THE

Scottish Provident Institution.

INSTITUTED 1837. INCORPORATED 1848.

HEAD OFFICE: 6, ST. ANDREW SQUARE, EDINBURGH.

THIS SOCIETY combines the advantages of **Mutual Assurance with Moderate Premiums.**

THE PREMIUMS are so moderate that at usual ages for Assurance £1200 or £1250 may generally be secured from the first for the yearly payment which would elsewhere assure (with profits) £1000 only—the difference being equivalent to an immediate and certain Bonus of 20 to 25 per cent.

The WHOLE SURPLUS goes to the Policyholders, on a system at once safe and equitable,—no share being given to those by whose early death there is a *loss* to the common fund. On this Principle large additions have been made to the policies of those who live to participate, notwithstanding the lowness of the premiums.

Examples of Premium for £100 at Death—With Profits.

AGE.	25	30*	35	40†	45	50
During Life.....	£1 18 0	£2 1 6	£2 6 10	£2 14 9	£3 5 9	£4 1 7
21 Payments	2 12 6	2 15 4	3 0 2	3 7 5	3 17 6	4 12 1

The usual *non-participating* Rates of other offices differ little from these Premiums.

* A person of 30 may secure £1000 at Death by a yearly payment, *during life*, of £20 : 15*s*.

[This premium would generally elsewhere secure (with profits) **£800** only, instead of **£1000**.]

OR he may secure £1000 by 21 payments of £27 : 13 : 4—*being thus free from payment after age* 50.

† At age 40, the Premium *ceasing at age 60* is for £1000 (with profits), £33 : 14 : 2,—being about the same as most Offices require during the whole of life. To **Professional Men** and others whose income is dependent on health, the limited payment system is specially recommended.

The SURPLUS at the 7th Septennial Investigation with Division of Profits (1894) amounted to **£1,423,018**, or deducting amount paid as Intermediate Bonuses to **£1,362,186**—of which **£970,390** was divided among **13,220** Policies entitled to participate, and **£391,796** reserved for future accumulation and division.

More than one half of the Members who died were entitled to **Bonuses** which, **notwithstanding that the premiums do not as a rule exceed the non-profit rates of other Offices,** were on the average equal to **an addition of about 50 per cent.** to the policies which participated.

The ACCUMULATED FUNDS exceed £9,500,000.

ARRANGEMENTS as to SURRENDER, NON-FORFEITURE, LOANS on POLICIES, IMMEDIATE PAYMENT OF CLAIMS, FREE RESIDENCE, &c., are specially liberal.

October, 1896. JAMES GRAHAM WATSON, *Manager.*

Branch Offices in Glasgow, Aberdeen, Dundee, Birmingham, Bristol, Cardiff, Leeds, Liverpool, Manchester, Newcastle, Nottingham, Belfast, and Dublin.

31, GREAT PORTLAND STREET, W. *Telegrams:* { SELFHELP, LONDON.

THE pick of the output of a number of Irish Factories, and of Peasant handiwork, comes solely to my DEPOT here; and from thence are distributed all over the Globe. The taste bestowed on their selection, the variety, and the value are beyond question. Nothing but what is made of Pure Wool finds any space in my warehouse. Great strides have been made by the manufacturers of recent years towards meeting the wants, and even fancies, of the British public; and they fear no competition in their own class of goods. Now that *shoddy* is rampant everywhere, all interested in the perpetuation of the good name and fame of our manufactures should study to support those who strive after that object; assist thereby in the development of Irish trade, my immediate interest: and at the same time procure satisfaction to themselves.

RETAIL, WHOLESALE, AND EXPORT.

Description of some of my Standard Goods. *Detailed Catalogues on application.*

IRISH FRIEZES (strong, rough TWEEDS) made in the Marquis of Waterford's Industrial House (*vide* special circular). These are *par excellence* the Cloths for **Country Suits**, for **Travellers**, for **Sportsmen**, and for **Cold Climates**, being substantial, warm, pliable, hard-wearing, and almost weather-proof; made in useful mixtures; dark and light, plain and plaids. Make also most useful and comfortable Ulsters. Price **3s.** yard, 28 inches wide.

IRISH HOMESPUNS.—These, like the FRIEZES, are admirable for gentlemen's Country Suits, Fishing, Shooting, Golfing, etc.; they are lighter in weight, and more loosely woven, after the style of **Harris Homespuns.** 28 inches, **3s.** yard; in pretty light weavings and fancies.

Very stout **IRISH TWEEDS** for rough country wear at home or abroad; wonderful value. **2s. 6d.** and **2s. 9d.** yard; splendid for Farmers, Gamekeepers, Mechanics, and Settlers in cold climates.

Extra thick **FRIEZES**, plain and napped, for heavy travelling and driving Ulsters or Suits in high latitudes, double width, **6s. 9d., 7s. 6d.** and **8s. 6d.** yard.

Useful and substantial **IRISH TWEEDS** for ordinary wear, town or country, **2s. 9d., 3s.** and **3s. 3d.** yard, 28 inches. (For boys' wear many of these are excellent, being hard twisted and closely woven.)

IRISH "SAXONY" TWEEDS for better wear, of smooth appearance, made from fine colonial wools; **3s. 6d.** & **3s. 9d.** yard. Finest, **4s.** and **4s. 6d.** yard.

IRISH (thin) HOMESPUNS make capital suits for warm climates or for home summer wear, being light, woolly, and cool, **2s. 3d.** and **2s. 6d.** yard, 28 inches. Some of these are also admirably suited for ladies' Gowns, Cloaks, and Ulsters; others for Cycling, etc.

DONEGAL HOMESPUNS, hand-spun and hand-woven by the peasantry, **2s. 2d. to 3s. 6d.** yard, according to weight and merit, 26 to 29 inches wide. The thin ones are perfect for tropical climates, the medium for ordinary summer lounge wear, whilst the heavier are almost identical with the genuine high-priced Harris homespuns, and made in exactly the same way.

Cork, Galway, Kerry, and Mayo peasant-made homespuns, **2s. 3d.** upwards.

UNDYED HOMESPUNS, light, medium, and heavy, **2s. 3d.** to **3s. 6d.** yard.

IRISH HOMESPUN TWEEDS for a serviceable all round suit; and boys' wear, 28 in., **2s. 8d.** yd.

Special **IRISH TWEEDS** for Mourning and Clerical wear, **2s. 9d., 3s., 3s. 3d.** and **3s. 6d.,** 28 in.

IRISH SERGE CLOTHS (pure indigo navy and woaded black) of superior manufacture and high recommendation. Single width, **3s., 3s. 6d.,** and **3s. 9d.**; double width, **6s.** to **10s.** yard, according to weight and fineness of wool. The wealthiest yachtsman can't purchase better cloths.

IRISH MELTONS; PILOT CLOTHS; DIAGONALS; VICUNAS; WHIP-CORDS or **RIDING TWEEDS AND TROUSERINGS**; all of sterling value, and bottommost prices.

IRISH FLANNELS, SHIRTINGS, TRAVELLING RUGS, HORSE CLOTHING; all of exceptional worth. Such goods are not to be had in the ordinary way of trade.

HAND-KNITTED SOCKS AND STOCKINGS, made by the Irish peasantry: Socks, **7d., 10½d.** and **1s.** pair: Stockings, plain knitting, **1s. 9d., 2s. 3d.** and **2s. 9d.**; Fancy, **3s.** to **4s. 6d.** pair. Gloves **1s.** to **2s.** pair. These appear marvels of cheapness to buyers used to Scotch knitting and Scotch prices.

FLANNEL TWEEDS for thinnest tropical suits, made of selected wools, mostly natural browns; well spun, and woven on hand-looms. They wear extremely well and don't shrink. Anglo-Indians, "Cape" residents and others are urged to give this speciality of mine a trial. **1s. 9d., 2s.,** and **2s. 6d.** yd., 28 in.

Patterns of any of above by request. Applicants must be explicit in stating their wants as to quality, and fancy as regards pattern; and whether for Town or Country wear. A promise also must be given that they will be returned, within a week, anywhere in the United Kingdom (those living in London are expected to call and view the stock for themselves); abroad, by next mail after a week's time for examination.

A discount of **10** per cent. is allowed off above prices for orders aggregating over **100** yards at a time—**7½** per cent. ditto over **50** yards; and **5** per cent. over **25** yards—an inducement to circulate the patterns amongst friends, especially when sent to distant countries, the higher discounts being under usual TRADE prices.

Parties abroad, not caring to wait for Patterns to be sent to order from, may depend upon my exercising every care in selecting for them, if they give a clear indication of their wants and enclose a remittance (as I know by experience the kind of clothes best suited to every climate and country). Any surplus will be enclosed in parcel.

A *British* tailor's charges for making and trimming an ordinary suit complete varies from about a guinea in the country to **35s.** in London; from this information a rough estimate can be made of the total cost—cloth and making.

All Cloths average **28** inches wide, except when stated to be double width; **7** yards single width, or **3½** yards double is the quantity for an ordinary size man's suit; **5** yards to **9** yards for Ulster, according to length and if cape is required. The weight of a suit length varies from **3** lbs. for a light Homespun or Tweed to **8**lbs. for a thick Frieze. When parcels are to be forwarded by post the cost must be added to remittance: if by rail or sea, charges will be booked forward.

Correspondence in English, Welsh, German, French, and Italian.

ROWLANDS' ARTICLES

For the Hair, Complexion, and Teeth, are the PUREST and BEST.

ODONTO A pure, non-gritty tooth powder; it whitens the teeth, prevents decay and sweetens the breath; is more efficacious than pastes or washes. **2/9.**

MACASSAR OIL preserves and beautifies the hair, and prevents it falling off or turning grey, is the best Brilliantine for ladies' and children's hair, being less greasy and drying than ordinary Brilliantine, and can be had in a golden colour for fair hair. Sizes, **3/6, 7/-, 10/6,** equal to four small.

KALYDOR is a most soothing, healing, and refreshing milk for the face, hands, and arms. It prevents and removes Freckles, Tan, Sunburn, Redness and Roughness of the skin, soothes and heals all Irritation, Chaps, Chilblains, Cutaneous Eruptions, &c., and produces a beautiful and delicate complexion. Bottles, **2/3** and **4/6.**

ESSENCE OF TYRE effectually dyes red or grey hair a permanent brown or black. **4/-**

EUKONIA. A pure toilet powder in three tints, White, Rose, and Cream for ladies of a Brunette complexion and those who do not like white powder. Boxes **1/-**, large boxes, **2/6.** Ask Chemists for ROWLANDS' ARTICLES, of 20, HATTON GARDEN, LONDON, and avoid spurious imitations.

COST PRICE LIFE ASSURANCE.

A Guide to Offices yielding 2 and 3 per cent. (Compound Interest) on Ordinary and Endowment Policies, respectively.

By T. G. ROSE.

"Interesting tables and illustrations of the most careful character."—*Insurance Record.*

"Vast amount of information."—*Citizen.*

"Valuable pamphlet."—*The Review.*

"Of interest to insurance experts."—*Financial Times.*

"The author seems to be perfectly well acquainted with the subject."—*Echo.*

"Is likely to be found useful."—*Yorkshire Post.*

"The author has dealt with the subject exhaustively, and also with consummate ability; the pamphlet should command an extensive circulation."—*Middlesex and Surrey Express.*

"This little pamphlet will serve a very good purpose. The ignorance and carelessness of insurers concerning the offices in which they are insuring are so notorious that the figures and tables given should prove of immense utility and interest, especially as they are extracted from the schedules supplied to the Board of Trade by the Life Assurance Offices themselves."—*Financial Standard.*

"Investment in a Life assurance or endowment policy as a means of earning interest on capital is not quite so plain a transaction as laying out the fund in Consols, but it is, nevertheless, the case that the return upon the outlay is greater under an insurance policy than from other equally safe sources. . . . It is not the best office that gets the most business, and if insurants would study the subject in their own interest there would be some extraordinary changes rapidly brought about in the condition of various prominent establishments. Mr. Rose has put together a mass of interesting facts."—*Capitalist.*

AN

Almanack

For the Year of Our Lord

1897

BY

JOSEPH WHITAKER, F.S.A.

CONTAINING AN ACCOUNT OF THE

Astronomical and other Phenomena

A LARGE AMOUNT OF

INFORMATION RESPECTING THE GOVERNMENT
FINANCES POPULATION COMMERCE AND
GENERAL STATISTICS OF THE BRITISH
EMPIRE THROUGHOUT THE WORLD
WITH SOME NOTICE OF
OTHER COUNTRIES
&c. &c.

LONDON
OFFICE: 12, WARWICK LANE,
PATERNOSTER ROW

6:2215

PREFACE.

THE NEW YORK PUBLIC LIBRARY
ASTOR, LENOX AND TILDEN FOUNDATIONS.
1897.

In the earlier portion of the Almanack many alterations will be found. An alphabetical arrangement of Government Offices has been substituted for that hitherto adopted, and the Knighthood now contains for the first time the Royal Victorian Order, the Royal Red Cross, the Albert Medal, and the Order of St. John of Jerusalem, while the Military Knights of Windsor have found a place in the Army lists.

Many complaints having reached us as to the inadequacy of the list of Fairs hitherto provided; this has in the present issue been entirely recast, and we believe that it will now be found to meet all requirements, both as to accuracy and fulness.

In the Supplementary portion appears an article in commemoration of the LONGEST REIGN in the country's annals. An absolutely Perpetual Calendar, for finding any date from the time of the Creation, with some account of the origins of the Gregorian, Julian and other methods of computing the year, will be found of interest. The work of the Royal Commissions on Vaccination and in connection with the administration of the Royal Patriotic Fund, receive attention; while the Educational article is now presented largely in tabular form. Among miscellaneous subjects specially treated are Agriculture, London Water Companies, Tramways, the Postal Work of the World, and the Food Supply of the Kingdom; while Hall Marks on Plate have been reinstated after a year's absence from our pages. The geographical-political articles have been extended in scope, and further maps added to render them intelligible to all.

These and other additions have made it necessary to again enlarge the ALMANACK, which now extends to 760 pages. In spite of extension so much information is omitted year by year to make way for new topics, that it has been thought advisable to construct an Index to Former Issues (1869—1896), which will be found at the end of the book.

The information given has in all cases been corrected throughout, and brought down to the latest possible date.

Year by year it has been our pleasing duty to acknowledge the assistance of, and to repeat our thanks to, numerous correspondents, both in England and beyond seas, many of whom take an almost personal interest in the correctness of the information afforded by the Almanack; we trust we may continue to enjoy this friendly co-operation in the future as in the past, and no effort on our part shall be lacking to maintain the position WHITAKER'S ALMANACK has reached, as the best in the world.

In order that full advantage may be taken of such suggestions, letters should reach our hands not later than October.

WARWICK LANE, PATERNOSTER ROW,
LONDON, *28th November*, 1896.

INDEX.

DURATION OF LIGHT AND DARKNESS.

The second column of the first page of Calendar for every month contains a small diagram showing the amount of Darkness, or of Sun or Moonlight. These small figures represent the twelve hours from 6 P.M. to 6 A.M., and have four divisions, each representing three hours. From the 13th to the 20th of January there is moonlight from 6 P.M. till 6 A.M., but from the 1st to the 5th and from the 27th to the 31st it will be seen that there is no moonlight. In the summer months the Sun comes to our aid.

The Diagrams used are—

HOURS FOR LIGHTING BICYCLE AND OTHER LAMPS.

Lamps must be lighted during the period of one hour after sunset and one hour before sunrise, which times will be found in the Calendar pages.

Digitized by Google

WHITAKER'S ALMANACK FOR 1897.

BEING THE FIRST AFTER BISSEXTILE, AND 60 AND 61 OF QUEEN VICTORIA.

Common Notes for the Year.

NOTE.—To ascertain any day of the week, first look in the table for the year required, and under the months are figures which refer to the corresponding figures at the head of the columns of days below. *For Example:*—To know on what day of the week May 4 fell in the year 1891, in the table of years look for 1891, and in a parallel line, under May, is fig. 5. which directs to col. 5. in which it will be seen that May 4 fell on Monday.

¶ 1752 same as 1772 from Jan. 1 to Sept. 2. From Sept. 14 to Dec. 31 same as 1780 (Sept. 3—13 were omitted).

Eclipses, Occultations, and other Celestial Phenomena.

January 1. Day breaks at 6*h.* 1*m. morn.*, and Twilight ends at 6*h.* 6*m. aft.*, the length of the Day being 7*h.* 50*m.*

Jan. 5. Mean time of Sun's semidiameter passing the meridian, 1*m.* 10·6*s.*

Jan. 6. Mercury at greatest elongation (19°) East, 7*h. aft.*

Jan. 6. Venus in conjunction with the Moon, 7*h. aft.* ♀ 3° 7′ S.

Jan. 7. Occultation of B.A.C. 7986, magnitude 6. The disappearance takes place at 4*h.* 16*m. aft.*, 32° from the vertex.

Jan. 14. Occultation of 19 Tauri, magnitude 4. The disappearance takes place at 1*h.* 30*m. morn.*, 65° from the vertex; the reappearance at 2*h.* 26*m. morn.*, 202° from the vertex.

Jan. 14. Occultation of 20 Tauri, magnitude 4. The disappearance takes place at 1*h.* 58*m. morn.*, 100° from the vertex; the reappearance at 2*h.* 30*m. morn.*, 169° from the vertex.

Jan. 17. Occultation of ε Geminorum, magnitude 3. The disappearance takes place at 7*h.* 6*m. morn.*, 130° from the vertex. At the reappearance the star will be below the horizon at Greenwich.

Jan. 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 9·3*s.*

Jan. 22. Mercury in inferior conjunction with the Sun, 2*h. aft.*

In this month the Mornings increase 27*m.*, and the Afternoons 46*m.*

Morning and Evening Stars.

☿ Mercury is an evening star till towards the end of the month. Not well situated for observation on account of its southern declination.

♀ Venus is an evening star, and may be well observed in this month, after sunset, in the South-west.

♂ Mars can be well observed, in the constellation Taurus, throughout the month, a little to the North of the star ζ Tauri.

♃ Jupiter may be observed in Leo; rising, in the late evening, in the North-east.

♄ Saturn cannot be well observed in this month. Not far from β Scorpii.

In the early part of the month the constellations Camelopardus, Lynx, Gemini, Monoceros, and Canis Major are on the meridian about midnight. In Gemini there is a fine compressed cluster of small stars in the right leg of Pollux, in R.A. 6*h.* 48*m.*, and Decl. 18° 8′ N., nearly midway between γ and ζ Geminorum. This cluster is triangular in shape, and, in small telescopes, hardly distinguishable from a nebula. It can be best observed on the nights immediately before and after the 2nd. There is a very fine cluster in Canis Major, in R. A. 6*h.* 43*m.*, and Decl. 20° 39′ S., about 4° South of Sirius. With a very small astronomical telescope the individual stars can be easily distinguished; and with a low power eye-piece, on the larger instruments, the field appears full of stars of various magnitudes.

MONTHLY NOTES.

Feb. 1. Partridge and pheasant shooting ends. Copies of Register of Voters to be sent to Secretary of State within three weeks.

10. Last day for County Councils to approve rating basis under Agricultural Rates Act, 1896, and to send their returns as to valuation to Local Government Board.

11. Scottish general salmon-fishing begins.

20. Notice of Election of Borough Auditors to be published. Nominations must be delivered by the 22nd.

28. Hare-hunting ends.

RAINFALL IN FEBRUARY, 1896.

In this month rain fell on 6 days. The total fall for the month was 0·36 inch; *below* the average of fifty years, 1841-90, by 1·12 inches.

Mean Longitude of Moon's Ascending Node, February 1, 315° 28′ ♒.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

February 1. Day breaks at 5*h*. 42*m*. *morn*., and Twilight ends at 6*h*. 46*m*. *aft*., the length of the Day being 9*h*. 7*m*.

Feb. 1. An Annular Eclipse of the Sun, invisible at Greenwich. See page 70.

Feb. 5. Mean time of Sun's semidiameter passing the meridian, 1*m*. 7·5*s*.

Feb. 8. Occultation of 26 Arietis; magnitude 6. The disappearance takes place at 9*h*. 53*m*. *aft*., 57° from the vertex.

Feb. 15. Venus at greatest elongation (47°) East, 10*h*. *aft*.

Feb. 15. Occultation of 8 Cancri, magnitude 4. The disappearance takes place at 7*h*. 14*m*. *aft*., 233° from the vertex; the reappearance at 7*h*. 20*m*, *aft*., 242° from the vertex.

Feb. 16. Mercury at greatest elongation (26°) West, 5*h*. *morn*.

Feb. 20. Mean time of Sun's semidiameter passing the meridian, 1*m*. 5·9*s*.

Feb. 23. Jupiter in opposition to the Sun, 2*h*. *aft*.

Feb. 27. Mercury at greatest distance from the Sun, 9*h*. *aft*.

In this month the Mornings increase 51*m*., and the Afternoons 49*m*.

MORNING AND EVENING STARS.

☿ MERCURY is a morning star in this month. In Sagittarius till about the 15th, when it enters Capricornus.

♀ VENUS is an evening star throughout the month.

♂ MARS may be well observed throughout the nights in this month. Not far from ζ Tauri on the 28th. In conjunction with the Moon on the 11th, at 8*h*. *aft*.

♃ JUPITER may be observed rising, in the early evening, in the North-east.

♄ SATURN in Scorpio; badly placed for observation.

* The days thus indicated throughout the Almanack are those on which High Tides may be expected. Strong northerly winds in the North Sea and a low barometer with heavy rains in the counties drained by the Thames, will probably cause a higher rise of the river, and the low-lying riverside districts to be flooded. See Tides, p. 71.

In the early part of this month the constellations Ursa Major, Lynx, Cancer, and a part of Hydra are on the meridian about midnight. In Cancer there is a very beautiful cluster of stars situated in the Crab's southern claw, in R.A. 8*h.* 45*m.* 32*s.*, and Decl. 12° 13′ N., consisting of some 200 stars from the 8th to 13th magnitudes. The fine group of stars in Cancer, called "Præsepe," can be best observed in this month. It does not consist of a very great number of stars, but the components are, as compared with those of other clusters, of considerable magnitude. It is situated in R.A. 8*h.* 34*m.*, and Decl. 20° 20′ N., about 1° to the west of a line joining the stars δ and γ Cancri.

The triple star ζ in Cancer may be examined in this month: it will be found in R.A. 8*h.* 6*m.* 15*s.*, and Decl. 18° 0′ N. Two of the stars are only 1″ apart, and the third about 5″ from them.

RAINFALL IN MARCH, 1896.

In this month rain fell on 22 days. The total fall for the month was 2·99 inches; *above* the average of fifty years, 1841–90, by 1·53 inches.

MONTHLY NOTES.

March 1. Auditors of Boroughs to be elected.

—. Last day for Assessment Committee to approve Supplemental Valuation lists as to Rateable Value of land under Agricultural Rates Act, 1896. They come into force on 1st prox.

15. Close time for all wild birds till 1st August.

18. Annual assembly of Parish Meetings in Rural parishes to take place on or within seven days before or after 25th.

25. Lady Day. Quarter Day. Accounts of Overseers to be made up to this date for the past half-year.

Mean Longitude of Moon's Ascending Node, March 1, 313° 59′ m.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

March 1. Day breaks at 4*h*. 53*m*. *morn*., and Twilight ends at 7*h*. 31*m*. *aft*., the length of the Day being 10*h*. 51*m*.

Mar. 5. Venus at least distance from the Sun, 1*h*. *morn*.

Mar. 5. Mean time of Sun's semidiameter passing the meridian, 1*m*. 4·9*s*.

Mar. 9. Occultation of 19 Tauri, magnitude 4. The disappearance takes place at 4*h*. 53*m*. *aft*., 108° from the vertex: the reappearance at 5*h*. 57*m*. *aft*., 189° from the vertex.

Mar. 13. Occultation of ε Geminorum; magnitude 3. The disappearance takes place at 1*h*. 49*m*. *morn*., 127° from the vertex; the reappearance at 2*h*. 14*m*. *morn*., 183° from the vertex.

Mar. 20. Mean time of Sun's semidiameter passing the meridian, 1*m*. 4·3*s*.

Mar. 20. Sun enters Aries: Spring commences, 8*h*. *morn*.

Mar. 23. A near approach of the Moon to π Scorpii; magnitude 3. Least distance of star from Moon's limb at 2*h*. 11*m*. *morn*., 33° from the vertex.

Mar. 23. Venus at greatest brilliancy, 6*h*. *morn*.

Mar. 26. Occultation of B.A.C. 6562; magnitude 6. The reappearance takes place at 5*h*. 52*m*. *morn*., 257° from the vertex.

In this month the Mornings increase 1*h*. 8*m*., and the Afternoons 51*m*.

MORNING AND EVENING STARS.

☿ MERCURY is a morning star in the early portion of the month. Too near the Sun for easy observation in the latter half.

♀ VENUS is an evening star; at greatest brilliancy on the 23rd.

♂ MARS can be well observed in this month; a little to the north of η and μ Geminorum on the 27th.

♃ JUPITER can be well observed throughout the nights in this month; in the constellation Leo, a few degrees East of Regulus.

♄ SATURN almost stationary between β and δ Scorpii. Rises about midnight, in South-east.

night, in the beginning of March, the ons Ursa Major, Leo, Crater, and Hydra meridian. In Ursa Major is a large Nebula, appearing as a mass of attenu- from 3½′ to 4 in diameter; it is situated 1h. 8m. 40s., and Decl. 55° 38′ N. Its pic examination leads to the inference mass of incandescent gas.
mes to the meridian about midnight towards the end of this month. Between Virg and Coma Berenices is a large Nebula, one of th class known as "Spiral Nebulæ," situated in R. A 12h. 13m. 29s., and Decl. 15° 0′ N. With a larg telescope of 8 inches aperture it appears to b resolvable in the centre into two bright star-lik points. This constellation is thickly strewed wit nebulæ, which may be best observed on th evenings immediately before and after the 2nd.

PHASES OF THE MOON.

● New Moon	2*d.*	4*h.*	24*m.*	Morning.
☽ First Quarter	10	8	27	Morning.
○ Full Moon	17	6	25	Morning.
☾ Last Quarter	23	9	48	Afternoon.

Perigee 5*d.* 2*h.* M. 252,400 | Perigee 17*d.* 9*h.* A. 222,200.

RAINFALL IN APRIL, 1896.

In this month rain fell on 10 days. The total fall for the month was 0·57 inches; *below* the average of fifty years, 1841-90, by 1·03 inches.

MONTHLY NOTES.

April 1. On this day the new valuation and rating basis under Agricultural Rates Act, 1896, come into operation, and the five years during which the Act is to continue in force begin to run.

—. Refreshment House Licences to be renewed. Quarter Sessions to be held unless otherwise fixed.

5. Dividends on Consols, &c., due.

6. Clerks of the Peace and Town Clerks send registration precepts to Overseers before 15th inst.

9. Fire Insurances must be paid.

15. Parish Councils to hold their annual meeting on or within seven days after this date.

19. English Bk. and Edinburgh Spring Holiday.

Mean Longitude of Moon's Ascending Node, April 1, 312° 21′ m.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

April 1. Day breaks at 3*h*. 36*m*. *morn*., and Twilight ends at 8*h*. 31*m*. *aft*., the length of the Day being 12*h*. 54*m*.

Apr. 2. Mercury in superior conjunction with the Sun, 3*h*. *morn*.

Apr. 5. Mean time of Sun's semidiameter passing the meridian, 1*m*. 4·4*s*.

Apr. 7. Venus stationary in the Heavens, 4*h*. *morn*.

Apr. 9. Occultation of Mars. At the time of disappearance Mars will be below the horizon at Greenwich. The reappearance takes place at 9*h*. 2*m*. *morn*., 290° from the vertex, as Mars is rising.

Apr. 9. Occultation of 48 Geminorum; magnitude 6. The disappearance takes place at 9*h*. 54*m*. *aft*., 60° from the vertex.

Apr. 12. Occultation of R Leonis; magnitude varying from 5 to 11. The disappearance takes place at 8*h*. 59*m*. *aft*., 151° from the vertex; the reappearance at 9*h*. 56*m*. *aft*., 243° from the vertex.

Apr. 20. Mean time of Sun's semidiameter passing the meridian, 1*m*. 5·1*s*.

Apr. 21. Occultation of X (3) Sagittarii; magnitude varying from 4 to 6. The disappearance takes place at 2*h*. 52*m*. *morn*., 57° from the vertex; the reappearance at 3*h*. 49*m*. *morn*., 308° from the vertex.

Apr. 22. Occultation of σ Sagittarii; magnitude 2. The disappearance takes place at 4*h*. 48*m*. *morn*., 64° from the vertex; the reappearance at 6*h*. 3*m*. *morn*., 256° from the vertex.

In this month the Mornings increase 1*h*. 2*m*., the Afternoons 48*m*.

MORNING AND EVENING STARS.

☿ MERCURY is an evening star, well placed for observation after sunset in the latter portion of the month.

♀ VENUS an evening star throughout the month.

♂ MARS may be observed after sunset, in the North-west, in Gemini.

♃ JUPITER in Leo, near to Regulus. Can be well observed throughout the month.

♄ SATURN almost stationary; near to β Scorpii.

At the latter part of April the constellations Draco, Boötes, and Libra will be on the meridian about midnight. An irresolvable double Nebula in Canes Venatici, near η Ursæ Majoris, can be observed in this month: it is situated in R.A. 13*h*. 25*m*. 30*s*., and in Decl. 47° 46′ N. The Southern Nebula is surrounded by a faint ring of nebulous light, and was called by Herschel, in his Catalogue, "the Halo Nebula." Later observations placed it among the "Spiral" Nebulæ. That this is not a true incandescent Nebula is shown by the absence of bright lines in its spectrum. In R.A. 15*h*. 13*m*. 16*s*., Decl. 2° 30′ N., is a very fine cluster of stars, condensed into great brilliancy towards the centre. Sir W. Herschel could distinguish over 200 stars in this group in the field of his 40-feet reflector, but found the middle portion so condensed that the individual stars could not be distinguished. Lord Rosse says that the stars range from the 12th to 15th mag. The evenings about the 1st are the best for observing these objects.

Eclipses, Occultations, and other Celestial Phenomena.

May 1. Day breaks at 2*h.* 3*m. morn.*, and Twilight ends at 9*h.* 51*m. aft.*, the length of the Day being 14*h.* 48*m.*

May 5. Mean time of Sun's semidiameter passing the meridian, 1*m.* 6·2*s.*

May 6. Occultation of ω Geminorum; magnitude 5¼. The disappearance takes place at 11*h.* 51*m. aft.*, 44° from the vertex; at the reappearance the star will be below the horizon at Greenwich.

May 7. Mars in conjunction with the Moon, 10*h. aft.* ♂ 0° 22′ N.

May 7. Vesta in conjunction with the Moon 6*h. morn.* Vesta 0° 16′ S.

May 16. Occultation of π Scorpii; magnitude 3. The disappearance takes place at 9*h.* 15*m. aft.*, 127° from the vertex; the reappearance at 10*h.* 20*m. aft.*, 313° from the vertex.

May 18. Occultation of B.A.C. 6194; magnitude 4½. The disappearance takes place at 11*h.* 33*m. aft.*, 38° from the vertex; the reappearance at 11*h.* 48*m. aft.*, 9° from the vertex.

May 18. Saturn in opposition to the Sun, 5*h. morn.*

May 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 7·4*s.*

In this month the Mornings increase 42*m.*, and the Afternoons 43*m.*

Morning and Evening Stars.

☿ Mercury is an evening star in the first half of the month. In inferior conjunction with the Sun on the 21st at 7*h. morn.*

♀ Vesta is a morning star, in Aries. Stationary on the 18th at 2*h. morn.*

♂ Mars is an evening star. Very near to δ Cancri on the 31st.

♃ Jupiter is an evening star, in Leo, near Regulus.

♄ Saturn rises in the South-east in the early evening.

Towards the end of May we shall find the nstellations Draco, Hercules, Ophiuchus, and orpio on the meridian about midnight.

Hercules contains a very splendid cluster of stars nated in R.A. 16*h.* 38*m.* 2*s.*, and Decl. 36° 40′ N. is, like most of the star-clusters, is condensed the centre, and may be easily seen with derate telescopic aid; and a few days before d after the 1st and 31st of the month, when the on is absent, it may, if the opportunity is taken of a very clear night, be seen with the naked eye, plainly, between the stars ζ and η Herculis, rather nearer to η. This cluster, discovered by Halley in 1714, is one of the most beautiful examples of these bodies to be seen in the heavens. With the great Refractor of the Lick Observatory the nebulous glow at the centre has been resolved into separate points.

Uranus can be observed well in this month, southing at 0*h.* 16*m.* morn. on the 13th.

Mean Longitude of Moon's Ascending Node, June 1, 309° 7′ m.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

June 1. In this month there is no real night, but either daylight or twilight; the length of the Day being 16*h*. 15*m*.

June 4. Venus at greatest brilliancy, 0*h*. *morn*.

June 5. Mean time of Sun's semidiameter passing the meridian, 1*m*. 8·4*s*.

June 9. Occultation of η Virginis; magnitude 5¼. The disappearance takes place at 9*h*. 11*m*. *aft*., 67° from the vertex.

June 14. Occultation of X (3) Sagittarii; magnitude varying from 4 to 6. The disappearance takes place at 11*h*. 14*m*. *aft*., 105° from the vertex; the reappearance on the 15th at 0*h*. 27*m*. *morn*., 257° from the vertex.

June 16. Occultation of σ Sagittarii; magnitude 2¼. The disappearance takes place at 0*h*. 0*m*. *morn*., 140° from the vertex; the reappearance at 0*h*. 47*m*. *morn*., 212° from the vertex.

June 16. Mercury at greatest elongation (23°) West, 6*h*. *morn*.

June 20. Mean time of Sun's semidiameter passing the meridian, 1*m*. 8·7*s*.

June 21. Sun enters Cancer: Summer commences, 4*h*. *morn*.

In this month the Mornings increase 2*m*., and the Afternoons 14*m*.

MORNING AND EVENING STARS.

☿ MERCURY is a morning star. At greatest elongation on the morning of the 16th, when it may be observed rising an hour before the Sun, in the North-east.

♀ VENUS is a morning star; at greatest brilliancy on the 4th at 0*h*. *morn*.

♂ MARS is an evening star; may be observed in the North-west between Cancer and Leo.

♃ JUPITER is an evening star; situated between Regulus and ϵ Leonis.

♄ SATURN is in Libra. In conjunction with Uranus on the 18th at 8*h*. *aft*. ♄ 2° 3′ N.

ary 5th must be
ters to prevent
ounty and Paro-
aims to vote.

In the last week of June the constellations Draco, Lyra, a portion of Hercules, Scutum Sobieski, and a part of Sagittarius will south about midnight.

In Sagittarius there is a notable and very extensive region, known as the "Horse-shoe," from its shape. It will be found in R.A. 18h. 14m. Dec. 18° 15′ S. The spectroscope shows that it consist of a mass of incandescent gas. Holden says that one arm of the Nebula has changed its position since Herschel's time. In shape it somewhat resembles the great Nebula in Andromeda.

In Sagittarius, a little West and North of λ, is a globular cluster of very small stars, densely crowded, to be seen only with difficulty in small telescopes. Owing to its great southern declination there is but little chance of seeing this Nebula except when southing. The evenings about the 29th, when it souths at 1h. morn., are the best.

RAINFALL IN JULY, 1896.

In this month rain fell on 7 days. The total fall for the month was 1·07 inches; *below* the average of fifty years, 1841-90, by 1·40 inch.

MONTHLY NOTES.

July 1. Special Sessions for Licences to deal in Game to be held this month.—Quarter Sessions held this week.

5. Dividends due.

9. Fire Insurances must be paid.

12. Glasgow Fair Week begins.

17. Glasgow Fair Saturday.

20. Rates and Taxes due January 5th must be paid on or before this day by Voters to prevent disqualification.—Last day for County and Parochial Electors to send in their claims to vote.

Mean Longitude of Moon's Ascending Node, July 1, 307° 32′ m.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

July 1. There is no real night until after the 20th of this month.

July 2. The Earth at greatest distance from the Sun, 4*h. morn.*

July 5. Mean time of Sun's semidiameter passing the meridian, 1*m.* 8·4*s.*

July 8. Venus at greatest elongation (46°) West, 0*h. morn.*

July 12. Occultation of B.A.C. 6194; magnitude 4¾. The disappearance takes place at 7*h.* 53*m. aft.*, 66° from the vertex; the reappearance at 8*h.* 38*m. aft.*, 337° from the vertex.

July 13. Occultation of χ^1 Sagittarii; magnitude 5. The disappearance takes place at 9*h.* 21*m. aft.*, 69° from the vertex; the reappearance at 10*h.* 21*m. aft.*, 304° from the vertex.

July 20. Mean time of Sun's semidiameter passing the meridian, 1*m.* 7·4*s.*

July 24. Occultations of 17 Tauri, magnitude 3¾; 23 Tauri, magnitude 4¼; η Tauri, magnitude 3. The respective disappearances take place at 0*h.* 17*m. morn.*, 94° from the vertex; 0*h.* 56*m. morn.*, 161° from the vertex; 1*h.* 23*m. morn.*, 140° from the vertex. The respective reappearances take place at 1*h.* 10*m. morn.*, 309° from the vertex; 1*h.* 33*m. morn.*, 245° from the vertex; 2*h.* 15*m. morn.*, 267° from the vertex. There will also be a near approach of 20 Tauri and 27 Tauri.

July 29. An Annular Eclipse of the Sun, invisible at Greenwich, see p. 70.

In this month the Mornings decrease 35*m.*, and the Afternoons 30*m.*

MORNING AND EVENING STARS.

☿ MERCURY is a morning star early in the month; in superior conjunction with the Sun on the 15th, and becomes an evening star towards the end of the month.

♀ VENUS is a morning star throughout the month. In conjunction with Neptune on the 28th at 9*h. aft.* ♀ 1° 22′ S.

♂ MARS is an evening star throughout the month. Near to Regulus in the early evenings of the month. Close to Jupiter on the 25th.

♃ JUPITER is an evening star, in Leo. Only 8′ North of Mars, on the 25th, at 3*h. aft.*

♄ SATURN is an evening star throughout the month.

In the middle of July the constellations Cygnus, Vulpecula, Aquila, and Sagittarius will be on the meridian about midnight.

The Annular Nebula in Lyra, situated between β and γ, is the best example of the Annular Nebulæ; the heavens containing, as far as is at present known, comparatively few examples of this class. It requires a rather good telescope to see it well: it is in R.A. 18h. 49m. 47s., and Decl. 32° 54′ N. It exhibits a spectrum as if composed of an incandescent gas.

There is also a globular cluster in Lyra, as nearly as possible midway between γ Lyræ and β Cygni: it was formerly considered a Nebula, until resolved into stars by Sir William Herschel in 1784. It is in R.A. 19h. 12m. 35s., Decl. 30° 0′ N. The best nights for the observation of these objects are those just before and after the 29th.

RAINFALL IN AUGUST, 1896.

In this month rain fell on 15 days. The total fall for the month was 2·05 inches; *below* the average of fifty years, 1841-90, by 0·29 inch.

MONTHLY NOTES.

August 1. Borough and County Lists to be affixed to church doors and at Post Offices for two Sundays.—Claims of Lodgers to be sent in between this day and 20th. Lammas—Scottish Quarter Day.

2. Bank Holiday. 5. Oyster Season commences.

20. Last day for service on Overseers of objections to Electors in counties and boroughs.

25. Last day for publishing claims and objections to vote in elections, and for Overseers to deliver lists of Electors.

Mean Longitude of Moon's Ascending Node, August 1, 305° 53′ m.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

August 1. Day breaks at 1*h*. 30*m*. *morn*., and Twilight ends at 10*h*. 40*m*. *aft*., the length of the Day being 15*h*. 20*m*.

Aug. 4. Occultation of 89 Virginis; magnitude 5. The disappearance takes place at 8*h*. 17*m*. *aft*., 118° from the vertex; the reappearance at 9*h*. 11*m*. *aft*., 220° from the vertex.

Aug. 5. Mean time of Sun's semidiameter passing the meridian, 1*m*. 6·0*s*.

Aug. 9. Occultation of σ Sagittarii; magnitude 2¼. The disappearance takes place at 6*h*. 10*m*. *aft*., 184° from the vertex; the reappearance at 6*h*. 56*m*. *aft*., 218° from the vertex.

Aug. 13. Mercury and Jupiter in conjunction, 6*h*. *morn*. ☿ 1° 14′ S.

Aug. 20. Mean time of Sun's semidiameter passing the meridian, 1*m*. 4·8*s*.

Aug. 21. Occultation of χ Tauri; magnitude 5¾. The reappearance takes place at 2*h*. 44*m*. *morn*., 316° from the vertex.

Aug. 24. Occultation of ω Geminorum; magnitude 5¼. The disappearance takes place at 1*h*. 10*m*. *morn*., 108° from the vertex; the reappearance at 2*h*. 1*m*. *morn*., 332° from the vertex.

Aug. 26. Mercury at greatest elongation (27°) East, 5*h*. *aft*.

In this month the Mornings decrease 47*m*., and the Afternoons 59*m*.

MORNING AND EVENING STARS.

☿ MERCURY is an evening star; at greatest elongation on the 26th.

♀ VENUS is a morning star; rising in the North-east about 3 hours before the Sun.

♂ MARS is an evening star; near η Virginis at the end of the month.

♃ JUPITER is an evening star; in Leo.

♄ SATURN is an evening star: in Libra, a little to the west of β Scorpii.

At the beginning of August Cepheus, Cygnus, Vulpecula, Delphinus, and Capricornus south at midnight.

In Vulpecula, nearly 4° due north of γ Sagittæ, is the famous "Dumb-bell" Nebula, generally considered irresolvable, although under the higher powers of Lord Rosse's telescope there seemed to be some trace of resolvability shown. It is situated in R.A. 19*h.* 55*m.* 8*s.*, and Decl. 22° 26′ N., and gives a spectrum of bright lines, according to Dr. Huggins.

There is a small bright globular cluster, 4° due south of ε Delphini, consisting of a mass of very small stars, not very easy for small telescopes: it is situated in R.A. 20*h.* 29*m.* 7*s.*, and Decl. 7° 3′ N. This cluster is a good one, according to Sir John Herschel, for testing the space-penetrating power of telescopes. This though a small is yet a bright cluster, and may be observed easily on the evenings immediately before and after the 27th.

RAINFALL IN SEPTEMBER, 1896.

In this month rain fell on 22 days. The total fall for the month was 5·45 inches; *above* the average of fifty years, 1841-90, by 3·20 inches.

MONTHLY NOTES.

September 1. Declarations as to misdescription or other error in County or Burgess Lists to be delivered to the Town Clerks and Clerks of the Peace.—The lists of objections to County Electors, and claims and objections in Boroughs, to be affixed to church doors till 8th. Lists of Jurors to be affixed to church doors for the first three Sundays. Salmon close-time begins.

8. Last day for inspecting claims of voters.

12. Sheriffs of City of London to be sworn in.

29. Accounts of Overseers to be made up to this date for the past half-year.

Mean Longitude of Moon's Ascending Node, September 1, 304° 14′ m.

Eclipses, Occultations, and other Celestial Phenomena.

September 1. Day breaks at 3*h*. 9*m*. *morn*., and Twilight ends at 8*h*. 51*m*. *aft*., the length of the Day being 13*h*. 31*m*.

Sept. 5. Mean time of Sun's semidiameter passing the meridian, 1*m*. 4·0*s*.

Sept. 9. Mercury stationary in the Heavens, 2*h*. *morn*.

Sept. 13. Jupiter in conjunction with the Sun, 6*h*. *morn*.

Sept. 19. Occultation of 139 Tauri; magnitude 5. The disappearance takes place at 5*h*. 57*m*. *morn*., 137° from the vertex; the reappearance at 7*h*. 2*m*. *morn*., 215° from the vertex.

Sept. 20. A near approach of ε Geminorum to the Moon; magnitude 3¼. The least distance between the star and Moon's limb takes place at 1*h*. 54*m*. *morn*., 45° from the vertex.

Sept. 20. Mean time of Sun's semidiameter passing the meridian, 1*m*. 3·8*s*.

Sept. 22. Sun enters Libra; Autumn commences, 7*h*. *aft*.

Sept. 26. Mercury in conjunction with the Moon, 3*h*. *morn*. ☿ 2° 35′ N.

Sept. 27. Mercury and Jupiter in conjunction, 11*h*. *aft*. ☿ 2° 17′ S.

Sept. 30. Mercury stationary in the Heavens, 8*h*. *aft*.

In this month the Mornings decrease 47*m*., and the Afternoons 1*h*. 6*m*.

Morning and Evening Stars.

☿ Mercury is an evening star at the beginning, and a morning star at the end of the month.

♀ Venus is a morning star. Very near to Regulus on the 25th.

♂ Mars is an evening star.

♃ Jupiter too near the Sun for easy observation.

♄ Saturn is an evening star. Nearly in the same position as last month.

On the 1st of September, Cepheus, Pegasus, Aquarius, and Piscis Australis will be on the meridian at midnight.

In Pegasus, R.A. 21*h.* 24*m.* 59*s.*, and Decl. 11° 42′ N., is a fine globular cluster of very small stars, 4½′ north-west of ε Pegasi, much condensed towards the centre where the stars cannot be resolved: there are many telescopic and several rather bright stars in the field. Aquarius contains a fine cluster of stars, condensed in the centre, and presenting a true globular form, consisting of very small stars very much compressed. It is situated in R.A. 21*h.* 28*m.* 5*s.*, and Decl. 1° 18′ S.

In the early evening, at the beginning of the month, the bright cluster in Capricornus, situated in R.A. 21*h.*, 34*m.* 28*s.*, and Decl. 23° 38′ S., can be observed: it is rather bright, with a central condensation, and does not require great telescopic power to see it well. The best evenings for observation are those immediately before and after the 26th.

RAINFALL IN OCTOBER, 1896.

In this month rain fell on 19 days. The total fall for the month was 2·94 inches; *above* the average of fifty years, 1841-90, by 0·13 inch.

MONTHLY NOTES.

Corrections for next year's Whitaker's Almanack should be sent some time this month.

October 1. Burgess List to be revised some time before the 12th.—Pheasant shooting begins.—Common Lodging-houses to be whitewashed in the first week.

5. Dividends due. 9. Various Licences expire.

11. Quarter Sessions begin in the first *whole* week after this date.

14. Fire Insurances must be paid.

23. Borough Councillors to be nominated.

Mean Longitude of Moon's Ascending Node, October 1, 302° 39′ ♒.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

October 1. Day breaks at 4*h*. 8*m*. *morn*., and Twilight ends at 7*h*. 31*m*. *aft*., the length of the Day being 11*h*. 33*m*.

Oct. 3. Occultation of χ^1 Sagittarii; magnitude 5. The disappearance takes place at 6*h*. 43*m*. *aft*., 116° from the vertex; the reappearance at 7*h*. 34*m*. *aft*., 193° from the vertex.

Oct. 5. Mean time of Sun's semidiameter passing the meridian, 1*m*. 4·4*s*.

Oct. 7. Mercury at greatest elongation (18°) West, 10*h*. *aft*.

Oct. 8. Occultation of λ Piscium; magnitude 4¼. The disappearance takes place at 9*h*. 31*m*. *aft*., 32° from the vertex; the reappearance at 10*h*. 35*m*. *aft*., 264° from the vertex.

Oct. 13. Occultations of 17 Tauri, magnitude 4; 23 Tauri, magnitude 4; η Tauri, magnitude 3; 27 Tauri, magnitude 4. The respective disappearances take place at 11*h*. 59*m*. *aft*., 73° from the vertex; on the 14th, 0*h*. 41*m*. *morn*., 129° from the vertex; 1*h*. 25*m*. *morn*., 101° from the vertex; 2*h*. 41*m*. *morn*., 118° from the vertex. The respective reappearances take place at 1*h*. 6*m*. *morn*., 302° from the vertex; 1*h*. 51*m*. *morn*., 228° from the vertex; 2*h*. 47*m*. *morn*., 231° from the vertex; 3*h*. 35*m*. *morn*., 182° from the vertex.

Oct. 16. Occultation of 125 Tauri magnitude 5. The disappearance takes place at 5*h*. 47*m*. *morn*., 99° from the vertex; the reappearance at 6*h*. 51*m*. *morn*., 203° from the vertex.

Oct. 20. Mean time of Sun's Semidiameter passing the Meridian 1*m*. 5·5*s*.

In this month the Mornings decrease 51*m*., and the Afternoons 1*h*. 3*m*.

MORNING AND EVENING STARS.

☿ MERCURY is a morning star; at greatest elongation on the 7th.

♀ VENUS is a morning star.

♂ MARS too near the Sun for observation in this month.

♃ JUPITER is a morning star; a little to the West of η Virginis.

♄ SATURN is an evening star; near to β Scorpii.

On the 1st of October, Cassiopeia, Andromeda, Pisces, and Cetus are on the meridian at midnight; while Cancer and Orion are rising, and Hercules and Capricornus setting.

In Andromeda, near to the 4th mag. star υ, is a large and irresolvable Nebula in the form of an elongated ellipse. It is situated in R.A. $0^h.\ 37^m.\ 9^s.$, and Decl. 40° 42′ N. In Sept., 1885, a decided stellar nucleus was observed in R.A. $0^h.\ 36^m.\ 31^s.$, Decl. 40° 38′ N., probably unconnected with the Nebula.

A splendid double group of stars may be observed in this month, situated midway on a line joining α Persei and γ Cassiopeiæ: the northern cluster is a magnificent collection of stars, much condensed towards the centre, and on a fine night, without moonlight, such as the nights about the 25th, affords one of the most brilliant telescopic objects in the heavens. One of the stars near the middle of the group is of a fine ruby colour.

RAINFALL IN NOVEMBER, 1895.

In this month rain fell on 19 days. The total fall for the month was 2·89 inches; *above* the average of fifty years, 1841-90, by 0·62 inch.

An "Inch of Rain" means a gallon of water spread over a surface of nearly two square feet, or 3,630 cubic feet = 100 tons upon an acre.

MONTHLY NOTES.

November 1. Latest day for receiving corrections for Whitaker's Almanack.

1. Salmon-fishing with rod and line ends.—Ordinary day of election of Borough Councillors.—Holiday at Bank Transfer Office and Stock Exchange.—Fox-hunting begins.

9. Mayors and Aldermen of Boroughs to be elected and Sheriffs appointed.

11. Martinmas: Scottish Quarter Day.

12. County Sheriffs for next year nominated.

15. Solicitors', notaries', proctors', and sworn clerks' certificates expire. *See* Note, Dec. 15.

Mean Longitude of Moon's Ascending Node, November 1, 30° 1′ ♋.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

November 1. Day breaks at 5*h*. 1*m*. *morn*., and Twilight ends at 6*h*. 27*m*. *aft*., the length of the Day being 9*h*. 35*m*.

Nov. 5. Mean time of Sun's semidiameter passing the meridian, 1*m*. 7·2*s*.

Nov. 8. Mercury in superior conjunction with the Sun, 5*h*. *morn*.

Nov. 12. Mercury and Mars in conjunction, 7*h*. *aft*. ☿ 0° 21′ S.

Nov. 19. Occultation of p^5 Leonis; magnitude 5½. The disappearance takes place at 6*h*. 4*m*. *morn*., 179° from the vertex; the reappearance at 7*h*. 0*m*. *morn*., 268° from the vertex.

Nov. 20. Mean time of Sun's semidiameter passing the meridian, 1*m*. 9·0*s*.

Nov. 21. Occultation of D.M. −10° 3570; magnitude 6. The reappearance takes place at 5*h*. 40*m*. *morn*., 358° from the vertex.

Nov. 23. Venus in conjunction with the Moon, 3*h*. *morn*. ♀ 6° 39′ N.

Nov. 24. Mars in conjunction with the Moon, 9*h*. *morn*. ♂ 4° 4′ N.

Nov. 27. Mars and Saturn in conjunction, 7*h*. *aft*. ♂ 2° 2′ S.

In this month the Mornings decrease 49*m*., and the Afternoons 38*m*.

MORNING AND EVENING STARS.

☿ MERCURY too near the Sun for observation in this month.

♀ VENUS is a morning star.

♂ MARS rises and sets too nearly with the Sun for observation.

♃ JUPITER is a morning star; between η and γ Virginis.

♄ SATURN too near the Sun for observation.

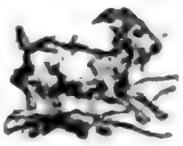
On the 1st of November, Perseus, Aries, and Cetus are on the meridian at midnight.

An irresolvable Nebula 2½° to the East of γ Andromedæ may be observed in this month. It was discovered by Miss Herschel, with a small reflecting telescope of twenty-seven inches in focal length. It is a very elongated Nebula, 15′ long by 3′ broad, with a cleft, dark in the middle, and suggests the idea of a flat ring seen very obliquely. It is in R.A. 2h. 15m. 57s., and Decl. 41° 49′ N. The best evenings for observing it are those immediately before and after the 23rd.



Neptune can be well observed in this month; on the 30th it passes the meridian, or souths, at 0h. 45m. *morn.*, in R.A. 5h. 23m. 16s., and Decl. 21° 47′ N.

RAINFALL IN DECEMBER, 1895.

In this month rain fell on 19 days. The total fall for the month was 2·51 inches; *above* the average of fifty years, 1841–90, by 0·74 inch.

MONTHLY NOTES.

Dec. 10. Grouse and Black Game Shooting ends.

15. Last day for renewing solicitors' certificates.

16. Notices to owners and occupiers affected by private bills in Parliament must be delivered.

21. Election of Common Councilmen in the City of London.

25. Quarter Day. Bills of exchange falling due this day must be provided for on the 24th.

27. Bank and General Holiday. Bills of exchange falling due on 26th are not payable till the 28th.

31. Various Licences expire.

Mean Longitude of Moon's Ascending Node, December 1, 299° 26′. ♈

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

December 1. Day breaks at 5*h*. 41*m*. *morn*., and Twilight ends at 5*h*. 57*m*. *aft*., the length of the Day being 8*h*. 6*m*.

Dec. 5. Mean time of Sun's semi-diameter passing the meridian, 1*m*. 10·4*s*.

Dec. 6. Occultation of ϵ Arietis; magnitude 4½. The disappearance takes place at 2*h*. 30*m*. *aft*., 71° from the vertex; the reappearance at 3*h*. 14*m*. *aft*., 325° from the vertex.

Dec. 7. A near approach of 27 Tauri to the Moon; magnitude 3½. The least distance of star from the Moon's limb occurs at 2*h*. 47*m*. *aft*., 19° from the vertex.

Dec. 12. Venus and Saturn in conjunction, 8*h*. *aft*. ♀ 0° 56′ S.

Dec 18. Jupiter in conjunction with the Moon, 8*h*. *morn*. ♃ 6° 50′ N.

Dec. 20. Mean time of Sun's semidiameter passing the meridian, 1*m*. 11·0*s*.

Dec. 21. Mercury at greatest elongation (20°) East, 0*h*. *morn*.

Dec. 21. Sun enters Capricornus, Winter commences, 1*h*. *aft*.

Dec. 22. Venus in conjunction with the Moon, 10*h*. *aft*. ♀ 3° 40′ N.

Dec. 23. Mars in conjunction with the Moon, 5*h*. *morn*. ♂ 2° 26′ N.

Dec. 30. Venus and Mars in conjunction, 11*h*. *aft*., ♀ 0° 40′ N.

In this month the Mornings decrease 23*m*., and the Afternoons increase 6*m*.

MORNING AND EVENING STARS.

☿ MERCURY is an evening star; at greatest elongation East on the 21st at 0*h*. *morn*.

♀ Venus is a morning star: in conjunction with Uranus on the 8th at 2*h*. *aft*. ♀ 0° 47′ N.

♂ MARS is a morning star, but of too great southern declination for easy observation.

♃ JUPITER near to γ Virginis throughout the month.

♄ SATURN is a morning star; a little to the East of β Scorpii.

On the 1st of December, at midnight, the constellations Camelopardus, Taurus, and Eridanus will be on the meridian.

In Taurus is a fine resolvable Nebula of a pearly white colour 1½° North-west of ζ Tauri, in R.A. 5h. 28m. 16s., and Decl. 21° 57′ N. This Nebula is the one known as the "Crab."

About the middle of the month Orion souths at midnight, and can be best observed in this month, although favourably situated in both November and January. This magnificent constellation contains the grandest of all the Nebulæ, situate in the Sword-Scabbard. A line drawn from α Orionis through ζ, the third star of the belt, will pass over θ Orionis and the Nebula. It can be seen with the naked eye. Evenings before and after the 23rd of the month are the best for observing it.

EXAMPLE 1.—Required the time of high water at Aberdeen on *January 22nd* :—

Time of high water at London Bridge	4h. 11m.	Morn.
Subtract tide interval	0 58	
Time of high water at Aberdeen	3 13	Morn.

EXAMPLE 2.—Required the time of high water at Scarborough on *January 22nd* :—

Time of high water at London Bridge	6h. 33m.	Morn.
Add tide interval	2 13	
Time of high water at Scarborough	8 46	Morn.

It may happen that the "tide interval" to be subtracted is greater than the quantity from which it has to be taken, in which case 12 hours must be added to the London Bridge time; the resulting difference will be the preceding day's afternoon tide where the London morning tide was used. Sometimes the sum "high water at London Bridge" + "tide interval" will exceed 12 hours; in this case, the excess will be the time of high water after the noon or midnight following, according as the London high water was either morning or afternoon.

EXAMPLE 3.—Required the time of high water at Aberdeen, *January 1st a/t.* :—

Time of high water at London Bridge on *January 2nd* + 12 hours	12h. 33m.	Morn.
Subtract tide interval	0 58	
Time of high water at Aberdeen, *Jan. 1st*	11 35	After.

Previous to 1752 the above dates are computed from the Old Style. Those printed in heavier type are leap-years. 1752 had E D up to September 2, but A from September 14 to December 31, the intermediate days being dropped for the change of Style. Its Easter was the last in Old Style. Until then also the years were considered to begin on March 25; but that, as it did not affect the date of Easter, is not noticed in this Table. The Table of Moveable Feasts in the Prayer-Book gives all the others after finding Easter in this. The Sunday Letters in the Calendar then enable any one to count the days of the week from Sunday. The tables in modern Prayer-Books are calculated for the New Style only.

The French Republican Calendar.

This, although reckoned from the 22nd September, 1792, was not introduced until the 22nd November, 1793. It remained in use only till the 31st December, 1805. The Gregorian Calendar was restored January 1st, 1806 (Nivôse 10, Year XIV.). The months varied in different years, thus Nivôse 1 commenced December 21st in 1793, December 22nd in 1795, December 21st in 1796, December 22nd in 1799, December 23rd in 1803, and December 22nd in 1804 and 1805. The following are the dates for the year 1804, the last complete year of the Calendar:—

Vendémiaire	(*Vintage*),	23 Sept. to Oct. 22	Germinal	(*Budding*),	22 Mar. to Apr. 21
Brumaire	(*Foggy*),	23 Oct. to Nov. 22	Floréal	(*Flowery*),	21 April to May 20
Frimaire	(*Sleety*),	22 Nov. to Dec. 21	Prairial	(*Pasture*),	21 May to June 20
Nivôse	(*Snowy*),	22 Dec. to Jan. 21	Messidor	(*Harvest*),	20 June to July 19
Pluviôse	(*Rainy*),	21 Jan. to Feb. 20	Thermidor	(*Hot*),	20 July to Aug. 19
Ventôse	(*Windy*),	20 Feb. to Mar. 21	Fructidor	(*Fruit*),	19 Aug. to Sept. 18

The months were divided into three decades of ten days each, but to make up the 365, five were added at the end of September; (*Primidi*), dedicated to Virtue; (*Duodi*) to Genius; (*Tridi*) to Labour; (*Quartidi*) to Opinion; and the 5th (*Quintidi*) to Rewards. To Leap Year, called *Olympic*, 5 P.M. 4s A.M. 3 3s A.M. day, the 22nd or 23rd September (*Sextidi*), "Jour de la Révolution," was added. This ... 1 6 P.M. dates has led to considerable confusion, but those who may wish to trace the fourteen years, and every some very elaborate tables in the English edition of Bourrienne's "Life of Napoleon":

Calendar of First and Second Proper Lessons

APPOINTED FOR SUNDAYS AND OTHER HOLY DAYS THROUGHOUT THE YEAR.

* Peculiar to Russia.

The Days of the Roman Month.

In the Roman (Julian) Calendar the months corresponded exactly with our own, excepting that down to the time of the great Emperor Augustus, the fifth and sixth months of the year—which, with the Romans, began with March—were called Quintilis and Sextilis; afterwards they were named in honour of the emperors Julius and Augustus.

In reckoning the days of each month three fixed points were taken, and any particular day was said to be so many days *before* the next coming fixed day. These three points were (1) the Kalends, by which name the first of each month was known; (2) the Nones, which fell on the seventh day of the month in March, May, July, and October, and on the fifth day in each of the other months; and the Ides, which always fell eight days after the Nones.

For example, the 1st of January was the Kalends of January (*Kalendis Januariis*), the 31st of December was the day before the Kalends of January (*pridie Kalendas Januarias*); but Dec. 30th was the third day before the Kalends of January (*ante diem tertium Kalendas Januarias*), in this case both Jan. 1st and Dec. 31st being included in the reckoning. And so on back to Dec. 14th, which was the nineteenth day before the January Kalends (*ante diem undevicesimum Kal. Jan.*), Dec. 13th being *Idibus Decembribus*, the Ides of December. In Leap-year, both Feb. 24th and Feb. 25th were known as the sixth day before the March Kalends, being distinguished respectively as *prior* and *posterior*.

To use this Table, take the Sun's declination in the left-hand column, and under the required latitude on the horizontal line will be found the apparent time of Sunset. Subtract the quantity found as above from 12h., and the remainder will be the apparent time of Sunrise.

This Table is arranged for Northern latitudes, but will serve equally well for Southern by changing the declination from North to South, and vice versâ.

The local mean time of the observed altitude, when reduced to the corresponding Greenwich mean time, may be converted into sidereal time by means of the table on the next page. It will be observed that the sign on the left-hand side of the *correction* in Table I. is to be used when the argument is on the left, and *vice versâ*; + means that the correction is to be added to the reduced altitude, and − that it is to be subtracted. The corrections derived from the double-entry Tables II. and III. are always added. In order to make the quantities taken out from Table III. additive they have been increased by 1′; this quantity must therefore be taken away from the final result.

To obtain the Sidereal Time corresponding to any given Mean Time, by means of the above tables all that is required is to take the Sidereal Time at the preceding Mean Noon (which will be found on the second page of each month) and add to it the Sidereal Equivalents opposite to the hours, minutes, and seconds of the given Mean Time. If the sum of these numbers comes out more than twenty-four hours, twenty-four hours must be subtracted from it. For example:—

Let it be required to find the Sidereal Time corresponding to the Mean Time 21*h*. 15*m*. 30*s*. on November 6:—

		H.	M.	S.
Sidereal Time at Noon on November 6		15	3	51
Mean Time intervals and equivalents from table above	21*h*. =	21	3	26·99
	15*m*. =		15	2·46
	30*s*. =			30·08
Corresponding Sidereal Time	=	12	22	50·53

This table may also be used to show the acceleration of Sidereal on Mean Solar intervals, by subtracting the Mean Time arguments from their Sidereal Equivalents.

Digitized by Google

The time used throughout this Almanack, with the one exception of that of High Water at Dublin, is Greenwich Mean Time, or the time which should be shown by a well-regulated clock; the column headed "Sun before or after Clock" gives the difference between mean and apparent time, or the time as shown by the Sun.

Conjunction.—A Planet is said to be in Conjunction with another body when it has the same longitude, and is seen in the same direction in the heavens. It is obvious that in the case of the inferior Planets this Conjunction will be of two kinds: the one when the Planet is between the Earth and the Sun, called *inferior* Conjunction; and the other when at the opposite point of its orbit, with the Sun between the Planet and the Earth, called *superior* Conjunction. The latter is the only kind of Conjunction that can happen to the *superior* Planets, Mars, Jupiter, Saturn, Uranus, and Neptune; the *inferior* Planets, Mercury and Venus, being subject to both kinds.

Opposition.—A Planet is said to be in Opposition when it is distant from the Sun 180° of longitude, at which time it is most brilliant, souths about midnight, and is, generally, at its least distance from the Earth.

Elongation.—The inferior Planets, in their revolutions round the Sun, appear to an observer on the Earth to swing pendulum-like from side to side, being alternately east and west of the Sun; the greatest Elongation is the termination of one of the swings, either east or west; and at these times the Planet appears, when viewed through a telescope, like the Moon in her first quarter if the Elongation be in the east, and like her last quarter if west. Both Mercury and Venus exhibit these phases, passing from new to full while moving from inferior to superior Conjunction, and from full to new again while passing from superior to inferior Conjunction.

Occultation.—It often happens that the Moon in her orbital motion passes before, and hides from a spectator on the Earth, certain of the Fixed Stars, and occasionally one or other of the Planets; these occurrences are called *Occultations*. Among the "Celestial Phenomena" are given the times at which certain of these Occultations take place, as well as the exact point on the Moon's limb where the observer is to look for the phenomenon; this point is reckoned from the true vertex, or highest upper portion of the Moon's image, counting continuously towards the East from 0° to 360°. The disappearance always takes place on the left-hand side of the Moon, and the reappearance on the right, but *vice versâ* when viewed through an inverting or astronomical telescope. Stars to the fifth magnitude only have been included in this summary, excepting some few of the 6th magnitude, occulted at the dark limb when the Moon is in either the first or fourth quarter; the reappearance or disappearance which would occur at the bright limb not being noted.

Southing.—The *Time of Southing* is the time at which the heavenly bodies pass the Meridian, and is so called because they are then due south. The Meridian being a great circle passing through the Pole and Zenith of the place, the southing will also be the time when they attain their greatest altitude above the horizon.

ECLIPSES.

In the year 1897 there will be two Eclipses of the Sun.

I. An annular Eclipse of the Sun, February 1, invisible at Greenwich. Begins on the Earth generally at 5*h*. 23*m*. aft., in longitude 177° West of Greenwich, and latitude 28° South. Central Eclipse begins generally at 6*h*. 26*m*. aft., in longitude 166° East of Greenwich, and latitude 32° South. Central Eclipse ends generally at 10*h*. 5*m*. aft., in longitude 61° West of Greenwich, and latitude 11° North. Eclipse ends on the Earth generally at 11*h*. 8*m*. aft., in longitude 78° West of Greenwich, and latitude 15° North.

The line of Central Eclipse lies almost entirely across the South Pacific Ocean, terminating in Venezuela.

II. An annular Eclipse of the Sun, July 29, invisible at Greenwich. Begins on the Earth generally at 1*h*. 2*m*. aft., in longitude 110° West of Greenwich, and latitude 17° North. Central Eclipse begins generally at 2*h*. 5*m*. aft., in longitude 125° West of Greenwich, and latitude 16° North. Central Eclipse ends generally at 5*h*. 5*m*. aft., in longitude 4° West of Greenwich, and latitude 23° South. Eclipse ends on the Earth generally at 6*h*. 52*m*. aft., in longitude 19° West of Greenwich, and latitude 22° South. A part of the line of Central Eclipse lies over Mexico.

TIDES AND TIDAL WAVES.

The great cause of our ocean tides is the Moon's nearness as compared with the Sun's distance. The Sun is 25½ million times heavier than the Moon, but his attractive power acts upon our planet mainly as a whole; whereas the Moon, being in our immediate neighbourhood and much smaller in size, acts specially and more intensely upon that limited area of the Earth's surface which is nearest her and directly under her. Wherever the Moon may be in her course, if a great ocean lies immediately beneath, its waters are heaped up by what is termed her "lifting power," and the crest of that bulging and liquid mass constitutes *high water* for that part of the world.

In 24 hours and 50 minutes, owing to the Earth's rotation, plus the Moon's orbital motion, that same part of the world is exactly under the Moon again, and thus another similar tide must always occur after that interval of time. These, the primary tides, being accounted for, to what cause are the secondary tides due, which occur exactly half way between in point of time? Suppose Ocean A is exactly under the Moon, as in the case just discussed, and that Ocean B is on the opposite side of our planet, how is the latter affected by our satellite? Very slightly: because

Digitized by Google

not only has she to lift up the waters of Ocean A, causing the primary tide there, but she has to exercise her attractive power on the great solid mass of the planet itself which separates the two oceans. Thus the Earth as a whole is drawn away from Ocean B, because the latter is so remote, and its waters, being left behind, bulge up at a point diametrically opposite to the primary tides of Ocean A, and form the secondary tides. It is manifest, therefore, that at every moment of the day and night two tides are being formed, on opposite sides of our planet, one directly under the Moon, the other at the point furthest from the Moon.

When a primary and the corresponding secondary tides are thus heaped up at two opposite points of the Earth's equator, then two other points half way between (*i.e.*, 90° distant in longitude) must be deprived of their waters, which have been ebbing either East or West to make up the primary and secondary. In other words, at any moment *low water* occurs 90° East or West of high water: or, since the Moon revolves in 24*h.* 50*m.*, any particular meridian must not only have its secondary tide 12*h.* 25*m.* after the primary, but must have low water 6*h.* 12½*m.* after high water.

According to mathematicians, some of the greatest of whom have bestowed much attention on the theory of the tides, the lifting power of the Sun on our oceans is only from 33 to 44 per cent. of that of the Moon. Three points are notable as to the influence of the Sun during each lunar month:—(1) At New Moon he acts with the Moon upon the primary tide at that meridian; (2) at Full Moon he pulls against the Moon, and therefore helps to heap up the secondary tide; and (3) when the Moon is in her quarters, the influence of the Sun is at right angles to that of the Moon, counteracting it, and therefore both primary and secondary tides are lowered. The first and second cases constitute *Spring Tides*; the third, *Neap Tides*. Thus, the solar tides are practically of no account except for their modifying influence on the lunar or true tides.

If our planet had no land on its surface, and the shoreless ocean were of uniform depth, the tidal wave-crests, both primary and secondary, would travel in regular succession from East to West, following the Moon's course. With our actual geography many local complications arise: seas like the Mediterranean, Baltic, or Euxine offer so small an area that the Moon can only act upon each as a whole, and there is practically no tide. The disturbing action requires a very wide expanse of deep water, such as the great Southern Ocean, or the S. Pacific; and there accordingly is assigned the birthplace of our great tidal wave, to which many tides in distant seas are referred. Our mighty pulse enters the Pacific in a N.W. direction, and another the Atlantic, both to be modified by the depth of water and the form of the coasts; and both extending to the bottom of the ocean. Owing to the islands of the Pacific the tides there become small, as the impulse travels north; but in the long deep trough of the Atlantic the tidal force attains a velocity of from 600 to 650 miles an hour. The western impulse across the S. Pacific reaches Tasmania in 12 hours, and in 12 hours more dashes against Hindostan and S. Africa. Another 12 hours and the tidal wave has reached Newfoundland on the West, and the African Cape Blanco on the East. Turning eastward across the N. Atlantic, the tide in four hours is split into two waves at Land's End, one of which goes slowly up the shallow English Channel, while the main branch is borne round the North of Scotland—to bring high water to Aberdeen and the coasts of Norway and Denmark—and finally reaches the mouth of the Thames in 48 hours after leaving the Antarctic Ocean. The Atlantic, being deep and free of islands, produces an independent tide, which helps to modify the tidal impulse from the South, one result being the famous high tides of the Bay of Fundy.

The tides are locally affected by the configuration of the coasts, and also to a slight extent by the changes of atmospheric pressure. Where the tidal wave enters gulfs or estuaries which open in its direction the difference between high and low water is much increased—*e.g.*, Bristol Channel, 40—60 ft.; St. Malo in the English Channel, 50 ft.; Chepstow, 60 ft.; Bay of Fundy, 70 ft. up to 100 ft. in the highest spring-tides. The "bore" or "eagre" on certain rivers occurs when the advanced portion of the tidal wave moves so slowly, owing to shallowness or other circumstances, that the succeeding waters gather in a heap—*e.g.*, Severn, "head" 3 feet high; Hoogly, 5 ft.; Amazons, 12 to 15 ft.—that on the Tsien Tang in China has been estimated to flow up the river with a velocity of 25 miles an hour. Another curious local modification of the tides is seen at Southampton, Poole, Weymouth, &c., where two tides occur in 12 hours; a similar anomaly near Clackmannan on the Firth of Forth is known as the "leaky tides."

The following heights of tides on the Thames, with the distance of their respective stations from the mouth of the river, are from *Phil. Trans.* (cxxiii. 204):—

	Height.	Distance
	ft. in.	m.
London Docks	18 10	60
Putney	10 2	67½
Kew	7 1	73
Richmond	3 10	76
Teddington	1 4½	79

The lunar tides, according to the results of recent investigation, are by friction slowly interfering with the Earth's rotation, and therefore lengthening our day. This must go on through countless centuries till the Earth's time of rotation is equal to a lunation, when the lunar tides will no longer exist, and our seas be disturbed only by the weak action of the solar tides.

OUR SEASONS.

The revolution of the Earth in its annual orbit round the Sun has the effect of causing the latter body, seemingly, to describe a complete revolution among the Stars in the course of the year. If the plane of this apparent path had been parallel to the Earth's Equator, the Days and Nights would be equal all over the Globe, and each place on the Earth would have one constant Season, the character of which would depend on its geographical latitude. Instead of this coincidence of planes, the Equator and Ecliptic (as this apparent path of the Sun is called) are mutually inclined to each other at 23½°; consequently, the Sun is alternately seen above and below the Equator by this amount, causing the phenomena of summer and winter: giving long days and Summer to the Northern hemisphere when the Sun is North of the Equator, and short days and winter when South of it.

Digitized by Google

This inclination of the two planes will cause the Sun to cross the Equator twice in the year, viz., once in the Spring, and again in the Autumn, at which times the Days and Nights are equal all over the world; and we experience for a day or two what would be the constant state of our climate if the Sun moved in the plane of the Equator.

From Spring, through Summer to Autumn, the Sun traverses exactly one half of the Ecliptic, and from Autumn, through Winter to Spring, the other half; but that these halves are not travelled over in equal times will be seen by an inspection of the times at which the different Seasons commence. It appears that the Sun is longer in performing the Summer than the Winter half; this is caused by the eccentricity of the Earth's orbit, and the Law of Areas, as it is called by Astronomers—a law which requires that an imaginary line, joining the Earth and Sun, shall sweep over equal areas in equal times. To do this, the Earth when nearer to the Sun, as at the Winter Solstice, must move more quickly than when farther away, at the Summer Solstice; because then the line joining the two bodies is shorter than in the latter case; the effect is to detain the Sun about eight days longer in the Northern than in the Southern Hemisphere.

The Earth's atmosphere is generally supposed to extend some forty miles in height, probably very much farther, but becoming, at only a few miles from the surface, of too great a tenuity to support life. The condition and motions of this aërial ocean play a most important part in the determination of climate, modifying, by absorbing, the otherwise intense heat of the Sun; and when laden with clouds, hindering the Earth from radiating its acquired heat into space. The amount of heat absorbed in its passage through the atmosphere will depend upon the thickness of the stratum which the rays have to penetrate, and this on the meridian altitude of the Sun.

If the surface of the Globe were smooth, and consisted entirely of land or water, the mean temperature of our Seasons would depend solely on our geographical latitude, and we should then find that all places on the same parallel would enjoy the same temperatures; but being, as it is, made up of water and land very unequally distributed, the former occupying two-thirds of the entire surface of the Globe, the temperature of the Seasons at places on the same parallel of latitude is modified by the surrounding masses of land and water. The great capacity of water for heat, and its low power of radiation, make the great Ocean, extending from Pole to Pole, the reservoir which stores up for us the heat it has received from the Sun; while the land, radiating again its heat very quickly, would soon grow cold. The principal medium by which this heat is conveyed to the land is that of the Winds, which, receiving their warmth and moisture from the water, pass over the land, and compensate for the loss of heat which the latter suffers from radiation. From this cause it is that islands enjoy more equable Seasons than inland countries, being neither so cold in Winter nor so hot in Summer; since the same clouded skies that retard the cooling of the land by radiation also shield it from the rays of the Sun in Summer. But in the interior of continents, where the winds have lost their moisture on their passage from the coast, great extremes are known to prevail between the Summer and Winter temperatures. Moscow has a difference between its Summer heat and Winter cold of 82°, London of 57°, while in the Shetland Islands, and at Penzance, in Cornwall, the differences are only 46° and 48° respectively. Beyond the fact of the presence of water, we must not forget that the oceans and seas are traversed by currents of warm water from the Equatorial regions, which greatly promote the distribution of heat. The chief of these prevail in the North Atlantic Ocean, and it is to one of them—the Gulf Stream—that we probably owe the mildness of the western coasts of Europe. This remarkable current, issuing from the Gulf of Mexico, flows in a north-easterly direction along the shores of America, and on encountering the Banks of Newfoundland splits into two branches, one of which proceeds to the Azores, and the other to the British Isles.

VARIABLE STARS.

Although the Stars generally shine with uniform brightness, there are among them some remarkable exceptions to this general rule. The earliest known, and the most remarkable amongst this class of Stars, is one situated in the constellation Cetus, and known by the name of *o* Ceti, or Mira Ceti. It has a period of nearly 331·3 days; that is to say, it goes through its cycle of variations in that length of time, continuing for about twelve or fourteen days at its maximum brightness, which has, at some of its maxima, reached to the second order of magnitude; it then goes on decreasing for some three months until it becomes invisible, in which condition it remains for five more months, when it again goes on increasing to the end of the period, when the maximum is again reached; but the order of magnitude is not always the same at successive maxima. The month of October is the best time for observing it. It will be found in R. A. 2*h*. 14*m*. 9*s*. and South Declination 3° 27′.

Another remarkable Variable Star is Algol, *β* Persei. This has a very short period, not quite three days—and ranges from the second to the fourth magnitude. It continues at its maximum for two days and a half, then begins to decrease very suddenly, and in rather more than three hours is reduced to a Star of the fourth magnitude; after remaining at this magnitude for a quarter of an hour, it again attains to its maximum in the same time that it took in passing from it to the minimum. This Star will be found in Right Ascension 3*h*. 1*m*. 28*s*. and North Declination 40° 34′. It can be well observed in October and November.

U Ophiuchi varies from the 6th to the 6½ magnitude, with a period of 20*h*. 8*m*. It may be observed in June; southing about midnight on the 10th. Will be found in R. A. 17*h*. 11*m*. 17*s*. and North Declination 1° 19′.

The Variable Star *β* Lyræ is remarkable in having a double period, viz., two maxima and two minima—the double period being very nearly equal to thirteen days; the difference between the maximum and minimum is only one degree of magnitude. There is another peculiarity in the changes of this Star—that, although the two maxima are equal, the minima are unequal. It is situated in R.A. 18*h*. 46*m*. 17*s*. and North Declination 33° 15′. The best time for observing it is in the months of June and July. Bright lines are occasionally seen in the spectrum of this star.

The Star *δ* Cephei is also subject to considerable variations in magnitude, passing from the third to the fifth with a period of 5⅓ days. In passing from the minimum to the maximum it occupies

less time than that required for it to reach the minimum again—in the proportion of 38 hours to 91. It is to be found in R. A. 22*h*. 25*m*. 21*s*. and North Declination 57° 53′. August and September are the best months in which to observe it.

There are two hypotheses suggested to explain the phenomena exhibited by the variable or periodical Stars; one of which endeavours to account for the variations in magnitude by supposing that opaque bodies are revolving around these particular Stars, and that at certain times they are interposed between the Earth and the Star, and so cut off from us a portion of the luminous rays of the latter. The other hypothesis suggests that the Stars themselves may have portions of their surface of unequal reflecting power, and that in their rotations they present to us in turns these more or less bright parts, and so cause the variations that we observe. This theory fails to explain the changes observed in the stars of the Algol type, and is only applicable to such as are quite regular in their fluctuations. Professor Pickering has shown that none of the theories put forward to account for the variability of the light of such stars as Algol will satisfy the observed changes, except that of an opaque satellite. Adopting this theory (which is now generally accepted) he finds theoretically such a satellite whose position and movements would agree with the observed facts.

The above-mentioned "variables" are but a very small portion of the Stars which are *known* to experience fluctuations of magnitude, but they are the most celebrated examples of their class. It is very likely that our knowledge concerning variable Stars and their distribution in space will be greatly increased when the examination of the photographic plates taken for the chart of the Heavens shall have been completed.

TERRESTRIAL MAGNETISM.

Magnetism is that property possessed by certain bars of steel, called Magnets, of attracting pieces of iron and also other magnets: beyond this idea very little, if any, meaning is popularly attached to the term Magnetism.

Every magnet has two poles, each pole having, as the term implies, exactly opposite properties, such that if we suspend one magnet by a thread free to move in any direction it will be found that on bringing another magnet, held in the hand, near to one end of the suspended magnet, if the opposing poles of each are of like properties, they will repel each other, but if of unlike, they will be attracted towards each other. By placing the magnet held in the hand in the proper position, the moveable magnet may be made to take up any required direction, as long as the magnetism in the magnets and their relative positions remain the same. In the Mariner's Compass we have a case of this kind, where the compass-needle is so suspended as to be free to move in the horizontal direction, the Earth itself being the other magnet, with its South Pole near to the Earth's North Pole, and its North Pole near to the Earth's South Pole; so that the North Pole of the compass will always point to the Magnetic South Pole of the Earth, differing from the true or Astronomical North by a quantity called the "Variation." The Variation of the compass is not only different for different places on the Earth, but is moreover liable to slow variation from year to year, causing it in the course of centuries to oscillate from East to West of the Astronomical meridian. In 1580, at London, the needle had an Eastern variation of about 11½°; between 1657 and 1662 its direction coincided with the plane of the Astronomical meridian; that is to say, the variation, or declination as it is generally called, was zero; since then it travelled westwards, and reached the maximum Western declination in 1815, and is at the present time (1897) approaching the zero, previously to again becoming Easterly.

The compass-needle being constructed to move in a horizontal direction only, exhibits that component of the total magnetic force which determines the declination; but if the needle had been mounted on a horizontal axis placed in the magnetic meridian, and been left free to move in a vertical plane, it would have been found to *Dip*, as it is technically called, or be inclined at an angle to the horizontal plane, the North Pole of the needle being depressed. The value of this *inclination* or *dip* varies also in different places on the globe, increasing towards the Poles, so that in the Northern Hemisphere, at the Magnetic Pole, we shall have the north end of the needle pointing directly downwards.

This North Magnetic Pole was found by Sir James Ross to be situate in 97° West longitude and 70° North latitude. The South Magnetic Pole is situated about 168° East longitude and 76° South latitude. Between these points there are found places of no *dip*; all such places are said to be situated on the Magnetic Equator, a plane not far removed from the terrestrial Equator. The *dip*, like the declination, is subject to secular and other variations, the true laws of which are not yet understood, but for the investigation of which Observatories have been established all over the world, and elaborate series of observations made on the motions of variously suspended magnets (their movements in most Observatories being automatically recorded by photography), furnishing a continuous record from hour to hour, and year to year, of the forces acting upon them.

FORECASTING THE WEATHER.

All outdoor pursuits, undertaken for profit or pleasure, depend so much upon the weather that we can imagine mankind to have taken an interest in its study from very early times; and, as a matter of fact, the popular ideas about weather prognostics are much the same as those which were in vogue in the earliest ages. Aristotle, in his book on Meteors (which, in his time, were supposed to have an atmospheric origin), collected all the then known prognostics of the weather, but in this work no serious attempt is made to explain the phenomena observed. In the cases where the attempt is made, the explanations offered are often very absurd, and show entire ignorance of the principles of physical science.

The observation of the state of the sky taught the meteorologists of early times when to expect good or bad weather, and the result of these observations, formulated into short and pithy sayings, made up, until quite recent times, the science of weather prognostics.

Birds and beasts are all more or less sensitive to coming changes in the weather, and by observation of their movements, sure warning of changes in the weather may be obtained. Among other instances it is observed that sea birds, as stormy weather comes on, fly inland in search of food; wild fowl leave the marshy grounds for higher

Digitized by Google

localities; swallows and rooks fly low before and during bad weather; frogs are unusually noisy before rain; sheep huddle together near bushes and trees.

It was not until the discovery of the barometer, in 1643, that the first great step was made towards a knowledge of the nature of our atmosphere. We were then, by its help, enabled to ascertain the weight and pressure of the great aërial ocean which surrounds us, and to learn when and where it was in a state of calm or storm. The invention of the thermometer, shortly afterwards, gave the means of determining its temperature. The hygrometer for showing the amount of moisture in the atmosphere, and the anemometer for giving the direction and force of the wind, are also instruments of great importance to the meteorologist. The indications of these instruments, combined with the careful observation of atmospheric appearances, interpreted by the results of former observations, will enable the individual observer generally to predict the kind of weather that may be expected in his immediate locality for a day or sometimes longer in advance.

A strip of sea-weed forms a very useful hygrometer for practical purposes, provided it be not kept in a room warmed artificially. In fine weather it will keep dry and have a somewhat dusty feeling, but with an increase of moisture in the air will become limp and sticky, indicating a probable change of weather in the shape of rain.

Since the time of Admiral FitzRoy the science of weather forecasting has made much progress in its details, but, for the individual observer, the method remains much the same now as then. The principal rules in use for forecasting the weather at present may be briefly stated as follows:—

A rising barometer usually foretells less wind or rain, and a falling barometer more wind or rain, or both; a high barometer, fine weather, and a low one the contrary.

If the barometer has been *about* its ordinary height at the sea level, and is steady or rising, while the thermometer falls and the air becomes drier, north-westerly, northerly, or north-easterly wind, or less wind, may be expected; and, on the contrary, if a fall takes place with rising thermometer and increasing dampness, wind and rain may be looked for from the south-east, south, or south-west: a fall of the barometer, with low thermometer, foretells snow.

With the barometer *below* its ordinary height a rise foretells less wind, or change in the direction towards the north, or less wet; but when the barometer has been low, the first rising usually precedes strong wind or heavy squalls from the north-west, north, or north-east, and continued rising foretells improving weather. If the barometer falls and warmth continues, the wind will probably *back*, and more southerly or south-westerly winds will follow.

In northern latitudes the heaviest northerly gales occur after the barometer first rises from a very low point. A rapid rise generally indicates unsettled weather; slow rise or steadiness, with little moisture in the atmosphere, fair weather. A considerable and rapid fall signifies stormy weather and rain. The barometer generally falls with a southerly and rises with a northerly wind; though sometimes the contrary happens, and then the southerly wind is dry and the weather fine, or the northerly wind wet and violent.

When the barometer sinks considerably, high wind and rain or snow will follow; wind from the northward, if the thermometer is low for the season; from the southward, if high.

When a gale sets in from the east or south-east, and wind *veers* by the south, the barometer will continue falling till the wind becomes south-west, when, after a lull, the gale will be renewed.

The north-east wind tends to *raise* the barometer most, and the south-west to lower it most.

Instances of fine weather often happen with a low barometer, and are generally followed by a duration of wind or rain, or both.

Predictions founded solely on the indications of the barometer and thermometer may be made with more certainty if combined with careful observation of the appearance of the sky, and the atmospheric effects peculiar to the particular locality.

A rosy sky at sunset, whether clouded or clear, a grey sky in the morning, a low dawn (that is when the first signs of the dawn appear on the horizon) all indicate fair weather. A red sky in the morning indicates bad weather, or much wind; and a high dawn (or when the first signs of the dawn are seen above a bank of clouds) presages wind.

From the clouds we may draw the following conclusions: soft-looking and delicate clouds foretell fine weather, with moderate breezes; hard-edged clouds, wind; rolled or ragged clouds, strong wind. A bright yellow sky at sunset also presages wind, and a pale yellow sky wet.

Dew and fog both indicate fine weather, while remarkable clearness of the atmosphere near the horizon (causing distant objects to appear very distinct and nearer than usual) is one of the most characteristic signs of coming wet.

At the present day, by the help of the electric telegraph, the meteorologist can obtain from as many stations as he desires the height of the barometer, direction and force of wind, &c., data which will inform him of the condition and movements of the aërial ocean at a definite time. He then marks on a map the height of the barometer at each place, and, drawing lines through all the places where the quicksilver stands at the same height, at any convenient interval he obtains a series of lines of equal pressure or weight, called shortly *isobars*, which show the height or depression at those places as the contour lines on a map show the different altitudes of the mountains and valleys. The thermometer readings, treated in the same way, are called *isotherms*. To make these synoptic charts (as they are called) complete, the force and direction of the wind, the amount of humidity, character of clouds, and other weather signs are also marked down, so that the chart may furnish a view of the weather at that particular time over the area from which reports have been obtained.

Supposing now that at the same time the next day a new set of data are received and marked on another chart, a comparison of the two will show the nature and direction of the change going on, and enable the meteorologist to predict, to a certain extent, what will be the immediately coming weather. This is a general description of the way in which the forecasts of weather, printed in the daily papers, are made. The interpretation of these synoptic charts may not appear to the reader to be a very difficult operation, but it must be remembered that meteorology is purely a science of observation, and, as such, will be most successfully handled by the observer of the greatest experience. From want of knowledge concerning the laws which govern the fluctuations of the

Digitized by Google

weather, failures in the forecasts must happen now and again, and no reason can be given why certain states of the atmosphere, which previous observation would lead us to believe should be stable, suddenly break up without any apparent warning.

Attempts have been frequently made to connect the state of the weather with the aspects of the planets, the changes of the Moon, or some other astronomical occurrences. The idea that the weather is dependent on the Moon's phases still finds favour with the vulgar, although any appreciable connection has been repeatedly disproved.

It is perfectly reasonable to suppose that the Moon produces some sort of tide in the atmosphere surrounding our globe, as it does on the waters of the ocean; but then, whatever effect this tide may have upon the weather would appear gradually according to regular laws, and would not account for the sudden and apparently capricious changes of which the weather forecaster most desires to be warned.

Dr. Samuel Clarke published a table, founded upon this theory, for the prediction of weather changes, which he says was the result of a long series of observations. It amounts to this:—If the new or full Moon takes place between noon and 2 p.m., or between 4 and 6 a.m., rain may be predicted. Fair weather may be expected when either new or full moon takes place between 4 and 6 p.m., or between 10 p.m. and 2 a.m.

It has also been held that weather of a like character will return in the same order after every revolution of the Moon's nodes—that is, after every nineteen years.

As, notwithstanding what has been said above, many persons still hold to the belief that the Moon's changes have something to do with the weather, it has been thought well to give Dr. Samuel Clarke's extended Weather Table, in order that any one who cares to do so may compare the predictions therein with his own experience, and prove for himself how much truth there is in the theory.

If the Moon change betw'n	Summer.	Winter.
12 and 2 P.M.	Very rainy	Snow and rain.
2 — 4 ,,	Changeable ...	Fair and mild.
4 — 6 ,,	Fair	Fair.
6 — 8 ,,	Fair, if wind at N.W. ...	Frosty, if wind N. or N.E.
6 — 8 ,,	Rainy, if at S. or S.W..	Rain or snow, if S. or S.W.
8 — 10 ,,	Rainy, if at S. or S.W..	Rain or snow, if S. or S.W.
10 — 12 ,,	Fair	Fair and Frosty.
12 — 2 A.M.	Fair	Hard frost, unless S. or S.W.
2 — 4 ,,	Cold & showery	Snow and stormy.
4 — 6 ,,	Rain	Snow and stormy.
6 — 8 ,,	Wind and rain.	Stormy weather.
8 — 10 ,,	Changeable...	Rain if wind W., snow if E.
10 — 12 ,,	Freq. showers..	Cold, with high wind.

Besides the meteorological instruments mentioned above, there is one often used to indicate weather changes which is known as the chemical weather-glass, camphor-glass, or storm-glass.

Though sold in London more than a hundred years ago, no scientific explanation of its indications seems to have been attempted till the late Admiral FitzRoy took it in hand. Up to the year 1825 these storm-glasses had been considered rather as curiosities than otherwise; nothing certain could be made of their variations; but lately, says the Admiral, writing in 1862, it was fairly demonstrated that if fixed undisturbed in free air—not exposed to radiation from fire or sun—but in the ordinary light of a well-ventilated room, or, preferably, in the outer air, the chemical mixture in the storm-glass varies in character with the *direction* of the wind—not its force, *specially* (though it *may* so vary in appearance only)—from *another* cause, electrical tension.

Admiral FitzRoy considered that these instruments had a scientific value, used in conjunction with the barometer and thermometer, in predicting local storms. Some other writers are at variance with the Admiral on this point—one affirming that the weather indications of the storm-glass are not to be relied on; another, that light and temperature are the agents that bring about the changes observed.

The instrument itself consists of a mixture of camphor, nitrate of potassium, and muriate of ammonia, partly dissolved in alcohol, with a little water. This solution is placed in a long glass vial or tube, with some air, and hermetically sealed. Some authorities say that a small hole should be left in the top to admit the external air.

At one time the upper part of the liquid in the tube will appear quite clear, the bottom portion being occupied by a shapeless mass like melting white sugar. Again, the liquid portion will be more or less filled with crystallizations like fern-leaves or hoar-frost, and under some circumstances like stars.

Mr. Charles Tomlinson made a rather exhaustive experimental examination of these storm-glasses, and came to the conclusion that the instrument acts as a rough kind of thermoscope, inferior, for most purposes, to the thermometer, and that the temperature is the principal, if not the only, agent in producing the observed changes.

The general rules given for interpreting the readings of the storm-glass are as follow:—

(a) If the undissolved substance lies low and smooth at the bottom of the tube, fine weather may be expected.

(b) If it rises gradually in the shape of fern or feather-like crystallizations rain is prognosticated.

(c) If it rises much higher than in (b), and if the liquid portion is less clear, with star-like crystals in motion, high wind or storm will follow.

To keep the instrument in good working order, Admiral FitzRoy recommends that the mixture be disturbed once or twice in a year, by inverting and gently shaking the tube.

RIGHT ASCENSION.

The Right Ascension of any heavenly body is its angular distance measured along the Equator from that point of intersection of the Equator and Ecliptic known as the Vernal Equinox. In the time of the ancient astronomers this point was situated in the constellation of Aries, and called by them the "First Point of Aries," but it has since then retrograded considerably behind that constellation, and is at present in the sign Pisces. Modern astronomers, however, still speak of this zero point, whence Right Ascensions are measured, as the "First Point of Aries." The Right Ascension and Declination are the two co-

Digitized by Google

ordinates which define the position of any point on the celestial sphere with regard to the Equator as a fundamental plane, just as those of longitude and latitude define the position of any place on the terrestrial globe; the meridian of Greenwich being taken as the starting-point by geographers from which to reckon their longitudes, while the astronomer reckons his from the meridian of the First Point of Aries.

Since a well-regulated astronomical clock should show 0*h*. 0*m*. 0*s*. when the First Point of Aries is on the Meridian, the Right Ascension may be called the Sidereal time of Southing, and the approximate mean time corresponding to it may be easily found for any object whose Right Ascension is given in this Almanack by means of the column headed Sidereal Time at Mean Noon, printed on the second page of each month. The rule may be thus stated:—*From the given Right Ascension subtract the Sidereal Time at the preceding Noon, and further diminish the result at the rate of* 10 *secs. an hour.* If the Right Ascension should be smaller than the Sidereal time to be subtracted, then 24 hours must be added to it. As an example:—At what time will Regulus South on March 15?

R. A. of Regulus + 24*h*.	34*h*. 2*m*. 53*s*.
Sidereal Time at Mean Noon (sub.)	23*h*. 33*m*. 24*s*.
Diminish by the Acceleration for 10*h*. 29*m*. 29*s*. at 10*s*. per hour	10*h*. 29*m*. 29*s*.
	1*m*. 45*s*.
Approximate mean time of Southing, March 15	10*h*. 27*m*. 44*s*.

In a similar manner the Sidereal time corresponding to any mean time may be found. Suppose, for instance, that we wish to know approximately what the Sidereal time would be at 9.30 p.m. on November 5, we have merely to add Greenwich time to the time given in the column headed Sidereal Time at Mean Noon of that date, increasing the result by the amount of the acceleration in 9*h*. 30*m*.:—

Sidereal time at mean noon	14*h*. 59*m*. 54*s*.
Greenwich time (add)	9*h*. 30*m*. —
	0*h*. 29*m*. 54*s*.
Add for acceleration for 9*h*. 30*m*. at 10*s*. per hour	1*m*. 35*s*.
Sidereal time November 5 at 9*h*. 30*m*. P.M.	0*h*. 31*m*. 29*s*.

To observers who are not furnished with a Sidereal Clock the Sidereal times at Mean Noon will be found very useful for readily finding the approximate mean times of Southing of the Stars, and also for ascertaining with equal readiness the Sidereal time corresponding to any required moment of mean time. If greater accuracy is required, use should be made of the table on page 69.

The figures in the second and third columns of the following Table give the apparent dimensions of Saturn's ring as seen from the Earth, and refer to the outer limit of the outer ring. For the with a s of the ring to be visible, the Sun and Earth though son on the same side of that plane. The the southern be invisible when its plane passes through the northerly centre of the Sun, centre of the Earth,

When the b Sun and Earth are on opposite sides wind and rain or the ring.

APPARENT DIMENSIONS OF SATURN'S RING, 1897.

The figures in the fifth and sixth columns represent respectively the *versed sines* of the illuminated portions of the discs of Venus and Mars.

The above table shews us that in the case of Venus, the nearest to the Earth of the inferior planets, the amount of gibbosity varies very considerably; passing from full to a thin crescent; thus presenting phases exactly similar to those of the Moon, but having much longer periods.

The great variation in her distance from the Earth at inferior and superior conjunction causes her apparent diameter to change considerably, from about 5″ in one case to 60″ in the other.

Her real diameter being 7,700 miles, her mass rather greater, and density rather less than that of the Earth, the force of gravity at her surface will be much the same as on the Earth; that is to say, a pound weight on the Earth would weigh about a pound on Venus.

In the case of Mars, the nearest to the Earth of the superior planets, the variations in phase are far less marked, in fact hardly appreciable till the planet is some considerable distance from opposition to the Sun, when it may be observed shewing a slightly gibbous phase.

His apparent diameter at opposition amounts to about 20″. He has a real diameter of 4,230 miles only; a mass about one-seventh, and a density somewhat less than that of the Earth: so that the force of gravity on his surface would be about four-sevenths of that on the Earth, and our pound weight, on Mars, would only weigh about nine ounces.

The apparent brilliancy of Mars varies at the different oppositions owing to the great eccentricity of his orbit; the most favourable condition being when the opposition and perihelion occur together. Such an opposition very nearly took place in the year 1719; when, on the 27th August, he was in opposition, and only 2° 30′ distant from perihelion. The lustre was so great that the planet was then mistaken for a comet or new star.

14	0 3 47	85	0 5
15	0 3 32	90	0 0

This Table of Mean Refractions is derived from that by the late Professor Bessel. With the argument 'apparent altitude' it gives the correction to be applied to observed altitudes in order to free them from the effect of atmospheric refraction. As refraction causes all bodies to appear more elevated above the horizon than they really are, the quantities in the table must be *subtracted* from the observed altitudes.

For an altitude not in the Table, the value of the mean refraction may easily be obtained by interpolation. For example, let the mean refraction be required for 6° 35′: here opposite to 6° 30′ we have 7′ 50″, and opposite to the next argument, 7° 0′, 7′ 20″ for the mean refraction, and we see that for an increase of 30′ in the altitude, the refraction has decreased 30″; therefore a simple proportion shows us that we must decrease the value corresponding to 6° 30′ by 5″, which will give 7′ 45″ as the mean refraction corresponding to 6° 35′ of apparent altitude.

ECLIPSES OF JUPITER'S SATELLITES.

The accompanying table contains *all* the Eclipses of the first Satellite, and *those only which are visible at Greenwich* of the second, third, and fourth Satellites.

The Roman numerals indicate the Satellite eclipsed; the letters D and R signifying respectively, Disappearance and Reappearance. Those Eclipses which are visible at Greenwich have an asterisk after the D or R in the second column.

To the 23rd of February the disappearances and reappearances will take place on the Western side of the Planet; from February 25 to August 15 the Disappearances and Reappearances will take place on the Eastern side, and from October 14 to the end of the year on the Western side. If the phenomena are observed with an inverting telescope these positions will apparently be reversed; the Western limb of the planet will be on the observer's left hand, and the Eastern on the right.

The mean time of Eclipse for any other place than Greenwich may be found by simply applying to the times given in the Table the difference of longitude, *adding* the difference if the longitude of the place is *East* of Greenwich, and subtracting if *West*.

From the above paragraph it will be inferred that the eclipses of the satellites furnish an easy method of determining longitudes; by observing the local times of immersion or emersion. A longitude so determined will not be very accurate in consequence of the gradual extinction of the light, which makes it difficult to estimate the true time of eclipse. The three outer satellites make the difficulty still greater, owing to their slower motions.

With the first satellite, and careful observation, a fair approximation to the longitude may be obtained in circumstances where more accurate and elaborate methods are not available.

Eclipses of Jupiter's Satellites in 1897.

EXPLANATION OF THE ASTRONOMICAL TABLES.

Mean Right Ascension.

The Mean Right Ascension and Declination for any other year may be found from this table by multiplying the annual variation by the number of years elapsed, and applying the result to the quantities given in this table. If the required date be earlier than 1897, the *signs* of the annual variations must be changed. In applying the corrections, to reduce to any other date, to the Declinations, it must be borne in mind that N. Declination means +, and S. Declination −, and that the corrections must be added *algebraically*.

Configuration of Jupiter's Satellites.

This column exhibits, at the particular hour mentioned, the respective position of Jupiter and his Satellites as seen in an inverting telescope. The white circles represent the Planet, and the numerals 1, 2, 3, and 4 the respective Satellites: a black circle is intended to show, either that the Satellite whose numeral it stands in the place of is in the shadow of the Planet (eclipsed), or else is behind the disc of Jupiter (occulted); the sign ✕ indicates that the Satellite in question is *on* the disc of the Planet.

Sidereal Time at Mean Noon.

This column indicates the Sidereal Time at Mean Noon on each day of the year, and is the time which the Observatory or Astronomical clock should show when the Mean Time clock points to Noon.

At the bottom of the pages containing the Tide Tables for each month, and immediately underneath the Right Ascension and Declination of the Pole-Star, &c., are given the places of a few of the more conspicuous Nebulæ and Star Clusters. Most of these may be seen pretty well with a telescope of

from three to four inches aperture.

Following the Phases of the Moon on the first page of each month there will be found as well as the *times* of Apogee and Perigee the corresponding distances from the Earth in miles.

The mean distance of the Moon from the Earth is 238,840 miles.

Under the head "Eclipses, Occultations, and other Celestial Phenomena," in each month, will be found the "Mean Time of the Sun's Semidiameter passing the Meridian" for the 5th and 20th days. This will be useful in determining time by the Dipleidoscope or similar instrument, when, from the interference of clouds, &c., only one limb of the Sun is observed. From the values on the 5th and 20th, that for any other day can be easily inferred with sufficient accuracy, the change in the apparent diameter being very slow.

α CENTAURI.

It is supposed that this star, one of the brightest in the Southern Hemisphere, is the nearest of the fixed stars to the Earth. Dr. Gill gives to it a parallax of 0·75″, which would make its distance from the Earth 275,000 times that of the Sun. At the rate at which light travels through space, it would require four years and four months to reach the Earth from this star.

MAGNETIC ELEMENTS.

The following table of mean magnetic elements is derived from the observations made at Greenwich in the respective years, and apply to Greenwich only.

The diurnal variation of the magnetic declination at Greenwich is about 12′ in summer, and 7′ in winter. The needle occupies its mean position about 10*h*. a.m., and again about 6*h*. p.m., throughout the year. It reaches its most westerly position about 2*h*. p.m., and its most easterly position during the night or early morning, according to the season of the year.

Year.	Mean Magnetic Declination at Greenwich West.	Horizontal Magnetic Force in C. G. S. Units at Greenwich.	Mean Inclination or Dip of Needle at Greenwich.

THE ASTEROIDS, OR SMALL PLANETS.

Besides the Planets which have been already alluded to in this Almanack, there are a large number (now about 420) of small bodies revolving round the Sun in the space between the orbits of Mars and Jupiter.

The distances of the Planets from the Sun are observed to increase, outwards, in a certain progression, except in the case of Jupiter, which is farther away than, if this law was absolutely true, he should be. It was suggested by Kepler that there might be another Planet, then undiscovered, between the orbits of Mars and Jupiter. The suggestion was acted upon by astronomers, and a search instituted for the suspected Planet. The Planet Ceres was very soon found by the Italian astronomer Piazzi, answering, as far as its position in space was concerned, very well with the place of the predicted Planet. About a year later Pallas was discovered by Olbers. Two years later, while constructing Star Charts, Harding, of Lilienthal, discovered the third of the series, to which he gave the name of Juno. In 1807 Olbers discovered the fourth of the series, which was named Vesta by Gauss. No more were discovered till 1845, when Hencke found Astræa, since which time many new members have annually been added. It will be remembered that several of these small bodies have been lost sight of since the date of their discovery. Within the last two or three years telescopes, having objectives corrected for the photographic rays, have been generally introduced, and the recent additions have been made almost entirely by photography. By this method the number of those lost sight of since their first discovery has been reduced to a very few, probably less than half a dozen.

Venezuela	Henry Lord Boulton, *Consul*	Elias Rodrigues, 11 Montague St., W.C.

The Stuart family traces its origin to Walter FitzAlan, Lord of Oswestry, Co. Salop, who entered the service of David I., King of Scotland, and became Hereditary High Steward, and whose descendant, in the year 1371, ascended the throne of Scotland as Robert II. The first of the race who succeeded to the throne of England was James the First, who had reigned in Scotland as James VI.: he was the only son of the unfortunate Queen Mary, by her cousin Lord Darnley, grandson of the Princess Margaret, daughter of Henry VII. After the death of Queen Elizabeth in 1603, James was not only legal heir to the throne, but was expressly designated as her successor by the deceased queen. He succeeded to the throne 24th March, 1603, and after an inglorious reign of 22 years, died in 1625: he was succeeded by his son, Charles I., whose unhappy reign was closed by his execution in 1649. Cromwell and the Commonwealth followed, but the country tired of them, and the eldest son of Charles was restored in 1660. Charles II. died 6 February, 1685, leaving no issue by his queen, Katharine of Braganza. But that "most religious Sovereign" had had, by various mistresses, no fewer than twelve illegitimate children, among whom were Henry FitzRoy, Duke of Grafton, Charles Lennox, Duke of Richmond, and Charles Beauclerk, Duke of St. Albans. On each of these three sons were conferred enormous perpetual pensions. Charles was succeeded by his brother, James II., whose attacks on English liberties only served to deepen the feeling of aversion with which the House of Stuart had come to be regarded by a Protestant nation. The expulsion of James having been effected with little difficulty, 11 Dec. 1688, the usual course of descent was necessarily set aside, and the Crown was offered, by a National Convention sitting in form of Parliament, to William, Prince of Orange (grandson of Charles I.), and his wife Mary, who was the eldest daughter of James by his first wife, Anne Hyde, daughter of the Earl of Clarendon, and they accordingly ascended the throne as William III. and Mary II., 13 February, 1689. Mary died in 1694, and William in 1702. By the Act of Settlement he was succeeded by Anne, second daughter of King James, sister of Queen Mary, and wife of George, Prince of Denmark. By her husband Queen Anne had seventeen children, who all died young; William, created Duke of Gloucester, who lived the longest, died aged eleven. Queen Anne died in 1714, and with her the Stuart dynasty ended. In order to secure the Protestant Succession the Act of Settlement (12 & 13 Will. III. c. 2) was passed, by which the Crown, after the death of Queen Anne, was settled upon the Princess Sophia, Electress and Duchess Dowager of Hanover, the youngest daughter of Elizabeth, daughter of James I. of England, and the heirs of her body being Protestants. Sophia dying about seven weeks before Queen Anne, her eldest son, George Louis, Elector of Hanover, succeeded to the British throne, 1 August, 1714, as George I.

James II. died in France in 1701: he left one son, James Francis Edward, known as the "Old Pretender," who married the granddaughter of John Sobieski, King of Poland, and by her had two sons, Charles Edward, the "Young Pretender," who died in 1788, and Henry Benedict, Cardinal York, who died in 1807, aged 82.

The intrusion of the House of Hanover was not popular: the new king had no personal friends, while the adherents of the Stuarts were numerous and powerful. In 1715 they broke out in open rebellion, and again in 1745; both revolts were suppressed only after a great deal of vindictive bloodshed.

George I. came among us with little knowledge of English politics, and but little interest in English legislation. He was entirely ignorant of the language, and for literature and art he had the utmost contempt; but he was an excellent man of business, and while accepting our loyalty for what it was worth, filled his own pockets, the pockets of his German attendants, and of his German mistresses, got away from England as often as possible, and used the strength of this country for the advantage of his beloved Hanover. He married Sophia Dorothea, Princess of Celle, and by her had two children. Notwithstanding his own licentiousness he charged his wife with an intrigue with Count Koningsmark, whom he caused to be assassinated, and although her guilt was never proved, he confined her for life. He died while on his road to Hanover, and his only son succeeded him on the throne.

George II. was born at Hanover, 30 October, 1683, and came to England with his father in 1714. He married Carolina Wilhelmina Dorothea, daughter of the Margrave of Brandenburg-Anspach, and by her had a numerous family:—1, Frederick Lewis, Prince of Wales; 2, George, died in infancy; 3, William Augustus, Duke of Cumberland; 4, Anne, married to William, Prince of Orange, who died in 1751; 5, Amelia Sophia, born in 1711, died unmarried in 1786; 6, Elizabeth, who also died unmarried; 7, Mary, married to Frederick, Prince of Hesse-Cassel; and 8, Louisa, married to Frederick, afterwards King of Denmark. George II. died 25 Oct., 1760. Frederick Lewis, Prince of Wales, eldest son of George II., like his father and his grandfather, was born at Hanover, 20 Jan., 1707: in 1736 he was married to the Princess Augusta of Saxe-Coburg, shortly after which he quarrelled with his father, with whom he remained on bad terms all the rest of his life. He had a family of nine children; *sons*—1, George William Frederick, afterwards King George III.; 2, Edward Augustus, created Duke of York and Albany; 3, William Henry, created Duke of Gloucester; 4, Henry Frederick, created Duke of Cumberland; 5, Frederick William, who died young; *daughters*—1, Augusta, married to Charles, Duke of Brunswick; 2, Elizabeth Caroline, died young; 3, Louisa Anne, also died young; 4, Caroline Matilda, who at the age of fifteen was married to her cousin, Christian VII., King of Denmark; a most unhappy marriage. Prince Frederick died in 1751, nine years before his father, who lived till 1760, and was succeeded by his grandson, who ascended the throne as George III., and made it his boast that he was a true-born Englishman. George III. was succeeded by his son, who became George IV.; he died in 1830, and was succeeded by his brother, who reigned as William IV. On the accession of Queen Victoria, in 1837, the Crown of Hanover passed, under the provisions of the Salic Law, to her uncle, Ernest, Duke of Cumberland. In 1866 the Prussians, who had long coveted that country, found a pretext for seizing it and extinguishing the Monarchy.

Commanders of the Royal Victorian Order.
Companions of the Bath.
Companions of the Star of India.
Companions of St. Michael and St. George.
Companions of the Indian Empire.
Members 4th Class of the Royal Victorian Order.
Companions of the Distinguished Service Order.
Members 5th Class of the Royal Victorian Order.
Eldest Sons of the younger Sons of Peers.
Baronets' eldest Sons.
Eldest Sons of Knights—1. Garter; 2. Thistle; 3. St. Patrick; 4. The Bath; 5. Star of India; 6. St. Michael and St. George; 7. Indian Empire; 8. Knights Bachelors.
Younger Sons of the younger Sons of Peers.
Baronets' younger Sons.
Younger Sons of Knights in the same order as eldest Sons.
Gentlemen entitled to bear arms.

Women take the same rank as their husbands or as their brothers; but the daughter of a peer marrying a Commoner retains her Title as Lady or Honourable. Daughters of Peers rank next immediately after the wives of their elder brothers, and before their younger brothers' wives. Daughters of Peers marrying Peers of lower degree take the same order of precedency as that of their husbands; thus the daughter of a Duke marrying a Baron degrades to the rank of Baroness only, while her sisters married to commoners retain their rank and take precedence of the Baroness. Merely official rank on the husband's part does not give any similar precedence to the wife.

There are three Orders confined to Ladies: the Order of Victoria and Albert, the Crown of India, and the Royal Red Cross. But members are entitled to no special precedence.

LOCAL PRECEDENCY.—No written code of county or city order of precedence has been promulgated, but naturally in the county the Lord Lieutenant stands first, and secondly the Sheriff. In London and other Corporations, the Mayor stands first, after him the Sheriff, Aldermen, Chief Officers, and Livery. At Oxford and Cambridge the High Sheriff takes precedence of the Vice-Chancellor.

The Houses of Parliament.—i. The House of Lords,

the *Magnum Concilium* of the early chroniclers, consists of the Spiritual Lords of England (the 2 Archbishops and 24 Bishops), the Temporal Peers of England, Great Britain, and the United Kingdom, and in addition 16 Hereditary Peers of Scotland elected to each Parliament, and 28 Hereditary or created Peers of Ireland elected for life. A large number of Scottish and Irish Peers have English titles, by virtue of which they are entitled to a seat, and 2 of the elected Peers of Ireland (viz. the Lords De Montalt and Powerscourt) have, since their election, been created Peers of the United Kingdom. No Peer can take his seat if he be under age, of unsound mind, or bankrupt. Exclusive of 15 minors, the Assembly consists of 5 Princes of the Blood, 2 Archbishops, 21 Dukes, 22 Marquesses, 117 Earls, 27 Viscounts, 24 Bishops, 305 Barons, 16 Scottish and 28 (26 besides the 2 above) Irish Representative Peers—in all, 565. There are also 10 Ladies who are Peeresses in their own right (8 of England and the United Kingdom, and 2 of Scotland), whose titles and names are given at pages 127, 130.

b. signifies born; *s.*, succeeded; *m.*, married; *w.*, widower or widow; *div.*, divorced; *M.*, minor.

SPEAKER.—Hardinge Stanley, Lord Halsbury, Lord High Chancellor of England £4,000

Chairman of Committees.—The Earl of Morley £2,500

Deputy Speakers.—The Earl of Cork and Orrery, K.P., the Earl of Lathom, G.C.B., the Earl De Montalt, Viscount Oxenbridge, and Lord Herschell, G.C.B.

PRINCES OF THE BLOOD (6).—*Style*, His Royal Highness the Duke of ——. *Addressed as*, Sir, or more formally, May it please your Royal Highness.

		Eldest Son or Heir.
1841	Albert Edward, Prince of Wales, Duke of Cornwall (1337), &c., *b.* 1841, *m.*	Duke of York, *b.* 1865

Peerage of Ireland.

Irish Peers have an advantage over those of Scotland inasmuch as they are eligible for seats in the House of Commons, but for English constituencies only (*e.g.*, Viscount Valentia for Oxford City). Those marked * are also Peers of Great Britain or of the United Kingdom ; † are Representative Peers.

DUKES (2).

The Houses of Parliament.—ii. The House of Commons.

The constitution of Parliament, as it now exists, dates back almost eight centuries to the time of King John and Magna Charta. In this document there is a provision that "no scutage or aid shall be imposed in our realm save by the Commune Concilium of the realm," and to this Council were to be summoned the Prelates and Greater Barons individually, and the Lesser Barons and tenants in chief collectively. From this groundwork the National Assembly has grown up through the reigns of the various Sovereigns until it has assumed its present shape. The principal landmarks of this growth are, the summons of citizens from Boroughs by Simon de Montfort, the assumption of the maxim "Grievances precede supply" under the Tudors and Stuarts; and the appearance of the office of Prime Minister, and the abolition of the custom of the Sovereign presiding at meetings of the Ministers, under the House of Hanover.

The representation in the Commons varied considerably until 1885, since which date it has stood at 670:—465 members from England, 30 from Wales, 72 from Scotland, and 103 from Ireland. Previous to the Union with Scotland, in 1707, the House consisted of only 513 members; in that year 45 were added for the new Kingdom. In 1801, when Ireland became part of the Kingdom, 100 members were added, and in 1832 the Reform Act raised the representation of Ireland to 105, and that of Scotland to 53. Between this date and 1885 only one change was made, 7 members being added to Scotland in 1867. Many of the old abuses have been swept away by the different Acts of Reform, but much confusion still remains in the nomenclature of the various divisions and sub-divisions of the constituencies, in consequence of which the members for Shoreditch, for instance, must be sought under the headings Haggerston and Hoxton.

At the time of going to press there was one vacancy, caused by the resignation of Mr. J. Martin White, the member for Forfarshire.

The allotment of members to the great divisions of the Kingdom is shown in the following table, which also presents a view of the existing balance of parties as returned by each division:—

	Distribution of Members.				Present Position as to Parties		
	Counties.	Boroughs.	Universities.	Total Members.	Ministerial.	Opposition.	Majority.
England	234	226	5	465	347	118	229 *Min.*
Wales	19	11	—	30	8	22	14 *Opp.*
Scotland	39	31	2	72	32	40	8 *Opp.*
Ireland	85	16	2	103	21	82	61 *Opp.*
United Kingdom	377	284	9	670	408	262	146 *Min.*

More precisely, the parties stand as follows: Ministerialists, 408 (Conservatives 338, Liberal Unionists 70); Opposition, 262 (Liberals 180, Anti-Parnellites 71, Parnellites 11). The Labour Party is represented by 10 Liberals and 2 Anti-Parnellites.

The letters after the names are—*C.* Conservative, *U.* Liberal-Unionist, *L.* Liberal, *P.* Parnellite, *A.-P.* Anti-Parnellite, *S.* Socialist, *Ind.* Independent, *Lab.* Labour, and *Temp.* Temperance. Former Members who lost their seats at the General Election are denoted by an asterisk*, while those who contested or won constituencies other than they formerly represented are marked thus †.

The figures placed after the names of places give the number of electors on the register in the year 1896; the figures after the names of candidates represent the votes polled at the General Election (unless otherwise stated); the names of the successful candidates, now Members, are printed in italics.

The total number of Electors upon the register in 1896 is given below, together with the Registrar-General's estimate of the Population in the middle of the year:—

	England and Wales.		Scotland.		Ireland.		United Kingdom.	
	Total.	Per Member.	Total.	Per Member.	Total.	Per Member.	Total.	Per Member
Electors	5,038,818	10,180	647,178	8,988	729,473	7,082	6,415,469	9,575
Population	30,717,092	62,055	4,186,849	58,151	4,547,756	44,153	39,451,697	58,883

From this it will be seen that whereas England and Wales are represented by one member for every 10,000 electors, Scotland possesses the same advantages for every 9,000 electors, and Ireland for every 7,000.

The Fourteenth Parliament of Queen Victoria,

ELECTED JULY AND AUGUST, 1895.

Speaker, The Right Hon. William Court Gully, M.P. for the City of Carlisle ..... £5,000.
Chairman of Committees, James William Lowther, M.P. for Penrith Div. of Cumberland ..... £2,500.
Temporary Chairmen, Arthur O'Connor; John Edward Ellis; Rt. Hon. C. B. Stuart-Wortley, Q.C.; J. Grant Lawson; and Edmond R. Wodehouse.

England.

At the Autumn Assizes held at Carmarthen and Brecon, Criminal business only is taken; but at the Glamorgan Assize, Civil and Criminal business are taken.

THE NATIONAL BALANCE SHEET, 1895—96.

EVERY year there is presented to Parliament a National **Budget**, which may not unfairly be described as a balance-sheet presented for adoption by a Chairman (the Chancellor of the Exchequer) to a Board of Directors (the House of Commons) elected by Shareholders (almost the whole male population of the United Kingdom). Generally this Budget, or **Estimate of the Revenue for the financial year that is to come and proposal for the disbursement thereof**, is adopted, with or without modifications, after a somewhat lengthy debate thereon in the Commons, but there are occasions when a majority of the Directors manifests its dissatisfaction at the prospect laid before them, and this usually ends in the resignation of the Chairman and some of the Directors, followed by the re-election of others in their stead. In the financial year under examination there was a balance of actual revenue over actual expenditure of £4,209,472.

RECEIPTS.	£
Balance at Banks of England and Ireland, 31 March, 1895	6,300,827
Total Revenue (as detailed below)	101,973,829
Repayment of Advances—	
(1) By Mint	910,000
(2) By Italian Government for Sardinian Loan	63,893
Raised by the Renewal of Bills, &c.—	
(1) For Supply Purposes	6,619,700
(2) For Redemption Purposes	4,974,500
Raised by the Creation of Additional Debt	1,088,550
Amounts temporarily borrowed	3,100,000
Casual Receipts	3,465
Total Receipts	£125,034,764

ISSUES.	£
Total Expenditure (as detailed below)	97,764,357
To meet other Expenditure—	
(1) Imperial Defence Act (1888)	58,000
(2) Barracks Act (1890)	600,000
(3) Telegraphs Act (1892)	572,664
(4) Naval Works Act (1895)	860,000
Advance for Purchase of Bullion for Coinage	745,000
Bills and Bonds paid off—	
(1) For Supply Purposes	6,619,700
(2) For Redemption Purposes	4,974,500
Issues for Redemption of Debt	765,342
Temporary Advances Repaid	3,100,000
Balance at Banks of England and Ireland, 31 March, 1896	8,975,201
Total Issues	£125,034,764

THE NATIONAL INCOME

is mainly derived from the following sources:—(I.) EXCISE, (II.) CUSTOMS, (III.) PROPERTY AND INCOME TAX, (IV.) ESTATE DUTY, (V.) the POST OFFICE, and (VI.) STAMPS, and of these the two first-named account for nearly half the total amount received; considering this, and the additional fact that the contribution from the Post Office swells this amount to almost three-fifths of the whole, it will be readily seen that the majority of the National Income is derived from Voluntary Contributions and Indirect Taxation.

NATIONAL INCOME FOR THE LAST TWO YEARS.

	1894-95.	1895-96.
Excise	£26,050,000	£26,800,000
Customs	20,115,000	20,756,000
Property & Income Tax	15,600,000	16,100,000
Estate Duty		14,600,000
Post Office	10,760,000	11,380,000
Telegraph Service	2,580,000	2,840,000
Stamps (excluding Fee, &c., Stamps)	14,440,000	7,350,000
Land Tax	1,015,000	1,015,000
House Duty	1,420,000	1,495,000
Crown Lands (net)	410,000	415,000
Interest on Suez Shares	394,995	689,524
Miscellaneous	...	1,533,305
Total National Income	£94,683,762	£101,973,829

Of the sources of Income mentioned in the above Table—

(I.) EXCISE is derived mainly from **Intoxicants**, which account for £26,322,399 (*Spirits* £15,603,680, and *Beer* £10,718,719), the remainder accruing from **Licences** (£238,540) and **Railway Duty** (£259,312).

(II.) CUSTOMS: The principal contributory articles are **Tobacco** (£10,748,522), **Spirits** (£4,216,920), **Tea** (£3,746,194) and **Wine** (£1,254,994).

(III.) PROPERTY and INCOME TAX: To this PROPERTY contributes £4,971,100, which is made up of £4,793,600 from **Lands and Tenements**, and £177,500 from the **Occupation of Land**; the share from INCOME TAX (at 8*d.* in the £) is £11,011,744, being £1,300,300 from **Annuities and Dividends**; £8,587,244 from **Trades and Professions**, and £1,124,200 from **Public Offices, Annuities from Public Revenues, &c.**

(IV.) ESTATE DUTY: This total is made up of £7,564,644 from the estates of persons dying after August 1, 1894; £90,323 from those who died before that date; £2,730,861 from **Legacy**, and £1,051,512 from **Succession Duties**.

(V.) The POST OFFICE contribution is made up of £12,156,907 from the **Sale of Postage Stamps**, and £409,331 **poundage on Money and Postal Orders**.

(VI.) STAMPS: Under this heading are included **Deeds** £3,998,473, **Bills of Exchange** £672,487, and **Receipts, Drafts, and other** 1*d.* **stamps** £1,261,301.

The remaining items are comparatively small, but one of them, the interest on SUEZ CANAL SHARES (£665,113, interest and dividend on 173,502 ordinary shares, and £8,304 on 2,925 Actions de Jouissance), is worthy of mention; it is not until 1898 that the full rate of interest will be paid, but the estimated market value of these shares (for which £4,080,000 was paid) was on March 31, 1896, £22,627,000.

THE REVENUE AS CONTRIBUTED.

The following table shows the amount contributed to the Exchequer from each of the three kingdoms in the financial year 1895-96. Excise, Estate Duty, Stamps, Property and Income Tax, and Inhabited House Duty, and Land Tax alone are given, Customs being omitted, since the importation of goods takes place at Scottish or Irish ports for transfer to England and Wales, and *vice versa*, so that the returns are not representative of the consumption of the various nations.

NET AMOUNT OF INLAND REVENUE CONTRIBUTED BY ENGLAND AND WALES, SCOTLAND, AND IRELAND, TO THE INCOME OF THE UNITED KINGDOM IN 1895-96, AND THE AMOUNT CONTRIBUTED PER HEAD CALCULATED ACCORDING TO THE POPULATIONS OF THE CENSUS OF 1891.

	England and Wales.	Scotland.	Ireland.	United Kingdom.
Excise	£19,490,875	£6,798,454	£5,299,049	£31,588,378
Estate Duty	12,048,834	1,391,360	648,414	14,088,608
Stamps	6,625,114	469,265	244,852	7,339 231
Income and Property Tax	13,822,590	1,456,762	703,492	15,982,844
House Duty and Land	2,376,202	131,547	*nil.*	2,507,749
	£54,363,615	£10,247,388	£6,895,807	£71,506,810
Population, April, 1891	29,001,018	4,033,103	4,704,750	37,740,283
Amount per Head	£1 17*s.* 5¼*d.*	£2 10*s.* 9½*d.*	£1 9*s.* 3½*d.*	£1 17*s.* 10½*d.*

THE NATIONAL EXPENDITURE.

The main headings under which the Expenditure is accounted for are as follow:—

I.—CONSOLIDATED FUND SERVICES:

	1894-95	1895-96.
A The National Debt (see pp. 182-83)	£25,000,000	£25,000,000
B Civil List	407,774	408,022
Annuities to the Royal Family (p. 184)	173,000	173,000
Annuities and Pensions, various	143,758	132,312
Salaries and Allowances	81,618	81,277
Courts of Justice	514,633	515,713
Miscellaneous Services	321,638	291,033
	£26,642,421	£26,601,357

II.—*SUPPLY SERVICES:

	1894-95.	1895-96.
Navy	£17,195,645	£19,724,000
Army	17,993,393	18,460,000
,, Ordnance Factories	200	200
Miscellaneous Civ Services	19,133,828	19,800,000
Customs and Inland Rev.	2,646,000	2,702,000
Post Office	6,869,000	7,018,000
Telegraph Service	2,764,000	2,744,000
Post Office Packet Service	727,000	715,000
	£67,529,066	£71,163,000
Total Expenditure	£94,171,487	£97,764,357

* Full particulars of the way in which the sums accounted for above are to be expended by the various departments in the financial year 1896-7 will be found under the Navy Estimates, pp. 234-236; the Army Estimates, pp. 215-217; and those of the Civil Service and Revenue Departments on pp. 185-187; the National Debt being fully treated on pp. 182-183.

LOCAL TAXATION ACCOUNTS.

The following table showing the **Payments to the Local Taxation Accounts** consists of sums which in reality are part of the National Income, but never actually reach the Exchequer. The amounts mentioned are collected for local authorities by the Imperial officers in accordance with certain Acts of Parliament, and are as follow: (1) Duties on Local Taxation Licences, and Penalties in connection therewith, the proceeds of which are distributed to the different counties of Great Britain in accordance with the amount certified to have been collected in each. (2) One-half of the Estate (Probate) Duties, which is shared by England and Wales (4ths), Scotland ($\frac{1}{10}$ths), and Ireland ($\frac{1}{20}$th): and (3) Certain Additional Beer and Spirit Duties, the amount derived therefrom being paid to the three accounts in the same proportion as the Estate Duties.

PAYMENTS TO THE LOCAL TAXATION ACCOUNTS, IN THE YEAR ENDED 31ST MARCH, 1856.

	England.	Scotland.	Ireland.	Total.
LOCAL TAXATION (Customs and Excise) DUTIES:	£	£	£	£
Additional Beer Duty (CUSTOMS)	400	55	44	499
Additional Spirit Duty ,,	162,393	22,328	18,270	202,991
Additional Beer Duty (EXCISE)	332,823	44,151	35,305	412,279
Additional Spirit Duty ,,	620,923	85,564	67,216	773,703
LICENCES (including Penalties)	3,188,448	335,653	.....	3,524,102
SHARE OF ESTATE DUTY, &c.	1,952,034	267,405	233,104	2,452,542
	6,257,021	755,156	353,939	7,366,116

National Debts are of comparatively recent origin. In the unsettled state of the Middle Ages they were impossible; but as nations settled down and showed something like a feeling of responsibility, patriotism, or more frequently speculation, prevailed, and every country now has a National Debt. The example of England, which has always paid its way and promptly met the demand for interest, has exercised an influence upon the borrowing power of other nations.

The British Debt took many years to reach the gigantic proportions it assumed under the Regency of George IV., and any serious reduction was regarded as almost hopeless; but it has been so vigorously and so successfully attacked during the past twenty-five years that it bids fair to be all but extinguished within a reasonable limit of time. Even so lately as 1883 the Funded Debt stood at 713 millions; it is now under £590,000,000, and within the next twenty years, at the present rate of shrinkage, will be nearly 200 millions less.

In January, 1816, after the great Continental wars, our indebtedness was over nine hundred millions sterling. Within a few years this was reduced by one hundred millions, and after that by a comparatively small sum nearly every year. Additions were made when slavery was abolished in 1833, and at the time of the Crimean War. In 1816 the debt amounted to £45 a head of the population; its present amount is a little over £14 (£14 6*s.* 8*d.*)

The *nominal* amount of debt in January, 1816, was £885,186,323; but by adopting the present method of capitalizing the Annuities then outstanding as three per cent. stock, the following figures will represent the actual state of the Debt on that date. Reckoned in this manner it stood as follows:—

Funded Debt	£816,312,000
Unfunded Debt	44,727,000
Terminable Annuities capitalized...	39,397,000
	£900,436,000

This large amount of Debt was the growth of many years, and nearly all had been raised for foreign wars. There was a trifling sum (£664,263) due when the "glorious revolution" of 1688 brought over the Dutch King William to save the country from Popery, arbitrary government, and other evils, but in carrying out these projects he succeeded in adding to the Debt nearly sixteen millions during the twelve years of his reign. Under Queen Anne, Marlborough added to the glories of the country, and helped to swell the Debt, which at the time of the Queen's death had increased by nearly thirty-eight millions. Under the first George the Debt decreased slightly; but George the Second in 33 years left the country nearly eighty-seven millions worse off than he found it. During the first twelve years of George III. the Debt was again reduced by about ten millions, and at the time of the revolt of the American Colonies it was under one hundred and thirty millions, an amount which frightened all the political economists of that day. Undismayed at this, the obstinate king and his weak ministers pressed on the war, "entirely regardless of expense." The bill was a heavy one, and added one hundred and twenty-one millions more to the permanent Debt. On the conclusion of the disastrous war, which had all along been unpopular, there was a considerable outcry at the waste: some efforts were made to reduce the amount, and in the nine years from 1784 to 1793, ten and a half millions were paid off, no less than £2,421,681 of this sum disappearing in one year—1792.

The French revolutionary war began in 1793, and with a short interval of exhaustion, called "Peace," lasted till 1815, when Bonaparte was sent to St. Helena, and the forty years' real peace commenced. During these twenty-three years of war, money was borrowed in the most extravagant manner. From 1793 to 1801 the average price of £100 three per cent. Stock was £57 17*s.* 6*d.*, and from 1803 to the conclusion of the War, £60 17*s.* 6*d.* Had the Government adopted an opposite plan, and for every hundred pounds borrowed received the whole amount, paying five or six, or even seven, per cent., the gross indebtedness of the country on the termination of the War would have been several hundred millions less, and the high rate of interest could have been gradually reduced. Such, however, was the recklessness of ministers, that in 1798 they raised a loan of £3,000,000, at the rate of £200 three per cent. Stock and 5*s.* long annuity for every hundred pounds borrowed. Another instance may be mentioned. In 1815 a loan of £36,000,000 was negotiated, every subscriber receiving £174 three per cent. Stock, and £10 four per cent. With loans raised on such terms it is easy to understand how rapidly the Debt accumulated. The following loans were raised from 1793 to 1816:—

Year.	£	Year.	£	Year.	£
1793	4,877,956	1801	27,305,271	1809	12,298,375
1794	6,998,389	1802	14,638,254	1810	7,792,444
1795	30,464,831	1803	8,752,761	1811	19,143,953
1796	22,244,982	1804	14,570,763	1812	24,790,697
1797	30,356,873	1805	16,649,801	1813	39,649,282
1798	16,858,503	1806	13,035,344	1814	34,563,603
1799	21,714,863	1807	10,432,934	1815	20,241,807
1800	23,030,529	1808	12,095,044	1816	514,059

With the return of peace efforts were made to reduce the Debt; but this was no easy matter. In 1813, the national expenditure had reached the unprecedented amount of £108,397,645, of which £68,748,363 was raised by taxation, and £39,640,282 by loans. In 1815, the Waterloo year, the amount raised by taxation had increased to £72,210,512; but in 1817, the War being finished, taxation was reduced to £52,055,913, and out of this the sum of £1,826,814 was applied to the reduction of Debt. The following amounts were paid off from 1817-37:

Year.	£	Year.	£	Year.	£
1817	1,826,814	1824	7,456,559	1831	2,673,858
1818	1,624,606	1825	9,900,725	1832	5,696
1819	3,163,130	1826	1,195,531	1833	1,023,784
1820	1,918,019	1827	2,023,028	1834	1,776,378
1821	4,104,457	1828	4,667,965	1835	1,270,050
1822	2,962,564	1829	2,760,003	1836	1,590,727
1823	5,261,725	1830	1,935,465	1837	1,985,885

1837-1896.....£42,882,465.

The gross Liabilities of the State on March 31, 1896, were as follows:—

I. The Funded Debt	
(A) Permanent	£583,146,878
(B) Annuities	49,351,465
II. The Unfunded Debt	9,975,800
III. Other Capital Liabilities	4,065,962
Total Debt	£652,540,105

From this total must be deducted the following assets:—

Value of Suez Shares	£22,627,000
Unrepaid Loans	789,063
Present value of Annuity from Australasian Colonies	150,291
Total Assets	£23,566,354

leaving the net Liabilities at £628,973,751.

The Debt is of three descriptions:—I. Funded (A) Permanent, (B), Terminable; II. Unfunded; III. Certain other Liabilities.

I. Funded Debt.—A. Permanent.

That is, Debt which the Government is not under obligation to pay off at any fixed time. This consisted of the following stock on March 31, 1896:—

2¾ per cent. *Consols*	£525,481,665
2¾ per cent. 1905	4,647,223
2½ per cent.	31,954,821
Exchequer Bonds 2½ per cent.	417,300
Bank of England Debt	11,015,100
Bank of Ireland do.	2,630,769
Book Debt 2¾ per cent.	13,000,000
	£589,146,878

B. Terminable Annuities.

These are a description of Sinking Fund by means of which a considerable portion of debt is paid off every year, and after a certain time the capitalized sum entirely extinguished. It may be shortly explained that the Treasury is empowered to give an Annuity for a certain number of years in exchange for permanent stock. Thus A transfers to the Treasury £1,000 of 2¾ per cent. stock on which he is receiving £27 10s. a year; the Treasury in return undertakes to pay A £55 a year for twenty years or thereabouts. The Treasury cancels the £1,000 stock, and thus reduces, say, Consols by that amount; but during twenty years it pays a much larger sum than it would have paid if it had left matters alone.

When the capital of the Debt is computed it is necessary to ascertain the capital value of these terminable Annuities. For this purpose the Government actuary calculates the amount of 2¾ per cent. stock equivalent in value to the terminable Annuities. When the normal rate of interest is reduced to 2½ per cent., a corresponding reduction will be made in the computation of Annuities.

The total amount of the terminable Annuity Debt, 31st March, 1896, was computed at £49,351,465; in 1884 it stood at £91,682,469.

II. Unfunded Debt.

The Unfunded Debt consists of loans, money borrowed for short periods, which the Government is bound to pay off at certain dates, and is represented by certain loans having currency for periods varying from a few months to five more years. On March 31, 1896, these were:—

Exchequer Bills (for supply)	£3,131,100
Treasury Bills ,, ,,	6,519,700
Exchequer Bonds (for Redemption purposes)	325,000
Total	£9,975,800

III. Other Capital Liabilities.

These sums are not included in the Capital on which Interest is arranged for in the Permanent charge.

On March 31, 1896, these sums stood as follows:—

Imperial Defence Act (1888) Annuities	£449,705
Russian Dutch Loan Annuity	411,827
Under Barracks Act, 1890	2,387,362
,, Telegraph Act, 1892	436,113
,, Naval Works Act, 1895	380,995
Total	£4,065,962

There are also sundry Contingent or Nominal Liabilities which the State is not likely to be called upon to any material extent to discharge. On March 31, 1896, these amounted to the following sums:—

Liability to Suitors (Chancery)	£2,327,823
,, ,, Bankrupts' Estates	1,108,777
,, ,, Suitors (Ireland)	245,151
Fee and other Funds ,,	163,285
Court of Bankruptcy ,,	35,042
Unclaimed Dividends (B. of England)	243,979
,, South Sea Annuities, &c. ,,	39,789
,, Dividends (Bank of Ireland)	1,459
Life Annuities, &c. (Nat. Debt Office)	25,000
Uncl. Dividend acct. ,, ,,	159,971
Total	£4,330,274

The Cost of the Debt for the last two years is detailed below:—

Debt:	1895.	1896.
Int. of Funded Debt	£16,069,869	£16,110,274
Terminable Annuities	6,422,410	6,422,138
Unfunded	461,830	118,367
Adjustment, 1895	150,675	...
Cost of management	176,953	176,447
New Sinking Fund	1,718,263	2,152,774
Total Charge for Debt	£25,000,000	£24,980,000

The following table shows the gross amount under the various heads and the Annual Charge of National Debt for the past twelve years:—

Year.	Gross Amount of the Debt.					Cost of Interest and Management.		
	Funded Debt.		Unfunded Debt.	Other Liabilities.	Gross total.	Funded Debt.		Unfunded and cost of Management, &c.
	Permanent.	Annuities.				Permanent.	Annuities.	
	£	£	£	£		£	£	£
1885	640,181,896	86,115,658	14,033,100	3,794,035	743,124,681	18,976,393	8,999,065	908,215
1886	638,849,694	85,829,917	17,602,800	2,757,433	745,039,844	18,793,179	3,502,134	476,046
1887	637,637,640	81,123,148	17,517,900	2,500,488	738,770,176	18,771,838	8,131,218	462,311
1888	609,740,743	78,449,230	17,385,100	1,152,508	706,727,581	18,187,386	6,614,704	1,197,910
1889	607,057,811	75,279,438	16,093,322	870,198	699,300,769	18,361,288	5,907,495	1,731,217
1890	585,959,852	71,731,869	32,252,305	619,812	690,563,838	16,836,000	6,555,596	1,607,938

CIVIL SERVICE, GROSS, £21,214,703; REVENUE DEPARTMENTS, £14,152,246. TOTAL, £35,366,949.

THE Estimates for the Civil Service as submitted annually to Parliament are in two sections—one, divided into seven classes, shows the amounts required for the Civil Departments of the Government; the other, under the head of Revenue Departments, deals with the Customs, Inland Revenue, and the Post Office. This latter section does not include the cost of buildings, that being shown under Class I. of the first section; neither does it include rents payable, except in the case of the Post Office.

The following table exhibits the cost of the two sections for three years, and brings out the growth of the expenditure:—

Year.	Gross Estimate.	Supplementary Estimate.	Estimated Receipts, &c	Not voted and transferred.	Net Estimate.	Actual Expenditure.	Revenue Departments.
	£	£	£	£	£	£	£
1894-95	20,021,785	402,689	1,149,934	1,000	17,538,285	18,841,038	13,619,982
1895-96	20,647,410	186,000	1,142,016	1,000	19,297,744	18,155,728	13,761,322
1896-97	21,214,703	551,266	1,120,312	—	19,795,040	—	14,152,246

The gross total of the several classes is exhibited below:—

1. Public Works and Buildings	£1,972,573
2. Salaries and Expenses	2,571,806
3. Law and Justice	4,446,068
4. Education, Science, and Art	10,566,384
5. Foreign and Colonial Services ...	861,994
6. Non-effective & Charitable Services	730,389
7. Miscellaneous	65,489
Total.....	£21,214,703

The following are the leading details, together with the principal variations between 1896-97 and the preceding year (the items for which in many cases underwent alteration):—

Appropriations in aid, £37,070.

In the Account departments a number of females are employed, one superintendent receiving £293, another £229, seven principal clerks £140 to £190, twenty-seven others from £105 to £130, and 162 from £65 to £100.

In the Telegraph department of the Central Station a matron receives £300, three supervisors £160 to £250, and six ditto £160 to £200, eighteen assistants £120 to £160, and forty others £100 to £120; while of the general body of telegraphists, 246 receive from 30*s.* to 38*s.* per week, and 555 from 10*s.* to 30*s.*

DUCHY OF CORNWALL.

The accounts of this Duchy, brought up to 31st December, 1895, give the following results for the year:—Balance from last year, £5,911; rents and profits of courts accruing to the Prince of Wales, £64,329; tithe rent-charges, recoverable, £2,691; royalties of coal-mines in Somerset, £892; royalties and reservations of dues, &c. £1,075; annuity from the Consolidated Fund in lieu of tin coinage dues, £16,217; dividends on stock, £6,496; giving (with smaller items) total income of £98,181; the arrears have again increased, and now amount to £24,956. The payments were—£55,074 to the Prince; outlay for the benefit of the estate, £14,022; deductions under various Acts of Parliament, £13,255; superannuations, &c. £1,808; expenses of management, £8,766; leaving a balance in favour of 1895 of £4,521. The capital account stood in December, 1895, at £10,784 in cash, and £221,297 in various securities.

DUCHY OF LANCASTER.

The accounts of this Duchy are brought up to 21st December, 1895. The balance in hand at the commencement of the year was £12,714. The net rents and profits accruing to Her Majesty were £50,719; royalties, rents, &c. £15,504; dividends of stocks, £600; escheats and forfeitures, £1,685, producing with various items of minor importance, a total gross income of £88,000, but of this only £82,302 was paid: the arrears on the 21st December amounted to £5,698. On the disbursement side £48,000 was paid to Her Majesty; in various payments, £34,302, including a payment of £2,000 to the Chancellor, leaving a balance of £13,698. The capital account stood in December, 1895, at nil in cash, and £21,819 in securities. The revenues of the Duchy have increased from £29,000 in 1847 to £82,302 net in 1894.

WOODS, FORESTS, AND LAND REVENUES.

The accounts of this department for the year ending March 31st, 1896, are divided under the heads of "Capital" and "Income." Under the head "Capital," commencing with a balance in cash of £46,001, and of stock of £184,533, there was received £84,324 from sales of estates, and of detached and outlying properties, from enfranchisements of copyholds, proceeds from mines, repayments of advances, dividends on stocks, &c. A total sum of £2,180 was expended in the purchase of estates; £861 in redemption of land tax; £13,724 in permanent improvements; miscellaneous, £87; leaving a balance of £55,718 in cash and of £227,164 in stock. The expenditure from income included expenses of collection, surveys, repairs, rates, taxes, donations, &c., £62,479; Windsor Park, £21,220; Royal forests and woodlands, £18,477. The gross income was £529,134.

* RELATIVE RANK IN ARMY AND NAVY.

		Rank with
Field Marshals	According to date of Commission.	Admirals of the Fleet.
Generals		Admirals.
Lieut.-Generals		Vice-Admirals.
Major-Generals		Rear-Admirals.
Brigadier-Gens.		Commodores, 1st and 2nd Class.
Colonels		Captains of 3 years.
Lieut.-Colonels		Captains under 3 years and Staff Captains.
Lieut.-Colonels but Senior to		Commanders & Staff Commanders.
Majors, according to date of Commission or Order.		Lieutenants, and Navigating Lieutenants of 8 years' standing.
Captains, according to date of Commission or Order.		Lieutenants, and Navigating Lieutenants under 8 years' standing.
Lieutenants, according to date of Commission or Order.		Sub-Lieutenants.

* The title and rank of officers of the Royal Indian Marine are similar to those of the Royal Naval Reserves, but senior to those officers in their respective ranks.

ARMY AGENTS.

1. Cox & Co., 16 Charing Cross.
2. Holt & Co., 17 Whitehall Place.
3. Hopkinson (Charles) & Sons, 3 Regent Street.
4. M'Grigor, Sir Charles R., Bart., & Co., 25 Charles Street, St. James's Square.

NAVY AND PRIZE AGENTS.

Banton, Mackrell, & Co., 26 Budge Row, Cannon Street.
Burnett & Co., 123 Pall Mall.
Stilwell & Sons, 21 Great George Street.
Woodhead & Co., 44 Charing Cross.

The Military Administration.

War Office, Pall Mall, S.W. Hours, 10 to 5.

* Additional to regimental pay.

The Army Estimates for 1896–97.

GROSS ESTIMATE, £20,940,778; NET INCREASE, £2,800; ORDNANCE FACTORIES, GROSS, £2,888,000.

THERE is a small net increase in the amount required for the year. The items of increase are found chiefly under the heads of Regimental Pay, Manœuvres and Warlike Stores: the decrease to fall in price of Provisions and Forage and the Works Account.

Year.	Gross Estimate.	Supplementary	Appropriations in Aid.	Net Estimate.	Expended.	No. of Men.
	£	£	£	£	£	
1894-95	21,004,390	100	2,923,490	18,080,900	17,935,920	155,347
1895-96	20,805,758	70,000	2,821,958	17,983,800	—	155,403
1896-97	20,940,778	—	2,884,178	18,056,600	17,770,095	156,174

The number of Regular Forces at home and in the Colonies is 147,105; Army Reserve, 80,100; Militia, 140,104; Yeomanry, 11,678; Volunteers, 263,528. The total of all branches, including the Regular Forces on the Indian establishment, is 715,683, of whom 665,154 are classed as "effectives."

The number of horses and mules (regimental), exclusive of officers' horses, is, on the British Establishment, 14,716; and on the Indian Establishment, 12,180.

In the following divisions, the gross total of each vote is given, and in the subsequent details will be found a comparison with the principal items of the previous year, and the net amount of each vote after deducting "Appropriations in Aid":—

EFFECTIVE SERVICES.

1. Pay, &c., of the Army	£7,036,500
2. Medical Establishments: Pay, &c.	296,100
3. Militia, Pay, &c.	561,000
4. Yeomanry, Pay, &c.	73,610
5. Volunteers, Pay, &c.	625,000
6. Transport and Remounts	682,200
7. Provisions, Forage, &c.	2,557,200
8. Clothing Establishments, &c.	1,248,500
9. Warlike and other Stores	2,436,000
10. Works, Buildings, and Repairs	1,067,100
11. Military Education: Pay, &c.	176,300
12. Miscellaneous Effective Services	58,200
13. War Office: Salaries and Charges	253,550
Total of Effective Services	£17,070,660

NON-EFFECTIVE SERVICES.

14. Retired Pay, Half-pay, &c., for Officers	£1,868,127
15. Pensions for Warrant Officers, &c.	1,829,020
16. Superannuation, &c. Allowances	172,971
Total	£20,940,778

The particulars of the 16 heads under which these Estimates are voted are as follow:—

1. *Pay, &c., of the Army (General Staff, Regiments, Reserve, and Departments).—General Staff, &c.:* Pay, &c., £188,000—increase £1,700; contingencies £4,000—increase £100; regimental pay £5,132,000—increase £4,550; regimental extra pay £390,000—increase £8,600; regimental allowances £122,000—decrease £7,400; regimental extra-duty pay £49,500—increase £50; agency £1,900—as last year; pay of supply, transport, and ordnance store establishments £125,000—increase £20,100; recruiting expenses £21,000—decrease £800; pay, &c. of Army pay department £109,200—decrease £2,350; veterinary department, pay, &c. £26,500; school of gunnery £20,800—increase £600; school of engineering £18,200—increase £100; school of musketry £6,100; gymnastic instruction £5,900; miscellaneous army schools £2,700; training army artificers in ordnance factories £1,600; funeral expenses £1,600; and for miscellaneous and unforeseen charges £860. The total is £6,227,060, being an increase of £15,750 upon the amount required in the previous year. *Chaplains' Department:* The pay of chaplains is £26,400—decrease £700; pay of officiating clergymen £32,700—increase £500; contingencies, including payments for buildings £1,040—as last year. The total for the department is £60,140—a decrease of £200. There are 84 chaplains, in four classes, besides chapel clerks, orderlies, &c. *Staff of Military Prisons and Charges for Administration of Military Law:* Pay, &c., of the establishment of the Judge Advocate-General and courts-martial expenses £3,100; pay of military prisons £13,300—increase £200; provost staff and military police £11,100—as last year; rewards, &c., for apprehension of deserters £2,800—decrease £500. *Pay, &c., of Army Reserve:* Class I. £718,900—decrease £1,960; class II. £100—decrease £40. The total of the vote is reduced by £1,174,000, appropriations in aid, leaving £5,862,500 as the net amount, a decrease of £140,500.

2. *Medical Establishment.*—The pay, &c., of the medical staff amounts to £233,200; pay of militia surgeons and civilian practitioners £10,600; pay of Medical Staff Corps, &c., £37,000; and cost of medicines £14,000. The medical staff consists of six surgeon-major-generals, 14 surgeon-colonels, and 594 executive medical officers—total 614, exclusive of the Indian Establishment, which numbers 335.

3. *Militia, Pay and Allowances.*—Regimental pay £315,000; extra pay of officers and men £7,100; regimental allowances £44,200—decrease £1,300; extra-duty pay £1,500; bounty and expenses of enrolment £190,600—decrease £10,800; prison staff £1,200—decrease £200; contingencies £1,400. The Militia, officers and men (including Artillery, Engineers, Infantry, Militia Medical Staff Corps, Channel Islands Militia, Malta Militia, St. Helena Militia, and Bermuda Militia), number 140,104, of whom 108,746 were present at training in 1895; and the Militia Reserve, 30,000. The permanent Militia staff, consisting of 4,749 officers, sergeants, trumpeters, buglers, drummers, and corporals, is charged under Vote 1.

4. *Yeomanry, Pay and Allowances.*—Regimental pay £45,400; extra pay and allowances £26,500; and miscellaneous charges £1,110. The permanent staff consists of 165 officers and sergeants, while the yeomen, officers, and men number 11,513, giving a total of 11,678; the number present at training in 1894 being 8,493.

5. *Volunteer Corps, Pay and Allowances.*—The pay of adjutants is £75,500—decrease £500;

Digitized by

of sergeant instructors £98,000—increase £400; capitation grants £262,000—decrease £231,500; allowances in aid of camps £128,000—increase £13,000; miscellaneous charges £61,500—increase £19,000. The establishment of the force is, including permanent staff:—Staff of Volunteer Brigades, 165; Honourable Artillery Company, 897; light horse, 304; artillery, 47,720; engineers, 14,285; rifle volunteers, 197,434; and medical staff corps, 1,591. The number of efficient volunteers, including staff, is stated as 226,500, of whom 225,700 receive a capitation grant of 35*s.* per head, and 800 a grant of 10*s.* per head. A special capitation allowance of 65*s.* is made for 1,200 engineer volunteers efficient in submarine mining, one of 50*s.* for 19,800 proficient officers and sergeants, one of 30*s.* for 1,578 officers passed in tactics and signalling, one of 2*s.* for 135,500 men in possession of a greatcoat, and one of 1*s.* for miscellaneous expenditure of 12,000 engineer volunteers, and to 217,000 efficient volunteers possessed of a complete equipment, the travelling allowance for attendance at united drill, &c., being £17,500.

6. *Transport and Remounts.*—Land and coastwise transport in the United Kingdom £368,600—increase £35,500; land and inland water transport in the Colonies £25,500—decrease £6,500; conveyance of troops and stores by sea £105,000—decrease £14,400; purchase of remounts £83,100—increase £2,800. The establishment number of horses is 15,294, and the number to be purchased 1,703.

7. *Provisions, Forage, and other Supplies.*—Cost of provisions, and allowances in lieu thereof, £1,355,500—decrease £700; forage, and allowances in lieu, and of paillasse straw £400,700—decrease £35,300; fuel and light, and allowances in lieu £335,700—decrease £27,950; field allowances £35,300—increase £9,300; rents, rates, and water supply £131,250—decrease £3,700; lodging allowances £227,100—decrease £3,650; colonial allowances £27,400—decrease £1,150; newspaper advertisements £3,150—decrease £300; barrack services £41,100—decrease £350.

8. *Clothing Establishments and Services.—Army Clothing Department:* Pay of clothing establishments £12,100. *Clothing Factory:* Establishment pay £500—as last year; wages £65,000—increase £1,000; materials £215,000—as last year; machinery £1,700—increase £1,300. It appears that the approximate annual cost of clothing per man for rank and file varies from £7 1*s.* 4*d.* in the Life Guards to £2 14*s.* 8*d.* in the West India Regiment, the Foot Guards being £4 13*s.* 8*d.*, Infantry £2 18*s.* 9*d.*, Highland regiments £3 15*s.* 3*d.* kilted, and if trewed £3 4*s.* 11*d.*

9. *Warlike and other Stores: Supply and Repair.*—Pay of Civilian Staff and wages of Army Ordnance Department £317,900—increase £5,150; contingent expenses £300: guns and carriages £326,750—increase £184,760; ammunition £654,640—increase £101,890; small arms £436,400—decrease £4,850; miscellaneous services £230,550—decrease £121,100; equipment stores £228,600—increase £44,350; barrack, hospital, and prison stores £170,500—decrease £33,400; engineer stores £51,350—increase £7,850. Small arms include rifles and bayonets £321,100; carbines and pistols £54,300; swords and lances £11,000; repair and browning of arms, and miscellaneous and spare parts £50,000. Harness and saddlery amount to £47,300; camp equipage £55,050; accoutrements £97,300; transport vehicles £28,950. The vote is reduced by £303,000 appropriations in aid to £2,133,000, a net increase of £180,150.

10. *Works, Buildings, and Repairs: Cost, Pay, &c., of the Royal Engineer Superintending Staff.*—Salaries of superintending staff £114,560—increase £2,690. *New works, additions, &c. £1,000 and upwards each:* Fortifications £73,600—decrease £37,400; ordnance store buildings £31,590—decrease £11,304; barracks £123,348—decrease £8,844. *New works, &c., of less than £1,000 each:* Fortifications, &c. £29,900—decrease £1,000; ordnance store buildings £15,750—decrease £2,000; barracks £75,000—as last year. *Ordinary and current repairs:* Fortifications £46,800—increase £3,000; ordnance store buildings £28,900—as last year; barracks £290,000—increase £5,000; grants in aid of works £23,220—increase £10,320. The subordinate officers of the Royal Engineer Department whose salaries are provided for under this vote are 663 in number, absorbing £104,860.

11. *Military Education.*—The heads of expenditure are:—Office of the Director-General £8,000—increase £200; Royal Military Academy £32,900—decrease £1,200; Royal Military College £43,800—increase £200; Staff College £7,700—increase £200; regimental and garrison schools and libraries £45,500—increase £1,000; Duke of York's Royal Military School £10,100; Royal Hibernian Military School £7,500—as last year; Artillery College £9,900—increase £700; Army Medical School (Netley) £7,700—increase £100; School of Music (Kneller Hall) £2,200—as last year; rewards for proficiency in languages £1,000 (the amounts and the number of recipients are not shown). Appropriations in aid reduce the net vote to £119,000—increase £4,200. The chief expenses at the Royal Military Academy are, the Governor's salary £1,500, the salaries of other officers being £2,035 for the military department, besides £6,521 for warrant officers, &c., and £514 for general expenses. The professors and teachers receive £12,803; and the expenses of students figure at £9,437. At the Royal Military College the aggregate salaries of the military officers amount to £4,597, of which the Governor receives £1,500, and the professorial salaries are £9,127. At the Staff College the salaries of professors are £3,800, that of the commandant being £1,000. The charge for regimental and garrison schools is £40,200; to which is added the sum of £5,300, being 50*s.* per annum to each troop, battery, or company on the establishment, with pay of 15 permanent librarians, and extra-duty pay to certain others.

12. *Miscellaneous Effective Services.*—The chief sub-heads are—Ordnance Committee £10,300; rewards to inventors £3,500; Royal Artillery Institution and Royal Engineer Institute £900; Tower Armouries £3,060; grants in aid of certain institutions £4,335; military attachés abroad £4,900; medals £2,300; police £27,300.

13. *War Office.*—The salaries of the staff amount to £89,900—decrease £1,317—of which £10,450 belongs to the department of the Secretary of State, £69,700 to the department of the Commander-in-Chief, £7,650 to that of the Financial Secretary, and £2,100 to the Contract Department. Details:—Secretary of State £5,000; Private Secretaries, additional pay to, £450; Parliamentary Under-Secretary £1,500; Private Secretary additional pay to, £150; Permanent Under-Secretary £2,000; Private Secretary, additional pay to £150; Assistant Under-Secretary £1,200. The Commander-in-Chief receives £4,500; four Aides-de-Camp and Private Secretary £3,000; the Adjutant-General £2,700; the Quarter-Master-

General £2,100; and the Military Secretary £1,500. Three Deputy-Adjutants-General receive £1,500 each; the Inspector-General of Recruiting £1,500; the Director of Intelligence Branch £1,500; the Inspector-General of Remounts £1,200; the Inspector-General of Ordnance £2,100; the Inspector-General of Fortifications £2,100; two Deputy Inspectors £1,200 each; four Assistants £3,400; the Director-General, Medical Department £1,500; the Surgeon-General £1,300; and the Chaplain-General £1,000. The Financial Secretary receives £1,500; the Accountant-General £1,800; one deputy £1,200; three assistants £3,000; the Director of Contracts £1,200; and the Assistant Director £900. The staff numbers 89, and the civil clerks are 359, with salaries of £107,126. The surveyors and clerks of works number 60, receiving £17,385; and the military clerks 96, receiving £13,039.

The Votes for Non-Effective Services are:—

14. *Retired Pay, Half Pay, &c., for Officers and others.—Distinguished Services:* Rewards to officers amount to £12,200, the sums ranging from £50 to £100 each. *Half-pay, &c.:* Officers eligible for employment—46 field marshals and general officers £32,000—increase £2,000; 206 regimental officers £53,000—decrease £3,500; 11 departmental officers £2,200—decrease £500: total £87,200—a decrease of £2,000. *Retired Pay and Gratuities, &c.:* The retired pay of 252 general officers amounts to £205,000—decrease £2,800; of 3,017 regimental officers £836,000—increase £37,000; and of 929 departmental officers £332,800—decrease £1,400. Gratuities to officers in lieu of pensions amount to £72,000—as last year; allowance to 5 children of deceased foreign officers £30; and annuity paid to the National Debt Commissioners for advances made in commutation of pay £50,938—decrease £11,532. Compensation to be awarded by the Army Purchase Commissioners to officers on retiring amounts to £9,500—decrease £7,500; and to Royal (late Indian) Artillery and Engineers £1,000—decrease £1,000. *Widows' Pensions, &c.:* Pensions to 2,001 widows and relatives of officers amount to £145,100—increase £2,600; compassionate allowances to 1,309 children £19,250—decrease £1,250; relief fund £1,250; pensions and allowances to widows and children of civil officers £254. *Pensions for Wounds:* Wounded officers number 120, their pensions amounting to £13,000—increase £1,000; repayments to National Debt Office for commutation advances, £1,324. *Retired Allowances to Officers of Auxiliary Forces:* Militia £12,000; Yeomanry Cavalry £1,200; Volunteers £15,000; and commutation of retired allowances £3,081. Appropriations in aid (£349,127) reduce the total of the vote to £1,519,000—increase £3,800.

15. *Pensions, &c., for Warrant Officers, Non-Commissioned Officers, and others.—In-Pensions:* Chelsea Hospital £27,440—increase £440; and Kilmainham £5,650—increase £350. At Chelsea the Governor receives £500 in addition to £1,300 as Field Marshal. The Lieutenant-Governor receives £310, besides retired pay; the Physician and Surgeon £600; the Deputy Surgeon £520; the Chaplain £365, and allowances for assistance £100; he is also provided with an Acting Chaplain, who draws £100 a year from the Prize Fund, and £50 for duties at the Royal Military School. Six Captains draw each £60 a year; the Adjutant £310; Quartermaster £302; Dispenser £183; Matron £154; a "Whitster," otherwise a "Bleacher," £70; and an Organist £50. All except the Acting Chaplain are also entitled to unfurnished apartments, fuel, and light. Altogether the Establishment costs £6,534 a year in payment of officers. There is also a charge of £4,006 for clerkships, &c. At Kilmainham the chief item is for provisions £2,500. *Out-Pensions:* The expenditure consists of £65,500, paid to 859 warrant officers, and £1,697,500 to 80,096 non-commissioned officers; the maintenance of lunatics £7,000; pensions to 163 army schoolmistresses and 8 nurses £4,700; and gratuities in commutation and in lieu of pensions £10,000. *Rewards for Distinguished Services:* Warrant and non-commissioned officers £5,130; Victoria Cross pensions £475; gratuities to soldiers for long service £1,125—decrease £75. The rewards paid to non-commissioned officers vary from £5 to £20. The Victoria Cross pension to warrant and non-commissioned officers and privates is £10 per man, 6 recipients still serving, and 44 having been discharged. *Widows' Pensions:* Pensions and allowances to widows and children of warrant officers £4,500—increase £500. The gross estimate is reduced by £471,220 appropriations in aid, leaving the net vote £1,357,800—increase £2,800.

16. *Superannuation, &c. Allowances.*—The net total, after deducting £171, appropriations in aid, amounts to £172,800—an increase of £3,400. Superannuations are £102,400—increase £3,650; compensations £68,000—as last year; compassionate allowances £700—as last year; gratuities £1,500—as last year; commutation of superannuation allowances, &c. £370—decrease £177.

ORDNANCE FACTORIES.

The sum required for this branch of the service is shown in a separate estimate, the stores produced by the department being for both Army and Navy. The gross amount of the estimate is £2,888,000, against £2,213,100 in 1895-96, and the items are:—Establishment pay £27,320—increase £278; wages and police £1,575,374—increase £416,881; materials and stores £1,135,000—increase £204,000; machinery obtained by contract £45,000—increase £15,000; buildings £73,806—increase £9,511; miscellaneous £24,000—increase £230; non-effective charges, £1,500—decrease £1,000. Of the gross total £1,044,000 is chargeable to the Army for stores, £1,298,000 to the Navy, £200,000 to India, £90,000 to other repayments (Army and Navy), £36,000 is covered by sale of old stores, and £12,000 by miscellaneous receipts. This leaves £100 as the net amount of the vote, as in 1895-96. The establishment consists of a director-general receiving £2,500, 3 assistants £2,050, 7 superintendents £6,550, 8 other officers £3,555, 22 clerical staff £8,279, 1 mechanical and 2 works staff £1,372. The medical establishment costs £2,198, schools and library £105, and chaplains £611. Wages and police at Woolwich amount to £1,203,068, at Enfield £258,436, at Waltham Abbey £57,584, and at Birmingham £56,286. Materials and stores for Woolwich cost £940,000; for Enfield £85,000, for Waltham Abbey £102,000, and for Birmingham £8,000. The machinery obtained by contract is in addition to that made by the factory and valued at £45,000. Buildings include the cost of new works £43,542, the maintenance and repairs being £30,264. Among miscellaneous items are £4,300 for stationery, and £9,650 in lieu of rates.

Since the last issue of the Almanack, the following changes have been made in the higher naval commands:—In the Mediterranean, Vice-Adm. Sir J. O. Hopkins has been appointed to succeed Adm. Sir M. C. Seymour, and Rear-Adm. R. H. Harris has succeeded Rear-Adm. C. E. Domvile: in the Channel, Rear-Adm. A. T. Powlett has succeeded Rear-Adm. A. H. Alington as second in command: at the Nore, Vice-Adm. H. F. Nicholson has succeeded Adm. Sir R. Wells, who has since died: at Plymouth, Adm. Sir. E. R. Fremantle has succeeded Adm. Sir A. McL. Lyons: in the Pacific, Rear-Adm. H. St. L. B. Palliser has succeeded Rear-Adm. H. F. Stephenson: in China, a second flag-officer has been appointed in the person of Rear-Adm. C. L. Oxley, and Commod. S. C. Holland has succeeded Commod. G. T. H. Boyes: on the S.E. Coast of America, Capt. C. J. Norcock has succeeded Capt. C. E. Gissing as Senior Officer: and at Portsmouth Dockyard, Rear-Adm. E. Rice has succeeded Rear-Adm. C. G. Fane.

The chief naval event of the year was the sudden commissioning in January, when difficulties appeared to be imminent with Germany and the United States, of a Particular Service Squadron consisting of the battleships *Revenge* and *Royal Oak*, the cruisers *Gibraltar*, *Theseus*, *Hermione*, and *Charybdis*, and six torpedo-boat destroyers, under Rear-Adm. A. T. Dale. This squadron eventually went to the Mediterranean, and after some of its ships had been left to strengthen that command, and others had been added to the Channel Fleet, Rear-Adm. Dale hauled down his flag in the autumn. Other naval events of importance were the bombardment of Zanzibar, where, upon the death of the Sultan, a usurper had installed himself in opposition to the will of Great Britain: the brilliant co-operation of a small naval brigade with the military advance up the Nile to Dongola; an unusual series of accidents, one of which involved the drowning in China of Capt. H. B. Lang of the *Narcissus* and a number of men; and another of which caused the death of one and the serious injury of several other firemen on board the *Blake*; and the conclusion of some elaborate experiments with the dynamite gun at Milford. The year has also witnessed the supply to the Channel Squadron, and to certain other vessels of high explosive shells; and the addition to the harbour-service of the navy of the new tugs *Alligator*, *Bustler*, *Clover*, *Chub*, *Crocodile*, *Elf*, *Escort*, *Monkey*, *Pert*, *Sprite*, and *Tortoise*. The new docks, Nos. 14 and 15, have been completed at Portsmouth. These, which are capable of receiving the largest ships yet afloat, measure 592¾ ft. in length, and have a depth on the sill, at high water, of 33¾ ft. One is 82 ft., and the other 94 ft. broad at the entrance.

The cadet training-ship *Britannia* has been condemned, and her establishment is to be transferred to buildings on shore at Dartmouth as soon as the latter can be provided. In the meantime the small tender *Wave*, which has for years been attached to the *Britannia*, has been superseded by the sea-going sloop *Racer*. The *Cockatrice*, which has long done duty as guardship in the Danube, has been re-named *Moorhen*, and her place has been taken by the gunboat *Bramble*, re-named *Cockatrice*.

The following is a list of the Squadrons afloat (Nov. 1896).

Mediterranean and Red Sea. *Commander-in-Chief*, Adm. Sir Michael Culme Seymour, Bart., K.C.B. (Ramillies) (*to be succeeded in March by Admiral Sir J. O. Hopkins*). *Battleships*, Anson, Barfleur, Camperdown, Collingwood, Hood, Howe, Nile, Ramillies, Rodney, Trafalgar. *Cruisers*, Astræa, Blanche, Cambrian, Fearless, Forte, Hawke, Scout, Scylla, Sybille, Theseus. *Torpedo-boat destroyers*, Ardent, Banshee, Bruizer, Dragon. *Torpedo-boats*, Gleaner, Hebe, Skipjack. *Gunboats*, Cockatrice, Dryad. *Sloops*, Melita, Nymphe, with the Hibernia (*flag-ship, Malta Dockyard*), Rupert (*Port guard-ship, Gibraltar*), Polyphemus (*torpedo ram*), Surprise (*despatch vessel*), Tyne (*troop-ship*), Imogene (*special service*), Cruiser (*training-ship*).

Channel. *Commander-in-Chief*, Vice-Admiral Lord Walter Talbot Kerr, K.C.B. (Majestic). *Battleships*, Empress of India, Magnificent, Majestic, Repulse, ; Resolution, Royal Sovereign. *Cruisers*, Bellona, Blake, Blenheim, Charybdis, Hermione. *Gunboats*, Halcyon, Speedy.

North America and West Indies. *Commander-in-Chief*, Vice-Admiral James E. Erskine (Crescent). *Cruisers*, Cordelia, Crescent, Indefatigable, Intrepid, Mohawk, Pallas, Talbot, Tartar. *Sloops*, Buzzard, Pelican. *Gunboat*, Partridge. *Floating battery*, Terror (Bermuda). *Depôt ship*, Urgent (Jamaica).

South East Coast of America. *Captain* (Commodore), Charles J. Norcock (Retribution). *Cruisers*, Barracouta, Retribution. *Sloops*, Acorn, Basilisk.

Pacific. *Commander-in-Chief*, Rear-Admiral Henry St. L. B. Palliser (Impérieuse). *Cruisers*, Comus, Impérieuse, Satellite. *Sloops*, Icarus, Wild Swan. *Gunboat*, Pheasant. *Store-ship*, Liffey (Coquimbo).

Cape and West Coast of Africa. *Commander-in-Chief*, Rear-Admiral Harry H. Rawson, C.B. (St. George). *Cruisers*, Barrosa, Blonde, Fox, Gibraltar, Philomel, Phœbe, Racoon, St. George. *Gunboats*, Magpie, Sparrow, Thrush, Widgeon. *River service*, Herald, Mosquito. *Special service*, Alecto. *Depôt ship*, Penelope (Simon's Bay).

East Indies. *Commander-in-Chief*, Rear-Admiral Edmund C. Drummond (Bonaventure). *Cruisers*, Bonaventure, Brisk, Cossack, Marathon. *Gunboats*, Lapwing, Pigeon, Redbreast. *Torpedo-boat*, Plassy. *Special service*, Sphinx. *Coast defence*, Abyssinia, Assaye, and Magdala (Bombay).

China. *Commander-in-Chief*, Vice-Admiral Sir Alexander Buller, K.C.B. (Centurion). *Battleship*, Centurion. *Cruisers*, Æolus, Archer, Grafton, Immortalité, Narcissus, Pique, Porpoise, Rainbow, Spartan, Undaunted. *Gunboats*, Esk, Firebrand, Linnet, Peacock, Pigmy, Plover, Rattler, Redpole, Swift. *Torpedo-boats*, Handy, Hart. *Sloop*, Daphne. *Receiving ship*, Tamar (Hong Kong). *Despatch vessel*, Alacrity.

Australia. *Commander-in-Chief*, Rear-Admiral Cyprian A. G. Bridge (Orlando). *Cruisers*, Katoomba, Mildura, Orlando, Pylades, Rapid, Ringarooma, Royalist, Wallaroo. *Gunboats*, Goldfinch, Lizard, Ringdove. *Torpedo-boat*, Karrakatta.

Training Squadron. *Commodore*, George L. Atkinson (Active). *Cruisers*, Active, Calypso, Champion, Volage.

On Particular Service. *Cruisers*, Curaçoa, Endymion, Flora, Melpomene, Nelson, Northampton. *Gunboats*, Albacore, Jason, Raven. *Surveying*, Seahorse. *Torpedo depôt ship*, Vulcan. *Store ship*, Wye.

Ordered Home. *Battleship*, Royal Oak.

Surveying Service. Dart, Penguin, Rambler, Research, Stork, Triton, Waterwitch.

* *Volage*, 12, 3080 (2400), 2nd cl. cruiser, Training Squadron. *Capt.* Richard Nigel Gresley: *Chaplain*, Rev. Ernest J. Vaughan; *Staff-Surg.* William R. M. Young; *Paym.* James H. F. Campion; *Staff-Eng.* Charles Underhill.

* *Vulcan*, 8, 6620 (12000), torpedo depôt ship, Mediterranean. *Capt.* Chas. G. Robinson; *Chaplain*, Rev. Hamilton Macdonald; *Staff-Surg.* Henry W. D. Walsh; *Staff-Paym.* Henry J. Ollard; *Staff-Eng.* Frederick Worth.

* *Wallaroo*, 8, 2575 (7500), 3rd cl. cruiser, Australasian waters. *Capt.* Walter H. B. Graham; *Staff-Paym.* William R. Dodridge; *Staff-Eng.* John S. Watch; *Surg.* Edward H. McSherry, M.D.

† *Wanderer*, 925 tons, training brig for boys, Portland. *Lieut. and Comm.* Reginald A. Allenby.

WARRIOR, 32, 9210 (4000), 1st cl. cruiser, Portsmouth.

* WARSPITE, 14, 8400 (10000), 1st cl. cruiser, flagship, Queenstown. *Rear-Adm.* Claude E. Buckle; *Capt.* Fredk. R. Boardman, C.B.; *Comm.* Sidney Hughes; *Chaplain*, Rev. Edward H. Good; *Staff-Surg.* Michl. Ronan; *Fleet-Paym.* Mountagu Bertie Williams; *Fleet-Eng.* Frederic G. Whittaker; *First Lieut.* Drury St. A. Wake.

* *Waterwitch*, 620 tons (450), surveying vessel, Australian station. *Comm.* James W. Combe; *Assist.-Paym.* Robert R. Hastings; *Surg.* Fred. A. Capps; *First Lieut.* Fredk. C. C. Pasco.

Wave, 308 tons (250), special-service vessel, Dartmouth.

Weasel, 1, 254 (110), 3rd cl. gunboat, Portsmouth.

* *Widgeon*, 6, 805 (1200), 1st cl. gunboat, Cape and West Africa. *Lieut. and Comm.* John H. S. Burder; *Surg.* Charles S. Facey; *Asst.-Paym.* Gustavus C. Rochfort; *Eng.* Arthur P. L. Dupen.

* *Wildfire*, 453 tons (360), flag-ship, Sheerness. *Vice-Adm.* Henry Fredk. Nicholson, C.B.; *Staff-Capt.* (in command) Albert R. Wonham; *Chaplain*, Rev. Joseph Reed; *Fleet-Surg.* Wm. E. Bennett; *Staff-Paym.* Robert M. Pearson; *Inspector of Machinery*, William W. Chilcott.

* *Wild Swan*, 8, 1130 (800), sloop, Pacific. *Comm.* Macvey Napier; *First Lieut.* William D. Church; *Paym.* Charles H. A. Ward; *Surg.* Horace B. Marriott; *Eng.* Harold Gaisford.

WIVERN, 4, 2750 (1000), coast defence ship, Hong Kong. *Staff-Eng.* John Kerr.

Wizard, 6 (4500), torpedo-boat destroyer, Cowes.

* *Wye*, 1370 tons (700), store-ship, particular service. *Staff-Comm. in command*, Walter Sandys Chambré; *Surg.* John Jenkins; *Asst.-Paym.* Lawrence A. Bebb; *Eng.* Nathaniel E. Green.

Zebra, 6 (4500), torpedo-boat destroyer, Chatham (completing for sea). *Eng.* James F. A. Hastings.

Zephyr, 6 (3850), torpedo-boat destroyer, Devonport (completing for sea). *Eng.* Harry J. Meiklejohn.

NAVAL AIDES DE-CAMP TO THE QUEEN.

Adm. of Fleet, H.R.H. Duke of Saxe-Coburg-Gotha (Duke of Edinburgh), K.G. (*personal*).

Captain H.R.H. Duke of York, K.G., K.T. (*personal*).

Lyons, *Adm.* Sir Algernon McLennan, K.C.B. (*first and principal*).

Fullerton, *Rear-Adm.* John Regd. Thos., C.B., C.V.O. (*Royal Yacht*).

Captains:

Fanshawe, Arthur Dalrymple.
Ingles, John.
Beaumont, Lewis Anthony.
Bruce, James Andrew Thomas.
Holland, Swinton Colthurst.

Rolfe, Ernest Neville, C.B.
Moore, Arthur William, C.M.G.
Bickford, And. Kennedy, C.M.G.
Acland, William Alison Dyke.
Mann, William Fredk. Stanley.

Marine—

Campbell, *Colonel* William, R.M.A.
Crosbie, *Col.* Adolphus Brett.

HON. PHYSICIANS TO THE QUEEN.

Navy Pay.

ANNUAL PAY OF EFFECTIVE OFFICERS AND SEAMEN.

ADMIRAL (home command), including table money and allowance in lieu of servants, £3,420 to £3,967. Vice-Admiral (according to where serving), £2,555 to £3,102. Rear-Admiral £1,642 to £2,737. Commodore (2nd class), £410 to £602; extras, £365 to £730. Captain, £410 to £602; extras, £91 to £328. Staff-Captain, £511; extras, £84 to £141. Commander, £365; extras, nil to £141. Staff-Commander £219 to £410; extras, £84 to £159. Lieutenant in command, £201 to £274; extras, £84 to £141. Lieutenant, £182 to £256; extras, nil to £73. Chief Officer, £201; extras, nil to £38. Sub-Lieutenant, £91; extra for navigating duties, £45. Senior Mate, £119 to £137. Second Mate, £91 to £100. Midshipman, £32. Naval Cadet, £18. Chief Gunner, and Chief Boatswain, £164. Gunner, and Boatswain, £100 to £150. Petty Officer, and leading Seaman, £32 to £181. Able, ordinary, and 2nd class ordinary Seaman, £24 to £106. Boy, £9 to £18.

Fleet-Surgeon £493 to £602; extras, £46 to £91. Staff-Surgeon, £383 to £438; extras, £46 to £91. Surgeon, £210 to £284. Chaplain, £210 to £401.

Chief Inspector of Machinery afloat, £639. Inspector ditto, £548. Chief Engineer, £237 to £401; extras, £18 to £255. Engineer, £160 to £219; extras, £18 to £164. Assistant ditto, £110 to £137; extras, £18. Engine-room Artificer, £100 to £137. Stoker, £30 to £91. Chief Carpenter, £164; extras, £5 to £9. Carpenter (officer), £100 to £150.

Naval Instructor, £219 to £401. Secretary, £274 to £548. Paymaster, £256 to £602; extras, £45 to £91. Assistant ditto, £91 to £210. Clerk, £73. Assistant, £46. Domestic, from £17.

With their guns, tonnage, and (within brackets) their indicated horse-power under forced draught, except in the case of the *Andromeda*, *Albion*, *Canopus*, and *Furious*, where the H.P. under natural draught is given. Armoured vessels have their names printed in CAPITALS, and vessels building in private yards have an asterisk * prefixed.

**Albatross*, 6 (7500), torpedo-boat destroyer, Chiswick.
**ALBION*, 16, 12950 (13500), first-class battleship, Blackwall.
**Amphitrite*, 11000 tons, first-class cruiser, Barrow-in-Furness.
Andromeda, 16, 11000 (16500), first-class cruiser, Pembroke.
**Angler*, torpedo-boat destroyer, Chiswick.
**Arab*, torpedo-boat destroyer, Glasgow.
**Argonaut*, 11000 tons, first-class cruiser, Glasgow.
**Ariadne*, 11000 tons, first-class cruiser, Glasgow.
**Ariel*, torpedo-boat destroyer, Chiswick.
**Avon*, torpedo-boat destroyer, Barrow-in-Furness.
**Bat*, torpedo-boat destroyer, Jarrow-on-Tyne.
**Bittern*, torpedo-boat destroyer, Barrow-in-Furness.
**Bullfinch*, 6 (5800), torpedo-boat destroyer, Hull.
CANOPUS, 16, 12950 (13500), first-class battleship, Portsmouth.
**Chamois*, torpedo-boat destroyer, Jarrow-on-Tyne.
**Cheerful*, 6 (5800), torpedo-boat destroyer, Newcastle-on-Tyne.
**Coquette*, 6 (5400), torpedo-boat destroyer, Chiswick.
**Crane*, torpedo-boat destroyer, Jarrow-on-Tyne.
**Cygnet*, 6 (5400), torpedo-boat destroyer, Chiswick.
**Cynthia*, 6 (5400), torpedo-boat destroyer, Chiswick.
**Diadem*, 16, 11000 (16500), first-class cruiser, Glasgow. (Launched Oct. 20, 1896.)
**Dove*, 6 (5800), torpedo-boat destroyer, Hull.
**Earnest*, torpedo-boat destroyer, Birkenhead.
**Electra*, 6, torpedo-boat destroyer, Glasgow.
**Europa*, 16, 11000 (16500), first-class cruiser, Glasgow.
**Express*, torpedo-boat destroyer, Birkenhead.
**Fairy*, 6 (6000), torpedo-boat destroyer, Glasgow.
**Fawn*, 6 (5900), torpedo-boat destroyer, Jarrow-on-Tyne.
**Fervent*, 6 (3850), torpedo-boat destroyer, Paisley.
**Flirt*, 6 (5900), torpedo-boat destroyer, Jarrow-on-Tyne.
**Flying Fish*, torpedo-boat destroyer, Jarrow-on-Tyne.
**Foam*, 6 (5400), torpedo-boat destroyer, Chiswick.
Furious, 10, 5750 (10000), second-class cruiser Devonport.
**Gipsy*, 6 (6000), torpedo-boat destroyer, Glasgow.
Gladiator, 10, 5750 (10000), second-class cruiser Portsmouth.
**GLORY*, 16, 12950 (13500), first-class battleship Birkenhead.
GOLIATH, 16, 12950 (13500), first-class battleship Chatham.
**Griffon*, torpedo-boat destroyer, Birkenhead.
**Kestrel*, 6 (5800), torpedo-boat destroyer, Glasgow.
**Leopard*, 6, (6000), torpedo-boat destroyer, Barrow-in-Furness.
**Locust*, torpedo-boat destroyer, Birkenhead.
**Mallard*, 6 (5400), torpedo-boat destroyer Chiswick.
**Mermaid*, 6 (5800), torpedo-boat destroyer, Newcastle-on-Tyne.
**Niobe*, 16, 11000 (16500), first-class cruiser, Barrow-in-Furness.
OCEAN, 16, 12950 (13500), first-class battleship Devonport.
**Osprey*, 6 (6000), torpedo-boat destroyer, Glasgow.
**Otter*, 6 (6000), torpedo-boat destroyer, Barrow in-Furness.
**Pactolus*, 8, 2135 (7000), third-class cruiser, Newcastle-on-Tyne.
**Panther*, torpedo-boat destroyer, Birkenhead.
**Pegasus*, 8, 2135 (7000), third-class cruiser, Jarrow-on-Tyne.
**Perseus*, 8, 2135 (7000), third-class cruiser, Hull.
**Pomone*, 8, 2135 (7000), third-class cruiser, Sheerness.
**Prometheus*, 8, 2135 (7000), third-class cruiser Hull.
Proserpine, 8, 2135 (7000), third-class cruiser Sheerness.
**Pyramus*, 8, 2135 (7000), third-class cruiser, Jarrow-on-Tyne.
**Seal*, torpedo-boat destroyer, Birkenhead.
Spartiate, 11000 tons, first-class cruiser, Pembroke Dock.
**Sylvia*, 6 (6000), torpedo-boat destroyer, Sunderland.
Vindictive, 10, 5750 (10000), second-class cruiser Chatham.
**Violet*, 6 (6000), torpedo-boat destroyer, Sunderland.
**Vulture*, 6, torpedo-boat destroyer, Glasgow.
**Whiting*, torpedo-boat destroyer, Jarrow-on Tyne.
**Wolf*, torpedo-boat destroyer, Birkenhead.

Of the above, the five battleships, *Albion*, *Canopus*, *Glory*, *Goliath*, and *Ocean*; the four first-class cruisers *Amphitrite*, *Argonaut*, *Ariadne*, and *Spartiate*; the six third-class cruisers *Pactolus*, *Pegasus*, *Perseus*, *Pomone*, *Prometheus*, and *Pyramus*, and 28 of the torpedo-boat destroyers, form part of the building programme for 1896-97, as announced by Mr. Goschen in March, 1896; but contracts for three second-class cruisers, which were also then promised, and which were to complete the programme, have not, at the time of going to press, been given out. Of the vessels building, the most remarkable are the destroyers *Albatross* and *Express*. The former is guaranteed by her builders, Messrs. J. I. Thornycroft, a speed of 32 knots, or about 36¾ land miles, per hour, a speed equal to that of most ordinary trains. Yet even this great speed will be exceeded in the case of the *Express*, which is guaranteed by Messrs. Laird to do no less than 33 knots an hour upon trial. What those figures, undreamt of three or four years ago, mean, will be better understood if we imagine the *Albatross* and *Express*, the fastest vessels in the world, to be opposed to one another in warfare. Owing to their lowness in the water, they would not be likely to sight one another at a greater distance than 10 miles. If they did this, and if, at the instant of sighting, the commander of each headed at full speed for his opponent, the two vessels might be in actual collision within the short space of 10 minutes, and they would be within easy gunshot of one another in about 5 minutes.

GROSS ESTIMATE, £22,774,318; NET, £21,823,000; NET INCREASE, £3,122,000.

THE principal points of difference between the Estimates for this year and its predecessor are increases in votes 1, 3, 5, 6, 7, 8, 9, 10, 11, 12, 14, and 15, amounting to £3,538,700, and decreases in votes 2, 5, 8 (matériel), and 13, amounting to £416,700 (votes 4 and 16 are unaltered). The following tabular statement gives at one view the cost of this branch of the public service for three years:—

Year.	Gross Estimate.	Supplementary (net).	Appropriations in Aid.	Net Vote.	Expended.	No. of Officers and Men.	
	£	£	£	£	£	Seamen.	Marines.
1894-95	18,371,713	200,000	1,305,613	17,366,100	—	57,026	15,363
1895-96	19,613,821	—	912,821	18,701,000	—	61,945	15,363
1896-97	22,774,318	—	951,318	21,823,000	—	65,757	15,861

The estimated total number of officers, seamen, boys, coastguard, and Royal Marines available for sea service is 85,793, and of other services 7,957, total 93,750; an increase of 4,900.

The gross total of the several votes is shown in the following abstract, and in the succeeding details will be found the net total of each, after deducting "Appropriations in Aid":—

EFFECTIVE SERVICES.

1. Wages to Officers, Seamen, &c. ...	£4,536,100
2. Victualling and Clothing	1,800,544
3. Medical Establishments & Services	180,382
4. Martial Law	10,630
5. Educational Services	111,578
6. Scientific Services	74,180
7. Royal Naval Reserves	229,911
8. Shipbuilding, Repairs, Maintenance, &c.—	
I. Personnel	2,116,915
II. Matériel	2,387,000
III. Contract Work	5,423,480
9. Naval Armaments	2,600,855
10. Works, Buildings, and Repairs ...	624,900
11. Miscellaneous Effective Services ...	198,746
12. Admiralty Office	245,560
Total Effective Services	£20,540,781

NON-EFFECTIVE SERVICES.

13. Half-pay, Reserved & Retired Pay	£761,258
14. Pensions, Gratuities, and Compassionate Allowances	1,052,090
15. Civil Pensions and Gratuities	324,889
Total, Non-Effective Services ...	£2,138,237

SERVICES IN CONNECTION WITH THE COLONIES.

16. Additional Naval Force in Australasian Waters, Annuity payable under	£95,300
Grand Total	£22,774,318

1. *Wages to Officers, Seamen, and Marines.*—Net total £4,419,800, an increase of £286,300, chiefly caused by provision for additional numbers, and by variations in rates of pay and allowances. The sub-heads are: Wages of officers, seamen, and boys, £3,702,431—increase £256,509; coastguard, wages £209,747—increase £315, and contingencies £54,32 — decrease £150; royal marines, wages £513,611—increase £10,094, and contingencies £16,220 — increase £345; royal marine divisions, salaries £6,348—increase £30, and contingencies £14,062—increase £230; recruiting expenses £19,358—increase £6,344. The appropriations in aid, in reduction of the gross amount of the vote, are £116,300. The details of those receiving pay, &c., are as follows:—14 flag officers, 3,132 commissioned officers, 588 subordinate officers, 1,108 warrant officers, and 56,420 petty officers, seamen, &c., making a total of 61,262. Of 9,795 boys, 4,495 are for service in the fleet, and 5,300 under instruction in training-ships. In the coastguard service there are 90 commissioned officers, 231 chief officers, and 3,879 petty officers, seamen, &c. In the Royal Marines the headquarters staff consists of 5 commissioned officers, 3 warrant officers, and 4 staff sergeants and sergeants; for the service afloat, 113 commissioned officers, 1 warrant officer, 416 staff sergeants and sergeants, 284 buglers, and 8,059 rank and file; and for the service ashore, 247 commissioned officers, 24 warrant officers, 774 staff sergeants and sergeants, 284 buglers and musicians, and 5,622 rank and file, a total of 15,836 for this branch of the service.

2. *Victualling & Clothing.*—Net total £1,369,600, an increase of £2,500. The sub-heads are: Salaries and allowances £17,312—decrease £54; wages of artificers £44,660 — increase £1,504; wages of crews of victualling-yard boys £5,677 —increase £48; wages, &c., of police £5,550—decrease £19; extra pay to artificers £35—as last year; rents, water, and contingencies £1,876—increase £15; provisions and allowances in lieu £837,894—increase £24,864; payments for provisions not taken up £329,500—increase £30,700; beer-money, and excess cost of rations £15,100 —increase £3,300; mess-traps £6,250 — decrease £3,950; light, and allowances in lieu £38,890—increase £2,730; seamen's clothing, soap, and tobacco, £338,200 — decrease £6,300; marine clothing, &c. £78,200—increase £2,410; victualling stores £38,900—increase £1,732; marine barrack stores £19,500—increase £1,810; freight, lighterage, &c. £23,000—increase £3,000. Appropriations in aid amount to £430,944.

3. *Medical Establishments and Services.*—Net total £156,200, an increase of £4,800. The heads are: Salaries £35,694 — increase £51; wages £26,750—increase £221; police £3,511—decrease £16; extra pay £400; rents, water, &c. £1,317—decrease £65; gas and electric lighting £2,510—increase £210; contingencies £2,000. Medicines and medical stores, including hospital and infirmary provisions, instruments, &c. £83,000—increase £3,000; subsistence of seamen at sick quarters £19,500—increase £1,000; contributions in aid of lock hospitals £2,350—as last year; and miscellaneous disbursements £3,350 — increase £250. The gross amount is reduced by £24,182, appropriations in aid.

4. *Martial Law.*—The net total is £10,600—as last year. The heads of expenditure are —Courts-martial £1,500—increase £100; Naval Prisons, Lewes £3,625; Bodmin £2,024; Hong Kong, Bermuda, the Cape, Ascension, and Coquimbo £1,461; conveyance of prisoners £1,200; and subsistence abroad £820. The ap-

propriations in aid under this vote amount to only £30.

5. *Educational Services.* — The net total is £81,300, an increase of £1,900. The details are: —Royal Naval College, Greenwich, salaries, wages, and allowances £26,474—decrease £14, and contingencies £10,451 — decrease £110. Training of naval cadets costs £24,726 — increase £946; educational staff for the Fleet £19,294—increase £1,872; training school for engineer students £13,630—increase £1,632; expenses of boys in training ships £6,330—increase £1,570; expenses connected with medical candidates £450—as before; examinations £2,143—increase £151; inspection of naval schools £771—decrease £230. Dockyard schools cost £2,966, and contingencies £43—increase £33; and royal marine barrack schools £3,175, and contingencies £205—increase £2; with contributions in aid of schools £900—as before. The appropriations in aid amount to £30,278.

6. *Scientific Services.*—Net total £63,300—an increase of £1,900. The salaries, &c., of the Royal Observatory amount to £6,916—increase £74, some details of which will be found on p. 163. The contingent expenses are £1,185, a decrease of £715. The Cape Observatory includes an astronomer at £800, a first assistant at £550, and other salaries and apparatus make a total of £4,252- increase £200. Expenses in connection with the photographic mapping of the heavens £630. The total estimated cost (£9,050) is to be spread over a term of years, £4,850 being for Greenwich and £4,200 for the Cape of Good Hope. The salaries, &c., of the Hydrographical Department amount to £13,114—decrease £56; for drawing and engraving charts the expense is £9,350, and for printing and mounting them £9,300. In 1895 there were 176,527 charts sold, producing £10,670. Coast and other surveys carried on in various parts of the world cost £17,300—increase £111. The cost of the Naval Museum at Greenwich is set down at £724—decrease £5; and the Compass Department at £1,700 — as before. The expense of the "Nautical Almanac" is £3,845 — increase £214. The average annual sale of the Almanac has been recently about 12,500, the number sold in 1887 (15,371) dropping to 11,750 in 1889, with a rise in 1891 to 13,477, followed by a fall in 1893 to 11,978: the number sold in 1895 was 12,109. Chronometers are estimated to cost £3,914, and there are items of £250 contributed to the funds of the Institution of Naval Architects and £300 to the Royal United Service Institution. The appropriations in aid amount to £10,880.

7. *Royal Naval Reserves.* — The net total is £229,800—an increase of £14,200. The sub-heads are: Royal Naval Reserve £223,387 — increase £13,104; reserve of retired officers, &c. £6,500—increase £1,250; Royal Naval Artillery Volunteers £24—a decrease of £76. In the Reserve the number of officers provided for is 1,600, and seamen, &c. 24,200. Retired officers and men number 6,520. Compensation to the officers and men of the Royal Naval Artillery Volunteers for abolition of the corps £24—decrease £76. Appropriations in aid £111.

8. *Shipbuilding, Repairs, Maintenance, &c.*—This vote is divided into three sections, the net amount of each being:— *Personnel* £2,104,000 (increase £264,000), *Matériel* £2,251,000 (decrease £404,000), and *Contract Work* £5,386,000 (increase £1,970,000) —giving a total of £9,741,000, and showing, as compared with last year, a net increase of £1,860,000. The total appropriations in aid under the three sections amount to £186,395. The Estimates here notify that "provision has been made for new construction in the above vote to the extent of—Section 1, £1,081,700; Section 2, £1,130,900; Section 3, £5,022,274. Total, £7,234,874."

Under the first section—*Personnel*—the sub-heads are—*Dockyards at Home:* Salaries £157,115—decrease £2,303; wages, and hire of teams £1,680,343—increase £285,821; police £37,853—decrease £209; contingencies £5,330—increase £130. The numbers and aggregate salaries of officials at the home dockyards are as follows—Portsmouth, 260 officials £46,882; Devonport, 214 officials £39,169; Chatham, 188 officials £34,058; Sheerness, 103 officials £19,541; Pembroke, 67 officials £13,666; Deptford Storeyard, 19 officials £3,537; Haulbowline, 3 officials £399; Portland Coaling Depôt, 2 officials £163. The total officials for the above dockyards number 899, against 898 in 1895-96, and their salaries amount to £157,115 against £159,418 in the previous year. The total number of artificers and labourers to be employed in the dockyards at home is rather more than last year, being 23,350 against 19,370, and their wages amount to £1,680,343. The police number 396, their wages being £37,853. *Abroad*, the items are: Salaries, &c. £54,701—increase £2,429; wages, &c. £170,353 — increase £5,875; police £10,290—decrease £177; contingencies £930—as last year.

The second section—*Matériel*—includes: Timber, masts, deals, &c. £130,000 — decrease £22,000; metals and metal articles £1,149,000 — decrease £278,174; coals for yard purposes £53,000—decrease £5,000; hemp, canvas, &c. £112,000—decrease £53,000; paint, oils, pitch, and similar articles £290,000—decrease £70,000; electrical, torpedo, and other apparatus £90,000 — decrease £10,000; coals for steam vessels £500,000—increase £25,000; freight £35,000 — as before; rents, water, &c. £18,905 — increase £94; gas £9,905—increase £300.

The third section—*Contract Work*—includes: Propelling machinery £2,332,380—increase £1,145,695; auxiliary machinery £42,412—decrease £3,163; hulls of contract-built ships £2,347,580—increase £737,046; repairs and alterations £77,230—increase £2,040; inspection £45,000 — increase £10,000; gun mountings and air-compressing machinery £471,258—increase £59,675; machinery for shore establishments £59,000—increase £14,000; royal reserve of merchant cruisers (subvention for right of pre-emption or hire as armed cruisers or transports) £48,620—increase £3,147.

The amount expended on *New Construction* detailed in the Navy Expense Accounts in the year 1895-96, is estimated at £4,405,019 on the vessels building by contract, and £3,291,448 on Dockyard-built ships, and £69,179 for small vessels. The total estimate for New Construction includes also £991,754 for re-construction, &c., £1,075,214 for sea stores, coals, &c., and £1,039,305 for establishment, and miscellaneous charges; the whole sum thus amounts to £10,871,919.

9. *Naval Armaments.* — The net total is £2,543,200—an increase of £850,000. The larger items are: Salaries and allowances £20,537—increase £922; wages of artificers £101,068—increase £5,159; wages of police £15,949—increase £1,923; for guns £801,900 — increase

£369,500; projectiles and ammunition £1,010,200—increase £348,780; torpedoes and gun-cotton £212,000—increase £36,200; small arms, &c. £323,400—increase £90,370; inspection £80,000—increase £5,000; freight £23,000—as last year. The appropriations in aid amount to £57,655.

10. *Works, Buildings, and Repairs.*—Net total £618,400, an increase of £71,400. Salaries amount to £30,500—increase £1,500; and the charge for new works, additions, &c., is for dockyards at home £185,395—increase £89,085; abroad £68,925—increase £15,320; naval barracks £7,700—increase £6,700; marine barracks £7,700—increase £3,600; prisons £1,000—as last year; hospitals and infirmaries £16,410—increase £1,460; educational vote £5,850—increase £2,850; observatories £1,500—decrease £3,200; coastguard stations £11,850—increase £400; naval armaments £36,650—increase £3,635; storehouses and works £22,718—decrease £58,922; minor new works £70,670—increase £762; ordinary repairs at home and abroad £125,000—increase £2,545; interest on branch railways into naval yards and maintenance £1,510—as before; redemption of rent-charges on ditto £4,396—as before; pay of seamen on works abroad £3,260—decrease £13; compensations, &c. £296—as last year; grants in aid of works £8,520—increase £3,127. The appropriations in aid amount to £6,500.

11. *Miscellaneous Effective Services.*—Net total £189,200, an increase of £12,400. The amounts of chief importance are—passage money and conveyance of officers, seamen, &c. £110,000—increase £9,600; expenses attendant on commanders-in-chief £3,800—decrease £100; piloting and towing ships of the Navy £18,000—increase £1,000; telegraphic communications £9,500—increase £500; lodging allowances to officers £11,500—increase £2,300; allowances for stationery £3,600—as before; compensation for damage £3,000—as before; expense of committees £3,000—increase £500; naval attachés abroad £2,000—as before; lighthouses, &c. £3,520—decrease £770; percentage to banks £1,500—as before; loss by exchange and discount £1,000—as last year; advertisements £2,000—increase £70; water police £5,826; allowances to ministers of religion £4,900; to religious and other institutions £1,300; and miscellaneous payments and allowances (including the conveyance by sea of the Royal Household, and the entertainment of royal personages) £10,600. The appropriations in aid amount to £9,546.

12. *Admiralty Office.*—Total net cost £236,800—a decrease of £400. The sub-heads are: Salaries, wages, &c. £239,075—increase £4,669; travelling expenses £7,800—as before; contingencies £3,685—increase £171. The cost of the several departments, and details of the principal salaries, will be found at pp. 219 and 232. The appropriations in aid amount to £8,760.

The votes for non-effective services are as follows:—

13. *Half Pay, Reserved and Retired Pay.*—The net sum required is £749,000, being a decrease of £12,300. Half pay amounts to £59,536—decrease £3,529, the recipients being 3 admirals of the fleet, 6 admirals, 15 vice-admirals, 23 rear-admirals, 145 officers, 5 engineers, 10 medical officers, 3 chaplains, 2 naval instructors, 1 secretary, 29 accountants, and 1 royal marine officer; reserved and retired pay £669,018—decrease £6,801; commutation of retired pay £25,054—decrease £2,688; and gratuities to officers on retirement £7,650—as before. On the reserved list there are 13 officers, requiring £1,715; 1,977 on the retired list £584,210; and 253 retired marine officers £85,808. Appropriations in aid £12,258.

14. *Naval and Marine Pensions.*—The net total of the vote is £1,030,100, an increase of £22,200. The amount is thus distributed: Pensions to 84 retired naval officers £4,740—as last year; to 1,012 engineers, subordinate officers, &c. £93,000—as last year; to 27,996 seamen and marines £778,400—increase £20,400; for good and meritorious services £6,400, in amounts of £300 annually to flag officers, £150 to captains, of £150 to £200 to marine officers, and of £100 to medical officers. The pensions for conspicuous bravery amount to £400, being £80 to 8 recipients of the Victoria Cross, £300 to 12 men who have received a medal for conspicuous gallantry, and £20 to 2 sergeants of Royal Marines "for distinguished conduct in the field." Pensions for wounds amount to £4,750 among 94 officers, and commutation of naval pensions to £4,070. The sum of £123,750 is payable to 2,303 widows of naval officers—increase £250; £7,400 to 125 widows of marine officers—increase £200; £12,000 to 159 widows and relatives of officers, seamen, and marines slain; £680 in compassionate allowances to late officers of the navy and marines; and £16,500 in compassionate allowances, which includes £14,750 to 1,069 children of deceased naval and marine officers. Appropriations in aid amount to £21,990.

15. *Civil Pensions and Gratuities.*—Net total £324,400, an increase of £7,100. The items are: Superannuation allowances to civil officers £118,000—increase £6,500; to artificers £165,000—increase £300; pensions and allowances to coastguard (506 persons) £28,000—as before; special gratuities £300; contribution in aid of Pension Funds £11,100—increase £560; commutation of civil pensions £964—decrease £257; and special pensions to officers £1,525—as before. Appropriations in aid £489.

16. *Additional Naval Force in Australasian Waters.*—This is an extra vote for services in connection with the Colonies, and under an arrangement made between the Imperial and Australasian Governments the sum of £95,300 is required as the seventh instalment of an annuity to meet the first cost of seven vessels for the protection of floating trade in Australasian waters. A contribution of £35,000 is payable by the Colonies, leaving £60,300 as the net amount of the vote.

The number of officers and men borne on ships' books, and for whom provision is made in these Estimates, is:—Fleet service—officers and seamen 61,262, boys 4,495; Coastguard, 4,200; Royal Marines 15,836; other services 7,957; total 93,750.

According to the Parliamentary Return of the 12th Aug. 1896, the number of ships built and *building* was, Battleships 45; *building*, 12. Cruisers, Armoured, 18; Protected, 87; *building*, 29; Unprotected, 16. Coast Defence, 15. Torpedo vessels, 35. Torpedo-boat destroyers, 42; *building*, 48. Torpedo boats, 101. Special vessels, 3. Total 362 of all classes—or including the 99 building, 461.

THE CHURCH OF ENGLAND.

The Church of England is "established" in its recognition as the national organisation for the maintenance of Christian belief and practice, and its clergy are an estate of the realm; the Sovereign is one of its members, and its supreme governor on earth; the free exercise of its inherent rights as a Church is guaranteed, and its authority, when lawfully exercised, is enforced. The Church has taken a large share in the promotion of civilisation, education, and philanthropic enterprise, and has exercised a powerful moral influence towards order, peace, and national progress.

The Church of England took its rise in 597, when Ethelbert, the pagan King of Kent, was baptized by missionaries sent by Gregory, the Bishop of Rome. The Italians only converted, permanently, the small kingdom of Kent; but they made the first beginning of the Church of England. East Anglia and Wessex were converted by other foreigners. The great impetus to the spread of the faith was given by two English Northumbrian Kings, who had been taught by the Scotic (Celtic) Church from its centre at Iona. By their influence the new faith was established in by far the largest part of the country.

The Church of the Britons, whom the pagan English had driven away to the West, continued a separate existence in its mountainous retreats, and took no part in the conversion of the English. It had merged its organization in that of the English Church as early as the Norman times. The Church of England and Wales is one.

About the years 660 to 680, the principal Kings of the English Heptarchy learned to take united action in Church matters, and that was the beginning of the unity of England. It was not till 150 years later that England became in any sense one kingdom. At that time, A.D. 828, the Archbishoprics of Canterbury and York had long been in existence, and the Bishoprics of London, Rochester, Winchester, Lichfield, Worcester, Hereford, and the originals of the Sees now called Chester, Lincoln, Salisbury, Norwich, Chichester, Durham, as also four Bishoprics since merged in others. Thus, to speak generally, the present organization and geographical arrangement of the Church of England is older by a century and a half, in some parts by two centuries and more, than the Kingdom of England.

The Church of England passed unbroken through the Norman Conquest. Lanfranc was consecrated the first Norman Archbishop of Canterbury by nine English Bishops. The Reformation under Henry VIII. is the most important landmark in its existence, and at the Reformation the Bishoprics of Chester, Oxford, Peterborough, Bristol, and Gloucester were formed. In the present century, to meet the wants of the growing populations, the sees of Ripon, Manchester, St. Albans, Liverpool, Wakefield, Truro, Newcastle and Southwell have been created. There are now two Archbishops, 32 diocesan (Bishops of whom 24 have seats in the House of Lords), and 17 Bishops Suffragan. The Anglican Episcopate has spread far and wide. There are 90 colonial and missionary bishoprics, the first being that of Nova Scotia in 1787; and 80 American bishoprics, the first in 1784. The growth in modern times may be seen from the invitations to the Lambeth Conference of Bishops in communion with the Church of England: in 1867, 144; 1878, 173; 1888, 211; for 1897, 247.

The Convocations of Canterbury and York are the deliberative bodies of the Church of the Southern province and the Northern province respectively. The archbishops and bishops, the deans and archdeacons, sit in Convocation *ex officio*, and there are elected representatives of the Cathedral Chapters and the beneficed clergy. In accordance with ancient custom, Convocation cannot make ecclesiastical laws or canons without the permission of the Sovereign.

There are about 14,000 parishes, and in half of these the income of the incumbent is less than £130 a year. The estates of the Bishoprics and Cathedrals are in the main managed by the Ecclesiastical Commissioners, who pay the incomes of the bishops, &c., and spend the balance in improving the endowments and buildings of parishes, providing funds for additional clergy, and endowing new parishes. The whole number of clergy, beneficed and not beneficed, is about 23,000; the Archdeacons (90 in number) and Rural Deans (810) are the officers through whom the bishop of the diocese regulates their proceedings. Each diocesan bishop has a Court with legal officials, for the trial of cases that arise.

The sums raised by voluntary contribution during the period from April, 1894, to March, 1895, as given in the "Church Year Book" for 1896, amounted to about £5,850,000, exclusive of offerings by Churchmen made direct to societies and independently of the parochial clergy (or for the general maintenance of hospitals and similar institutions). In the 25 years from 1860 to 1884, £35,000,000 was given for Church building and work of that kind, £7,000,000 for Home Mission work, £10,000,000 for Foreign Missions, £22,000,000 for Elementary Education, £4,000,000 for Charitable Work, and £2,000,000 for Clergy Charities; with a total of £81,000,000. Some of the most important items are exclusive of the action of Societies, and a vast amount of charity is never put on record.

POPULATION OF THE WORLD ACCORDING TO RELIGIONS.*

Protestants	137,000,000
Roman Catholics	216,000,000
Greek, Armenian and Abyssinian Churches.	95,000,000
Total Christians	448,000,000
Buddhists and Brahmins	672,000,000
Mohammedans	200,000,000
Jews	7,000,000
Other Creeds	125,000,000
Total non-Christians	1,004,000,000

St. Patrick's National Cathedral, Dublin.—*Dean and Ordinary*, Very Rev. Henry Jellett, D.D.

GENERAL SYNOD.

Consisting of House of Bishops (13) and House of Representatives (viz., 208 clerical and 416 lay).
Honorary Secretaries, Very Rev. Mervyn Archdall, D.D.; Rev. Canon J. B. Crozier, D.D.; Gordon E. Tombe, J.P.; J. C. Meredith, LL.D.
Secretary to the Representative Church Body (incorporated 1870),
Thomas Greene, M.A., 52, St. Stephen's Green East, Dublin.

The Church of Ireland, founded by St. Patrick in the fifth century, existed as a separate Church for nearly 1300 years. From 1152 to 1560 she was in alliance with the Church of Rome. This ceased

Digitized by Google

when, only two Bishops dissenting, she accepted the Reformation. By the Act of Union, 1800, she was united with the Church of England. By the Act of 1869 this union was severed, and on Jan. 1, 1871, the Church of Ireland resumed her ancient position. The Act of 1869 not only disestablished the Irish Church, but also took away her property, nothing being left but the right to the life services of the Annuitant Bishops and Clergy, the right to claim churches in use for divine service, the right to buy the See and Glebe Houses (with garden and curtilage) built by the clergy at their own cost, and £500,000 in lieu of private endowments.

The supreme governing body of the Church of Ireland is the GENERAL SYNOD, which meets annually.

Subject to the General Synod are 23 *Diocesan Synods*, which are assisted by smaller elected bodies called Diocesan Councils.

The Bishop of the Diocese is chosen by the clerical and lay members of the *Diocesan Synod*. The Primate is chosen by the bench of Bishops from amongst their own number.

The incumbent of the Parish is appointed by a *Board of Nomination*, consisting of 7 persons, viz.: —The Bishop, 3 diocesan nominators (2 clerical and 1 lay) appointed by the Diocesan Synod, and three parochial nominators (lay) appointed by the registered vestrymen of the parish.

The financial trustees of the Church are the REPRESENTATIVE BODY, composed of the Archbishops and Bishops, 13 clergymen and 26 laymen, chosen by the Diocesan Representatives in the General Synod, with 13 co-opted members (clerical or lay). This body holds the property of the Church, and administers its funds, subject to the General Synod.

The first property it held was the capital sum £7,581,075, representing the life annuities of the Bishops and Clergy paid over as commutation money by the Church Commissioners, and also £500,000 compensation for private endowments. The commutation capital now amounts only to £1,849,916, charged with annuities to 290 annuitants, £55,749. The funds, however, in the custody of the Representative Body amount in all to £7,873,012, made up of *Commutation* £1,849,916, *Parochial Sustentation* £4,105,261, *Episcopal Sustentation* £449,163, *Glebes purchase* £329,291, *Miscellaneous purposes* £1,090,943

Since 1871, members of the Church have paid in to the Representative Body a total sum of £4,696,864. The interest of the Parochial Sustentation Fund is £164,210. The total amount of assessment for stipend paid by parishes, 1895, was £133,318, and the total amount paid for stipends under Diocesan Schemes was £233,640.

The number of members of the Church of Ireland by the Census of 1891 was 602,300.

Churches, Mission Stations, &c., 303. Parsonages, 143. Clergy, 300. Communicants, 39,664. Baptisms, 1894-95, 8,281.

The ESTABLISHED CHURCH OF SCOTLAND is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both clerical and lay deputies from each of the Presbyteries, and representatives from the universities and royal burghs. It is presided over by a Moderator (chosen annually by the Assembly), and the Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown), who receives the sum of £2,000 for his services. The country, for Church purposes, is divided into 16 synods and 84 presbyteries, and there are about 1,733 ministers and licentiates engaged in ministerial work. The Church population exceeds that of all the other Presbyterian bodies united, and is estimated at about half the whole population of Scotland; the number of communicants in 1894 was 620,376. By it the sum of £429,851 was raised in 1894 for home and missionary purposes. Within the last 46 years 392 chapels, at a cost of £1,427,000, have been endowed and erected into parishes *quoad sacra*. The original parishes were 924, in addition to which there were in 1894, 392 new and 40 Parliamentary parishes, also 207 unendowed churches and 170 preaching and mission stations; a total of 1,733. The Presbyterian form of Church government as first set up in Scotland was superseded in 1662 by the Episcopal Church under the Stuarts; but at the Revolution in 1688, Presbyterianism regained the legal establishment, which it still preserves. In consequence of the action of the civil courts in certain cases of disputed settlements, confirmed by a decision of the House of Lords in 1842, about 289 parish ministers resigned their preferments and in 1843 founded the *Free Church*. MODERATOR, the Right Rev. Archibald Scott, D.D.

PRESBYTERIANISM HAS SEVERAL SUBDIVISIONS.

(1) *The Free Church of Scotland*, founded in 1843, is based on the great principle of the independence of the Church in its spiritual action, and holds as a consequence the right of each congregation to elect its own minister. The circumstances that led to the formation of this Church have been already mentioned. The sum of £367,000 was raised in the first year of the disruption, and by 1853 850 congregations had been formed. At the present day the Free Church is a fully organised body, consisting of a General Assembly, 16 synods, and 75 presbyteries. There are 1,165 ministers, with 1,094 congregations meeting in well-appointed churches built for them, of which about 50 are preaching stations. The General Assembly meets every year at the same time as that of the Established Church. Having no endowments, the clergy are mainly supported by the Sustentation Fund, which along with congregational supplements gives on an average £245 to each minister, three-fourths of whom are also provided with manses. The sum of £650,324 was raised in 1895-96 for the various purposes of the Church, including Missions. MODERATOR for 1896-97 is the Rev. the Hon. W. Miller, LL.D., C.I.E., of the Free Church, Madras.

(2) *The United Presbyterian Church*, which has 29 presbyteries, 577 churches, 613 ministers, and 191,881 members in Scotland and Ireland, who raised

Digitized by Google

£343,839 in 1895 for its purposes. It has 873 missionaries, evangelists, and teachers in the East and West Indies, in Africa, China, and Japan. MODERATOR, 1896-97, the Rev. James Rennie, Glasgow.

(3) *The Presbyterian Church in Ireland.*—According to the Census of 1891, the members of the various Presbyterian churches in Ireland were 446,687. The largest of these, under the superintendence of the General Assembly, consists of 36 home presbyteries, 654 ministers, 565 congregations, with 104,838 communicants, 83,154 families, 9,176 Sabbath-school teachers, and 106,342 scholars. During the year 1895-96 this branch contributed by congregational effort £183,090 for religious, charitable, and missionary purposes. The total income for the year for all purposes was £247,412. It possesses two Colleges, with a staff of 14 professors, and has 29 ordained with 4 medical missionaries in foreign parts. MODERATOR, 1896-97, Rev. H. M. Williamson, D.D., Belfast. *Clerk*, Rev. W. J. Lowe, M.A., Londonderry.

(4) *The Presbyterian Church of England* has 12 presbyteries, 301 congregations, 11 preaching stations, and 69,632 communicants. It has a Theological College in London, and supports 55 missionaries abroad, including 22 women. In 1895 the amount raised for various purposes was £230,542. MODERATOR of Synod for 1896-97, Rev. J. T. McGaw, D.D.

(5) The less numerous divisions are: the Reformed Presbyterian Synod, the Eastern Reformed Synod, the United Original Seceders, the Secession Presbytery in Ireland, and the Synod of the Church of Scotland in England.

OTHER RELIGIOUS DENOMINATIONS.

The ROMAN CATHOLIC CHURCH. (*See* page 250.)

WESLEYAN-METHODISTS. (*See* page 252.)

The INDEPENDENTS, or CONGREGATIONALISTS, in England come next to the Methodists; they are the most ancient community of Dissenters. They maintain that each church is its own ruler, and thus dispense with both episcopacy and presbyteries. They first appeared in the time of Elizabeth, under whom they were very harshly treated; in consequence, great numbers repaired to North America; but their principles triumphed under the Commonwealth. In 1831 the majority of their churches were formed into the Congregational Union. There are 51 county and other Associations in England and Wales, with 4,594 churches and preaching stations containing 1,626,865 sittings; the number of ministers is stated as 2,816. Of these 127 are temporarily without pastoral charge, 74 are engaged in collegiate and tutorial duties, 42 are occupied in secretarial work, and 327 by reason of age or ill-health have retired from pastoral duty. CHAIRMAN, 1897, Rev. Charles A. Berry, D.D., Wolverhampton. *Sec.*, Rev. W. J. Woods, B.A. (Memorial Hall, Farringdon St.).

The *Countess of Huntingdon's Connexion*, with 36 chapels. Its tenets are expressed in XV articles, founded on the XXXIX articles and Westminster Confession, but in some chapels the prayers of the Church of England are read.

The BAPTISTS are, in all respects but one, similar to the Independents; they have the same form of Church government, and differ but in one point of practice—viz., the Baptism by immersion of believers only. Like the Congregationalists, they are for the most part grouped in Associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1813. In Great Britain and Ireland there were, in 1895, 3,809 chapels and 1,935 pastors. The members numbered 353,967, and Sunday scholars 513,638. In addition to the members in this country, the Baptists have numerous chapels and several hundred ministers in the Colonies. In the United States they form one of the most numerous religious bodies there, the "members" alone numbering somewhere about 4,000,000. Their missionaries are employed in India, Ceylon, China, Palestine, the West Indies, Africa, Brittany, and Italy.

The WELSH CALVINISTIC METHODIST ASSOCIATION is the only Church of purely Welsh origin, and embraces a very large section of the Welsh-speaking population. The form of Church government is presbyterian. At the present time the body numbers—chapels and places of worship, 1,486; ministers and preachers, 1,123; deacons, 5,309; communicants, 145,094; on probation, 2,931; Sunday-school teachers, 24,860; scholars and teachers, 195,354; number belonging to the congregations (including communicants), 306,669. A sum amounting to £230,105 was collected for various religious purposes in 1894. One of the features of the Welsh churches is the Sunday school, which is attended by adults as well as children: the vernacular is the language generally used in these schools. There are 221 English congregations with 14,740 communicants; all the rest are Welsh. MODERATOR of General Assembly, 1896, Rev. W. James, Aberdare.

The SALVATION ARMY is one of the most recent religious denominations, and one of the most successful. In Aug. 1896, the number of *Officers* was 12,035, of *Enrolled Soldiers* about 500,000, of *Corps* and *Outposts* 5,469, of *Junior Soldiers Corps*, 1,252, *Local Officers*, 25,126. The number of countries occupied was 44, and of languages used 28. Connected with the Salvation Army are numerous philanthropic institutions under various denominations, including 27 Homes of Rest, 64 Rescue Homes for Fallen Women, 87 Slum Posts, 17 Prison Gate Homes, 77 Shelters and Cheap Food Depôts for the Homeless, 30 Workshops and Factories, 31 Labour Bureaux, 7 Farms, &c. "GENERAL," William Booth.

MINOR RELIGIOUS DENOMINATIONS.—A complete list of these will be found at p. 253. The chief of them are the Unitarians, with about 350 ministers, 345 chapels, and other places of worship. The Society of Friends, which consists of 16,412 members in Great Britain, has 337 recorded ministers, including 136 women; their places of worship in 1895 numbered 353. *Central Office*, 12 Bishopsgate St. Without, E.C. The Moravians have about 50 congregations and preaching stations. The Catholic and Apostolic Church have above 80 churches; the New Jerusalem Church (Swedenborgians), 75 societies, with 6,063 registered members; the Latter-Day Saints (Mormons) have 82 churches. Among the inhabitants of the United Kingdom are about 80,000 Jews, mainly in London and other large towns, who possess 80 synagogues, with about 100 ministers and readers (*Chief Rabbi*, Dr. Hermann Adler). The Jews support their own poor, and raise about £150,000 annually for religious and benevolent purposes. Their number throughout the world is computed at various totals. The Brethren, or Plymouth Brethren, have 23 places of worship in London and the suburbs. The Greeks have churches in London, Manchester, and Liverpool. The Armenians have churches in London and Manchester; the French, Dutch, Swedes, and Swiss in London, Norwich, and Canterbury; and now a mosque has been opened for Moslems. Each year fresh names are added to the list, but it does not necessarily follow that there are so many new sects.

In theory the Church of England is governed by means of its Convocations of Bishops and Clergy: there is a House of Convocation for each province, Canterbury and York. Each Convocation consists of two Houses, the upper confined to the archbishops and bishops, the lower composed of the dean of every cathedral, the archdeacons, with proctors elected from every cathedral chapter, and two more elected by the clergy of every diocese in the Province of Canterbury, and by every archdeaconry in the Province of York. A fresh election is made with every new Parliament.

PROVINCE OF CANTERBURY.

Upper House.

President.—The Most Rev. the Lord Archbishop.
The Right Rev. the Lords Bishops of London; Winchester; Bangor; Bath and Wells; Chichester; Ely; Exeter; Gloucester and Bristol; Hereford; Lichfield; Lincoln; Llandaff; Norwich; Oxford; Peterborough; Rochester; Salisbury; Southwell; St. Albans; St. Asaph; St. David's; Truro; Worcester.

Lower House.

Prolocutor, The Rt. Rev. Bishop Sumner, D.D.
The Very Rev. the Deans.
The Venerable the Archdeacons.

Also the following Proctors:

BANGOR.—*Chapter*, Canon Thomas.
Clergy.—T. Edwards; E. Hughes.
BATH & WELLS.—*Chapter*, Canon Buckle.
Clergy, W. Michell; Edwin A. Salmon.
CANTERBURY.—*Chapter*, Canon Rawlinson.
Clergy, A. Whitehead; F. H. Murray.
CHICHESTER.—*Chapter*, Canon Sanderson, D.D.
Clergy, A. H. S. Barwell; J. J. Hannah.
ELY.—*Chapter*, Canon E. C. Lowe, D.D.
Clergy, J. H. Macaulay; W. Cunningham.
EXETER.—*Chapter*, Canon Edmonds.
Clergy, H. Tudor; R. Martin.
GLOUCESTER & BRISTOL.—*Chapters*, Canon St. John (*Gloucester*); Canon Tetley (*Bristol*).
Clergy, F. V. Mather; H. Procter.
HEREFORD.—*Chapter*, W. Poole.
Clergy, E. F. Clayton; C. S. Palmer.
LICHFIELD.—*Chapter*, Rt. Rev. Sir L. T. Stamer, Bt.
Clergy, C. N. Bolton; E. Philips.
LINCOLN.—*Chapter*, Sub-Dean Clements.
Clergy, J. H. Overton; G. W. Jeudwine.
LLANDAFF.—*Chapter*, Prebendary C. J. Thompson.
Clergy, John T. Harding; F. W. Edmondes.
LONDON.—*Chapter*, Rt. Rev. G. F. Browne; Canon Duckworth (*Westminster*). *Clergy*, Preb. A. J. Ingram; (and a vacancy).
NORWICH.—*Chapter*, Canon C. K. Robinson.
Clergy, Constantine Frere; T. P. Garnier.
OXFORD.—*Chapter*, Canon William Bright.
Clergy, Edmund Savory; W. F. Norris.
PETERBOROUGH.—*Chapter*, Canon L. Clayton.
Clergy, W. Yates; H. L. Watson.
ROCHESTER.—*Chapter*, Canon Jelf.
Clergy, Canons Clarke and Bristow.
ST. ALBANS.—*Chapter* (none).
Clergy, J. W. Irvine; J. M. Procter.
ST. ASAPH.—*Chapter*, Canon E. W. Edwards.
Clergy, David Evans; David Jones.
ST. DAVID'S.—*Chapter*, Canon Lewis.
Clergy, T. R. Walters; D. Jones.
SALISBURY.—*Chapter*, Canon T. L. Kingsbury.
Clergy, R. S. Hutchings; Canon E. S. Bankes.
SOUTHWELL.—*Chapter* (none).
Clergy, Charles Gray; C. J. Hamilton.
TRURO.—*Chapter*, A. J. Worlledge.
Clergy, A. C. Thynne; J. S. Tyacke.
WINCHESTER.—*Chapter*, Canon W. P. Warburton.
Clergy, Vernon Musgrave; W. Durst.
WINDSOR.—*Chapter*, Rt. Rev. Bishop Barry.
WORCESTER.—*Chapter*, Canon Knox Little.
Clergy, W. W. Douglas; E. A. Waller.
Vicar-Gen., The Rt. Hon. Sir Jas. Parker Deane, *Registrar*, Sir John Hassard. [D.C.L., Q.C.
Actuary, Francis Cobb.
Apparitor-General, Sir J. A. Hanham, Bart.
Clerk, Arthur Ryder.

PROVINCE OF YORK.—Upper House.

President.—The Most Rev. the Lord Archbishop.
The Right Rev. the Lords Bishops of Durham; Ripon; Chester; Carlisle; Manchester; Liverpool; Newcastle; Wakefield; Sodor and Man.

Lower House.

Prolocutor, T. E. Espin, D.D.
The Very Reverend the Deans of the Province.
The Venerable the Archdeacons.

And the following Proctors:

YORK.—*Chapter*, Canon Randolph; Bishop Blunt. *Clergy*, Canon Faber; Canon Argles. *Clergy of Cleveland*, Rev. C. N. Gray; Canon H. Temple. *Of E. Riding*, Canon Watson; J. W. Stanbridge. *Of Sheffield*, J. Gilmore; W. R. Pim.
CARLISLE.—*Chapter*, Bishop Ware. *Clergy*, Canon Mathews; R. Bower. *Clergy of Westmorland*, Canon Stock; Canon Sherwen. *Clergy of Furness*, L. R. Ayre; Canon Bell.
CHESTER.—*Chapter*, Canon Feilden. *Clergy*, Canon Wood; W. E. Torr. *Clergy of Macclesfield*, Canon Gore; S. A. Boyd.
DURHAM.—*Chapter*, Canon Tristram. *Clergy*, Canon J. Baily; Canon H. E. Savage. *Clergy of Auckland*, Chancellor T. E. Espin; Canon D. R. Falconer.
LIVERPOOL.—*Chapter* (none). *Clergy*, Canons Jones and Blundell. *Clergy of Warrington*, Canons O. H. L. Penrhyn and G. H. Spooner.
MANCHESTER.—*Chapter*, Canon Crane. *Clergy*, Canon Birley; Hon. A. T. Lyttelton. *Lancaster*, Canon Hawkins; S. Hastings. *Blackburn*, Bishop Cramer-Roberts; Canon Rogers.
NEWCASTLE.—*Chap.* (none). *Clergy of Northumberland*, Canons J. M. Lister; P. Rogers. *Clergy of Lindisfarne*, Canons J. Waite and H. F. Long.
RIPON.—*Chapter*, Canon Wynter-Gibbon. *Clergy of Richmond*, R. P. Daniell-Bainbridge; V. J. Ryan. *Of Craven*, Canon Eddowes; A. J. G. Nash. *Of Ripon*, Canons Owen and Wood.
SODOR AND MAN.—*Clergy*, B. P. Clarke.
WAKEFIELD.—*Clergy of Halifax*, Canons Iven and Grenside. *Clergy of Huddersfield*, Canon J. W. Bardsley and W. F. Norris.
Archbishop's Commissioners.—Bishop of Beverley the Dean and Canons Residentiary of York.
Synodal Secretary.—Rev. Canon Wright, Rectory Stokesley, Yorkshire.
Registrar.—Hen. A. Hudson, Minster Yard, York.

BRITISH MISSIONARY CONTRIBUTIONS.

THE 25th annual summary of British contributions to Foreign Missions, compiled by the Rev. Canon Scott Robertson, of the Dane John, Canterbury, exhibits the amount collected in the United Kingdom by Missionary Societies. These amounts do not include balances brought forward, contributions from abroad, or sums derived from invested capital:—

Church of England Societies	£544.2[illegible]
Unsectarian Societies, Bible, Tract, &c.	184,2[illegible]
Nonconformist Societies in England	445.8[illegible]
Scottish & Irish Presbyterian Societies	200,4[illegible]
Societies of the Roman Catholic Church	12,9[illegible]
Total for Foreign Missions in 1895	**£1,387.6[illegible]**

Total in 1893, £1,228,257—in 1893, £1,375,571.

The Roman Catholic Church.

(From a Roman Catholic Contributor.)

THE ROMAN CATHOLIC CHURCH.

Consists of that vast body of Christians throughout the world who, professing the same faith, and having the same Sacraments and same holy Sacrifice of the Mass, are united under one visible head, the Roman Pontiff, as Vicar of Christ, and Successor of St. Peter the Prince of the Apostles.

In the Catholic Church there is a *threefold office*. 1. The *teaching* office, with authority to teach Divine Truth, to condemn error, and to decide religious controversies. 2. The *priestly* office, with power to offer the holy Sacrifice, to administer the Sacraments, and to perform other sacred functions. 3. The *pastoral* office, with authority to rule and govern the Church.

1. The matter of the Church's *teaching* consists of the whole revealed word of God: namely, the doctrine contained in the Holy Scriptures; and the revealed doctrine, not written in the Holy Scriptures, which has come down by tradition from the time of the Apostles. This twofold doctrine includes, not only the truths which have been *explicitly* revealed, but also other truths which, necessarily following from them, have been revealed *implicitly*. — The Church's teaching is infallibly made known, (1) in those truths which, without being formally defined, are believed by the whole Church; (2) by the articles of recognised Creeds, and the definitions of œcumenical Councils; (3) by the Roman Pontiff "when he speaks *ex cathedrâ*,—that is, when, in discharge of the office of Pastor and Teacher of all Christians, by virtue of his supreme apostolic authority he defines a doctrine, regarding faith or morals, to be held by the universal Church."

2. The *priestly* office of the Church is exercised, first, by the Bishops, in whom resides the plenitude of the Priesthood; secondly, by the Priests and other sacred ministers, to whom the Bishops communicate a part of their sacred power.—The Sacraments administered, and the holy Sacrifice offered in the Church, are everywhere the same; but with a difference of ceremonial, from which arises the distinction between the *Latin Rite* and the several kinds of *Oriental Rite*.

3. The *pastoral* office includes the whole of the Church's government, with its legislation and discipline. This legislation and discipline may vary; but the doctrine of the Church cannot change.

THE CATHOLIC HIERARCHY, or governing body of the Catholic Church, consists of:—1. The Sovereign Pontiff, assisted by the Sacred College of Cardinals, and by about 20 Sacred Congregations, or permanent ecclesiastical committees, of which the Cardinals are the chief members; and of which the most generally known are the Inquisition or Holy Office, the Congregation of Bishops and Regulars, the Propaganda, the Index, and the Congregation of Sacred Rites. 2. The Patriarchs, Archbishops, and Bishops. 3. The Apostolic Delegates, Vicars, and Prefects; and 4. certain Abbots and Prelates.

Subject to the Bishops, and co-operating with them in the sanctification and spiritual direction of the faithful, are the great body of the Priesthood. Next to these may be mentioned the many Religious Orders and Congregations of men and women, who, while attending to their own sanctification, render also good service to the Church for the sanctification of others, by education, and by various corporal and spiritual works of mercy and of charity.

The Sovereign Pontiff. Pope Leo XIII. (Vincent Joachim Pecci), the 258th Pope, counting from St. Peter, was born March 2, 1810; elected Pope Feb. 20, and crowned March 3, 1878.

The Cardinals. The Sacred College consists, when complete, of 70 Cardinals: namely, 6 Cardinal Bishops, whose dioceses are the six "suburban sees" near Rome; 50 Cardinal Priests (for the most part Archbishops or Bishops), whose "titles" as Cardinals are the "titular churches" of Rome; and 14 Cardinal Deacons.—The present number of Cardinals is 60: 5 Bishops, 51 Priests, and 4 Deacons; all of whom, except 12 Cardinal Priests and the 4 Deacons, are Patriarchs, Archbishops, or Bishops. Of these 60 Cardinals, 32 are Italian; 11 Austrian, German, or Polish; 5 French; 4 British subjects; 4 Spanish; 2 Portuguese; 1 of the United States; and 1 Belgian.—The first Cardinal Bishop is Louis Oreglia di Santo Stefano, Dean of the Sacred College; the first Cardinal Priest, Gustavus Adolphus von Hohenlohe; the first Cardinal Deacon, Theodolphus Mertel. Cardinal Rampolla is Secretary of State to His Holiness. Cardinal Ledochowski is Prefect of the Propaganda, the Sacred Congregation which is specially charged with the ecclesiastical affairs of non-Catholic countries, both of the *Latin* and of *Oriental Rite*.—The 4 British subjects in the Sacred College are: Cardinals Moran, Taschereau, Logue, and Vaughan, Archbishops respectively of Sydney, Quebec, Armagh, and Westminster, who are all Cardinal Priests.

Patriarchs, Archbishops, and *Bishops.* In the Catholic Church there are 10 Patriarchates, with 14 Patriarchal Sees, 8 of the Latin Rite and 6 of Oriental Rite; 191 Archiepiscopal Sees, 173 Latin and 18 Oriental; 772 Episcopal Sees, 719 Latin and 53 Oriental. Besides these 977 *Residential Sees*, as they are called, there are other Sees called *titular*—formerly called Sees *in partibus infidelium* (in infidel regions), which for the most part are assigned to those Archbishops and Bishops who are appointed to Apostolic Delegations, Vicariates, or Prefectures; or to the office of Coadjutor, Auxiliary, or Administrator. — There are 8 Delegations, 124 Vicariates, and 43 Prefectures Apostolic; of which, all the Delegations, and nearly all the Vicariates, are administered by Archbishops or Bishops.—The total number of Patriarchs, Archbishops, and Bishops, on January 1, 1896, was 1,295.

THE CATHOLIC CHURCH IN THE BRITISH EMPIRE.

In *England*, from 1623 to 1850, Catholics were under Bishops, as Vicars-Apostolic, with first 1, then 4, and afterwards 8 Districts or Vicariates; in 1850 the Hierarchy was restored, by the erection of one Archiepiscopal and 12 Episcopal Sees, now increased to 14. In *Scotland*, Catholics were under Bishops, as Vicars-Apostolic, from 1694 to 1878, with first 1, then 2, and afterwards 3 Districts or Vicariates; in 1878 the Hierarchy was restored, by the erection of 2 Archiepiscopal and 4 Episcopal Sees. In *Ireland*, the ancient Hierarchy has continued to this day. In *Wales* there is now a Vicariate.—Besides the United Kingdom, Hierarchies are established in British America, India, and Australasia.

There are now in the British Empire 28 Archiepiscopal and 102 Episcopal Sees; and 29 Vicariates and 11 Prefectures Apostolic. Including 10 Coadjutors and Bishops-Auxiliary, the number of Archbishops and Bishops now holding office in the British Empire is 167, distributed as follows:—

The Methodist Churches.

Under the general designation of Methodists are included all those religious bodies which owe their existence, directly or indirectly, to the efforts of the Revds. John and Charles Wesley. The most numerous and influential of them are—

Wesleyan Methodists, the original body founded in 1739 by these two brothers. While students at Oxford, in 1729, they gathered a number of young men together for purposes of study and devotion, who were nicknamed, first, "The Holy Club," and afterwards "The Methodists." In 1739 John Wesley founded the "Religious Societies," in which the first beginnings of Methodism are to be found. The number of members rapidly increased, until a more definite and extensive organisation than Wesley at first gave them was imperatively demanded. The first *Conference*, consisting of six clergymen and four laymen, was held in 1744. The Conference is now composed in its Representative Session of 240 ministers and 240 laymen with a ministerial president and secretary at its head, elected year by year; by semi-annual meetings of the ministers in each district, over which a chairman is appointed by the Conference; and by quarterly meeting of the ministers and lay officers of each circuit. The authority of both these last meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism. When Wesley died the number of members was 76,968, and since then the increase has been so great that above 18,000,000 people are now receiving Methodist instruction in various parts of the world. At Washington in October, 1891, it was reported that there were more than 30,000,000 Methodists, but this is merely an estimate. *Pres.* Rev. M. Randles, D.D.; *Sec.* Rev. M. Hartley. Various district bodies of Methodists have been formed, the most important being these:—

1. *The Methodist New Connexion*, which was formed in 1797 by the Rev. Alexander Kilham, the original difference between it and the parent body being the different degrees of power allowed to the laity.—*President*, Rev. E. Holyoake.

2. *The Primitive Methodists*, who sprang up in Staffordshire, in 1810, under the leadership of Hugh Bourne. Next to the Wesleyans they are the most numerous of all the denominations which have arisen out of the Methodist movement.—*President*, Rev. W. Jones.

3. *The Bible Christians*, founded in 1815 by William O'Bryan, a Wesleyan lay preacher in Cornwall. They exist principally in the West of England.—*President*, Rev. D. Murley.

4. *The United Methodist Free Churches*, which are an amalgamation of three different secessions—the Protestant Methodist, formed in 1828; the Wesleyan-Methodist Association, which sprang out of a controversy in 1834, concerning the training of ministers; and the Wesleyan Reform Association, founded in 1849, during a great agitation in the Wesleyan societies. The union was effected in 1857. *President*, Rev. G. Turner.

Finances.—The amount raised for sustentation by the Methodist bodies can only be approximately estimated. The *Wesleyans* raised in 1895-96 £117,205 to sustain their very extensive missionary operations. At the same time their Home missionary income was £36,900; £29,040 were expended on the education of ministers' children at the Connexional schools; £245,610 were contributed in Great Britain for chapel-building; and £10,000 for the training of candidates for the ministry, of whom there are 163 in the four theological colleges. By the *Methodist New Connexion* the following sums were raised: For chapel fund, £970; for missions, £6,051. The *Primitive Methodists* raised £34,127 for new chapels, and the *United Methodist Free Churches* £22,440 for their missions.

The number of Members is for the United Kingdom; of Chapels and Scholars, Great Britain only.	Ministers	Lay Preachrs.	Members	On Probation.	Chapels.	Sunday Scholars.
Wesleyan Methodists	2,358	17,224	462,237	32,050	7,930	965,201

The number of Religious Denominations by whom Buildings were certified for Worship up to 31st October, 1895, and enumerated above, was 293, there being an increase of 15 during the year. Those marked (*) appear in the list this year for the first time.

The Universities.

In the Middle Ages the term "University" could be applied to any organised body of men. There could thus be a "university" of persons engaged in any particular occupation. The term came, however, to be appropriated exclusively to bodies of persons engaged in the occupation of teaching and study. Such Universities or guilds of teachers and students, when they had attained some definite organisation, naturally secured the right of granting licences to teach. As time went on it became the custom to grant these licences not only to persons who actually wished to teach, but to all who demanded them and who fulfilled certain requirements, and thus they became what we now understand by the term "degrees."

The earlier Universities grew so imperceptibly from small beginnings, that it is impossible to say who were their founders or in what year they were founded. Bologna (the earliest) and Paris (the most important) first rose into notice in the twelfth century, Oxford and Cambridge in the thirteenth. The system of degrees and the names of the chief officers of the University were introduced into England, as well as into other countries, from Paris. The distinguishing characteristic of the Universities of Oxford and Cambridge undoubtedly is the existence of a number of separate corporations, or Colleges, of which the names are given below.

There have been and are Colleges at many Universities, but nowhere have they reached anything like the same influence and importance as at Oxford and Cambridge. The origin of the Colleges was due to benevolent persons who desired to relieve a certain number of poor scholars from some of the hardships of their life at the mediæval Universities, and in order to do this provided a building in which such scholars could live a common life, and also an endowment for their maintenance. University and Balliol Colleges at Oxford were established in a somewhat rudimentary form in the middle of the thirteenth century; but the establishment of Merton College at Oxford, in 1274, by Walter de Merton, was the real beginning of the English college system. In the foundation of Peterhouse, the first Cambridge college, ten years later, "the rule of Merton" was closely followed.

The early College consisted of a Head and scholars, endowed with board and lodging by means of the buildings and revenues provided by the founder. The scholars were divided into senior scholars engaged in giving instruction, and junior scholars engaged in receiving it; the senior scholars were each other's "fellows;" and gradually the term "Fellow" became appropriated to the senior or governing members of the College, while the term "Scholar" was restricted to the junior members. It was not till long after the establishment of Colleges that it became the custom for them to take in paying boarders—"commoners" at Oxford, "pensioners" at Cambridge. At first the class which corresponds to the commoners and pensioners of the present time continued to live (as the whole University did before the establishment of Colleges) in lodgings kept by townsmen or graduates. Two of the old lodging-houses, or "Halls" kept by graduates still remain at Oxford; but under the regulations of the Commission of 1882, they will disappear on the next vacancy in the office of Principal. But a statute of the same year provided for the existence of Private Halls: of these there at present are three, with 38 undergraduates. Twenty years ago the pre-college era was to some small extent restored by the admission of "non-collegiate students" to Oxford and Cambridge.

The University of Oxford at present numbers upwards of 12,000 members. Of these about 3,000 are in residence in Oxford; the remainder, with a few exceptions, have finished their academical course, taken a degree, and are scattered over the country following various professions. The resident members of the University consist of undergraduates going through a course of instruction and study, and of graduates giving instruction or engaged in research. The resident graduates are 400 or 500 in number, and the undergraduates in residence are about 3,000.

The government of the University is in the hands of three bodies:—1. Convocation, which consists of all Masters of Arts and Doctors of Civil Law, Medicine, or Divinity, who remain members of the University, whether resident or non-resident; 2. Congregation of the University, which consists of resident members of Convocation; 3. The Hebdomadal Council, which consists of certain officers and 18 members elected by Congregation. The Hebdomadal Council alone has the power of initiation; Congregation can amend, confirm, or reject its proposals; Convocation can only confirm or reject them; it may, however, amend certain proposals relating to money. The election of the University representatives in Parliament is vested in the members of Convocation. The Ancient House of Congregation, which must not be confounded with the Congregation of the University, has now nothing to do with legislation in any form, but confines itself to granting degrees and electing examiners. In order to "matriculate," or become a member of the University, it is necessary to be admitted into one of the Colleges or Halls, or into the body called Non-Collegiate Students. A candidate may be admitted into a College as a scholar, as an exhibitioner, or as a commoner. Most of the scholarships are now open to competition for youths under 19, and are chiefly of the value of £80 per annum for (practically) four years. Some of the exhibitions are scarcely distinguishable in any important respect from open scholarships, but election to an exhibition is, as a rule, subject to the satisfaction of the electors that the candidate is in necessitous circumstances. Besides the open scholarships and exhibitions, there are still a few "close" ones confined to particular localities, or particular schools. To be admitted into a College as a commoner, or to become a member of a Hall, or a non-collegiate student, it is necessary to pass an examination held by the College or Hall, or by the delegates of non-collegiate students, or to have passed some test accepted in lieu of this examination. The degree of Bachelor of Arts, the ordinary University degree, cannot be obtained in less than 2 years and 8 months from matriculation, nor without residing in Oxford for twelve terms, which need not be continuous; there are 4 terms in each year. Members of the University who wish to proceed to a degree must first pass Responsions or one of the examinations accepted as equivalent. The path of undergraduates then divides: those aiming at Honours in Natural Science take the science preliminary, and then the final schools; to the rest three courses are open, (*a*) to read Pass Moderations and Pass

Finals; (*b*) to read Pass Moderations (or, what is reckoned as the equivalent for the schools of Law and Modern History, the Law Prelim.), and one of the final honour schools of Litt. Hum., Mathematics, Natural Science, Law, Modern History, Theology, and English Literature; (*c*) to read Honour Moderations in Classics or Mathematics, and any one of the above-mentioned Honour Schools or the Pass final School. After passing these examinations the under-graduate is entitled to take the degree of Bachelor of Arts (or Medicine). For a musical degree a special course is prescribed. For the higher degrees of Bachelor or Doctor in Civil Law, Medicine, and Divinity no more residence is necessary, but for the baccalaureate in Civil Law and Medicine there is an examination prescribed. For the degree of B.Litt. or B.Sc., a special course of study is prescribed by the statutes of the University; for the baccalaureate in Divinity a thesis is at present required. For the M.A. degree the only requirement is that the candidate should have taken the B.A. degree and had his name on the books for twenty-six terms since his matriculation. The bulk of the instruction at Oxford is given by the college tutors and lecturers under a system which allows members of one College to attend lectures given in any other. The remainder of the instruction is given by the University Professors and Readers. The chief University institutions are the Bodleian Library, the second library in the Kingdom; and the Museum, which is furnished with all that is necessary for teaching natural science and medicine.

In 1880 a statute was passed by which "any College or Institution within the United Kingdom, or in any part of the British dominions, being a place of education in which the majority of the students are of the age of 17 at least, may, under certain conditions, be admitted to the privilege of affiliated Colleges." St. David's College, Lampeter, in 1880, University College, Nottingham, in 1882, and Firth College, Sheffield, in 1886; and in the British Colonies, Sydney and the Cape of Good Hope availed themselves of this in 1888, Calcutta and the Punjaub in 1889, Bombay in 1890, Adelaide in 1891, Madras, Melbourne, Allahabad, and New Zealand in 1894, and Toronto in 1895.

In 1884 a statute was passed allowing the delegates of local examinations to use the several honour schools of the University for the purpose of the examination of women. Somerville College, Lady Margaret Hall, and St. Hugh's Hall are now established in Oxford for the higher education of women, and some of the members avail themselves of this statute, and are also admitted to the lectures of some of the University professors, and to certain of the College lectures.

The semi-official guide to the University is the "Student's Handbook to the University of Oxford," of which a new edition is being prepared.

THE UNIVERSITY OF CAMBRIDGE is an incorporation of students in all and every of the liberal arts and sciences. It consists of seventeen Colleges, one public, and one private, hostel, founded "for the study of learning and knowledge, and for the better service of Church and State." These are maintained by the endowments of their several founders and benefactors; each of them is a corporate body, and is bound by its own statutes, but is likewise controlled by the paramount laws of the University. A new Code of Statutes for the University was approved by the Queen in Council in 1882. In each of the Colleges there are eight separate orders: these are—(1) Head; (2) Fellows; (3) Noblemen graduates, doctors in the several faculties, bachelors of divinity, masters of arts and masters of law, who are not upon the foundation; (4) Bachelors of Arts, Physic, and Law (5) Fellow-commoners; (6) Scholars; (7) Pensioners, forming the great bulk of the students; and (8) Sizars, students of narrow means, and in receipt of various emoluments. The head of each College has supreme disciplinary authority in educational matters; and he, together with the foundation fellows, or a council elected by them, form the governing body. The great legislative assembly of the University is called the Senate: it is composed of all those who have obtained the degree of Doctor or Master, and whose names are still on the register. There is a Council of the Senate (consisting of the Vice-Chancellor and sixteen members of the Senate, of whom eight vacate their office every second year, the office being held for two years), by whom every University "grace" or decree must be approved before it is offered to the Senate. A residence of nine terms is required from each student before taking the B.A. degree, and "honours" may be obtained in any of the following:—Mathematics, Classics, Moral Sciences, Natural Sciences, Mechanical Sciences, Law, History, Theology, Semitic, Indian, and Modern Languages. The University possesses a library of more than 200,000 printed volumes, besides MSS., the Fitzwilliam Museum, the Observatory, the Botanical Garden, the Museum of Biological and Physical Science, and the Divinity School. James I. granted to the University the privilege of sending two Members to Parliament, which it has ever since enjoyed. In 1893-94, the number of students who matriculated was 935, while the members on the boards amounted in 1892 to 12,440. The University has powers with regard to the admission of affiliated students similar to those possessed by the University of Oxford. Privileges of affiliation are also granted under certain conditions to students and local lecture centres. The following Colleges and Institutions have been admitted to the privileges of affiliation:—University College, Nottingham; Firth College, Sheffield; University of Adelaide; University of Calcutta; St. David's College, Lampeter; University of New Zealand; University College of Wales, Aberystwith; University of the Cape of Good Hope; St. Edmund's College, Old Hall, Ware; Universities of Allahabad, Bombay, Punjab, Toronto.

DUBLIN UNIVERSITY, which is, for most purposes, identical with Trinity College, Dublin, was incorporated by Royal Charter in 1591. Oxford and Cambridge recognise each other's degrees, and those granted by Dublin University, but no others. There are schools of Divinity, Law, Medicine and Surgery, and Engineering. It is represented in Parliament by two members.

SCOTLAND possesses four Universities, namely, those of St. Andrews, Aberdeen, Edinburgh, and Glasgow, and the general regulations as to graduation are common to all. THE UNIVERSITY OF EDINBURGH was founded in 1582 by a charter granted by James VI. of Scotland, and in 1621 the Scottish Parliament granted to it all the privileges enjoyed by other Universities in the kingdom. This grant was confirmed in the Treaty of Union between England and Scotland

and again in the Act of Security. The constitution was, however, modified by the Act (1858) relating to the Scottish Universities, and again by the Universities Act of 1889, with numerous ordinances issued by the Commissioners appointed under the latter Act. The University of Edinburgh is a Corporation consisting of a chancellor, rector, principal, 39 professors, and 100 lecturers, &c., 8,000 registered graduates, and about 3,000 matriculated students. The essential qualification for graduation at this, as at other Scottish Universities, is attendance at certain series of lectures or classes. There are now six faculties in the University, viz., Arts, Science, Divinity, Law, Medicine, and Music. The University confers the following degrees after examination, viz.:—M.A., D.Litt., D.Phil., B.Sc. and D.Sc., B.D., B.L., LL.B., M.B., Ch.B.; M.D., Ch.M., Mus. Bac. and Mus. Doc. It also confers the honorary degrees of D.D., LL.D., and Mus.Doc. The buildings have been more than doubled in extent within the last 20 years, and the magnificent McEwan hall is now completed. The library contains about 200,000 volumes and 700 MSS., and there is also a theological library of 10,000 volumes. In the various faculties there are bursaries, scholarships, and fellowships, tenable from one to four years, and ranging in value from £10 to £160, their total value being upwards of £16,000 per annum.

The University of St. Andrews was founded by Henry Wardlaw, Bishop of the diocese, in 1411, and was confirmed by a Bull of Pope Benedict XIII. in 1413. During the 15th and 16th centuries three Colleges were established in connection with it, viz., St. Salvator (1450), St. Leonard (1512), and St. Mary (1537). All the Colleges had originally teachers both in philosophy (or arts) and in theology, but in 1579 the two older of them were confined to philosophy, and that of St. Mary to theology. In the year 1747, the Colleges of St. Leonard and St. Salvator were united by Act of Parliament. The Universities of Edinburgh and St. Andrews unite in sending a representative to Parliament.

The University of Glasgow was founded by a Bull of Pope Nicholas V. (1450–51), with the power of creating doctors and masters, and enrolling readers and students, the whole of whom were to enjoy the same rights and privileges as the University of Bologna. At first it had neither property nor endowment, but in 1460, James, Lord Hamilton, bequeathed to the then Regent and his successors a tenement in the High Street, with four acres of land adjoining, for the "use of the College of Arts." Between 1577—when a new charter was issued—and the Restoration, the University flourished in every way, but the re-establishment of episcopacy detached from it a large part of its revenues, and many of its professorships were abandoned. In 1864 the old buildings were sold for £100,000, and a Government grant of £120,000 was obtained; these amounts, together with public subscriptions and college funds, were laid out in the new buildings now to be seen at the west end of the city. The University of Glasgow includes five faculties, viz., Arts, Theology, Law, Medicine, and Science: it was reconstituted and received further endowments under the Acts of 1858 and 1889. Conjointly with the University of Aberdeen, it sends one member to Parliament.

The present University of Aberdeen derives its origin from two distinct foundations, viz., University and King's College of Aberdeen, founded in 1494 by William Elphinstone, Bishop of Aberdeen, under the authority of a Papal Bull; and Marischal College and University of Aberdeen, founded (1593) by George Keith, 5th Earl Marischal, under a charter afterwards ratified by Act of Parliament. In 1860, by another Act of Parliament, the two foundations were united and incorporated into one University and College, under the title of the University of Aberdeen. The five faculties are Arts, Science, Divinity, Law, and Medicine; and at the end of the Arts curriculum scholarships and prizes are given of the annual value of about £1,300. The University Library contains more than 100,000 volumes.

Of the modern Universities of the United Kingdom the most important is the University of London, which was first incorporated by Royal Letters Patent dated November 28, 1836. The present Charter was issued in 1863; and a supplemental charter, opening all degrees to women, was granted in 1878. This University is simply an examining body which, by reason of its unquestionable integrity and its severely high standard, has gained an excellent reputation. The fees are moderate, ranging from £2 to £10. The various faculties are Arts, Science, Law, Medicine, and Music, and all faculties (except Medicine) are open to candidates irrespective of the place or manner of their education. The matriculation, the Pass examinations in Arts and some in Science, are held at a large number of provincial Colleges, while the matriculation B.A. and LL.B. examinations may be held at colonial centres. The corporate body of the University includes the Chancellor, Vice-Chancellor, fellows, and graduates. In 1895 the total number of candidates at all the examinations was 6,000.

The remaining modern Universities are Durham, established by the Dean and Chapter of Durham under the authority of an Act of Parliament passed in 1831; the Victoria University, which received a Royal Charter in 1880, and combines Owens College, Manchester, University College, Liverpool, and the Yorkshire College, Leeds; the Royal and Catholic Universities of Ireland; and the University of Wales.

Of late years much has been done in the way of extending University teaching and advantages. Both Oxford and Cambridge now hold what are called "Local" Examinations, senior and junior, in many parts of the country, and the certificates granted to the successful candidates are accepted as evidence of competency from an educational point of view. They have also organised "University Extension Lectures," which are given in all parts of the kingdom by arrangement with local committees, who apply for a course of lectures and guarantee the small expenses.

The University of London, too, has arranged a definite scheme, which is now in full working, for the inspection and examination of schools other than primary, conducted under the direction of the Senate.

UNIVERSITY SCHOLARSHIPS, 1895-96.

Abbott, V. M. Ferrers, *Trin.*
Barnes, J. F. Dobson, *Trin.*; F. J. W. Whipple, *Trin.* (equal).
Battie, J. F. Dobson, *Trin.*
Bell, J. L. Coe, *John's*; G. F. Exton, *Jesus*; H. R. T. S. Perrott, *Trin.* (all equal).
Browne (*Sir Wm.*), G. C. Armstrong, *Trin.*
Clerk Maxwell, C. T. R. Wilson, B.A., *Sid.*
Craven, C. E. Guiterman, *Trin.*
Crosse, C. F. Andrews, B.A., *Pem.*; A. H. McNeile, B.A., *Pem.* (equal).
Davies, A. D. Nightingale, *Trin.*
Harkness, J. E. Gray, *King's.*
Lightfoot, J. H. Clapham, B.A., *King's.*
Pitt, J. A. Nairn, *Trin.*
Porson, J. F. Dobson, *Trin.*
Stewart of Rannoch, C. W. Dunn, *Trin.*; G. A. Purton, *Christ's* (*Classics*); W. D. Braithwaite, *Caius*; J. St. A. Johnson, *Trin.*; B. C. S. Everett, *Caius* (*Sacred Music*).
Tyrwhitt, A. R. R. Hutton, *John's*; F. H. Sangster, *Jesus.*
Waddington (not awarded).
Whewell (not awarded).

UNIVERSITY STUDENTSHIPS, 1895-96.

Balfour, A. Willey.
Craven, R. C. Bosanquet, B.A., *Trin.*
Isaac Newton, J. G. Leathem, B.A., *John's.*
John Lucas Walker, L. Cobbett, M.A., *Trin.*
Prendergast, F. A. C. Morrison, B.A., *Jesus.*

UNIVERSITY PRIZES, 1895-96.

Adam Smith, A. L. Bowley, B.A., *Trin.*
Adams (not awarded).
Bhaunagar, J. F. Bryant, B.A., *Clare.*
Browne (*Sir Wm.*) *Medals*, L. D. Barnett, *Trin.* (*Greek Elegiacs*); J. B. Cobden-Samuel, *Jesus* (*Greek Epigrams*); P. Greeves, *John's* (*Latin Epigrams*).
Burney, J. D. C. White, B.A., *Trin.*
Carus, C. F. Andrews, B.A., *Pem.*; J. K. Sopwith, *Emm.*
Chancellor's Medals: Classics, J. A. Nairn, *Trin.*; L. D. Barnett, *Trin.*
English Verse (not awarded).
Legal (not awarded).
Law & English (not awarded).
Cobden, P. M. M. S. Amos, B.A., *Trin.*
Evans (not awarded).
George Long, J. E. R. de Villiers, *John's.*
George Williams (not awarded).
Hare, L. Whibley, M.A., *Pem.*
Harness, S. Walder, B.A., *Caius.*
Hebrew, F. H. Sangster, *Jesus.*
Hebrew Mason, A. R. R. Hutton, *John's.*
Hulsean, L. R. Holme, B.A., *Jesus.*
Jeremie, F. Livingstone, B.A., *Pem.*; W. L. E. Parsons, B.A., *Pem.*; W. F. Wright, B.A., *John's* (equal).
Kaye (not awarded).
Le Bas, H. Oelsner, *Caius.*
Maitland (no essay sent in).
Members, G. P. Gooch, B.A., *Trin.* (*English Essay*); R. K. McEldevry, B.A., *John's* (*Latin do.*).
Norrisian (not awarded).
Porson (not awarded).
Powis (*Medal*), J. J. R. Bridge, *Caius.*
Prince Consort, R. P. Mahaffy, B.A., *King's.*
Scholefield (not awarded).
Seatonian, G. W. Rowntree, M.A., *Clare.*
Sedgwick (not awarded).
Smith, W. S. Adie, B.A., *Trin.*; A. Y. G. Campbell, B.A., *Trin.*; F. W. Lawrence, B.A., *Trin.*
Thirlwall, E. E. Bryant, B.A., *Emm.*
Tyson, E. T. Whittaker, B.A., *Trin.*
Walsingham (*Medal*), I. L. Tuckett, B.A., *Trin.*
Winchester, R. Geikie, *King's*; J. G. McCormick, *John's*; A. J. Simey, B.A., *King's.*
Yorke (not awarded).

SENIOR WRANGLER.

W. G. Fraser, *Queens'.*

UNIVERSITY RECEIPTS AND EXPENDITURE.

Receipts for the year 1895.

Receipts, 1895	£39,681	18	11
Balance due from chest, 31 Dec. 1895	3,499	1	1
	£43,181	0	0

Expenditure for the year 1895.

Total payments	£43,181	0	0

University of London (£17,035)* 1836.

Burlington Gardens, W.

Chancellor, The Rt. Hon. Lord Herschell, G.C.B.
Vice-Chancellor, Sir Henry Enfield Roscoe, D.C.L.

(Senate of Thirty-six Members.)

Representative in Parliament, Right Hon. Sir John Lubbock, Bart., D.C.L.
Representative on Med. Council, S. Wilks, M.D., F.R.S.
Registrar, F. V. Dickins, M.R. £850
Assist. do. and Librarian, H. F. Heath, PH.D. £500
Clerk to Senate, T. Le Marchant Douse, B.A. £450
Assistant do., Alfred Milnes, M.A. £300
Supplemental do., Edwin Brewer £250
Chairman of Convocation, E. H. Busk, M.A.
Clerk of do., Henry E. Allen, LL.B. £250

EXAMINERS.

Anatomy, D. J. Cunningham, M.D.; G. D. Thane, each £150
Botany and Vegetable Physiology, J. R. Green, D.SC.; W. H. Trail, M.A. ..... each £120
Chemistry, W. R. Dunstan, M.A., F.R.S.; H. McLeod, F.R.S. ..... each £240
Common Law and Evidence, W. B. Odgers, LL.D., Q.C.; His Hn. H. M. Bompas, M.A., Q.C. en. £50
Comparative Anat. & Zoology, F. E. Beddard, M.A., F.R.S.; E. Ray Lankester, LL.D., F.R.S. each £120
Constitutional History of England, T. A. Walker, LL.D.; F. C. Montague, M.A. ..... each £25
English Language, Liter., and History, Israel Gollancy, M.A.; C. H. Herford, LITT.D. ... each £180
Equity and Real and Pers. Prop., Alfred Hopkinson, M.A., Q.C., M.P.; J. Simmonds, LL.D. each £50
Experimental Philos., J. H. Poynting, D.SC., F.R.S.; J. J. Thomson, D.SC., F.R.S. ..... each £210
Forensic Med., A. P. Luff, M.D.; Thomas Stevenson, M.D. ..... *artment.*
French Language and Lit., Jam M.A. Victor Spiers, M.A. ..... d, LL.D.
Geology and Physical Geog., Pro M.A. F.R.S.; T. G. Bonney, D.SC., B.A.
German, K. H. Breul, LITT.D; Simmons, LL.B. PH.D. ..... -L.
Greek, G. E. Marindin, M.A M.A. A. W. Ward, LITT.D.

* The amounts named in this list are the sums nominally voted by Parliament for the current year.

Ophthalmology, Edgar A. Browne, F.R.C.S.
Midwifery and Gynæcology, J. Wallace, M.D.
Clinical Medicine, T. R. Glynn, M.D.; A. Davidson, M.D.; Richard Caton, M.D.; W. Carter, M.D.
Clinical Surgery, Rushton Parker, F.R.C.S.; F. T. Paul, F.R.C.S.; W. Mitchell Banks, F.R.C.S.
Diseases of Children, P. Davidson, M.B.
Materia Medica, W. Carter, LL.B., M.D.
Medical Jurisprudence, F. T. Paul, F.R.C.S.
Mental Diseases, J. W. Wiglesworth, M.D.
Hygiene, E. W. Hope, M.D.

LEEDS—THE YORKSHIRE COLLEGE. 1874.

President, The Marquess of Ripon, K.G.
Principal, N. Bodington, M.A.
Dean of Dept. of Medicine, T. Scattergood, M.R.C.S.
Registrar and Secretary, W. F. Husband, LL.B.

Department of Science, Technology and Arts.

PROFESSORS.

Mathematics, L. J. Rogers, M.A.
Physics, W. Stroud, D.SC.
Chemistry, Arthur Smithells, B.SC.
Geology, P. F. Kendall, F.G.S.
Coal Mining, Arnold Lupton, M.I.C.E.
Biology, L. C. Miall, F.R.S.
Botany, J. H. Wilson, D.SC.
Engineering, John Goodman, M.I.M.E.
Greek, N. Bodington, M.A.
Latin & Ancient History, B. M. Connal, M.A.
Philosophy, C. M. Gillespie, M.A.
French, P. H. M. du Gillon.
Teutonic Lang. and Lit., A. W. Schüddekopf, PH.D.
Hebrew, Joseph Strauss, PH.D.
Textile Industries, Roberts Beaumont.
Dyeing, J. J. Hummel, F.I.C.
Spanish, A. R. Alvarez, M.A.
Education, J. Welton, M.A; Miss J. A. Emmerson
Fine Arts, F. Suddards.
Leather Industries, H. R. Procter, F.I.C.
Agriculture, James Muir.
Sanitary Engineering, W. Spinks, M.I.C.E.
And twenty-four others.

Medical Department.

Medicine, J. E. Eddison, M.D.; T. Churton, M.D.
Surgery, A. W. Mayo Robson, F.R.C.S.
Practical Surgery, E. Ward, M.B.
Descript. & Appl. Anat., T. Wardrop Griffith, M.D.
Osteology, Edmund Robinson, M.R.C.S.
Physiology and Histology, De Burgh Birch, M.D.
Pathology and Morb. Hist., E. F. Trevelyan, M.D.
Midwifery, Charles J. Wright, M.R.C.S.
Diseases Women and Children, J. B. Hellier, M.D.
Forensic Medicine, Thomas Scattergood, M.R.C.S.; C. M. Chadwick, M.D.

French and Italian, Clovis Bévenot, M.A.
German, G. Fiedler, PH.D.

Queen's Faculty of Medicine.

Dean, B. C. A. Windle, M.D.
Sub-Dean, G. Barling, F.R.C.S.
With Professors of *Medicine, Surgery, Anatomy, Physiology, Chemistry, Physics, Zoology, Therapeutics, Forensic Medicine, Hygiene and Public Health, Midwifery, Gynæcology, Pathology, Lunacy, Operative Surgery, Toxicology, Ophthalmology, Osteology, Applied Anatomy, Materia Medica, and Dentistry.*
Day Training Dept. (men), C. O. Tunstall, B.A.
,, (women), Miss Joyce.

Librarian, W. H. Cope.
Secretary and Registrar, G. H. Morley.

BRISTOL—UNIVERSITY COLLEGE. 1876.

Principal, C. Lloyd Morgan, F.G.S.
Secretary, James Rafter.

Arts and Science.

Chemistry, S. Young, D.SC.; F. E. Francis, PH.D.; E. H. Strange, B.SC.
Mathematics, F. R. Barrell, M.A.
Exp. Phys., A. P. Chattock; L. N. Tyack.
Engineering, J. Ryan, D.SC.; W. M. Thornton, B.SC.; W. J. B. Davis; W. Osborne.
Geology, Botany and Zoology, C. Lloyd Morgan, F.G.S.; S. H. Reynolds, M.A.
Botany, S. H. Reynolds, M.A.
Mod. Hist. & Eng. Lit., J. Rowley, M.A.; C. Ord, M.A.
International Law, Sir C. M. Kennedy, K.C.M.G.
Greek & Latin, R. Fanshawe, M.A.; F. Brooks, M.A.
Hebrew, Rev. J. Polack, B.A.
French, C. le V. Hastings, B.A.; A. d'Ourey, B.A.
German, C. Ord, M.A.—*Italian*, Signorina Gualtieri
Harmony, &c., C. Bucknall, MUS.B.
Orient. Lang. and Lit., E. Sibree, M.A.

Medicine.

Dean, E. M. Skerritt, M.D. (with 30 Professors, &c.).
Day Training Coll. for Women, Miss M. F. Pease.

NEWCASTLE-ON-TYNE—RUTHERFORD COLLEGE. 1878.

Principal, A. M. Ellis.
Mathematics & Physics, R. H. Jude, D.SC.
Applied Mathematics, &c., C. H. Innes, M.A.
Chemistry & Metallurgy, Geo. Smith, B.SC.
Geology, J. D. Best. *Mining*, F. C. Swallow, M.E.
Building Construction, D. Campbell.
Classics & English, J. Greenfield, J. Gerrie, M.A.
School of Art, Jos. Moore. *Sec.*, H. Crawford Smith.

NOTTINGHAM—UNIVERSITY COLL. 1880.

Principal, Rev. J. E. Symes, M.A.
Language and Literature, J. E. Symes, M.A.
Latin, Greek, and Philosophy, F. S. Granger, LITT.D.
French and Spanish, H. E. Berthon, B.-ès-L.
German and Italian, Herr Freund.
Chemistry and Metallurgy, Frank Clowes, D.SC.; J. J. Sudborough, D.SC.; R. M. Caven, B.SC.; G. Melland, B.SC.
Math., Phys. & Mech., W. H. Heaton, M.A.; E. H. Barton, D.SC.; P. E. Shaw, B.A.; F. G. Taylor, M.A.; A. H. Simpson.
Engineering, W. Robinson, M.E.; W. H. Everett, B.A.
Botany, Biology, Palæontology, J. W. Carr, M.A.; A. E. Smith, B.SC.
Mining, Charles Latham, M.E.
Secretary, P. H. Stevenson, F.S.A.

DAY TRAINING DEPARTMENT.

Principal, Rev. J. E. Symes, M.A.
Normal Master, A. Henderson, B.A.

SHEFFIELD—FIRTH COLLEGE.

Principal, W. M. Hicks, D.SC.
Mathematics, A. H. Leahy, M.A.
Physics, The Principal; J. D. Thompson, B.SC.
Chemistry, W. C. Williams, B.SC.; G. Young, PH.D.
Classics, W. C. F. Anderson, M.A.
History, H. W. Appleton, M.A.
English Lang. and Lit., G. C. M. Smith, M.A.
Biology, A. Denny; B. Z. Bentley, B.A.
French, Edouard Sirot, B.-ès-L.
German, F. Schöllhammer.
Paedagogy, Mrs. L. D. Henry.
Coal Mining, F. W. Hardwick, M.A.; M. H. Habershon; L. T. O'Shea, B.SC.
Music, H. Coward, MUS.DOC.
Registrar, Ensor Drury.

SOUTHAMPTON—HARTLEY INSTITUTION.

Physics, R. W. Stewart, D.SC. (*Principal*).
Biology & Geology, E. T. Mellor, B.SC.
Chemistry, D. R. Boyd, PH.D.
Classics & English Lit., W. F. Mason, M.A.
Education, C. R. Chapple.
Engineering, J. Eustice.
French and German, E. du Bois, PH.D.
Fine Art, C. Tattershall Dodd (*Principal*).
Mathematics, C. E. Cullis, PH.D.
Modelling, E. Crompton.
Clerk, D. Kiddle.

Metallurgy, A. A. Read, F.I.C.
Engineering, A. C. Elliott, D.SC.
Biology, W. N. Parker, PH.D. *Celtic*, T. Powel, M.A.
Mining, W. Galloway, M.R. *Geol.*, (vacant).
Fr. Lang. & Lit., P. Barbier. *Ger. do.*, F. Arnold, M.A.
Hebrew, Rev. D. T. Evans, M.A. *Bot.*, A. H. Trow, B.SC.
Music, J. L. Parry, MUS.D.; *Geog.* T. W. Phillips, B.A.
Anatomy, A. W. Hughes, M.B.
Physiology, J. B. Haycraft, M.D.
Master of Method, Normal Dept., T. Raymont, M.A.
Registrar and Secretary, J. A. Jenkins, M.A.

Aberdare Hall.—*Principal*, Miss Hurlbatt.

LAMPETER—ST. DAVID'S COLLEGE. 1828.

Principal, and Professor of Greek and Theology, Canon John Owen, M.A.
Hebrew and Theology, Rev. E. T. Green, M.A.
Mathemat. and Physical Science, A. W. Scott, M.A.
Latin, Rev. G. W. Wade, M.A.
English Literature and Logic, H. Walker, M.A.
Welsh and History, Rev. R. Williams, M.A.

[Lampeter possesses the exceptional privilege of conferring degrees, B.A. and B.D., and has been affiliated to Oxford and Cambridge.]

SCOTLAND.

University of St. Andrews, 1411 (£10,800).

Chancellor, Duke of Argyll, K.G., K.T., LL.D.
Vice-Chancellor, Principal Donaldson, LL.D.
Rector, Marquess of Bute, K.T., LL.D.
Principal, James Donaldson, LL.D.
Dean of Faculty of Medicine, Professor Pettigrew.
Dean of Fac. of Theology, Principal Stewart, D.D.
Dean of Faculty of Arts, Professor Lang.
Representative in Parliament, Sir William Overend Priestley, LL.D.
Librarian, Registrar & Sec., J. M. Anderson.

United College of St. Salvator and St. Leonard.

Principal, James Donaldson, LL.D £825*

Professors.

Humanity, Rev. Alexander Roberts, D.D. £632
Logic & Metaphysics, D. G. Ritchie, M.A. 541
Greek, John Burnet, M.A. 632
Mathematics, P. R. Scott Lang, M.A. 632
Moral Philosophy, Wm. A. Knight, LL.D. 541
Nat. Philosophy, Arthur Stanley Butler, M.A. 632
Natural History, W. C. McIntosh, M.D. 541
Medicine, J. Bell Pettigrew, M.D. 428
Chemistry, Thos. Purdie, D.SC. 541
Education, John M. D. Meiklejohn, M.A. 451
Clerk and Factor, Stuart Grace.

College of St. Mary.

Principal, Very Rev. Alexander Stewart, D.D.

Professors.

Primarius Prof. of Divinity, The Principal ... £510
Biblical Criticism, Rev. Allan Menzies, D.D. ... 433
Ecclesiastical History, Rev. John Herkless ... 377
Oriental Languages, Rev. John Birrell, D.D. ... 541
Secretary and Factor, Stuart Grace.

Hall of Residence for Women.

Warden, Miss Louisa Innes Lumsden.

Students in 1895–96, 204. Winter Session commences 1st week of Oct., and ends 3rd week of March. Summer Session, 2nd week of April to 4th week of June.

University of Glasgow, 1450 (£10,432).

Chancellor, Earl of Stair, K.T.
Vice-Chancellor, The Principal.
Rector, Rt. Hon. Joseph Chamberlain, M.P., 1896.
Principal, Very Rev. John Caird, D.D. *£1,100
Represent. in Parl., James A. Campbell, LL.D.

Professors.

Humanity, George G. Ramsay, LL.D. *£1,430
Greek, George G. A. Murray, M.A. *1,350
Civil Eng. & Mech., Archibald Barr, D.SC. ... 900
Logic and Rhetoric, Robert Adamson, LL.D. *800
Moral Philosophy, Henry Jones, M.A. *800
Natural Philosophy, Lord Kelvin, G.C.V.O. .. *1,252

* The sums appended to the various Chairs are the net amounts received in the year 1894–95.; each of those marked with an asterisk * has an official residence in addition.

Catholic University of Ireland.
Dublin, 1854.

Supreme Governing Body, the Catholic Archbishops and Bishops: with a *Rectorial Council*, consisting of the Rector, and Heads of Colleges.
Rector, Right Rev. Monsignor Molloy, D.D.

The University now consists of the following six colleges:

ST. PATRICK'S COLLEGE (Maynooth).—*President*, Right Rev. Monsignor Gargan, D.D.
UNIVERSITY COLLEGE (St. Stephen's Green, Dublin).—*President*, Very Rev. Robt. Carbery, S.J.
UNIVERSITY COLLEGE (Blackrock).—*Superior*, Very Rev. Jules Botrel.
ST. PATRICK'S COLLEGE (Carlow).—*President*, Very Rev. J. Foley, D.D.
HOLY CROSS COLLEGE (Clonliffe).—*President*, Very Rev. Michael Walsh.
MEDICAL SCHOOL (Cecilia Street, Dublin).—*Dean of the Faculty*, Sir C. J. Nixon, M.D.

Professional Education.

NAVAL, MILITARY, AND ENGINEERING.

GREENWICH—ROYAL NAVAL COLLEGE

President, Admiral Sir W. J. Hunt-Grubbe, K.C.B.
Director of Studies, W. D. Niven, M.A., F.R.S.
Captain of College, Capt. John P. Pipon, C.M.G., R.N.
Professors: Mathematics, Carlton J. Lambert, M.A. W. Burnside, M.A., F.R.S.; *Applied Mechanics*, J. H Cotterill, M.A., F.R.S.; *Physics*, A. W. Reinold M.A., F.R.S.; J. W. W. Waghorn, D.SC. (*Assist.*) *Chemistry*, Vivian B. Lewes; *Fortification* Capt. George G. Aston, R.M.A.; Capt. Walter J Whiffin, R.M.A. (*Assistant*).
Instructors: Mathematics, William Gleed, M.A. Nicholas Fletcher, B.A.; Rev. J. L. Robinson M.A., R.N. (*Chaplain*); Ch. Morgan, M.A.; *Applied Mechanics*, Robt. B. Dixon, Engineer R.N.; *Physics and Mathematics*, Thos. H. Blakesley, M.A., C.E.; *Nautical Astronomy and Navigation*, James R. Clark, M.A., R.N.; *Navigation and Mathematics*, Geo. Williams, R.N.; *Steam*, John Yeo, F.S.N.A., Fleet Engineer, R.N. G. W. Roone, Engineer, R.N.; *Nautical Surveying, &c., and Meteorology*, Staff-Comm. William R. Martin, R.N.; Lieut. Stuart V. S. C. Messum, R.N.; *Naval Architecture*, W. J. Luke, and G. F. Munday; *Marine Engineering*, P. Marrack; *Freehand Drawing*, A. Ackland Hunt; *French*, M. Henri Testard, B.A., and Mons. A. Huguenet; *German*, Dr. Eugène Oswald, M.A.
Assist. to Director, Hy. B. Goodwin, M.A., R.N.
Chaplain, Rev. John Lovell Robinson, M.A.
Med. Officers, G. W. Armstrong; Wm. Willes.
Storekeeper, Cashier, &c., James G. Matthews.
Senior Clerk and Secretary, F. E. Raven.
Civil Engineer, J. G. Loughborough.
Curator of Museum, Lieut. Thomas Pratt, R.N.

WOOLWICH—ROYAL MILITARY ACADEMY, 1741.

Governor & Comm., Lt.-Gen. E. O. Hewett, C.M.G.
Assist. Commdt. and Sec., Lt.-Col. F. A. Yorke, R.A.
Adjt. and Q.-M., Capt. A. Handley, R.A.
Surgeon, Surg.-Lt.-Col. Wm. Chas. Gasteen, M.D.
Mathematics and Mechanics, H. Hart, M.A.
Fortification, Major Wm. Daniel Conner, R.E.
Artillery, Major F. A. Curteis, R.A.
Military Topography, Lt.-Col. L. G. Fawkes, R.A.
Tactics, Lieut.-Col. H. D. Buchanan-Dunlop, R.A.
French, Albert Barrère. *German*, A. Weiss, PH.D.
Landscape Dwng., Lt.-Col. Dacres T. C. Belgrave.
Chemistry and Physics, Dr. W. R. E. Hodgkinson.

ROYAL MILITARY COLLEGE, SANDHURST, 1799.—£43,635.

Governor & Commandant, Lt.-Gen. C. J. East, C.B.
Asst. Commdt. and Sec., Lt.-Col. Montagu Wynyard.
Quartermaster, Capt. Thomas King Bunting.
Riding Master, Major Hugh Ernest Elliott.
Surgeon, Brig.-Surg. Alfred F. S. Clarke, M.D.
Assist.-Surg., Brig.-Surg. F. Gillespie, M.D.
Chaplain, Rev. Alfred J. Townend, B.A.

PROFESSORS AND INSTRUCTORS.

Fortification:—Professor, Major William Harold Chippindall, R.E. £500
Instructors, Major A. F. Gatliff, R.M.; Capt. E. G. Wynyard, D.S.O.; Capt. W. N. Bolton; Major A. F. M. Ferryman; Capt. F. W. D. Quinton, R.A.; Capt. J. L. Armitage. . . . . each £350
Military Topography:—Professor, Lieut.-Col. W. W. C. Verner £500

Instructors, Capt. A. H. C. Kenney-Herbert; Capt. R. Armstrong; Maj. J. R. Young; Capt. C. M. Lester; Capt. B. W. S. Van Straubenzee; Capt. W. E. Lascelles; Capt. T. R. R. Ward; Capt. Lewis Conway Gordon, R.M.A. .....each £350
Tactics, Military Administration and Law:—Professor, Lt.-Col. John Adam Fergusson £500
Instructors, Capt. C. G. Morrison; Capt. P. Wildman-Lushington; Capt. Bernard R. James; Major C. W. M. Rawlinson; Capt. L. E. Kiggell; Capt. S. T. Banning .....each £350

STAFF COLLEGE, CAMBERLEY.

Commandant, Col. Henry John Thoroton Hildyard.
Military Art & History, Lt.-Col. Geo. Fras. R. Henderson.
Fortification, &c., Lt.-Col. Henry C. C. Walker, R.A.
Topography, Lt.-Col. Finlay Cochrane Beatson; Major J. S. Talbot (*Instructor*).
Staff Duties, &c., Lt.-Col. E. W. Fleming, R.A.
French, Monsieur M. Deshumbert.
German, Dr. H. Oskar Sommer.

OXFORD MILITARY COLLEGE, COWLEY.

Head Master, G. B. Grundy, M.A.
Assistant Masters, Rev. E. W. Jones, M.A.; J. H. Chapman, M.A.; C. F. Baranowski, B.ès L.; W. G. Collett, M.A.; W. R. Thomas, B.A.
Secretary to Directors, J. W. Garnett.

ROYAL INDIAN ENGINEERING COLLEGE, COOPERS HILL, STAINES, 1871.

President, Col. John Pennycuick, C.S.I., R.E.
Prof. of Eng. Constr., Callcott Reilly, M.I.C.E.
Hydraulic Engineering, T. A. Hearson, M.I.C.E.
Assist., A. H. Heath, A.M.I.C.E.
Prof. of Surveying, Maj.-Gen. E. H. Courtney, R.E.
Instructor in Surveying, R. J. Woods.
Drawing, Geometrical, A. Hicks.
Assist. do., C. B. McElwee.
Drawing, Freehand, Russell Dowson.
Mathematics (Applied), G. M. Minchin, M.A., F.R.S.
Prof. of Pure Mathematics, A. Lodge, M.A.
Prof. of Chemistry, Herbert McLeod, F.R.S.
Analytical Chemist, F. W. Harbord, F.I.C.
Professor of Physics, W. N. Stocker, M.A.
Professor of Forestry, W. Schlich, PH.D., C.I.E.
Instructor in French, J. A. Perret.
Instructor in German, T. H. Dittel.
Secretary, Lt.-Col. W. J. Boyes.
Bursar, J. P. Pasco, R.N.
Chaplain, Rev. Charles Croslegh, D.D.
Medical Officer, W. E. Giffard.

ARTILLERY COLLEGE, WOOLWICH.

Director, Col. Charles Trench, R.A. £1,000
Staff Officer, Lieut. L. R. Kenyon, R.A..... 350

THAMES NAUTICAL TRAINING COLLEGE (INCORPORATED).—H.M.S. *Worcester*, off Greenhithe. *Capt. Supt.*, D. Wilson Barker, R.N.R., F.R.S.E.
MERCANTILE MARINE.—Cadet School Ship *Conway*, Rock Ferry, Birkenhead. *Comm.* Capt. A. T. Miller, R.N. *Chief Officer*, Lieut. C. Cater, R.N.
CRYSTAL PALACE COMPANY'S SCHOOL OF PRACTICAL ENGINEERING.—*Principal*, J. W. Wilson, M.INST.C.E.; *Sup. of Educ. Dep.*, R. G. Hodson.

AGRICULTURE.

ASPATRIA AGRICULT. COLL., near Carlisle.

President, Sir Wilfrid Lawson, Bart., M.P.
Vice-President, H. Howard.
Principal, J. Smith Hill, B.A. (*Botany & Zoology*).
Practical Agric. and Agric. Eng., H. F. Hill.
Chemistry, C. J. R. Tipper.
Mathematics, C. J. R. Tipper.
Agricultural Law, The Principal.
Bookkeeping, D. D. Williams.
Practical Surveying, D. Burns, C.E.; J. H. Scott.
Veterinary Science, H. Thompson, M.R.C.V.S.

CIRENCESTER ROYAL AGRICULT. COLL.

President, Duke of Richmond and Gordon, K.G.
Principal, Rev. John B. McClellan, M.A.
Agriculture, E. Blundell.
Dairy Farming, E. Blundell; T. Nuttall.
Estate Management & Forestry, R. Anderson, F.S.I.
Chemistry, E. Kinch, F.C.S., F.I.C.
Geology, Botany, & Natural Hist., T. T. Groom, D.SC.
Mathematics and Physics, H. Ohm, M.A.
Land Surv. & Prac. Engineering, G. Paton, C.E.
Veterinary Science, &c., W. T. Wilson, F.R.C.V.S.
Building, F. W. Waller, F.R.I.B.A.
Agricultural Law, E. B. Haygarth.
Bookkeeping, G. Paton, C.E.
Architectural Drawing, C. Stolle.

COLONIAL COLLEGE, Hollesley Bay, Suffolk.

Resident Director, Robert Johnson.
Agricultural Science, &c., C. G. Freer Thonger.
Practical Agriculture, George J. Goodwyn.
Nat. Hist. & Laboratory, F. Seymour Pile, M.A.
Hygiene, Ambulance, &c., R. J. Roche, B.A.
Engineering, Surveying, &c., J. J. Hedges.
Veterinary Science, &c., R. St. Clair Houdon, B.A.
Horticulture, J. Wolton.

DOWNTON—COLLEGE OF AGRICULTURE.

President, Prof. Wrightson, F.C.S.
Agriculture, The President.
Botany and Practical Agric., R. S. Seton, B.SC.
Chemistry, J. M. H. Munro, D.SC.
Veterinary Science, W. A. Edgar, *Vice-Pres.* R.C.V.S.
Estate Management Survey., C. E. Curtis.
Mathematics, Bookkeeping, and Building Construction, C. E. Curtis, F.S.I.

SOUTH EASTERN AGRIC. COLL., Wye, Kent.

(Under the County Councils of Kent and Surrey.)
Chairman, T. J. Halsey.
Clerk to the Governors, J. T. Welldon, Ashford, Kent.
Principal, A. D. Hall, M.A.
Chemistry, The Principal; H. H. Cousins, M.A.
Botany, J. Percival, M.A.
Zoology & Economic Entomology, F. V. Theobald, M.A.
Surveying, Building, &c., T. J. Young.
Veterinary Science, J. Wortley Axe, M.R.C.V.S.

MISCELLANEOUS.

COLLEGE OF PRECEPTORS, Bloomsbury Square, W.C.

President, Very Rev. Thomas Wm. Jex-Blake, D.D.
Dean, H. Weston Eve, M.A.
Treasurer, Edward Pinches, B.A.
Secretary, C. R. Hodgson, B.A.

Teachers after passing certain examinations are granted diplomas of F.C.P., L.C.P., and A.C.P., and are authorized to wear gowns and hoods.

GILCHRIST EDUCATIONAL TRUST, 17 Victoria Street, Westminster.

Trustees, R. L. Holland, *Chairman*; Rt. Hon. Lord Playfair, G.C.B.; Rt. Hon. Sir U. J. Kay-Shuttleworth, Bart., M.P.; Hon. Alfd. Lyttelton, M.P.; Aldn. James Stuart, M.P.
Sec., R. D. Roberts, D.SC.

Founded by the late Dr. Gilchrist (died 1841), for

the benefit, advancement, and propagation of education and learning in every part of the world. The income is applied to the maintenance of Scholarships, to the carrying on of lectures on scientific subjects for artizans, and to the assistance of approved Educational objects.

LONDON PAROCHIAL CHARITIES
(Trustees of the), 3 Temple Gardens, E.C.

Chairman of Governors, Sir J. Savory, Bart., M.P.
Vice-Chairman, Sir Owen Roberts.
Clerk, H. Howard Batten.

LEGAL.

INNS OF COURT.

[Joint Board of Examiners appointed by the Four Inns of Court for conducting the Examination of Students previous to Admission at an Inn of Court.]

Middle Temple.—Sir Peter Henry Edlin, Q.C.; Edmd. Macrory, Q.C.; Charles Grey Wotherspoon; Edmund Russell Roberts.

Inner Temple.—Robt. Henville Simonds; James Edward Aldous; Arthur Llewelyn Davies; Herbert Chitty.

Lincoln's Inn.—Richard Marrack, M.A.; George Serrell, LL.D.; Harry Johnson; Sir Sherston Baker, Bart.

Gray's Inn.—Henry Charles Richards; J. R. V. Marchant; Arthur Edmund Gill; Charles Herbert Smith.

Secretary to the Board, Thomas Purdue, Oak of Honour Hill, S.E.

LINCOLN'S INN HALL.

Chairman, Rt. Hon. Lord Macnaghten.
Vice-Chairman, J. Napier Higgins, Q.C.

READERS.

Jurisprudence, &c., W. A. Hunter, LL.D.
Equity, A. Hopkinson, Q.C., M.P.
Real and Personal Property, A. Underhill.
Constitutional Law, J. P. Wallis.
Procedure, Civil and Criminal, A. Henry.
Common Law, Edmund Robertson, Q.C., M.P.
Clerk of the Council, Frederick Dapp.

INCORPORATED LAW SOCIETY,
Chancery Lane.

President, Joseph Addison.
Vice-President, William Godden.
Secretary, Edward Walter Williamson.
Assist. Secretary, S. P. B. Bucknill.
Clerk to Committees, T. Lane.
Librarian, F. Boase.

GENERAL COUNCIL OF THE BAR.

Chairman, H. H. Cozens-Hardy, Q.C., M.P.
Secretary, H. C. A. Bingley, 2 Hare Court, E.C.

MEDICAL.

MEDICAL AND DENTAL REGISTRATION.

GENERAL MEDICAL COUNCIL, 299 Oxford Street, W.—*President*, Sir Richard Quain, Bart., M.D.; *Registrar of General Medical Council and Branch Council for England*, W. J. Clarke Miller, B.A.; *Registrar of Branch Council for Scotland*, James Robertson, 1 George Square, Edinburgh; *Registrar for Ireland*, S. Wesley Wilson, 35 Dawson Street, Dublin.

Any person falsely assuming the title of Physician, Surgeon, Doctor, or Apothecary, is liable to a heavy penalty under the Medical Act; and to a further fine under the Apothecaries Act.

There is a similar penalty for Dentists.

ST. BARTHOLOMEW'S HOSPITAL AND COLLEGE.—The clinical practice of this hospital comprises a service of 678 beds, besides 70 beds for convalescent patients at Swanley, in Kent. The resident appointments, 32 in number, as well as all the students' appointments—clinical clerkships, dresserships, &c.—are chosen from the most diligent students, without fee. Scholarships and prizes to the value of nearly £900 are awarded annually. A college is attached, where students may reside. Number of patients, 1894—in, 6,474; out, 161,419. Entrance fee, for lectures and hospital practice, 150 guineas, *perpetual*.—*Warden of the College*, Dr. T. W. Shore.

ST. THOMAS'S HOSPITAL. (Founded 1228.)—In this hospital, which contains 572 beds, the prizes and scholarships are numerous. More than 20 house appointments are open to students who have obtained their diplomas. Clinical clerkships and dresserships may be held without extra fees. The School buildings are among the most complete in London. *Composition* fee, £150.—*Medical Secretary*, G. Rendle, M.R.C.S.

GUY'S HOSPITAL.—Average number of beds in daily occupation 416. The various appointments and offices are filled by students, selected according to merit. Some of the scholarships are of the value of £150. Entrance fee, £157 10*s*. *perpetual*. or £163 in four instalments. *Dean*, Dr. Shaw.

ST. GEORGE'S HOSPITAL.—Entrance fee £145, *perpetual*, or £150 in four instalments. Number of beds 355.

MIDDLESEX HOSPITAL.—Entrance fee, £126 5*s*. Number of beds 321. Two scholarships, value £100 and £60, and one of £60 for students of Oxford or Cambridge, are awarded annually.

LONDON HOSPITAL AND MEDICAL COLLEGE.—This is the largest general hospital in Great Britain, and contains nearly 800 beds. 50 resident appointments are made annually, as well as numerous clinical clerkships, dresserships, &c. Holders of resident appointments are provided with rooms and board entirely free of expense. Fee £126 or by instalments; 15 guineas less to sons of medical men; 24 prizes and scholarships were awarded in 1895. *Warden of the College*, Munro Scott, Turner Street, Mile End.

WESTMINSTER HOSPITAL.—Entrance fee, £105; or by instalments, £115 10*s*. to £126. Number of beds, 205.

UNIVERSITY COLLEGE HOSPITAL.—Entrance fees varying from £57 15*s*. to £141 15*s*.; or by instalments £142. Number of beds, 208.

CHARING CROSS HOSPITAL MEDICAL COLLEGE.—Entrance fee for *General* students, 110 guineas, or 121 guineas in five instalments. For *Dental* students, 54 guineas, or 60 guineas in two equal instalments. Number of beds, 160. *Dean*, Montague Murray, M.D.

KING'S COLLEGE HOSPITAL.—Entrance fee £135. Number of beds, 217.

ST. MARY'S HOSPITAL.—Perpetual fee, £138; or by instalments, £144. Number of beds 381.—*Dean*, Geo. P. Field. *Sec.*, Frederick H. Madden.

All the above Hospitals have Schools of Medicine attached to them. Application in every instance to be made to the *Medical Secretary*.

LONDON SCHOOL OF MEDICINE FOR WOMEN, 30, Handel Street, Brunswick Sq., W.C. (Associated with Royal Free Hospital).—*Dean*, Mrs. Garrett-Anderson, M.D. *Sec.*, Miss Heaton.

EDGE HILL, LIVERPOOL (Women).—Miss Hale.

UNIVERSITY EXTENSION.

EXTRA-MURAL WORK OF THE UNIVERSITIES OF OXFORD AND CAMBRIDGE.—This work falls under three heads: (1) Local Examinations; (2) The Examination of Schools; (3) University Extension. The purpose of the latter is to provide the higher education of persons of all ranks and of both sexes. The Extension authorities receive proposals for the establishment of lectures and teaching in England and Wales, and are authorised to appoint lecturers and examiners for the purpose. Each lecture is preceded or followed by a class for more detailed instruction, and the usual charge for a series of twelve lectures and classes is £42 12s. exclusive of travelling expenses. Further particulars may be obtained from J. A. R. Marriott, M.A. (Oxford), and R. D. Roberts, M.A. (Cambridge). A feature of this educational work is that, for each course, the authorities issue a loan travelling library, containing the principal books recommended by the lecturer.

UNIVERSITY CORRESPONDENCE COLLEGE, Burlington House, Cambridge. (London Office: 32 Red Lion Sq., W.C.)
Principal, William Briggs, M.A.

UNIVERSITY EXTENSION COLLEGE, EXETER. 1893.

Principal, A. W. Clayden, M.A.
Mathematical, Rev. J. Eaves, M.A. *Chem.*, W. H. Lewis, B.A.
School of Art, J. Birkmyer; J. Shapland.

The Bank of England was the first Joint-Stock Bank established in England, and having exclusive privileges, it continued the only Joint-Stock Bank in the country until 1826, in London until 1834. At this date the London and Westminster Bank was founded, and proceeded so successfully that it was quickly followed by the formation of the London Joint-Stock, the Union, London and County, the City, &c. At the present time the total capital paid up and reserves of the various Joint-Stock Banks amount to more than £150,000,000.

THE following is a list of London Banks and Bankers: those printed in heavier type are *Limited*, those with a † are registered at Somerset House, those with an asterisk * are Clearing Bankers, and those with a ‡ are Army Agents. Some of the others, although called Banks or Bankers, are merely Money-changers, or Money-lending establishments.

01†Adamson (C. W.) & Co., 33, Clement's Lane.

THE BANKERS' CLEARING HOUSE, in Post Office Court, Lombard Street, is the medium through which Bankers obtain the amount of Cheques and Bills in their hands for collection from other Bankers. Instead of presenting their cheques at each Banking House, and receiving cash and notes in payment, Clearing Bankers settle the whole amount delivered during the day at this establishment by receiving or paying the difference in their amount by a single cheque on the Bank of England. As every Bank in London and the Country is represented by Clearing Bankers, who, as agents, send through the Clearing House all drafts payable in the City and in the Country, the amount passing through this channel is enormous. The total for the year ending December 31st, 1895, was £7,592,886,000, an increase of £1,255,664,000 as compared with the year 1894. On Stock Exchange days the payments were £1,304,679,000, an increase of £340,224,000 on the year 1894. The payments on Consols account days for the same period have amounted to £345,446,000, an increase of £43,998,000 as compared with 1894; and on the 4ths of the months the payments for 1895 amounted to £283,610,000, an increase of £22,063,000 as compared with 1894. The establishment is managed by a Committee, the officers of which are—*Chairman*, Lord Hillingdon; *Deputy Chairman*, Rt. Hon. Sir John Lubbock, Bart., M.P.; *Hon. Sec.*, J. Herbert Tritton; *Acting Managers*, John C. Pocock (*Chief Inspector*); Philip W. Matthews (*Deputy Inspector*).

THE British Isles consist of Great Britain (England and Wales, and Scotland) and Ireland, and lie between the 49th and 61st degrees of N. latitude, and the 2nd degree of East and the 11th degree of West longitude. The total area is 121,115 sq. miles, with a population in 1891 of 37,740,283, an increase of 2,855,455 in ten years, in addition to the 604,182 who had emigrated.

ENGLAND,

which may be roughly said to be divided from Scotland on the north by the Cheviot Hills and the Rivers Tweed and Solway, and from Wales by the Severn and Dee, has an area of nearly 51,000 square miles, and a population (census, 1891) of 27,501,362. Except in the west and the north, England is for the most part a level country, so cultivated as to be highly productive. The other districts have mineral riches, including iron, tin, lead, zinc, slate, and coal, which make abundant amends for the poverty of their surface.

Many learned men have taken pains to ascertain the various human races that have in succession occupied parts of the British Islands. The most approved conclusions seem to be, that the southern and eastern parts of England have a population mainly derived from Belgic Gaul, whilst the western districts and Wales have been peopled from the West of France and the North of Spain. Ireland and Scotland are believed to have been peopled by a race originally Belgic, but which country received its population from the other is a point that has been acrimoniously discussed, and probably admits of no positive solution. This alone is certain, that when the Romans first came to our shores the inhabitants might have been roughly divided into two sections: those who lived inland, and who may with some reason be called Celtic colonists, were a race of hunters and shepherds, dressed in the skins of beasts, and inhabiting huts made of rude wickerwork and covered with rushes; whereas the coast-dwellers were, probably, of Gallic origin, with some approach towards civilisation, and holding intercourse, for purposes of trade, with foreign merchants visiting the island. These conclusions, however, only apply to very early times, and we know from history how very mixed the populations of our islands have now become. Neglecting the Romans, who were no more than mere military garrisons, and mingled little with the natives —much like Europeans in the East at the present day—we have the Saxons and Jutes established from Kent to Devonshire, and the Angles (and subsequently the Norsemen) from the Thames to the Tweed. The Norman Conquest brought in a mixed multitude from the Continent; the wars of Stephen introduced a numerous body of Flemings, who were settled by Henry II. in Wales; and the commercial views of Edward III. led to the establishment of a still larger body of the same people as clothworkers in Kent. Political and religious dissensions have had a great share in bringing in new races, for Dutch, French, and other refugees and their descendants exist among us in such numbers as perceptibly to modify the national character. The western part of England was known to the Phœnicians, and was resorted to by them for its tin, four centuries or more B.C.; hence the whole country received the name of the Cassiterides, or Tin Islands. When invaded by Cæsar (B.C. 55) it was called Britain (perhaps derived from Prydain, the name of an early chief of great power), or sometimes Albion, that is, the *White Land*, from the white cliffs on the S. E. coast.

The Romans subdued all England, and parts of Scotland and Wales, but did not reach Ireland, though its existence was known to them. About A.D. 410, the Romans abandoned the island after a rule of about 350 years, traces of which still remain in every quarter. These may best be observed in the names of many of our most ancient towns, in the great roads that reach from end to end of the country, and in the remains of Roman buildings and architecture from time to time unearthed in different places. For example, every town whose name consists wholly, or in part, of *cester*, *caster*, or *chester* (derived from Latin *castra*, a camp) marks the site of one of those wonderful entrenched camps for which the Roman armies were famous. Thus, we have Lancaster, Chester, Manchester, Cirencester, Gloucester, Tadcaster, Worcester, Doncaster, Colchester, Dorchester. Then the military roads, straight, broad, and splendidly made, are still to be traced. There were four of these, viz., Watling Street, from the coast of Kent by way of London, to Carnarvon; the Foss—or Fosdyke—from Cornwall to Lincoln; Ikenild Street, from the mouth of the Tyne, through York and Derby, to St. David's; and Irmin Street, from the last-named spot to Southampton. The Britons, being divided into as many hostile States as they had cities, were unable to resist the fresh hordes (now called Saxons and Angles) that poured into the island, and about A.D. 457 the kingdom of Kent was founded. The Britons still fought stubbornly, but were gradually driven westward, and by the year 584 the kingdom of Mercia (meaning the march-land, or frontier State) was established, being the last of the seven kingdoms founded by the invaders—whence the whole is usually styled the Heptarchy. The kings of the Heptarchy made war on each other, but at last, in 827, Egbert of Wessex obtained the supremacy of the whole, and styled himself King of England. His descendants, of whom Alfred the Great was the most illustrious, held the throne for more than 200 years, but the country suffered greatly during the time from the ravages of the Danes, who, under Canute and his sons, became its rulers for 25 years (1017–1042). The Saxon line was restored in the person of Edward the Confessor, to whom Harold succeeded; but his death in the Battle of Hastings, on the 14th October, 1066, gave England into the hands of the Norman kings, who reigned from 1066 to 1154. Then came the Plantagenets (1154–1485), the Tudors (1485–1603), and the Stuarts (1603–1714), to whom the House of Hanover succeeded on the death of Queen Anne. Her present Majesty is the sixth sovereign of that line, and on June 20, 1897, will have completed the 60th year of her reign.

The Army, including the Reserves and the forces in India (73,168), at the beginning of 1896 numbered 715,683, of whom 665,164 were effective—the Navy at the same date consisting of 65,757 men and boys, 4,200 coastguard, and 15,861 marines, or, including reserves and volunteers, a total of 93,750, with 45 battleships and 317 other vessels.

THE entire population of England and Wales is here given for 1891 (29,002,525), with the gross estimated rental as settled by the Assessment Committees in the Valuation Lists, the amount collected for the Poor Rate for the year ending Lady-Day, 1895, and the number of paupers who were actually in receipt of relief on Jan. 1st, 1896. The total number of persons in England and Wales receiving relief on Jan. 1st, 1895, was 840,456 as against 827,593 on Jan. 1st, 1895, an increase of 12,863 The total cost for the year ended Lady-Day, 1895 (the last information published), was £9,866,605, as against £9,673,505 for the year ended Lady-Day, 1894, £9,217,514 for the year ended Lady-Day, 1893, and £8,847,678 for the year ended Lady-Day, 1892.

The sum raised by Poor Rates during the year ended Lady-Day, 1895, was £19,063,833; the receipts in aid, inclusive of grants from County and Borough Councils, amounted to £2,483,058, forming a total receipt of £21,546,951; £10,801,394 of this amount was expended for other purposes than the relief of the Poor: the payments towards the County, Borough, and Police Rate, for instance, amounted to £7,868,362; to Highway Boards, &c., £796,519, while the School Boards received £1,114,207. Payments to other authorities are made out of the Poor Rate. The actual relief to the poor for the year ended Lady-Day, 1895, amounted to 6*s.* 7*d.* per head of the estimated population, while the sum levied as Poor Rate during the same period was equal to a rate of 12*s.* 8*d.* per head, being an increase in the former case of 1*d.*, and in the latter case of 9*d.* as compared with the corresponding amounts in previous year. (*For statistics and other particulars as to Wales, see next page.*)

* POPULATION OF COUNTIES.—The county population is that given in the Census of 1891, as the population of each Registration County. The Registration Counties do not precisely correspond with the area of ordinary counties, but with Poor Law areas to which the figures in this table relate. In 1861 the amount levied for poor rates was at the rate of 7*s.* 11½*d.* per head; in 1891 the amount levied was at the rate of 10*s.* 9½*d.* In 1861 the officials employed received but £660,370; in 1891 this had increased to £1,452,810.

THE Principality of Wales, with an extreme length of 135 miles, and a breadth varying from 15 miles to 95 miles, lies in the S.W. of Great Britain, and has an area of 7,378 square miles, or about 4,720,000 acres. The Principality is rich in minerals; slate, coal, and iron being among the more important; while of its manufactures, flannel, cloth, and hosiery alone are worthy of mention. The native inhabitants are almost wholly of the Cymric stock of the Celtic race, and a large number of them belong to the religious body known as the Calvinistic Methodists.

At what time Christianity was introduced it is impossible to tell, but certainly not later than A.D. 400. When the British Christians were driven from their homes, such of them as did not seek refuge beyond the seas, found in the rocky fastnesses of the Welsh mountains a secure retreat from their enemies. There they immediately set about dividing the country into ecclesiastical divisions for administrative purposes, and the present sees of Wales represent those leading centres of religious thought that became famous in the sixth century.

The four bishoprics still remain as of old, and the numbers of beneficed clergy now to be found in them are as follows: St. David's, 360; Llandaff, 146; St. Asaph, 206; and Bangor, 147. The sees of St. David's and Llandaff were united with the Southern province in the year 1107, and those of Bangor and St. Asaph in the years 1092 and 1143 respectively.

When the Saxon pirates began to visit and ravage the eastern shores of Britain, the Celtic inhabitants were gradually pressed westward by the invading hordes, and finally found secure shelter in the wilds of Wales, Devon, and Cornwall. The border-lands, or marches, between England and Wales were long in a state of at least guerilla warfare; and it was not until about 950 A.D. that one Roderick (Rhodi Mawr) contrived to unite the whole country into one Principality, dividing it afterwards among his sons into three smaller ones, named, severally, Gwynedd, Dyved and Cerediglon, and Powis. This was followed by the incursions of the Danes, after which Howel once more (in the 10th century) succeeded in re-uniting the country. Later, when England was tending in the same direction of unity, Athelstane received a tribute from the Welsh in recognition of his nominal sovereignty over them. William I. and his son Rufus both tried the plan of granting fiefs to their more adventurous Norman knights, on condition of their conquering the land, while Henry I. introduced into the Principality a colony of Flemish wool-workers. Henry II., too, and John, endeavoured, with doubtful success, to effect a final subjugation of the troublesome province. A combination of fortuitous circumstances led to its lasting conquest. Llewellyn, who succeeded David, had been implicated in the Montfort rebellion, but, on the accession of Edward I., managed to get included in the general amnesty granted to those who had joined the Leicester faction. In 1276, however, Edward, having been repeatedly refused the homage due to him from Llewellyn, raised an army to enforce his commands. Internal dissensions among the Welsh greatly aided the English, and Llewellyn, at length cooped up and almost starved to death among the Snowdon mountains, was forced to submit at discretion, and accept the terms offered by the victor (1277). By the grace of Edward the Welsh prince was allowed to return to the Principality; but trouble arising again, in which both Llewellyn and his brother David were concerned, a war arose, and the independence of Wales was for ever shattered. Llewellyn was slain in battle in 1282, with two thousand of his followers; and in the following year David, being betrayed to the English, was sent in chains to Shrewsbury, and at last put to a painful and ignominious death as a traitor. The Welsh nobility then submitted in a body, and King Edward invested his son Edward (who had been born at Carnarvon) with the Principality, which very soon afterwards was fully annexed to the Crown. In later days the history of Wales has been almost identical with the history of England, the Principality and country marching side by side in sure and steady progress.

In education the Principality has made great strides of recent years, and possesses three university colleges of its own, viz., at Aberystwyth, Bangor, and Cardiff, which have amalgamated, and are now incorporated as an independent University.

The following table of statistics contains some interesting information with reference to the various individual counties of Wales. In addition to those named, Monmouth is, not without good reason, claimed as a Welsh county; if admitted, it would add another quarter of a million to the population of the Principality, thus making it larger than that of Scotland in the early part of the century. The Welsh is a distinct nationality, with a language and literature of its own.

The most northerly part of the island, divided from the south by the River Tweed, the Cheviot Hills, and the Solway Firth, is the ancient Caledonia or modern Scotland, a mountainous country, and to a great extent bleak and barren, but inhabited by a race of men who have made the country productive, wealthy, and prosperous. It contains nearly 30,000 square miles, or 19,084,659 acres, of which not quite 4,500,000 are in a state of cultivation, with a population in 1881 of 3,735,573, and of 4,025,647 in 1891.

After the Union with England in the year 1707, and the suppression of the Rebellion of 1745, the Scottish people generally awoke to the fact that the loss of their separate nationality was a gain; and being united to a wealthy neighbour, they with one accord determined to derive all possible benefit from the change. By means of an admirable banking system, capital was utilised. With wonderful ingenuity and perseverance a great commercial port, Glasgow, was opened in the west, Scottish citizens flocked south and into the British colonies, everywhere carrying with them their habits of industry and thrift. India especially became the scene of their operations, and notwithstanding any narrow feelings of national jealousy, it was seen that they were creators of commerce and producers of wealth. Education was widely diffused throughout the masses, while the Calvinistic religion, even if it did not in all instances produce piety, helped to promote thought and mental activity. At the Union the Scottish Church and Judiciary were left intact, and so, with slight modifications, have remained to the present day; both England and Scotland borrowing something from each other and gradually assimilating.

POPULATION, AREA, VALUATION AND PAUPERS OF COUNTIES.

*** The valuation of lands and heritages is only approximate: it is that furnished by the Inspectors of the Poor to the Local Government Board for Scotland. The number of Paupers is that chargeable on May 14, 1895.

The Sheriff-Principal of Lanark resides in Glasgow, all the others reside in Edinburgh.

IRELAND is an island lying between 51° 26′ and 55° 23′ N. lat. and 5° 20′ and 10° 26′ W. long. It is about 60 miles to the west of England. On three sides it is washed by the Atlantic Ocean, and on the east by the Irish Sea and St. George's Channel. Its greatest length is, from north to south, 306 miles, and from east to west from 120 to 180, with an area of about 31,759 square miles, or 20,326,209 acres. The greater part of the surface is a plain, interspersed with low hills, the highest mountain being 3,414 feet above the sea-level. The rivers are numerous, the Shannon, 254 miles in length, being the principal; but the chief water feature of the country is the beautiful series of lakes or (as they are called) loughs, the largest, Lough Neagh, covering a surface of 98,255 acres. The harbours are among the finest in the world. The climate is temperate, and many plants which can only be grown in hot-houses in England flourish in the open air in Ireland; while the great moisture which generally prevails is so favourable to vegetation that the country early received the name of the Green or Emerald Isle.

The population of Ireland on April 3, 1891, was 4,704,750, a decrease of 470,086—equal to 9·1 per cent. since the preceding Census of 1881. It was not till 1821 that the first complete census was taken, and the numbers were then found to be 6,801,827; in 1831 they had increased to 7,767,401, and in 1841 to 8,175,124. The highest point was reached in 1845, when the entire population was estimated at 8,295,061. The potato crop, upon which all the agricultural and many of the manufacturing poor depended for their subsistence, having failed for two successive years, produced famine and disease, which carried off large numbers, and gave a great impulse to emigration, so that from 1845 the population rapidly decreased.

The conquest of Ireland was begun in the year 1170, but can hardly be regarded as completed until the surrender of Limerick in 1691, and was declared a kingdom in 1542; and this kingdom was united to that of Great Britain by the Act of Union, on Jan. 1st, 1801, the empty title of "King of France," which the English kings had borne since the time of Edward III., being then wisely abandoned.

The government is semi-independent. A Lord-Lieutenant, appointed by each successive Ministry, exercises almost regal sway. He has a salary of £20,000, but being usually a nobleman of large private fortune, his expenditure is frequently much more than the amount received. The peerage consists of 176 members, who are represented in the Imperial Parliament by 28 of their number; and 103 members represent the country in the House of Commons.

The prevailing religion is Roman Catholic, 75 per cent. of the population professing that form of faith. Until the year 1871 the Established Church was a branch of that of England, with two archbishops and ten bishops, although the members of this communion were but 12 per cent.—9 per cent. of the remaining Protestants being Presbyterians.

Ireland is well supplied with educational establishments, having two universities, a large number of secondary schools, indirectly endowed under the Intermediate Education Board, and an admirable system of Primary Schools.

The legal establishment is similar to that of England, and is presided over by a Lord Chancellor.

THE LORD LIEUTENANT.

His Excellency the Right Honourable George Henry, 5th Earl Cadogan, K.C., G.M.P., *born* 12th May, 1840; succeeded his father 8th June, 1873; *married*, 16th May, 1865, Lady Beatrix, 4th daughter of 2nd Earl of Craven; Lord Lieutenant General and General Governor of Ireland; sworn in 5th Oct., 1895 ..... £20,000

Chief Secretary and Keeper of Privy Seal—Right Hon. Gerald William Balfour, M.P. ... £4,425
Private Secretary, Laurence C. Dowdall.

Perm. Under Sec., Sir David Harrel, K.C.B.... £2,000
Private Secretary, W. P. J. Connolly.
Assistant Under Secretary, J. B. Dougherty.

LORD LIEUTENANT'S HOUSEHOLD.—£4,764.

ISLE OF MAN (Mona),

an island in the Irish Sea, in lat. 54° 3′—54° 25′ N. and long. 4° 18′—4° 47′ W., nearly equidistant from England, Scotland, and Ireland. It is about 34 miles long, and from 10 to 12 broad, containing an area of 145,325 acres, with a population of 55,598. Curiously enough the history of the island is intimately linked with that of the Hebrides and the kingdoms of Scotland and Norway. In the ninth century a body of malcontents from Norway emigrated to the western isles of Scotland, and their prosperity drew upon them the anger of the Norwegian monarch Harold, who in the year 870 sent forth a great expedition, conquered the Orkneys and the Shetlands, the Western Isles, and Man, and added them to the kingdom already beneath his sway. For three centuries the Norwegian rule remained intact, but when, in 1263, Alexander III. defeated the famous Haco, at the Battle of Largs, all these islands fell under Scottish rule. On his accession to the English throne, Henry IV. seized on the Isle of Man, and in 1406 bestowed it on the Stanley family. In 1736 James, 10th Earl of Derby, died without issue male; the earldom went to his next male heir, but the sovereignty of the island went, with the Barony of Strange, to his heir general, James, Duke of Athole, on whose death the island descended to his daughter Charlotte, from whom, in 1765, Parliament purchased the sovereignty for £70,000. In 1827 the Crown purchased it for the sum of £417,144. The land is rich in minerals, lead, iron, blende, and slate, and exports large quantities of agricultural produce. About 50 miles of railway have been constructed. The natives of this island belong to a mingled race of Celts and Norwegians, and the language, in which the Celtic element is predominant, is known as the Manx.

Man is governed by an independent Legislature called the Tynwald, consisting of two branches—the Governor and Council, and the House of Keys. Bills after having passed both Houses are signed by the Members, and then sent for the Royal Assent. Unless signed by the legal quorum of each House a Bill is not sent for the Royal Assent, the quorum of the Upper House or Council being the Governor and two Members, and of the Lower House or Keys thirteen Members, the majority of the whole number (24). After receiving the Royal Assent, it does not become law until promulgated in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the members of the Court.

Capital: Douglas, pop. 19,525 (Castletown, pop. 2,178, is the ancient capital); the other towns are Peel, pop. 3,631, and Ramsey, pop. 4,866.

Public revenue, 1895-96 ..... £72,752

THE CHANNEL ISLANDS

comprise the bailiwicks of Jersey and Guernsey (in the latter of which are comprehended the small islands of Alderney, Sark, and Herm, situated off the north-west coast of France, at distances of from ten to thirty miles, including the Minquiers Rocks). They are the only portions of the Dukedom of Normandy now belonging to England, to which they have been attached ever since the Conquest. The area altogether is about 73 square miles; and the population in 1891 was 92,272—Jersey, 54,418, Guernsey with Herm and Jetou 35,339, Alderney, 1,943, and Sark, 572. The land under cultivation in Jersey amounts to 20,000 acres, under about 2,500 proprietors, and more than 700 varieties of flowering plants and ferns, including many species not to be found among British flora, may be obtained there. The principal officer is the Lieut.-Governor, who represents Her Majesty. French is the official language of the local legislature, called the *States*, and of the Royal Court, but the old Norman dialect is still spoken by the people. The chief civil officer is the Bailiff, who presides over the *States* and over the Royal Court: he is appointed by the Crown. The royal court is the judicial body, and is composed of twelve jurats elected by the people. The States consist of fifty members (excluding the president), viz., the twelve jurats, twelve rectors, twelve constables, and fourteen deputies, three for St. Helier and one for each of the eleven country parishes. The climate of these islands is mild, and the soil exceptionally productive. An abundance of apples are grown for making cider, and the famous Jersey and Guernsey breed of cows has earned a well-deserved celebrity. The fisheries of Jersey are of considerable value, and include lobster, cod, and oysters. The islands being all but exempt from taxation, they possess a very large trade. The chief town of Jersey is St. Helier, on the south side, where there is excellent sea-bathing; the principal town of Guernsey is St. Pierre, on the east coast. In 1896 marriage with a deceased wife's sister was legalized, with certain stringent regulations.

NOTE.—These figures are approximate only. Fuller particulars of the Area, Population, Income, Expenditure, Productions, and Trade of each of the above Colonies or Possessions will be found in the Appendix, pp. 441–527.

London was a place of importance under the Romans, and was famed for its vast conflux of traders and its abundant commerce even in the first century of the Christian era. From the Romans it received municipal institutions, which have endured in their main features to the present day. In Saxon times it was in reality a small independent State, and its burgesses maintained their independence even after the Battle of Hastings. William the Norman only gained possession of their city by means of a treaty with them; and about eight years after he granted a charter, which is still preserved. It is addressed to William the Bishop, Godfrey the Portreeve, and all the Burgesses, and promises that they shall be "law worthy" (*i.e.*, possessed of privileges) as they were in the days of Edward the Confessor. The Portreeve, however, received the Norman title of Bailiff, which, in 1189, was changed to Mayor; the first holder under the new name being Henry Fitzalwyn, who filled the office for 24 years. On his death a new charter was granted by King John in 1214, which directed the Mayor to be chosen annually, which has ever since been done, though in early times the same individual often held the office more than once. A familiar instance is that of "Whittington, thrice Lord Mayor of London" (in reality, four times, A.D. 1397, 1398, 1406, 1409); and modern cases occur with Alderman Wood, 1815, 1816; Sir John Key, 1830, 1831; Alderman Cubitt, 1861, 1862; and Alderman Sir R. N. Fowler, 1883, 1885. The title of Lord Mayor was first bestowed in 1354 on Sir Thomas Legge, by Edward III.

Aldermen were first appointed by a charter of Henry III. in 1242, and were elected annually until 1394, when a charter of Richard II. directed them to be chosen for life. The Common Council was at an early date substituted for a popular assembly called the Folkmote. At first only two representatives were sent from each ward, but the number has since been greatly increased, some wards having as many as 16 members, and none less than 4. Sheriffs (as well as aldermen) were Saxon officers, who usually had charge of a large district. The time of their appointment for London is uncertain, but it is commonly placed in A.D. 1189. At first they were only the officers of the Crown, and were named by the Barons of the Exchequer; but Edward IV., whose cause was favoured by the citizens of London, gave them, in the first year of his reign, permission to choose their own Sheriffs. The citizens, however, lost this privilege as far as the election of Sheriff of Middlesex is concerned, by the Local Government Act, 1888, but they continue as heretofore to choose the Sheriffs of the City of London. They are appointed on Midsummer Day, and enter on office at Michaelmas, on which day the Lord Mayor is elected. He is sworn into office on November 8, and on the following day presented to the Lord Chief Justice at the Royal Courts of Justice, to take the final declaration of office—the pageant, conducted with some degree of civic state, being popularly known as the Lord Mayor's Show. The Recorder was first appointed in 1298. The Chamberlain is mentioned as a royal officer in 1195; when he became a civic official is not known; but the Town Clerk (called Common Clerk) and Common Serjeant (now appointed by the Crown) are mentioned as "ancient" officers in the Charter of Edward II. (A.D. 1319).

The Lord Mayor, Aldermen, and Principal Officers of the City of London.

Lord Mayor. £10,000.

Offices—Victoria Embankment, E.C. Hours 10 to 5 (Sat. 10—1). Board Meetings Thursday, at 3 p.m.

Was instituted (in accordance with Mr. Forster's Elementary Education Act) in 1870, and the first election took place on Nov. 29, 1870. From that date to Lady Day, 1896, accommodation in permanent schools had been provided for 479,681 children, and schools with accommodation for 62,227 are in process of erection. At Lady Day last there were upon the rolls of the Board Schools (including certain schools transferred, and temporary schools), 511,566 children. The staff of teachers comprised 9,093 adult, and 1,610 pupil-teachers and probationers.

When the census of all efficient and non-efficient schools in London was taken in 1871, the number of children on the roll was 320,143; the number now upon the roll of efficient schools *alone* is 738,930; the number sent to industrial schools at the instance of the Board, up to Lady Day, 1896, being 22,315. In addition, 20,405 other cases had been referred to various voluntary agencies, &c., to be dealt with. The precepts for the year 1896-97 amount to £1,800,926, which is at the rate of 12·31*d.* in the pound.

MEMBERS.†

Chairman, The Marquess of Londonderry, K.G. (*unp.*)
Priv. Sec., T. A. Spalding, LL.B., 1892.
Vice-Chairman, Gen. Francis J. Moberly.

City of London.—Miss Davenport-Hill; Duke of Newcastle; W. Henry Key; Patrick H. White.

The London County Council.

Office, Spring Gardens, S.W.; Hours 9.30 to 5; (Saturday 9.30 to 2).—Meets on Tuesday at 3 p m.

The London County Council was constituted, in common with county councils throughout England and Wales, under the Local Government Act of 1888. The main principle of the Act is that it adapts to counties that form of municipal government which had previously pertained only to English boroughs.

London is an *administrative* county, covering an area of 121 square miles, with boundaries conterminous with those of the area over which the late Metropolitan Board of Works exercised its jurisdiction under the Metropolis Management Act of 1855; so that it has absorbed, so far as *rateable value* is concerned, about seven-eighths of Middlesex, about two-thirds of Surrey, and nearly one-third of Kent; and in it the City takes its place as an electoral division.

The City of London was not much affected by the Act. The County of the City of London is a county for *non-administrative* purposes, such as quarter sessions, justices, &c.; and the Metropolis outside the City is a county for *non-administrative* purposes, by name the County of London, in which the justices continue their judicial duties. Such matters as necessitate the consideration of both the *administrative* county and the *non-administrative* county are referred to "The Standing Joint Committee" of the London County Council and the London Quarter Sessions.

The Administrative County of London has no jurisdiction over the police, in that respect differing from other counties.

The Council comprises a chairman, 19 aldermen, and 118 councillors, together 138, or, if the chairman be also an elected member or alderman (as at present), 137. The term of office for aldermen is 6 years, and 10 or 9 retire every 3 years. The councillors are elected for 3 years, and will all retire in March, 1898, the third council having been elected in March, 1895. The councillors are elected directly by the ratepayers, and the councillors elect the aldermen. The positions of aldermen and councillors are the same except as to the term of office. The first meeting of the London County Council was held on the 21st March, 1889, under the presidency of Lord Rosebery. His successors in the chair have been Sir John Lubbock, Sir John Hutton and Sir Arthur Arnold. The vice-chair has been occupied by Lord Farrer, Sir John Hutton, Mr. Charles Harrison, Mr. J. Williams Benn, and Dr. W. J. Collins. The onerous duties of deputy-chairman were first performed by the late Mr. Firth, then by Mr. Alfred Haggis, both of whom died while in office; afterwards Mr. W. H. Dickinson filled the position until March, 1896, and on his retirement the duties of the office were revised, and the salary hitherto attached to it ceased. The present deputy-chairman is Mr. R. M. Beachcroft.

The powers, duties, and liabilities of the Council are: *First*, those formerly belonging to the Metropolitan Board of Works in connection with the raising and loaning of money; main-drainage, and the sanctioning of new sewers constructed by vestries; fire brigade; parks and open spaces; works for prevention of floods by the Thames; bridges over the Thames within the county (and outside the City), and other Thames crossings, including the new tunnel under the Thames at Blackwall and the free ferry at Woolwich; street improvements; controlling the width of new streets, the building line, and the naming and numbering and temporary closing of streets; maintaining subways under streets for gas and water mains, &c.; supervising buildings and district surveyors; dangerous structures: buildings unfit for habitation; structure of theatres and music-halls; artizans' dwellings; cattle diseases; offensive businesses; dairies and cowsheds; explosive substances and petroleum storage; infant life protection; tramways; locomotives for roads; gas, gas-meter, and electric-meter testing; and constant supply of water. *Secondly*, those transferred from former county justices in connection with the granting of music and dancing licences in the Metropolis, including the City; asylums for pauper lunatics; reformatory and industrial schools; testing weights and measures; county buildings; coroners, and other minor matters. *Thirdly*, powers transferred from various authorities with regard to highways; licensing of houses or places for the performance of stage-plays beyond the limits of the Lord Chamberlain's authority; licensing of slaughter-houses and of cow-houses; and the supervision of common lodging-houses. *Fourthly*, new powers conferred by recent Acts with respect to technical education; Bills in Parliament, and actions at law; registration of electors; medical officers of health; inspection of factories to secure means of escape from fire; suppression of nuisances and regulation of overhead wires and sky-signs; and the appointment of inspectors under the Shop Hours Act, 1892. As the central representative body in London, the Council also interests itself in the thousand and one things affecting the welfare of the people of London as a whole, and has delegates on the Thames and Lea Conservancy Boards, and numerous other boards, charities, &c.

The Council meets weekly, and receives reports from its 27 standing committees. During the year ended March 31, 1896, upwards of 1,200 meetings of committees and sub-committees were held. The Finance Committee has important statutory powers, and its duties are of a very responsible nature. The Council is the principal money-raising body for all the local authorities of the Metropolis, and has a gross debt of £35,800,000, a Sinking Fund of £16,600,000, and an annual maintenance expenditure of £3,370,000. The Asylums Committee has special powers under the Lunatic Asylums Acts, and manages Hanwell, Colney Hatch, Banstead, Canehill, and Claybury Asylums. The last-named was opened during 1893, and the Committee is actively engaged upon providing two further asylums, one at Bexley for 2,000 patients, and one near Epsom. The Industrial Schools are under the care of another Committee: the schools at Feltham and Mayford accommodate 1,000 boys. The Housing of the Working Classes Committee perform the duties cast upon the Council by the Housing of the Working Classes Acts; they have in hand the clearance of insanitary areas at Somers Town, St. Pancras, and Clare Market, Drury Lane, and of numerous smaller areas, and the building of houses for artizans. The Council has established a model municipal lodging-house capable of accommodating 324 men, at Parker Street, Drury Lane. The most important work at present engaging the attention of the Bridges Committee is the tunnel under the Thames at Blackwall. The whole of the tunnelling work was completed in October last, and it is hoped that the tunnel will be opened for traffic in the spring of 1897. The work was done in compressed air, and without any fatal or disastrous consequences. The tunnel has an internal diameter of 23 feet,

and will accommodate vehicular and foot traffic. The cost will be upwards of one million sterling. The Woolwich Free Ferry is used by more than 4,000,000 passengers and 300,000 vehicles per annum. The rebuilding of Vauxhall Bridge was authorised by an Act of 1895, and a temporary bridge, to accommodate the traffic during the construction of the new bridge, is in course of erection. The formation of new approaches to the Tower Bridge, under the powers of Acts passed in 1895 and 1896, is under the care of the Improvements Committee. The Council has also adopted a proposal of this Committee for the widening of the Strand at Holywell Street, and Parliament will be asked to sanction the scheme in the ensuing year. Several smaller but important improvements are also being carried out. The Fire Brigade, directed by the Fire Brigade Committee, has been much increased since the Council came into existence: the authorised staff now numbers 961 men, and several new stations are being built.

The Council has resolved to exercise its powers, as the local authority for London, under section 43 of the Tramways Act, 1870, which gives the local authority power to purchase a tramway undertaking on the expiration of 21 years from the date of the authorising Act, upon payment of the constructional value (without allowance for goodwill, &c.) A length of 4¼ miles was purchased from the London Street Tramways Co. in 1895, and leased at a rental, and notice of purchase has been given in respect of other sections which have come under the purchase clause. A proposal has been made by the North Metropolitan Company that with regard to the 48 miles of tramways north of the Thames, instead of a piecemeal purchase extending up to 1910 under compulsory powers with costly legal proceedings, the whole system should be handed over to the Council forthwith at a stated price, on the condition that the company should have a lease of the lines for the next 14 years. Proceedings are also being taken with regard to the south side of the river.

Perhaps the most popular work of the Council is that connected with its parks and open spaces; 2,656 acres were taken over from the late Board, and over 1,000 acres have since been added. Bands are employed by the Council to play during the summer months.

The disposal of sewage is the work of the Main Drainage Committee. All the sewage of London is conveyed by 82 miles of main intercepting sewers to the outfalls at Barking and Crossness, and there the solid matters held in suspension are precipitated, the harmless effluent being allowed to flow into the river, and the sludge, amounting to upwards of two million tons in a year, being carried out to sea by a fleet of six specially constructed vessels. The improved condition of the river is a highly satisfactory result. The engineering experts who advise the Committee are, however, of opinion that extensive works are still needed to prevent the discharge of crude sewage into the river at the storm overflows in times of heavy rain.

In 1893 a "Works Department" was formed for the purpose of carrying out building, painting, sewer construction, paving, and other works, without the intervention of contractors. During the year ended 31st March, 1896, the Department executed a variety of works at a total cost of £240,000.

In November last great excitement was caused by the discovery, during the Comptroller's audit of the cost accounts of certain works executed by the Department, that, by a system of bogus transfers particular jobs which threatened to work out above the estimates had been credited in respect of materials represented as having been transferred to other jobs, not apparently for the pecuniary advantage of any of the officials implicated but with a view to equalising results and so gaining credit for the Department. A special subcommittee was immediately appointed to inquire into the matter, and after prolonged discussion the Council dismissed the Manager of the Department and appointed a special committee to hold a searching inquiry into the whole constitution and working of the Department.

The question of water supply is still engaging serious attention. Bills were promoted in Parliament in 1895 and 1896 to empower the Council to purchase the undertakings of the eight London Water Companies, and are to be introduced again in 1897, while the Water Committee is maturing a scheme for an alternative supply to be drawn from the valleys of South Wales.

Twenty members of the Council, together with fifteen representatives (nominated by the Council) of other bodies or interests, constitute the Technical Education Board, charged with the performance of duties under the Technical Instruction Acts.

The expenditure of the Council is met by two chief sources of supply—capital money raised by the issue of Stock, and current income raised in a county rate. Certain contributions are also received from the Imperial Exchequer. The capital disbursements for the year ended 31 March, 1896, amounted to £692,263, made up as follows: Thames Tunnel (Blackwall), £130,554; tramways purchase, £102,847: parks and open spaces, £20,418; street improvements, £94,470; housing of the working classes, £94,125; main drainage, £80,709; fire brigade, £54,017; lunatic asylums, £64,905; and other purposes, £50,218. The maintenance of such works, the Sinking Fund to pay off debt, and the interest on the debt, together with all recurring disbursements of every kind, are paid out of rates. Some idea of the nature and amount of this class of disbursements will be gathered from the statement on page 342.

The Council's powers to expend capital money and raise Stock, or, as they are called, "borrowing powers," are conferred by its annual Money Act. The Act of last session sanctioned, for the year ending March, 1897, expenditure on various improvements and services not exceeding £3,812,495, but a large proportion of this amount was a regrant of unexercised powers contained in previous Acts. The Act also conferred powers to lend during the year to the School Board, vestries, and other public bodies not exceeding £2,092,660.

The Council issued £1,000,000 of 2½ per cent. Metropolitan Consolidated Stock last year; the tenders amounted to £2,698,450, and the average price obtained was £104 9*s.* 7*d.* per cent. The total stock now outstanding amounts to £35,511,638. The gross debt, including liabilities transferred from the former counties of Middlesex, Surrey, and Kent, stood, on 31st March last, at £34,762,878; against this there were loans owing to the Council from the School Board, vestries, and other public bodies amounting to £13,339,606. Property was held to the extent of £2,243,227, and there were also other assets bringing down the net liability to £19,215,400.

The rating for the year 1896–97 amounts to 12·7*d.* in the pound over the whole county, including the City, and a further rate over the county outside

the City of 2·3*d.* in the pound, together 15*d.*; in 1895-96 the rate was 15*d.*; in 1894-95 14*d.*; in 1893-94 13*d.*; in 1892-93 12½*d.*; in 1891-92 11¾*d.*; in 1890-91 13¾*d.*; and in 1889-90 12½*d.* The rateable value of the County of London on 6th April, 1896, was £35,852,468—a 1*d.* rate producing £149,306.

In considering the question of rating, the grants paid by the Council in relief of local rates (indoor paupers, registration of electors, &c.) must be borne in mind; they tend to lighten the burden in some parishes and increase it in others; generally speaking, the effect is to materially benefit the poorer parishes. Each parish pays an equal rate in the £1 on its rateable value, but receives back, for instance, 4*d.* per day per head of the indoor paupers; the City receiving ½*d.*, and St. George-in-the-East about 11¼*d.* in the pound under this head alone. A still more important step towards the equalisation of London rates was effected by the London (Equalisation of Rates) Act, 1894, under which the Council is to levy half-yearly a rate of 3*d.* in the £ to make an "equalisation fund;" and then to distribute the fund on the basis of population.

The amount raised by county rate for the year to 31st March, 1896, is made up as follows:—

Estimated Receipts.			Estimated Expenditure.		
1. Estimated Balance on 31 March, 1896		£197,728	1. Debt:—		
2. Receipts (other than County Contributions):—			Redemption	£544,137	
Exchequer Contribution	£462,105		Dividends on Stock	1,111,657	
Interest on loans advanced, on cash balances, &c.	465,480		Interest on sundry liabilities	24,233	
Rents	91,040		Management of stock, &c.	45,825	
Sundry contributions, fees, fines, &c.	153,440				£1,725,852
		1,172,053	2. Grants:—		
3. **COUNTY CONTRIBUTIONS** required to be raised:—			To Guardians for indoor paupers	£326,809	
For General County purposes, equal to a rate of 12·7d.	£1,896,188		To Guardians and others out of the Exchequer contribution	216,112	
For Special County purposes, equal to a rate of 2·3d.	300,452		Registration of Electors	15,000	
		2,196,640	Main roads	8,560	
[Total rate, 15d.]					566,481
			3. Pensions (including Superannuation and Provident Fund, and prison and asylum pensions)		41,065
			4. Establishment Charges		124,720
			5. Judicial Expenses		41,859
			6. Services:—		
			Main Drainage	£222,110	
			Fire Brigade	167,665	
			Parks and Open Spaces	111,180	
			Bridges and Woolwich-ferry	31,900	
			Embankments	10,535	
			Pauper Lunatics	63,405	
			Industrial Schools	28,840	
			Coroners	23,780	
			Weights and Measures	13,565	
			Miscellaneous	51,820	
					724,820
			7. Technical Education		120,000
			8. Parliamentary Expenses, Water, Market and other Inquiries, Rating Appeals, &c.		25,050
			Total Expenditure		3,369,847
			9. Estimated Balance on 31 March, 1897		196,586
		£3,566,433			£3,566,433

OFFICERS OF THE COUNTY COUNCIL.

Clerk of the Council, C. J. Stewart £2,000
Comptroller, H. E. Haward £850
Assistant do., E. Doggett.
Engineer, Alex. Richardson Binnie £2,000
Dist. Engineers, Hart Bennett, J. E. Worth.
Bridges, E. Bazalgette.

THE CITY COMPANIES, NUMBER OF LIVERYMEN (1896), CORPORATE AND TRUST INCOMES, MASTERS, CLERKS, AND HALLS.

As will be seen from the following table, many of the London Livery Companies are possessed of great wealth. Of some portion of the property they are merely trustees, and no doubt render periodical accounts to the Charity Commissioners; but of the "Corporate" property they are the sole owners, are not bound to render any account, and may dispose of the income as they please. Fifteen of the Companies have more than ten thousand pounds a year; some of them are very liberal in their charities, especially in the way of education. Some of the Companies invite fresh members to join, others do their utmost to repel. Corrections have been made from time to time by most of the Companies; those marked ¶ have revised this year's list, but others take no notice of the application. Where the return was incomplete, the Editor allowed the old figures to remain.

Company.	No. of Livery.	Corporate Income	Trust Income	Total Income.	Master or Warden 1896—7.	Clerk.	Hall.*
		£	£	£			
Mercers	183	48,000	35,000	83,000	Thos. Jno. Watney	John Watney	4 Ironmonger Lane.
Grocers¶	183	37,500	500	38,000	F. Lambert	R. V. Somers-Smith	Princes St.

* These Companies having no Halls, the address of the Clerk is given in brackets.

The rateable value of the Halls of the London Companies is about £55,000, and that of their Schools and Almshouses about £18,000 a year. The value of their Plate and Furniture is about £320,000, and the annual income of the livings in their gift —several of the "great" Companies are patrons of livings—about £12,300. In 1880 the Companie were indebted to the extent of about £270,000.

The above information is mainly derived fror the report, in 5 vols., published in 1884, of the Cit Livery Companies' Commission appointed in 188 of which the late Earl of Derby was chairman.

Metropolitan and City Police Districts	443,421	4,766,661	5,633,806	

The Metropolitan Police District extends over a radius of 15 miles from Charing Cross, exclusi of the City of London, with a rateable value in 1895-96 of £38,716,378. The number of new hous built since 1849 up to and including the year 1895 is 598,192 with 4,007 in course of erection; tl new mileage since 1849 being 2,043.

* Not shown in the Census.

London Police.

For Police purposes London is divided into two jurisdictions, that of the METROPOLITAN and that of the CITY Police. The former force superseded the "Night Watchmen" in 1830, when a Bill introduced by Sir Robert Peel authorised the establishment of a Metropolitan Police under the control of the executive government. The night watch system continued in the City itself until 1839, when a force of City Police was established under the control of the Common Council.

The CITY POLICE* district comprises an area of 671 statute acres, and contains two courts of justice, those of the Guildhall and Mansion House, where the Lord Mayor and the Aldermen are the magistrates. Although the area is comparatively small, the rateable value is enormous, and there are 31,148 night residents to be protected.

The Force comprises 1 Superintendent, 1 ditto, Detective Department, 3 Chief Inspectors, 15 District Inspectors, 22 Station Inspectors, 12 Detective Inspectors, 71 Sergeants, 7 Detective Sergeants, and 795 Constables; also 57 Constables on private service duty.

The METROPOLITAN POLICE* district embraces an area of 442,750 statute acres, with a population of between six and seven millions. There are within this area fourteen Police Courts, viz., Bow Street, Clerkenwell, Great Marlborough St., Greenwich, Lambeth, Marylebone, North London, South Western (Lavender Hill), Southwark, Thames (Stepney), West Ham, West London (Vernon St.), Westminster, and Worship St.

The Force on Oct. 12, 1896, consisted of 32 Superintendents, 589 Inspectors, 1,840 Sergeants, and 12,831 Constables, making a total of 15,342, with 317 horses.

It is scarcely possible to form an accurate estimate of the enormous actual value of the property under police protection, but the mean rateable value of the metropolitan area for Metropolitan Police purposes for the year 1895-6 was £38,716,373. The Police Rate is now fixed by 31 & 32 Vict c. 67 at 9*d* in the £, of which 4*d* in the £ is payable out of the Local Taxation Account under the Local Government Act, 1888. The total amount of Police Rate levied on the Parishes for the year ending 31 March, 1896, was £826,587, and the Local Taxation Account contributed £640,909 to the Police Fund during the year. The pay of the Force, including Chief Constables, Superintendents, Inspectors, Sergeants and Constables, was £1,266,311. During the year 1895, the criminal offences reported to the Metropolitan Police amounted to 20,024; a decrease of 946 as compared with the preceding year. The proportion of felonies relating to property was only 2·906 per thousand of the population, lower than any previous year. Of burglaries, 514 were committed in 1895, an increase of 130 over 1894, and the estimated value of the property stolen in these burglaries was £4,041, of which £960 was recovered. Housebreakings numbered 1,501, and the value of the property lost was £12,951. Murder cases in 1895 numbered 18; there were three death sentences, and in three cases the murderer committed suicide. Of manslaughter there were 37 cases in 1895 as compared with 32 in 1894. The number of Penal Servitude Convicts liberated on licence into the Metropolitan Police District was 874—186 less than in 1894.

* For the official taff of the two Forces, see pp. 176–77.

Metropolitan Fire Brigade.

PREVIOUS to the formation of the Metropolitan Fire Brigade, under an Act passed in 1774, the churchwardens and overseers of every parish had been compelled to maintain an engine for putting out all fires occurring within their own boundaries; though, independently of this provision, for more than thirty years before 1866 the leading fire insurance companies had jointly organized and worked a fire-engine establishment of their own. On Jan. 1, 1866, the Metropolitan Board of Works took over these responsibilities.

By the passing of the Local Government Act, 1888, the London County Council assumed control of the Fire Brigade, and there is no limit as regards the amount of rate to be assessed.

The total expenditure for the year ended March 31, 1893, was £149,750. Of this amount the Treasury and the various insurance companies contributed £44,005, while the rate precepts furnished above £134,495 in 1892.

The strength of the Brigade in 1895 was as follows:—57 Land Fire-Engine Stations, 4 Floating or River Stations, 56 Hose Cart Stations, 200 Fire Escape Stations, 9 Steam Fire-Engines on Barges, 51 Land Steam Fire-Engines, 78 Six-inch Manual Fire-Engines, 17 Under-six-inch Manual Fire-Engines, 35 Miles of Hose, 116 Hose Carts, 8 Steam Tugs, 13 Barges, 12 skiffs, 225 Fire Escapes, 7 Long Fire Ladders, 9 Ladder Vans, 2 Ladder Trucks, 2 Trollies for Ladders, 2 Trollies for Engines, 12 Hose and Coal Vans, 5 Waggons for Street Duties, 10 Street Stations, 148 Watch Boxes, 791 Firemen, including Chief Officer, Second Officer, Superintendents, and all ranks, 20 men under Instruction, 16 Pilots, 75 Coachmen, 137 Horses, 81 Telephones between Fire Stations, 57 Alarm circuits round Fire Stations, with 563 call-points, 20 Telephones to Police Stations, 1 Telegraph, 81 Telephones, and 7 Bell-ringing Fire Alarms and 1 Speaking Tube to public and other buildings.

The total number of calls for fires was 5,635, of which 845 were false alarms; of the latter no fewer than 384 were maliciously sent through the call-posts, only 21 of the offenders being arrested.

The number of attendances at fires, or supposed fires, last year was 11,090, an average of 30 a day.

During 1894 there were 3,061 fires in the metropolis, and at 73 of them lives were lost.

Headquarters, Southwark Bridge Road, S.E.

Chief Officer, Commander L. de L. Wells, R.N. £900

The following list of Life Assurance Offices, with two or three unimportant exceptions, contains the names of all the British offices; and of five other companies doing business in this country—three Life Offices founded in New York, one in Australia, and one in Canada—with the premiums charged at various ages to secure the payment of £100 at death, with right to participate in profits. Those offices having an asterisk prefixed to the name transact Annuity as well as Life business. After the names are the figures (1) (2) (3) or (4). Those offices marked No. 1 are Proprietary or Joint Stock *Life* Companies; No. 2 are Proprietary *Life* and *Fire* Companies, and in three instances—those of the *Commercial Union*, the *London Assurance Corporation*, and the *Royal Exchange*—the business of *Marine* Insurance is included; No. 3 are Societies established on the principle of *Mutual* Assurance: that is, there is no proprietors' paid-up capital, the contributions of members being regarded as amply sufficient to meet all claims and contingencies; No. 4 are what are termed *Industrial* Life Offices, *i.e.*, the Life Insurances transacted are wholly or for the most part for sums *under* £100, the premiums being usually payable by weekly or monthly instalments.

Persons wishing to insure their own lives (or where legally or financially interested in the lives of others) are furnished with a paper containing questions respecting age, habits, state of health, and other matters, all which questions must be answered truthfully; for if any wilful misstatement be made the policy will be vitiated, and the office can refuse to pay when a claim is made; thus all the sums contributed will have been thrown away. If the application for insurance be rejected on account of ill-health, or a tendency to hereditary disease, offices are to be found which in the majority of cases will insure unsound lives, of course at a charge proportioned to the nature of the risk. Some tradesmen, *e.g.*, publicans, bricklayers, and others, are usually charged a higher rate than ordinary; a man engaged in business involving extra hazard, aged say 30, may have to pay as though he were 40 or 45.

It should be impressed upon intending insurers that they cannot be too careful in the selection of an office. *Safety should be the first consideration*, economy second—although really first, for there is no economy in insuring in an unsound office, however attractive its features may appear. The rates differ, but in some offices where the premium appears high, corresponding advantages are offered, and these offices may in the end prove quite as economical as others where lower rates are charged.

ANNUAL PREMIUMS FOR LIFE ASSURANCES

In the following Offices, at the ages of 25, 30, 35, 40, 45, 50, and 55, to secure the payment of One Hundred Pounds at death; the assured *participating in the profits* in all named, except the Post Office and certain of the Industrial Life Offices. The first column of figures gives the amounts returned as Life and Annuity Assets by the various Offices, in accordance with the provisions of the Act 33 & 34 Vict. c. 58; and the last column shows the number of years the Office has been established for the transaction of Life Assurance.

† Including paid-up capital.

The information now conveyed through the medium of the "Life Assurance Companies Act, 1870," which renders it imperative that every Life Office must furnish yearly to the Board of Trade a true state of its financial position, places within the power of every one of ordinary mental ability the means of ascertaining whether a Life Office is or is not financially if not actuarially sound. Without going into further detail, and to meet ordinary popular requirements, a test as to solvency may be ascertained in answer to three questions:—1. Is the management and other expenditure within the sum set apart for that purpose? 2. Are the funds safely invested, and does the interest received thereon *realise* the percentage on which the premium tables are framed? 3. Are the death claims which arise within, in amount, the "Expectancy" table of mortality adopted by the Company? Where the experience of the Company shows that these three questions can be *truthfully* answered in the affirmative, then the business may fairly be regarded as conducted on a perfectly secure basis. And just in proportion as by a careful selection the death-rate is reduced below the expectancy, as the rate of interest realised is beyond the assumed percentage, and as the expenditure is less than the sum allotted—in the same ratio will the office be able to show profits fairly and legitimately realised.

The Act of 1870 has now been in operation for upwards of 25 years, and the publication of the annual results in the Insurance Blue Book, while proving highly beneficial to soundly constituted and well managed life offices, has exercised a salutary influence in supplying the means of examining the internal affairs of such companies as would otherwise be able to shun the fierce light of publicity. The earlier issues of the Blue Book—1872 to 1881—contained simply a transcript of the figures of the various life offices but in 1882 a summary of the year's business was introduced, and has appeared year by year since that time. To indicate the progress that has attended the business of life insurance, the following table is subjoined, giving the results of the ordinary and industrial companies for the years 1882 and 1896 respectively:—

	Ordinary Life Companies.		Industrial Companies.	
	1882.	1896.	1882.	1896.
INCOME.	£	£	£	£
Premiums (less re-assurance)	11,638,319	17,637,681	1,941,994	6,382,927

Summary of Life Assurances in Force, as shown by the last Returns issued by the Board of Trade	1,428,137	£ 529,184,344	14,990,581	£ 144,142,569

Every year the Editor receives letters of inquiry from persons wishing to insure their lives, asking him to recommend an office, or inquiring as to the soundness of particular offices. It is hardly necessary to say that he has on all occasions declined to give an opinion, or to recommend any office; and until 1888 had refrained from pointing out one source of information open to all readers of the Almanack—the Advertisements. These are inserted by the different offices, and set forth the various advantages offered. As so many, very nearly all, the best offices avail themselves of these pages, the Editor thinks that he can be charged with no impropriety in thus drawing attention to them and to the particulars therein contained.

*Fire Insurance.

RATES.—For merchandise at the principal ports, and for mills and manufactories and other leading industries throughout the United Kingdom, all the offices charge the same, whilst for minor risks each office makes its own estimate, and charges the premium in its judgment applicable. The following is a digest of the scale put forward by some of the oldest companies, and the rates and classification are those which are generally adopted.

Common Insurances.—At 1*s.* 6*d.* to 2*s.* per cent. per annum, with certain exceptions:—

1. Buildings covered with slates, tiles, or metals, and built on all sides with brick or stone, or separated by party-walls of brick or stone which are carried through the roof, and used for residence, or non-hazardous purposes.

2. Goods in buildings as above, such as household goods, plate, wearing apparel, and printed books, liquors in private use, and personal effects not comprised in the following categories.

Hazardous Insurances.—At 2*s.* 6*d.* to 3*s.* 6*d.* per cent. per annum, with certain exceptions:—

1. Buildings of timber and plaster, or not separated by partition walls of brick or stone, or not covered with slates, tiles, or metals, and thatched barns and outhouses, having no chimney, nor adjoining to any building having a chimney; and buildings falling under the description of common insurances, but in which hazardous goods are deposited, or hazardous trades are carried on.

2. Goods.—The stock and goods of bread-bakers, tallowchandlers (not melters), inn-holders, drapers, stationers, also chemists and grocers not dealing in mineral oils.

Doubly Hazardous Insurances.—At 4*s.* 6*d.* to 5*s.* per cent. per annum, with certain exceptions:—

1. Buildings.—All thatched buildings having chimneys, or communicating with or adjoining to buildings having one, although no hazardous trade shall be carried on, nor hazardous goods deposited therein, and all hazardous buildings in which hazardous goods are deposited, or hazardous trades carried on.

2. Goods.—All hazardous goods deposited in hazardous buildings, and in thatched buildings having no chimney; also china, glass, mathematical and musical instruments, pictures, and jewels in private use.

Much depends upon the surroundings of the building insured; for a printer's or bookbinder's workshop, in a narrow lane, with old wooden houses near it, the premium would possibly be from 10*s.* to 15*s.*

Special Insurances.—5*s.* per cent. per annum and upwards:—

Buildings and contents among others of workers in wood, dealers in mineral oils, large drapers, some mills, warehouses, and factories; in the case of some theatres the rate is as high as 31*s.* 6*d.* per cent.

Close proximity to, or communication with, any building containing very hazardous goods or used for any specially hazardous trade will, of course, also increase the risk.

The most recent returns of 57* British Fire Offices give a premium Income of £19,289,894; Losses, £10,919,508; Expenses, £6,344,468. Funds exclusive of Capital, £27,785,942; Paid-up Capital, £8,795,928.

* Of this number 44 are Tariff Offices, the residue (13) Non-Tariff.

Ocean Accident and Guarantee	1871

THE BATTLE OF LIFE.

IT will be observed from the tables showing the EXPECTATION OF LIFE, pages 357–58, that, while during the period 1871–80, up to the age of sixty-seven in the males and ninety-one in the females, a greater number survived out of every million of either sex born than from 1838–54; after these ages there is no improvement; indeed, if anything, it is rather the other way, and this, too, despite the enormous strides made in sanitary science and other matters conducive to longevity. What is the reason for this? It is merely an example of the "survival of the fittest."

In the case of males, the improvement in the death-rate, as will be seen, is in the period 1871–80 almost entirely confined to the earlier years of life, and though it is a fact that a far greater number of children will reach middle age than was formerly the case, this does not suffice to increase the average duration of individual life. We have now amongst us a vast body of adult weaklings and chronic invalids, chiefly, be it observed, in the middle and upper ranks, who, had they been born fifty or sixty years ago, would have been in their graves ere reaching adolescence.

Immediate Annuities.

THE following Table shows the amount of Annuity granted by the undermentioned Companies for every £100 paid. The age last birthday is that upon which the payment is based, and as women are longer lived than men the Annuity is naturally smaller. By way of comparison, the rates for Annuities paid through the Post Office Savings Banks are given. By a few Companies, distinguished thus (‡), the proportionate amount of Annuity is payable to *day of death*.

The Annuity is calculated as payable half-yearly, except in case of those offices having an asterisk prefixed, when the annual payment is stated. The initial letters M and F indicate the rates for *Male* and *Female*. In the absence of these letters the rate quoted applies to either sex.

Companies marked thus † publish rates for age advancing by six months.

As Insurance Companies have the means of safely investing at a higher rate of interest than can be obtained from Government, they are able proportionately to offer more advantageous terms to annuitants: to those about to purchase, a study of the Comparative Table of Rates will consequently be found useful. The Ages quoted range from *fifty* to *seventy* years, Annuities being usually purchased within that range of age. The completed Age—the age *last* birthday—is that to which the Annuity in every case applies.

Friendly Societies.

In 1892, the latest year for which complete particulars are available, the number of Friendly Societies and Branches in existence in the United Kingdom was 29,742, with a membership of 8,320,262, and with funds amounting to a grand total of £26,003,061. The following table gives the figures relative to the most important of the Societies.

PARTICULARS OF NINE OF THE LARGEST FRIENDLY SOCIETIES IN THE UNITED KINGDOM FOR THE YEAR 1894.

Society.	Adult Male Membership.	Total Income (exclusive of Female and Juvenile Funds).	Total Accumulated Funds.	Total Benefits paid on account of Male Adults.	Sick Benefit to Male Adults.	Funeral Benefit on account of Members, Wives, and Widows.

Rules by which the Personal Estates (including leaseholds) of English Persons, and the Movable Estates of Scottish persons, Dying Intestate are Distributed.

IN EACH INSTANCE IT IS SUPPOSED THERE ARE NO NEARER RELATIONS THAN THOSE NAMED.

[* *Where this is prefixed the Regulation applies to Scotland only.*]

By the Intestates' Estates Act, 1890, passed in the Session 53 & 54 Vict., c. 29, a very important change is made in the law as regards provision for widows of men who die intestate and without issue after the first of September, 1890, whereby it is enacted that the real and personal estate of an intestate so dying, passes absolutely to the widow as far as the first £500 in value is concerned. If under £500 she takes the whole; if above £500 she takes £500 in addition to what she was entitled to under the law previously in force. This Act is not applicable to Scotland.

If the Intestate die, leaving	*His representatives take in the proportion following:—*
Wife only, no blood relations	Half to wife, other half to the Crown.
Wife, no near relations	Half to wife, rest to next-of-kin in equal degree to intestate.
Wife and child, or children, and children of a deceased child	One-third to wife, rest to child or children; and if children are dead, then to their lineal descendants, subject to this, that such child or children as had estate by settlement of intestate, or were advanced by him in his lifetime, shall bring such estate or advancement into account (but heir does not bring real estate into account). *One-third to wife; one-third to living children in equal shares (but the heir must collate the heritable estate, and those children who have been advanced by intestate in life must collate the advances); one-third equally among living children *per capita* (see NOTE A, next page), and issue of dead children *per stirpes*.
Wife and father	Half to wife, and half to father.
Wife and mother	Half to wife, and half to mother. *Half to wife, one-sixth to mother, two-sixths to Crown failing kin.
Wife, brother, or sister and children of a deceased brother or sister	Half to wife, one-fourth to living brother or sister, one-fourth to deceased brother's or sister's children. *Half to wife, one-sixth to brother, two-sixths equally among children of dead brother or sister.
Wife, mother, nephews, and nieces	Half to wife, one-fourth to mother, and other fourth to nephews and nieces *per stirpes*. *Half to wife, one-sixth to mother, two-sixths among nephews and nieces *per stirpes*.
Wife, mother, brothers, sisters, and nephews and nieces (children of deceased brothers and sisters)	Half to wife, residue to mother, brothers, sisters, and nephews and nieces (as to nephews and nieces *per stirpes*). *Half to wife, one-sixth to mother, two-sixths among the brothers and sisters (who take *per capita*), and the nieces who take *per stirpes*.
No wife or child	All to next-of-kin of equal degree.
Children by one or more wives and the issue of deceased children	All children equally *per capita*, issue of deceased children *per stirpes*; no difference between children of different wives. *One-half equally amongst all living children; the other half equally amongst living children *per capita*, and issue of dead children *per stirpes*.
Husband and children	Whole to husband.
Mother, but no wife, child, father, brother, sister, nephew, or niece	The whole to mother. *One-third to mother, two-thirds to the Crown failing kin.
Mother and brother or sister	Equally between them. *Mother one-third, brother two-thirds.
Mother, and brothers and sisters	Whole to them equally. *Mother one-third, brothers and sisters two-thirds equally *per capita*.
Father, and brothers and sisters	Whole to father. *One-half to father, the other half equally amongst brothers and sisters *per capita* (see NOTE B).

Child and grandchild by deceased child.....	Half to child, half to grandchild, who takes by representation. *Three-fourths to child, one-fourth to grandchild.
If no child, children, or representatives of them...	All to next-of-kin in equal degree to intestate.
Brother or sister, and children of a deceased brother or sister	Half to brother or sister *per capita*, half to children of deceased brother or sister *per stirpes*.
Brother and grandfather.....	Whole to brother.
Brother's grandson, and brother's or sister's daughter	All to daughter.
Brother and two aunts.....	All to brother.
Brother and wife	Half to brother, half to wife.
Grandfather, no nearer relation	All to grandfather.
Father's father, and mother's mother.....	Equally to both.
Grandmother, uncle, or aunt.....	All to grandmother. *All to uncle or aunt if paternal.
Uncle, and deceased uncle's child.....	All to uncle.
Uncle by mother's side, and deceased uncle or aunt's child	All to uncle. *Child of deceased paternal uncle or aunt takes in exclusion of maternal uncle.
Two aunts, nephew, and niece	Equally to all. *Nephew and niece.
Uncle's or aunt's children, and brother's or sister's grandchildren	Equally to all. *Brother's or sister's grandchildren.
Nephew by brother, and nephew by half-sister ...	Equally *per capita* (see NOTE A). *All to nephew by brother.
Nephew by deceased brother, and nephews and nieces by deceased sister	Each in equal shares *per capita*, and not *per stirpes*. *The same, having regard to NOTE B.

NOTE A.—*Per capita*, that is, taking individually, and not by representation. Thus, if A. die leaving three brothers or sisters, they each take an equal part of his effects in his or her own right. But if either of them die, leaving children, his children would take his share *per stirpes*, that is *through him*, and not in their own rights.

NOTE B.—By English Law, brothers and sisters of the half blood, whether by the mother's or father's side, share equally with the whole blood. By the Scottish Law, brothers and sisters german (that is, by the same father and mother) and their issue take in exclusion of brothers and sisters consanguinean (that is, by the same father) and their issue. And brothers and sisters consanguinean and their issue take in exclusion of brothers and sisters uterine (that is, by the same mother) and their issue.

NOTE C.—Posthumous brothers and sisters take equally with those born in lifetime of father.

Intestates' Estates—Real Property.

(N.B.—Leaseholds are Personal Property.)

TABLE of Descent of Real Property in England on death of an intestate and also showing the persons entitled to administer personal estate. No illegitimate child is capable of inheriting real estate. Custom of Gavelkind (descent to all sons alike) still exists in Kent, and custom of Borough English (descent to youngest son) in divers ancient boroughs. Custom of London for Administration of Personal Estate abolished in 1856. Leaseholds are Personal Estate. The Dower (viz., widow's thirds) of widows married since 1833 is in the majority of cases barred by the purchase deed. Generally put in by Solicitors to avoid the inconvenience of dower attaching.

In each instance it is supposed that there are no nearer relations than those named.

The persons named within brackets are those who are entitled to administer.

If Intestate die, leaving	*Real Property would descend to—*
Wife only, no blood relations ...	One-third to wife for life, rest to Crown; copyholds to lord of manor. [*Wife.*]
Wife and child, or children, and children of a deceased child ...	One-third to wife for life; rest to eldest son or his issue. [*Wife.*] One-third to wife for life in any case. [*Wife.*] Rest to eldest son or his issue, such son and his issue, whether male or female, being preferred to any other son and his issue, and all sons and their issue, whether male or female, being preferred to all daughters and their issue, whether male or female. If no son, rest to daughters equally. [*Either daughter, or not exceeding three.*] If daughters and grandchildren (sons and daughters of deceased daughter) rest to daughters and eldest son of deceased daughter.
Wife and father.....	One-third to wife for life; rest to father, if deceased purchased same, or had it left him by will. [*Wife.*]
Wife and mother	One-third to wife for life; rest to mother, there being no heirs on father's side. [*Wife.*]

Wife, brother, or sister, and children of a deceased brother or sister	**One-third to wife for life in any case; rest to eldest brother or his issue.** (*See* above, "Rest to eldest son or his issue," under head "Wife and child," &c.) [*Wife.*] **Sister and children of deceased sister, rest equally between sister and nephew (eldest).** [*Ditto.*] **Sisters and nieces, only, children of deceased sister, rest equally between nieces.** [*Ditto.*]
Wife, mother, nephews, and nieces	**One-third to wife for life; rest to nephew (eldest), or nieces, if brother left no son.** [*Wife.*]
Wife, mother, brother, sisters, and nieces (children of deceased brothers and sisters)	**One-third to wife for life in any case; rest to eldest brother.** [*Wife.*] **Rest to nieces, equally, if children of elder brother deceased.**
No wife or child or issue of a deceased child	**Lineal ancestor paternal, males of whole blood first.** [*Father or grandfather, as case may be.*]
Children by one or more wives, and the issue of deceased children	**All to eldest son, or his issue.** (*See* above, "Rest to eldest son or his issue," under head "Wife and child," &c. [*Either sons or daughters, not exceeding three.*] **Daughters equally.**
Husband and child or children	**Husband for life; afterwards to only child or to eldest son or issue of a deceased eldest son.** [*Husband.*] **If all daughters, to them equally.**
Mother, but no wife, child, or issue of a child, father, brother, sister, nephew, or niece, or more distant descendants of father	**All to mother in default of lineal ancestors on the father's side, or issue of such ancestors.** [*Mother.*]
Mother, and brothers and sisters	**All to eldest brother.** [*Mother.*]
Mother and sisters	**All to sisters.** [*Mother.*]
Father, and brothers and sisters	**All to father.** [*Father.*]
Child and grandchild by deceased child	*See* above, "Rest to eldest son or his issue," under head "Wife and child," &c. [*Child.*]
Brother and grandfather	**All to brother.** [*Brother.*]
Brother's grandson, and brother or sister's daughter	**All to great-nephew, if eldest brother's grandson.** [*Niece.*] **All to brother's daughter if child of eldest brother.**
Brother and two aunts	**Brother, all.** [*Brother.*]
Brother and wife	**One-third to wife for life; rest to brother.** [*Wife.*]
Grandfather (no nearer)	**All to grandfather.** [*Grandfather.*]
Father's father, & mother's mother	**All to father's father.** [*Either, or both.*]
Grandmother & uncle, or aunt on father's side (no nearer)	**All to uncle or aunt.** [*Grandmother.*]
Uncle, and deceased uncle's child	**Uncle, unless deceased uncle was elder brother, when his child takes all.** [*Uncle.*]
Uncle by mother's side, and deceased uncle or aunt's child	**Child of deceased uncle on father's side, or (if none) child of deceased aunt on father's side.** [*Deceased uncle or aunt's children, not exceeding three.*]
Two aunts, nephew, and niece, children of deceased brother	**Nephew.** [*Two aunts.*]
Uncle or aunt's children, and brother's grandchildren through a son	**Eldest brother's grandson, or if granddaughters between them equally.** [*Either, not exceeding three.*]
Nephew by brother, and nephew by half-sister	**Nephew by brother.** [*Either, or both.*]
Nephew by deceased brother, and nephews and nieces by deceased sister	**All to eldest nephew, son of deceased brother.** [*To either of the nephews and nieces, not exceeding three.*]

INSTRUCTIONS FOR OBTAINING PROBATE OR ADMINISTRATION WITHOUT EMPLOYING A SOLICITOR.

The entrance to the office for personal applications is in the south-east corner of the Quadrangle of Somerset House, Strand, Room 37. The applicant should bring the registrar's certificate of the death of the deceased, or an official certificate of burial, and the will, if there be one, and full details of the property and debts of the deceased.

If there be no will, or no executor be appointed, or the executor will not act, two sureties must also attend and enter into a bond for the faithful administration of the estate, unless the whole personal estate does not exceed £50, or the husband is the applicant, when one surety only will be required.

The scale of probate duty as remodelled under the Finance Act of 1894, will be found in detail on page 431.

In no case can any correspondence be entered into; nor can an interview be given to any agent. The business of the department can be transacted only with the applicant in person.

Where the deceased resided within the district of one of the District Probate Registries (see page 359), application may be made at that registry instead of at Somerset House.

Where the whole real and personal estate, without the deduction of debts or funeral expenses, does not exceed £500, application may be made at one of the Inland Revenue Offices.

Where the deceased has left no will, and the whole personal estate does not exceed £100, and the widow resides at more than three miles from any Probate Registry, application may be made to the Registrar of the County Court.

In Almanacks previous to 1886 tables were given showing the Expectation of Life, and the numbers of survivors out of a given number of births at each successive year of life. Those tables were constructed by the late Dr. Farr, of the General Register Office, and were calculated on the death-rates of 1838-54; but since that time very important changes have occurred in the death-rates at different ages, and consequently new tables have been constructed by Dr. W. Ogle, who succeeded Dr. Farr, on the basis of the death-rates of 1871-80. The following table gives the results both of the older and the later calculations; the first two columns in the male and female parts, respectively, giving the survivors at each year of life out of a million born of the corresponding sex, by the older and the newer calculation; and the two other columns giving similarly the expectation of life at each year:—

AGE.	MALES.				FEMALES.				AGE.
	Of 1,000,000 Born, the Number Surviving at the end of each Year of Life.		Mean After-lifetime (Expectation of Life).		Of 1,000,000 Born, the Number Surviving at the end of each Year of Life.		Mean After-lifetime (Expectation of Life).

Up to the year 1858 the probate and safe custody of wills was entirely within the jurisdiction of the Ecclesiastical Courts. Complaints of the carelessness and insecurity to which the documents were exposed at the hands of sinecurists and absentee officials became very rife, culminating perhaps in the vigorous onslaught on the system which was made by Charles Dickens in "David Copperfield" and "Household Words." The result was the establishment throughout the country of forty District Registries. To find a will proved before 1st January, 1858, the date on which the Court of Probate Act, 1857 (20 & 21 Vict. c. 77), came into operation, it is best to search first—if the testator was a man of substance—the index to the wills proved in the Prerogative Court of Canterbury, which is kept at Somerset House. Failing this, the will is probably to be found in the registry of the district in which it was proved. The wills proved prior to 1858 were all distributed among the district registries when these institutions came into existence. This is the only broad rule which can be laid down to guide a searcher. To find a will proved since 1858 is a far simpler task. It must have been proved either at the Principal Registry at Somerset House, or in the registry of the district in which the testator lived. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, which is freely open to the public. In the latter case, the original will, proved in the District Registry, is there kept, but a copy is sent to and filed at Somerset House, and may there be seen. Any will may be read by anybody who is ready to pay a search fee of one shilling; but the reader may not copy any part of the will except the names and addresses of the executors, and the date and private number of the will. If he desires a copy, he can order one to be made, for which he will pay according to the length of the will, at the rate of sixpence a folio (ninety words) for an ordinary copy, and ninepence a folio for a certified copy, which, with a shilling stamp impressed thereon, can be produced and read in any court of law. The District Registries established by the Act of 1857 are the following:—

Districts.	*Registrar.*	*Registries.*
Northumberland...	H. E. Edwards	Newcastle-upon-Tyne.
Durham.....	Joshua Earles..	Durham.
Cumberland and Westmorland ...	Wm. C. Butler	Carlisle.
Yorkshire, West Riding	F. Kruckenberg	Wakefield.
" N. Riding " E. Riding, inc. York.	Henry Arthur Hudson	York.
Lancashire, except Salford and West Derby Hundreds.	J. C. Douglas-Willan	Lancaster.
Manchester and H. of Salford .	Oswald H. Hardy	Manchester.
West Derby Hund.	T. E. Paget ...	Liverpool.
Chester	G. Middleton...	Chester.
Carnarvon & Anglesey	H. B. Roberts	Bangor.
Flint, Denbigh, & Merioneth	J. P. Lewis ...	St. Asaph.
Derbyshire	C. T. E. Wilde	Derby.
Nottinghamshire..	W. G. Vincent	Nottingham.
Leicester and Rutlandshire	G. H. Nevinson	Leicester.
Lincolnshire.....	John Swan.....	Lincoln.
Salop and Montgomery	F. R. B. Walton	Shrewsbury.
Northants, N. Huntingdon, & Cambridge.....	Henry William Gates	Peterboro'.
Norfolk	G. R. Harman	Norwich.
Suffolk, East ..... Essex, North	B. P. Grimsby	Ipswich.
Suffolk, W.	C. Wodehouse	Bury St. Edmunds.
Bedford & South Northants	C. C. Becke ...	Northampton
Warwickshire	W. G. Middleton	Birmingham.
Staffordshire	G. A. Bridgeman Simpson	Lichfield.
Radnor, Brecknock, and Herefordshire.....	T. C. Paris	Hereford.
Cardigan, Carmarthen, and Pembroke	W. Morgan Griffiths	Carmarthen.
Glamorgan and Monmouthshire	Clemt. Waldron	Llandaff.
Worcestershire ...	H. A. Franklin	Worcester.
Gloucestershire, except Bristol.	Rose Fuller.....	Gloucester.
Bristol and Bath...	Wm. H. Clarke	Bristol.
Oxford, Berks, & Bucks	Thomas M. Davenport	Oxford.
Somerset, East, except the Bath C. C. District.	Langford Ellicott	Wells.
Somerset, West ...	E. T. Alms.....	Taunton.
Devonshire	W. H. Bailey...	Exeter.
Cornwall	W. H. Shadwell	Bodmin.
Wiltshire	H. Elliot Fox	Salisbury.
Dorsetshire	E. A. Smith ...	Blandford.
Hampshire	C. Wooldridge	Winchester.
Sussex, East.....	J. W. Heisch...	Lewes.
Sussex, West	Sir R. G. Raper	Chichester.
Kent, East	H. M. Chapman	Canterbury.

Depository for the Wills of Living Persons.—It is unfortunate for the success of this institution that its existence is so little known. It may be added that the formalities and expense attendant upon depositing a will in Somerset House for safe custody do little to recommend that safety to the public. Since 1857 this depository has been provided by the State under sect. 91 of the Act 20 & 21 Vict. c. 77; but the provision has been almost a dead letter, for in three recent years there were only seven, nine, and seventeen testators found to place their wills in Somerset House. This may be done through the Registrar of a District Registry, who will transmit the will to London in a registered letter on receiving a fee of 10s. for the deposit, of 2s. 6d. for entering a minute thereof, and 2s. for filing the affidavit which is required. A will once deposited will not be given up to anybody, but must remain in the registry until the testator dies, unless he goes to the registry with the original minute of deposit and other proof of his identity, and destroys his will in the presence of the Registrar.

Parliamentary Summary for 1896.

THE old parliamentary adage that big majorities are very unmalleable proved no misnomer for the newly elected Unionist party, for no sooner had the Session of 1896 begun to develop than there were unmistakable signs that the Government would have to take in their legislative sails. Then, too, it appeared at first that the South African cloud that had burst with the unwarranted incursion of Dr. Jameson and his friends into the Transvaal would cause the Ministry much trouble, but, thanks to Mr. Chamberlain's able engineering at the Colonial Office, anything approaching a crisis was averted.

The biggest stumbling-block for the Government was undoubtedly their new Education Bill. After having assured their supporters that they really meant to fight the measure, they surrendered in the Committee stage and withdrew the Bill. Considerable time was, however, devoted to the Agricultural Land Rating Bill, a measure which sprang out of the Budget proposals, and the Land Law (Ireland) Bill, which was another attempt to adjust the differences between landlord and tenant in Ireland. Needless to say, that this measure caused considerable friction between the Lords and Commons.

Turning to the legislative output of the Session, some useful work was accomplished, including provision for an increase in the Navy, the extension of dockyards and harbours of refuge at the cost of many millions, the construction of a Central African railway, the building of new public offices, the subsidizing of light railways in England, Ireland, and Scotland, in addition to measures amending the Coal Mines Regulation and the Truck Acts, and dealing with the conciliation of trade disputes, Scottish agricultural rates and public health in Ireland.

February 11.—Parliament opened by Royal Commission.

LORDS. The reply to the Address was moved by Lord Stanmore, and seconded by Lord Rosslyn. Lord Rosebery criticised the Foreign policy of the Government, and was replied to by Lord Salisbury. The Address agreed to.

COMMONS. Mr. G. J. Goschen moved, Sir J. Stirling Maxwell seconded the Address. Sir W. Harcourt, while congratulating Mr. Chamberlain on the way he had dealt with the Transvaal difficulty, condemned the action of the Government in regard to Armenia. Mr. A. J. Balfour warmly combated the attack made on the Foreign policy of the Government, which he said had been consistent with a desire to maintain friendly relations.

February 12.—Mr. Dillon moved an amendment to the Address on the subject of Home Rule. Mr. Gerald Balfour announced that the Government would have nothing to do with the subject.

February 13.—Mr. Dillon's amendment negatived by 276 votes to 160. Mr. Labouchere moved a further amendment referring to the Transvaal.

February 14.—Debate on Address continued by Sir W. Harcourt and Mr. A. J. Balfour.

February 17.—After the closure had been passed an amendment by Mr. Harrington with regard to the imprisoned dynamitards, was rejected by 279 votes to 117.

February 18.—The Address carried.

February 19.—The Coroner's (Ireland) Bill, the Boards of Conciliation Bill, and the Shops Early Closing Bill read a second time.

February 20.—Discussion on Mr. A. J. Balfour's motion for New Rules of Procedure in Supply.

LORDS. Criminal Cases Evidence Bill, read a second time.

February 21.—Discussion on Welsh Museum Grants. The appointment of Irish Land Commissioners debated.

February 24.—New Rules of Procedure in Supply further discussed: speeches by Sir W. Harcourt and Mr. Balfour.

LORDS. Criminal Cases Evidence Bill passed through Committee.

February 25.—Discussion on Welsh Intermediate Education.

COMMONS. Adjourned debate on New Rules.

February 26.—Mr. Clancy's Evicted Tenants (Ireland) Bill rejected on the second reading by 271 votes to 174.

February 27.—New Rules of Procedure in Supply agreed to by 202 votes to 65.

LORDS. Criminal Cases Evidence Bill read a third time and passed.

February 28.—The Licensing Acts Amendment Bill read a first time.

COMMONS. Supply. The Shops Early Closing Bill referred to the Standing Committee on Trade.

March 2.—Discussion on the Government's Naval Programme. The Light Railways Bill read a second time.

LORDS. The Poor Law Guardians Bill and the Local Government (Elections) Bill read a second time.

March 3.—COMMONS. Mr. Samuel Smith moved resolution of sympathy with the suffering Armenians; speeches by Sir E. Ashmead Bartlett, Lord Grey, Mr. Curzon, Mr. Bryce and others. The motion was carried.

March 5.—Discussion on Naval Estimates continued by Sir C. Dilke, Mr. Balfour, Sir W. Harcourt and others.

March 6.—Belfast Corporation Bill read a second time,

March 9.—Naval Estimates discussion continued by Mr. Dillon, Mr. Arnold Forster, Mr. Goschen and others.

March 10.—Resolution in favour of the Sunday opening of Museums passed.

March 11.—Benefices Bill read a second time.

March 12.—Supplementary Army Estimates passed. Further discussion on the Navy Estimates.

March 16.—Debate on the Government Policy in Egypt; speeches by Mr. Curzon, Sir W. Harcourt, Mr. Labouchere, Sir C. Dilke, Mr. Balfour, Mr. J. Morley and others. Army Estimates discussed.

March 17.—Debate on the rehabilitation of silver.

March 19.—The Naval Works Bill read a second time.

March 20.—Vote of Censure on the Nile expedition moved by Mr. J. Morley which, after discussion, was negatived by 288 votes to 145.

March 24.—London Water Bills negatived on second reading.

March 26.—Naval Works Bill in Committee.

March 27.—Supply: Votes for £2,133,000 for Warlike and other stores agreed to.

March 30.—Naval Works Bill read a third time.

April 9.—Commons. Supply: Civil Service Estimates.

April 10.—Vote for Post Office packet service agreed to, also votes for Royal Palaces and Parks after motions to reduce the same had been negatived.

April 13.—Mr. Gerald Balfour introduced the Irish Land Bill.

April 14.—Discussion on the London and North Western Railway Bill.

April 16.—Budget statement by the Chancellor of the Exchequer. He stated that the total Exchequer receipts for the year under review amounted to £101,974,000, which showed an increase of £7,290,000 over those of the previous year. The total expenditure amounted to £97,764,000. This left a surplus of £4,210,000, the largest surplus that had accrued for the last 50 years. The expenditure for the coming financial year was estimated at £100,047,000 and the receipts at £101,755,000 leaving an estimated surplus of £1,708,000.

April 17.—Irish estimates in Supply; Lord Lieutenants Household vote carried by 210 votes to 115.

April 20.—Mr. Chaplin moved the first reading of the Agricultural Rating Bill. Motion agreed to.

April 21.—Amendment to the Military Manœuvres Bill rejected by 245 to 127.

April 23.—Discussion on Income tax resolution by Sir H. Fowler, Sir M. Hicks-Beach and others. Resolution agreed to.

Lords. Locomotives on Highways Bill read a second time.

April 24.—Commons. Supply: Scotch Estimates.

April 27.—Mr. Balfour's motion for the priority of Government business carried, after considerable discussion, by 266 votes to 124.

April 28.—Debate on Sir H. Fowler's amendment on the second reading of the Agricultural Rating Bill resumed. Speeches by Mr. Lawson, Sir J. Pease, Mr. Verney, Mr. Long, and others. Report of Supply agreed to.

April 29.—Debate on Agricultural Rating Bill continued by Mr. Shaw, Mr. Whiteley, Mr. Labouchere and others.

April 30.—Debate on Sir H. Fowler's amendment on second reading of the Agricultural Land Rating Bill brought to a close. After speeches from Col. Milward, Mr. Chaplin, Sir W. Harcourt, negatived by 325 votes to 160. Second reading of the Bill carried by 333 to 156.

Lords. The Metropolitan Counties Water Board Bill read a second time.

May 1.—Lord Loch denied the statement made by the Paris *Temps* regarding his connection with the Johannesburg Reform Committee.

Commons. Supply: Legal votes discussed.

May 4.—Resolution relating to the vote for the salaries of the Crown Law Officers agreed to.

May 5.—Sir J. Gorst moved second reading of the Education Bill. Mr. Asquith moved an amendment.

May 6.—Amendment further discussed by Mr. Yoxall, Mr. Hubbard, Mr. Bryce, and others. Second reading of the Sale of Intoxicating Liquors on Sunday Bill.

May 7.—Adjourned debate on Education Bill amendment. Speeches by Sir C. Dilke, Sir W. Hart Dyke, Mr. Buxton, Sir G. Trevelyan, and others.

May 8.—Discussion on Colonial Office vote. Among others who spoke were Sir W. Harcourt, Mr. Chamberlain, Mr. Courtney, and Mr. Labouchere.

Lords. Lord Rosebery pressed for Blue-book on Armenian affairs.

May 11.—Divorce Amendment Bill and the Housing of the Working Classes Bill read a second time.

Commons. Debate on Mr. Asquith's amendment continued by Mr. Ellis, Mr. Mundella, Sir E. Clarke and others.

May 12.—Mr. Asquith's amendment to the Education Bill rejected by 423 votes to 156 after speeches from Col. Mellor, Mr. Acland, Sir J. Fergusson, Mr. Dillon, and Mr. Balfour. The bill read a second time.

May 13.—Motion to extend the operation of the Agricultural Land Rating Bill to Ireland negatived by 278 votes to 108.

May 14.—The House went into Committee on the Land Rating Bill. Several amendments negatived.

May 15.—Supply: Navy Estimates.

May 16, 17, 18, *and* 19.—Committee on the Land Rating Bill.

May 18.—Lords. The Metropolitan Counties Water Board Bill passed through Committee.

May 19.—The Divorce Amendment Bill, and the Locomotives on Highways Bill passed through Committee.

May 22.—Commons. Clause IV. to IX. inclusive of the Land Rating Bill agreed to, and the Bill reported to the House, after a continuous sitting of twenty-two and a half hours.

June 1.—Commons. Light Railways Bill in Committee. The Parliamentary Franchise Bill withdrawn.

June 2.—Derby Day adjournment negatived by 199 votes to 58. Resolution relating to a Guarantee for the West Highland Railway agreed to by 168 votes to 43.

June 3.—The Benefices Bill discussed in Committee.

June 4.—Light Railways Bill further discussed.

June 5.—Sir W. Harcourt interrogated the Government on their policy in the Soudan.

June 8.—Mr. Gerald Balfour moved the second reading of the Irish Land Bill. A debate followed in which Mr. J. Morley, Mr. T. Healy, Mr. Redmond and others took part, and the motion was agreed to.

June 9.—Supply: Discussion of the Irish Constabulary vote. Motion for the reduction of the vote rejected by 156 votes to 70.

June 10.—Amendments to the Benefices Bill discussed.

June 11.—Education Bill in Committee. Motion to postpone Clause I. negatived by 262 votes to 121. An amendment providing that the District Council, and not the County Council, should be the Education Authority rejected by 298 votes to 125. Another, providing that every Municipal Borough should appoint an Education Committee for the purpose of the Act, after being further amended, carried by 332 to 83.

Lords. The Housing of the Working Classes (Ireland) Bill read a second time.

June 12.—Lord Salisbury made a statement on the Government's Policy with regard to the Soudan.

Commons. Discussion on the Irish Land Bill.

June 15, 16, *and* 17.—Commons. The Education Bill in Committee.

June 19.—Supply: Army Estimates votes for the Army Medical Establishment, allowances for Militia, Yeomanry and Volunteers passed.

June 22.—The Education Bill withdrawn.

LORDS. Marriage with a Deceased Wife's Sister Bill read a second time by 142 votes to 113.

June 23—The Divorce Amendment Bill read a third time and passed.

COMMONS. Agricultural Rating Bill discussed in Committee.

June 24, *and* 25.—Agricultural Rating Bill in Committee.

June 26.—Naval Estimates discussed in Committee on Supply.

June 29.—All-night sitting of the House. Agricultural Land Bill discussed. Clauses 4 and 5 agreed to. The West Highland Railway Bill read a second time. Debate on the second reading of the Conciliation Bill, which was carried by 155 votes to 5. The House adjourned at 11.35, June 30.

LORDS. Marriage with a Deceased Wife's Sister Bill passed through Committee.

July 1.—COMMONS. The Agricultural Land Rating Bill read a third time after Mr. Asquith's motion for its rejection had been defeated by 291 votes to 140.

July 2.—A resolution to make provision for the construction of a railway from Mombasa to the Victoria Nyanza agreed to.

LORDS. The Agricultural Land Rating Bill read a first time.

July 3.—COMMONS. The Irish Education Bill withdrawn. Supply: Foreign Office votes discussed.

July 6.—Lord G. Hamilton moved that the costs of Indian troops in Egypt for the Nile Expedition be charged to India, to which Mr. J. Morley moved an amendment. After discussion, the amendment was negatived by 275 votes to 190, and the original resolution carried by 253 votes to 106.

July 7 *and* 8.—The Finance Bill in Committee.

July 9.—Finance Bill reported to the House.

LORDS. Agricultural Land Rating Bill read a second time by 153 votes to 32 after a discussion in which Lord Farrer, Lord Salisbury and Lord Rosebery, took part.

July 10.—Third Reading of the Marriage with a Deceased Wife's Sister Bill carried by 142 votes to 104.

COMMONS. Committee of Supply. Education votes agreed to.

July 13 *and* 14. Debate on the Agricultural Rates, Congested Districts, and Burgh Tax Relief (Scotland) Bill.

July 14.—LORDS. Agricultural Land Rating Bill passed through Committee without amendment.

July 15.—COMMONS. Sir W. Harcourt moved the adjournment of the House to call attention to ministerial policy. Mr. Chamberlain replied.

July 16.—Land Law Ireland Bill in Committee.

LORDS. Lord Onslow moved a resolution with regard to the payment of Indian troops in Egypt. Among others who joined in the discussion were Lord Lansdowne, Lord Kimberley, and Lord Salisbury. The resolution was carried.

July 17.—Lord Salisbury presented the papers relating to the question of arbitration between Gt. Britain and the United States. Agricultural Land Rating Bill read a third time.

COMMONS. Irish Estimates discussed in Supply.

July 20 *to* 23.—Irish Land Law Bill debated.

July 24.—Supply: National Education vote agreed to.

July 27.—The Uganda Railway Bill read a second time. The Conciliation (Trade Dispute) Bill, and of Coal Mines Regulation Act (1887) Amendment Bill read a third time.

July 29.—The Land Law Ireland Bill read a third time.

July 30.—On the motion of Mr. Chamberlain it was agreed that a select Committee should be appointed to inquire into the Administration of the British South Africa Company.

August 1.—The Uganda Railway Bill read a third time.

August 6.—The Scotch Congested Districts and Burgh Land Tax Relief Bill read a third time.

August 7.—LORDS. Discussions in Committee on the Irish Land Law Bill.

August 10.—Land Law Ireland Bill read a third time.

August 11.—COMMONS. Resolution relating to the vote for the Island of Cyprus carried after discussion by 142 votes to 38. The Select Committee on the British South Africa Company nominated.

August 12.—The Lords' amendments to Land Law Ireland Bill considered. After considerable discussion a Committee was appointed to draw up reasons for disagreeing with the Lords' amendments.

August 13. Indian Budget agreed to. The Lords' amendments to the Commons' amendments to the Land Law Ireland Bill agreed to.

LORDS. Discussion of the Commons' amendments to the Lords' amendments to the Land Law Ireland Bill.

August 14.—Parliament Prorogued.

THE FIRST DAY OF THE YEAR.

Readers of Parish Registers and other ancient documents are sometimes puzzled by the dates, and especially by the apparent discrepancies in the time when the year commenced. It began:—

7th to 14th Centuries, at Christmas.
12th Century, by the Church, on March 25.
14th Century, by Civilians, same time.

In 1752 the New Style was introduced; Sept. 3 becoming Sept. 14, and the year dating from Jan. 1. Previous to this two dates were used, one for the civil year, and the other for the historical; the former commenced March 25, and the latter Jan. 1; thus we find the same event with two dates, *e.g.*, Feb. 20, 1681-2. Another change was made in the calendar by the same Act, 24 Geo. II. c. 23; the day after September 2nd was accounted the *fourteenth*, hence the difference between Old and New Michaelmas and other days.

TABLE OF THE STATUTES

Passed in the Second Session of the Twenty-Sixth Parliament of the United Kingdom of Great Britain and Ireland (59 & 60 Vict. A.D. 1896).

1. An Act to continue temporarily certain powers for the removal of difficulties at elections under the Local Government Act, 1894.
2. An Act to provide, during twelve months, for the discipline and regulation of the Army.
3. An Act to apply certain sums out of the Consolidated Fund to the service of the years ending on the 31st day of March, 1896 and 1897.
4. An Act to prevent certain disqualifications for elections to Parish Councils of 1896.
5. An Act to enable women to be elected and act as Poor Law Guardians in Ireland.
6. An Act to make provision for the construction of works in the United Kingdom and elsewhere for the purpose of the Royal Navy.
7. An Act to apply a sum out of the Consolidated Fund to the service of the year ending on the 31st day of March, 1897.
8. An Act to enable life assurance companies to pay money into court in certain cases.
9. An Act to amend certain provisions of the Local Government Act, 1888, with respect to the determination of differences by the Local Government Board.
10. An Act to amend the law relating to the appointment of members of dispensary committees in Ireland.
11. An Act to remove certain doubts with respect to the Housing of the Working Classes Act, 1890, so far as it applies to Ireland.
12. An Act for the better reporting of floating derelicts.
13. An Act to extend the time for the repayment of loans granted by Queen Anne's Bounty to incumbents of benefices.
14. An Act to facilitate the citation of sundry Acts of Parliament.
15. An Act to amend the Diseases of Animals Act, 1894.
16. An Act to amend the law with respect to the rating of occupiers of agricultural land in England, and for other purposes connected therewith.
17. An Act to redescribe the Parliamentary divisions of the city of Glasgow.
18. An Act to amend the Fisheries Acts relating to Norfolk and Suffolk.
19. An Act to make further provision with respect to epidemic, endemic, and infectious diseases, and to repeal the Acts relating to quarantine.
20. An Act to amend the Public Health Act with respect to the powers of port sanitary authorities.
21. An Act to amend the procedure of the Liverpool Court of Passage.
22. An Act to exempt certain chairmen of District Councils who have already taken the oath from again taking the oath before acting as Justices of the Peace.
23. An Act for the acquisition of a site for public offices in Westminster, and for purposes connected therewith.
24. An Act for the acquisition of property for the extension of the general register house at Edinburgh.
25. An Act to consolidate the law relating to friendly and other societies.
26. An Act to consolidate the enactments relating to friendly societies and industrial assurance companies which receive contributions and premiums by means of collectors.
27. An Act to amend the law relating to cabs in London.
28. An Act to grant certain duties of customs and inland revenue, to alter other duties, to amend the law relating to customs and inland revenue, and to make provision for the financial arrangements of the year.
29. An Act to amend the Bishopric of Bristol Act, 1884.
30. An Act to make better provision for the prevention and settlement of trade disputes.
31. An Act to amend the Housing of the Working Classes Act, 1890.
32. An Act to facilitate the construction of small piers and harbours in the counties of Orkney and Zetland.
33. An Act to amend the laws with respect to the Royal Naval Volunteers.
34. An Act to facilitate the construction of railways and the establishment of other means of communication in Ireland, and for other purposes incidental thereto.
35. An Act to provide for the appointment of judicial trustees and otherwise to amend the law respecting the administration of trusts and the liability of trustees.
36. An Act to amend the law with respect to the use of locomotives on highways.
37. An Act to amend the law with respect to the classification of lands and heritages for purposes of rating in Scotland, for the relief of the occupiers of agricultural lands and heritages, for the creation of a fund for the improvement of congested districts in the Highlands and Islands, and for relief from the payment of the land tax in burghs in Scotland.
38. An Act to make provision for the construction of a railway in Africa, from Mombasa to the Victoria Nyanza, through the Protectorates of Zanzibar, British East Africa, and Uganda.
39. An Act to continue various expiring laws.
40. An Act to provide for raising further money for the purpose of the Telegraph Acts, 1863 to 1892.
41. An Act for paying to the Local Taxation (Ireland) Account a share of the Estate Duty.
42. An Act to grant moneys for the purpose of certain local loans, and for other purposes relating to local loans.
43. An Act to amend the Coal Mines Regulation Act, 1887.
44. An Act to amend the Truck Acts.
45. An Act for abolishing the Court of the Vice-Warden of the Stannaries.

46. An Act to apply a sum out of the Consolidated Fund to the service of the year ending on the 31st day of March, 1897, and to appropriate the supplies granted in this session of Parliament.

47. An Act to further amend the law relating to the occupation and ownership of land in Ireland, and for other purposes relating thereto.

48. An Act to facilitate the construction of light railways in Great Britain.

49. An Act to amend the law relating to law agents and notaries public practising in Scotland.

50. An Act to provide for superannuation allowances to poor law officers and servants, and for contributions towards such allowances by such officers and servants; and to make other relative provisions.

51. An Act to prevent abuse of the process of the High Court or other Courts by the institution of vexatious legal proceedings.

52. An Act to amend the law with respect to the jurisdiction exerciseable in cases relating to the receipt or possession of stolen property.

53. An Act to amend the Labourers (Ireland) Acts, 1883 to 1892.

54. An Act to amend the Acts relating to Public Health in Ireland.

55. An Act to make provisions relating to the offices of chairman and deputy chairman of the Court of Quarter Sessions for the county of London.

56. An Act to amend the Wild Birds Protection Acts.

57. An Act to provide for the trial of burglaries by Courts of Quarter Sessions.

58. An Act for authorising the Treasury to guarantee the interest on certain capital of the West Highland Railway Company, and pay a sum of money to that company.

59. An Act to amend the Baths and Washhouses Acts.

PARLIAMENTS SINCE 1801.

Remarkable Occurrences, &c., 1895–1896.

DECEMBER, 1895.

Bank rate 2 per cent.

4. The Sultan requested the Powers (England excepted) not to press their demand for an additional guard-boat in the Bosphorus. This demand had been formulated in view of possible disturbance.

5. The Powers would not entertain the Sultan's proposal.

6. Said Pacha declined office, and fearing the Sultan's wrath, took refuge at the British Embassy in Constantinople.

— The Government of the Congo Free State offered to indemnify Mr. Stokes's representatives for the "irregular conduct" of Captain Lothaire. Mr. Stokes was hanged by Capt. Lothaire after a mock trial in Feb., 1895.

— After much deliberation, a plan for the unification of the Argentine debt was rejected by the senate.

7. Southampton election petition resulted in the unseating of Mr. Tankerville Chamberlayne (*C.*).

— An expository despatch on the points at issue between this country and Venezuela received by Mr. Secretary Olney from Lord Salisbury.

7. After a determined struggle against overwhelming odds the Italian force was annihilated by King Menelek's army at Ambalagi, Abyssinia.

8. The special service corps of picked men from several regiments embarked for Cape Coast Castle.

9. An ultimatum with reference to the outrage on a British outpost in British Guiana presented to the Venezuelan Government.

10. The Sultan permitted the entry of an additional guard-ship from each of the Powers into the Bosphorus.

— Mr. Bayard, the United States Ambassador, was severely censured in the House of Representatives for certain utterances in a speech at Boston on Democracy with reference to the U.S.A.

— Gungunhana, an African chieftain, against whom Portugal was undertaking an expedition, appealed to Mr. Cecil Rhodes for aid, which, however, was refused.

— Lord James of Hereford presided at a Conference between representatives of employers and operatives concerned in the Belfast and Glasgow lock-out.

11. The *Cumbrae* run down by the liner *Germanic* at the mouth of the Mersey.

13. Sir Francis Scott and staff arrived at Cape Coast Castle.

— As a sequel to the cessation of hostilities in Madagascar, a raid was made on the Friends Mission Station at Ramaindaro by a semi-civilized horde of Malagasy.

14. Birth of a second son to the Duke and Duchess of York.

— Belfast and Glasgow operatives rejected proposed arrangements of 10th inst.

17. President Cleveland in a message to Congress threatened the British Government with war if they attempted to force their proposals on the Venezuelan Government.

— In spite of the severe reverse of 7th January, the Italian Government granted a liberal credit for the conduct of the Abyssinian campaign.

18. In accordance with the recommendation of President Cleveland, the House of Representatives appropriated a sum of money for a United States Commission to arbitrate between Great Britain and Venezuela.

19. Lichfield Election petition resulted in the unseating of Mr. Fulford (*L.*).

— In the United States Senate a debate was opened on the Commission Bill, and the war feeling, which had been extreme, showed signs of subsidence.

20. The Commission Bill adopted.

21. Owing to the "war scare," which had arisen from President Cleveland's message to Congress, American securities generally showed a fall estimated at £200,000,000.

— Victory of the Spanish arms over the insurgents at Matanzas, Cuba.

23. Sir Augustus W. L. Hemming appointed governor of British Guiana.

24. While endeavouring to rescue the passengers of a vessel in distress, the Kingston lifeboat capsized and 17 lives were lost.

26. As an antidote to the financial depression, a new Tariff Bill was sanctioned by the American House of Representatives.

— The Roman Catholic Schools question between the Dominion Government and Manitoba reached a definite climax.

27. A manifesto issued by the "Transvaal National Union" setting forth under ten heads the desired political reforms.

28. Appeal sent by the Transvaal Uitlanders to Dr. Jameson, Administrator of the Chartered Company, demanding protection of women and children in Johannesburg in view of possible contingencies.

29. "Dr. Jameson's Ride" from Mafeking across the Transvaal frontier. Mr. Chamberlain on receipt of intelligence ordered the High Commissioner of the Cape and the British Agent at Pretoria to prevent bloodshed if possible.

Consols, highest, 107⅝; lowest, 105⅝.

JANUARY, 1896.

1. Defeat of Dr. Jameson and Chartered troops at Krügersdorp, Transvaal.

— Publication of the New Year's honours, Mr. Austin being appointed Poet Laureate, and peerages being conferred upon (the late) Sir Frederick Leighton, P.R.A., and Mr. Henry Hucks-Gibbs.

— President Cleveland definitely constituted his Venezuelan Boundary Commission.

— The first day of celebrations in Hungary of the millennial anniversary of establishment of Magyar nation.

2. The German Emperor sent to President Kruger a telegraphic congratulation on the defeat of Jameson. This caused a very strong feeling of indignation throughout Great Britain and the Colonies.

— Women admitted to diplomas of Royal College of Surgeons.

6. In consequence of certain untoward rumours, Mr. Rhodes resigned the premiership of Cape Colony and was succeeded by Sir J. Gordon Sprigg.

7. A "Flying Squadron" commissioned by the Admiralty, at brief notice, for use in case of necessity.

— President Kruger delivered Dr. Jameson into the custody of the High Commissioner of the Cape.

9. The Queen expressed her approval of President Kruger's conduct, and the latter issued a general proclamation of amnesty to the people of the Transvaal.

12. Demonstration of patriotism by the governments of Australia and Tasmania, New Zealand subsequently joining them, in a telegram to the Home Government.

14, 15. Meetings in favour of International Arbitration at Sion College and International Arbitration League. Mr. Hazell, M.P., Mr. Stead, and Canon Wilberforce were the principal promoters.

15. Settlement of the Anglo-French difficulty with regard to Mekong boundary (see p. 471).

— Autograph letter from the Queen to the Sultan requesting a special effort in respect of the Armenian difficulty.

18. The British Expedition occupied Kumassi, Ashanti, without bloodshed, and received King Prempeh's submission.

20. Prince Henry of Battenberg succumbed, on board H.M.S. *Blonde*, to the effects of fever contracted on the march with the British forces in the Ashanti Expedition.

21. The shipbuilding dispute on the Clyde was settled, and on 25th the Belfast strikers also agreed to resume work.

22. At this date several signs had appeared of the unpopularity in the U.S.A. of President Cleveland's message to Congress.

23. Madagascar declared a French possession.

25. Marshal Campos definitely regarded as superseded in his Cuban command, and his successor, General Weyler, sailed to assume office.

27. Disastrous colliery explosion in South Wales: over 55 lives lost.

31. As a sequel to the *Valkyrie-Defender* yacht race, Lord Dunraven visited New York to give evidence in support of his statements before a commission. The statements, however, proved to be unfounded.

Consols, highest, 108⅛; lowest, 105⅛.

FEBRUARY.

1. The commission appointed to enquire into affairs connected with "Dr. Jameson's Ride" left Southampton for South Africa.

3. Funeral of Sir Frederic (Lord) Leighton, President of the Royal Academy, at St. Paul's.

4. Funeral of H.R.H. Prince Henry of Battenberg at Whippingham, I. of Wight.

— Mr. Cecil Rhodes, ex-premier of the Cape Colony, arrived at Plymouth.

5. Issue of the new American 4 per cent. loan.

6. Mr. Cecil Rhodes was accorded an interview by Mr. Chamberlain, the Colonial Secretary.

10. Mr. Cecil Rhodes left England for South Africa.

11. The second session of Her Majesty's parliament opened by Royal Commission.

— H.R.H. the Duke of York opened the new building of the Church House, Dean's Yard, S.W.

12. Official books published by the British and German Governments relative to the recent disturbances in the Transvaal.

13. A report current in London that Dr. Nansen had succeeded in reaching the North Pole.

14. Prince Boris of Bulgaria was converted to the Orthodox faith amid great rejoicings at Sofia and throughout the country.

17. Dr. Leyds, Secretary of State for the Transvaal, left Berlin for Holland after a somewhat mystifying visit.

18. Mr. John Dillon elected chairman of the Irish (Anti-Parnellite) Party in place of Mr. Justin McCarthy, resigned.

19. Terrible dynamite explosion at a railway terminus in Johannesburg; 300 persons killed and injured.

20. Sir John Everett Millais, Bart., elected President of the Royal Academy in place of the late Sir Frederick (Lord) Leighton.

21. Announcement of the Presidential election in the Orange Free State. Judge M. T. Steyn succeeding Mr. F. W. Reitz, resigned.

23. Dr. Jameson, with Sir John Willoughby and other officers of the force engaged in the Transvaal difficulty, arrived at Plymouth, and to avoid demonstrations, conveyed secretly to London.

25. Dr. Jameson and his officers remanded by Sir John Bridge at Bow Street.

29. The United States Legation at Madrid was placed under armed protection against a mob which had been roused by denunciations of Spain and Spaniards by a senator in America, and by the friendliness exhibited by that country to the insurgents in Cuba.

Consols, highest, 110; lowest, 107⅞.

MARCH.

1. Overwhelming defeat of the Italian General Baratieri's forces at Adowa by the forces of King Menelek of Abyssinia; this defeat, following as it did the disaster of Ambalagi, led to the resignation of the Crispi cabinet, and to the subsequent treaty of peace of 26th October.

2. The American House of Representatives passed a resolution in favour of recognising the Cuban insurgents as belligerents: this was received in Spain with great demonstrations of anger and remonstrance.

4. Judge M. T. Steyn assumed office as President of the Orange Free State.

10. Formation of new Italian Ministry with Marquis di Rudini as premier; pledged to withdrawal at a favourable moment from Abyssinia.

16. Detachments of Egyptian troops ordered to Wady Halfa, partly in consequence of the Italian defeat at Adowa and the accompanying loss of prestige which had fallen upon European arms in North East Africa.

20. Resolutions censuring Mr. Bayard, the American Ambassador, for speeches uttered in England, passed by the House of Representatives.

26. Revolt of the Matabele at a favourable opportunity owing to the absence of Dr. Jameson and his forces from the country.

28. M. Berthelot, the French Minister for Foreign Affairs, resigned his position in the Bourgeois Cabinet.

— The 53rd annual boat race won by Oxford, after a very exciting finish, by less than half a length.

Consols, highest, 110; lowest, 108⅜.

APRIL.

3. Egypt: Successful operations against the Dervishes, 800 killed at Kassala.

4. The new National Portrait Gallery opened in St. Martin's Lane.

5. Opening of the International Athletic contests in the Stadium at Athens.

7. The new Royal Observatory opened at Edinburgh.

11. The Canadian House of Commons rose from a 129 hours' continuous sitting.

15. The Behring Sea Treaty ratified by the United States.

20. An International Bimetallic Congress assembled in Brussels.

22. Resignation of the Bourgeois Cabinet.

— The leaders of the Reform Committee pleaded guilty to the charge of high treason, and four of them were condemned to death on the 26th. An announcement was made two days later that the sentences had been commuted owing to pressure from England, and on May 18, the period of 15 years' imprisonment was inflicted instead of capital punishment. On June 11, this was further mitigated, and President Krüger released from prison all who would accept the terms offered them.

30. The Transvaal government published certain cipher telegrams in connection with the Jameson raid which caused a great stir throughout Europe and South Africa.

Consols, highest, 113⅞; lowest, 109⅝.

MAY.

1. Assassination of Nasir-ed Din, K.C., the Shah of Persia.

— Defeat of the Dervishes by Egyptian forces near Akasheh, the primary objective of the expedition.

2. The 1000th anniversary of the Kingdom of Hungary celebrated by the opening of a millennial exhibition at Buda-Pesth.

6. Herr Strobach elected Burgomaster of Vienna, thus ending the difficulty caused by the repeated election of Dr. Lueger.

9. The rebel Matabele defeated by British colonial forces at Gwelo.

11. Sir Jacobus de Wet, the British Agent-General at Pretoria, resigned his position owing to the growth of opinion that he had not done as much as he should to prevent the Jameson raid.

16. Suicide of one of the "Reform movement" prisoners in Pretoria prison.

19. Death of the Archduke Karl Ludwig, the heir presumptive to the Austro-Hungarian thrones.

20. The birthday honours published; Professor Max Müller being made a Privy Councillor, and Mr. Heneage and Colonel Malcolm, C.B., being raised to the peerage.

26. Coronation of the Czar and Czarina of Russia at the Kremlin, Moscow,

26. Mr. Rhodes resigned his position as director of the British South Africa Company.

29. A Parliamentary committee of enquiry into the Jameson affair nominated by the Speaker of the Cape Assembly.

30. Terrible disaster at Moscow; nearly 2,000 persons crushed to death in a scramble for gifts of food after the coronation festivities.

Consols, highest, 113⅛; lowest, 110⅝.

JUNE.

1. Publication of a letter from Mr. Gladstone regarding the validity of Anglican Orders.

2. Bye-elections in Frome; Mr. Barlow (*L*) elected with a majority of 299; and in Wick Burghs; where Mr. Hedderwick (*L*) received a majority of 212, both returns being gains to the Liberal party.

3. H.R.H. the Prince of Wales won the Derby with *Persimmon*.

6. Rebel Matabele received a severe check near Buluwayo.

— Serious Mussulman-Christian disturbances reported from Crete.

7. After exceptionally heavy work the British-Egyptian forces defeated the Dervishes and captured Ferkeh.

— Anarchist outrage on a Religious procession at Barcelona, several people killed by a bomb.

8. The advance made from the Reserve fund by the Egyptian Government for expenses incurred by the Nile expedition was ordered to be repaid by a decision of the Mixed Tribunal at Cairo.

9. Opening of the Congress of Chambers of Commerce of the British Empire at Grocers' Hall.

10. Dr. Jameson and his officers surrendered at Bow Street for judicial enquiry into the charges under the Foreign Enlistment Act.

15. Li Hung Chang, in his trip round the world, was received by the German Emperor.

— Mr. Harrison, an official of the British Guiana Government arrested by the Venezuelans.

— Dr. Jameson and his officers committed for trial.

— Celebration of Lord Kelvin's jubilee in connection with Glasgow University.

16. The Castle Liner *Drummond Castle* struck a rock off the island of Molène near Brittany and foundered in a few minutes, only one passenger (Mr. Macquardt) and two of the crew being saved.

17. Official condemnation by the Porte of the disturbances in Crete.

— Report of an earthquake and tidal wave in Japan on 15th, by which no less than 27,990 lives were lost, besides injury to 23,000 others and the destruction of over 7,000 houses.

20. A marble statue of the Queen unveiled in the quadrangle of the Royal Exchange.

— France declared Madagascar to be a French "Colony."

22. Death of Sir Augustus Harris, the noted theatrical organiser, to whom the existence in this country of first-class opera is entirely owed.

23. Many outrages reported from Van on Armenians and reprisals by the latter.

— The jury found a true bill against Dr. Jameson and his officers.

25. Li Hung Chang received by Prince Bismarck.

26. H.R.H. the Prince of Wales installed as Chancellor of the new University of Wales and conferred degrees upon the Princess, Lord Herschell, Lord Spencer, and Mr. Gladstone.

Consols, highest, 113⅞; lowest, 112¼.

JULY.

1. Lord George Hamilton opened the Indian Institution at Oxford.

7. At Henley Regatta the Leander eight defeated the Yale University crew in the first heat for the Grand.

8. The Ancient and Honourable Artillery Company of Boston, U.S.A., received and reviewed by the Queen at Windsor.

10. Mr. W. J. Bryan of Nebraska, after an impressive speech on the currency question, unanimously elected by the Democrats of Chicago as their candidate for the Presidency.

13. The New Canadian ministry, with Mr. Laurier as Premier, took the oath of allegiance.

14. Li Hung Chang received by President Faure.

17. The Anglo-American correspondence concerning Arbitration generally, and Venezuela in particular, laid upon the table in the Lords.

18. Mr. Alfred Austin, Poet Laureate, unveiled a statue of Robert Burns at Irvine, N.B.

20. Commencement of the Trial at Bar of Dr. Jameson and his officers.

21. On this day, the second of Her Majesty's 60th regnal year, H.R.H. the Duke of Cambridge unveiled a statue of the Queen near Blackfriars Bridge.

22. Marriage of Princess Maud of Wales and Prince Charles of Denmark at Buckingham Palace.

23. Total loss of the German gunboat *Iltis* off the coast of China, the whole crew going down with three cheers for the Emperor on their tongues.

28. Dr. Jameson and his officers sentenced to varying terms of imprisonment without hard labour, to be subsequently treated as first-class misdemeanants.

Consols, highest, 113⅞; lowest, 113¼.

AUGUST.

3. Great failure at Chicago, U.S.A., of Moore Brothers.

4. Li Hung Chang received by Lord Salisbury.

5. The Queen received Li Hung Chang in audience at Osborne.

6. Major Lothaire of the Congo Free State finally acquitted of the murder of Mr. Stokes in February, 1895.

8. Li Hung Chang celebrated his friendship with General Gordon by placing a wreath on the statue in Trafalgar Square.

13. Dr. Nansen, the Polar explorer, arrived at Vardö, Norway, after having left his ship, the *Fram*, on March 14, 1895. (See "Geographical Progress," page 582.)

15. Lord Salisbury installed as Lord Warden of the Cinque Ports.

— Mr. Gladstone received a visit from Li Hung Chang.

18. Unfortunate accident at Cowes; Baron von Zedlwitz killed on his yacht by the bowsprit of the German Emperor's yacht *Meteor*.

22. Major Coventry, one of the "Jameson raiders," released from Holloway Gaol owing to failure of health.

— Mr. Rhodes and others had a conference with the chief Indunas of the rebels in the Matoppo Hills.

25. Death of the Sultan Hamid bin Thwain of Zanzibar and seizure of the palace by Sidi Bargash in opposition to the advice of the British representatives at Zanzibar.

26. Mr. William Conynghame Green appointed British Agent in the Transvaal Republic in place of Sir Jacobus de Wet, who resigned in consequence of the Jameson incident.

27. The Emperor and Empress of Russia arrived at Vienna on their European tour.

— The usurping Sultan Sidi Bargash, having refused to obey the ultimatum sent by Admiral Rawson, the Commander of the African squadron, was bombarded in the palace at Zanzibar and fled for refuge into the German Consulate, whence he was subsequently taken by a German warship to the mainland.

Consols, highest, 113⅛; lowest, 112½.

SEPTEMBER.

1. Convention of the Irish race held at Dublin.

5. The *Windward*, which had carried the Jackson-Harmsworth polar expedition, arrived in the Thames.

— A scheme for the settlement of the schools difficulty in Manitoba was received and approved by the Provincial Council.

6. Major Watts, acting on his own initiative, tried the chief M'Koni by court-martial and had him shot when condemned.

9. Dr. Nansen arrived at Christiania amid much enthusiastic rejoicing, and was received by King Oscar.

— Mr. Bryan, the "Boy Orator," after a brilliant speech, was elected by the National Silver Party as candidate for the Presidency of the United States.

10. Bank Rate raised to 2½ per cent.

11. Georgi Pacha, a Christian, was appointed Governor-General of Crete by the Porte.

14. Tynan, the "No. 1" of the Phœnix Park murders, and the head-piece of a new dynamite conspiracy, was arrested at Boulogne, his colleagues Kearney and Haines being arrested at Rotterdam, and Bell at Glasgow.

15. The officers of the British Army who were connected with Jameson's raid were retired from the service without being cashiered.

— Mr. Tom Mann was prevented from instigating a strike among the seamen and dock-labourers at Hamburg, and requested to leave the port at once.

22. The Emperor and Empress of Russia arrived at Leith on their way to visit Queen Victoria at Balmoral.

23. This date marks the longest reign in the history of this country, but no official celebrations were held.

— The Egyptian expeditionary force entered Dongola, and thence telegraphed a congratulatory message to Queen Victoria on passing the limit of all former reigns.

24. Mr. Gladstone inveighed against the "Great Assassin who sits on the throne of Turkey," and attempted to rouse the country, and the government, to independent and isolated action on behalf of the Armenians.

— Colonel Sir H. H. Kitchener, the Sirdar of the Egyptian army, and Commander-in-Chief during the brilliant expedition to Dongola, was promoted to be a Major-General in the army.

— Bank Rate raised to 3 per cent.

27. The Iron Gates Canal on the Danube, which render a hitherto dangerous tract of the Danube quite navigable, opened by the Emperor-King of Austria-Hungary, and the King of Roumania.

29. Mr. Alderman Faudel Phillips elected Lord Mayor of London in succession to Sir Walter Wilkin.

— Complimentary banquet at Cambridge to Prince Ranjitsinghi, the cricketer.

30. At Paris was signed a treaty between France and Italy relative to the protectorate of Tunis.

— Fatal fire at the People's Palace, Aberdeen; several lives lost.

Consols, highest, 112⅞; lowest, 109⅛.

OCTOBER.

2. Fatal explosion of a powder-magazine at Buluwayo; many people killed.

3. The Emperor and Empress of Russia left Balmoral for Portsmouth *en route* to Cherbourg.

— Kearney and Haines, two of Tynan's accomplices, conducted by the Netherlands police to a steamer sailing for New York.

— The Emperor and Empress of Russia left Portsmouth under naval escort, and were met in mid-channel by a French fleet, which conducted them to Cherbourg.

6. An enthusiastic reception by the inhabitants of Paris was accorded to their Russian Majesties.

— Terrible fire at Guayaquil, Ecuador, causing damage estimated at £6,000,000.

7. The Czar Nicholas II. laid the foundation stone of the Alexander III. Bridge over the Seine.

— Disastrous gales and floods on the British and Irish coasts.

8. Lord Rosebery resigned the leadership of the Liberal party.

9. Lord Rosebery addressed a great political meeting at Edinburgh, and protested strongly against any idea of Great Britain's isolated intervention in the Eastern Question.

— Great review of the French army by the Emperor of Russia at Châlons: the Emperor subsequently left for Darmstadt, the native town of the Empress (Princess Alix of Hesse).

11. Sudden death at Hawarden Church, when on a visit to Mr. and Mrs. Gladstone, of Dr. Benson, Archbishop of Canterbury, from failure of the heart's action.

12. Considerable interest was aroused by the announcement that a Chinaman, Sun Yat Sen, had been arrested in London and confined in the Chinese Legation. He was subsequently released on Lord Salisbury's application.

13. The Marquess of Dufferin and Ava presented his letters of recall to President Faure after having been ambassador to France for six years.

— A new chapel was dedicated at Cheltenham College without much official celebration, as the late Archbishop was to have performed the dedication ceremony.

15. The French Government, having decided that insufficient evidence was forthcoming to implicate Tynan in a dynamite conspiracy at the present time, and, further, that the offences of 1882 were covered by prescription, ordered his release from Boulogne gaol.

16. Funeral of the late Archbishop Benson in Canterbury Cathedral, being the first primate to be interred there since the Reformation.

21. Trafalgar Day was celebrated on the initiative of the Navy League by a handsome decoration of the Nelson monument in Trafalgar Square.

22. Bank Rate raised to 4 per cent.

24. Amid great rejoicings the Prince of Naples, Crown Prince of Italy, was married at Rome to the Princess Hélène of Montenegro.

26. Dr. Temple, Bishop of London, was appointed to the Primacy in succession to the late Archbishop Benson.

— Li Hung Chang appointed Minister of Foreign Affairs by the Emperor of China, this being the mark of an extraordinary revolution in the conduct of affairs in the Chinese Empire.

— Monsignor Bartolomeos, the *locum tenens* for the Armenian patriarch, narrowly escaped assassination.

31. Mr. Chamberlain was elected Rector of Glasgow University by a majority over his opponent, Mr. Birrell, Q.C.

— The Hamburg *Nachrichten* published a reply to the *Imperial Gazette*, which condemned the "revelations" of the former journal. These "revelations" were supposed to be the work of Prince Bismarck, and announced that, during the existence of the "Triple Alliance," Germany had entered into a collateral agreement with Russia.

Consols, highest, 110⅝; lowest, 107¾.

NOVEMBER.

1. Great demonstration by "Goldites" at New York in favour of the candidature of Mr. McKinley for the Presidency of the United States.

2. The Bishop of Peterborough, Dr. Mandell Creighton, was appointed Bishop of London in succession to Dr. Temple, who became Archbishop of Canterbury.

3. Commencement of the polling in the United States. The candidates being Mr. McKinley, Goldite and Republican, and Mr. Bryan, Silverite and Popocrat.

4. The results of the Presidential election, so far as known by telegraph, forecasted an overwhelming majority for Mr. McKinley.

— The Rev. the Hon. E. Carr Glyn, vicar of Kensington, was appointed to the Bishopric of Peterborough, vacant by the transfer of Dr. Creighton to the see of London.

9. The Prince of Wales celebrated his 55th birthday.

— Lord Mayor's Day. At the Guildhall Banquet Lord Salisbury declared the British Guiana-Venezuela difficulty had been solved by arrangement with the United States. The latter country to appoint two commissioners to confer with two British commissioners, the body of four to elect a fifth as president, and settle the matters in dispute.

10. Bye-election at Bradford. Capt. Hon. F. Greville (*C*), elected by a majority of 395 over Mr. Billson (*L*) and Mr. Keir-Hardie (*Lab*).

12. A detachment of troops, consisting of sixteen hundred officers and men, with munitions of war, embarked at Barcelona, for the Philippines.

— At the French Cabinet Council, M. Hanotaux, the Foreign Minister, said the Turkish ambassador had called upon him, and handed him a written statement of the measures which the Sultan had taken to fulfil his promises in regard to the Armenians.

14. Motor-carriages being no longer classed as traction engines, a trip was made to Brighton *via* Reigate from Northumberland Avenue.

23. H.R.H. the Prince of Wales left Paddington on a visit to the Duke and Duchess of Marlborough at Blenheim Palace.

— Trial of Lady Scott (Russell case) commenced at the Old Bailey.

28. Reassuring letter published from Earl Grey regarding the Chartered Co.'s territories.

Consols, highest, 111¼; lowest, 108⅜.
Bank Rate, 4 per cent.

Obituary, 1895–96.
